This data is compiled by business year, not by calendar year. The Percentage of listed buildings in Wales at risk applies to the entire Listed Building dataset, as at year-end.

Please note that Listed Buildings are normally assessed on a 5-year cycle, not annually i.e. of the 30,000 listed buildings in Wales, 6,000 are inspected annually. At the conclusion of the last cycle 9.15% of Listed Buildings were considered to be at-risk.
