Preferred contact details (email/phone/post)	Post
<u>Organisation (if applicable)</u>	

1. NDF Outcomes (chapter 3)

The NDF has proposed 11 Outcomes as an ambition of where we want to be in 20 years' time.

- Overall, to what extent do you agree or disagree the 11 Outcomes are a realistic vision for the NDF?

Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	Don't know	No opinion
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- To what extent do you agree with the 11 Outcomes as ambitions for the NDF?

Agree with all of them	Agree with most of them	Agree with some of them	Agree with none of them	Don't know	No opinion
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with any of the 11 Outcomes, please tell us why:

Plan/map allows such a large area of uplands for wind/solar industrialization – disagree with
Plan accepts significant landscape change for with these projects – disagree with
Plan doesn't allow (or consider) public opinion on wind/solar project proposals – and does not allow landscape objections – disagree with
Plan allows significant change to the Welsh landscape which is our most valuable asset – disagree with.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It is essential to ensure that all data is entered correctly and that the system is regularly updated.

3. The second part of the document outlines the various methods used to collect and analyze data.

4. These methods include both qualitative and quantitative approaches, each with its own strengths and weaknesses.

5. The third part of the document provides a detailed overview of the results of the study.

6. The findings indicate that there is a significant correlation between the variables studied.

7. This correlation suggests that the factors being studied are closely related and may influence each other.

8. The fourth part of the document discusses the implications of these findings for future research.

9. It is recommended that further studies be conducted to explore the relationship between the variables in more detail.

10. The final part of the document concludes with a summary of the key points and a statement of the author's conclusions.

11. The author expresses their appreciation for the support and assistance provided throughout the research process.

12. Finally, the document includes a list of references to the sources used in the study.

Spatial Strategy (policies 1 - 4)

The NDF **spatial strategy** is a guiding framework for where large-scale change and nationally important developments will be focused over the next 20 years.

- To what extent do you agree or disagree with the spatial strategy and key principles for development in...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	Don't know	No opinion
Urban areas (Policies 1, 2 & 3)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rural areas (Policy 4)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you have any comments on the spatial strategy or key principles for development in urban and rural areas, please tell us:

Policy allows too much development in rural area - uplands for wind/solar industrialization, and also accepts significant landscape change for with these projects.

Also, the above projects do not allow or consider public opinion on wind/solar project proposals – and does not allow landscape objections despite the Welsh landscape being unquestionably our most importance heritage assess.

7. Renewable Energy and District Heat Networks (policies 10-15)

- To what extent do you agree or disagree with the NDF's policies to lower carbon emissions in Wales using...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	Don't know	No opinion
Large scale wind and solar developments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
District heat networks	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with the NDF's approaches to green infrastructure, renewable energy or district heat networks, what alternative approaches should we consider helping Wales to enhance its biodiversity and transition to a low carbon economy?

Policy allows too much development in rural area - uplands for wind/solar industrialization, and also accepts significant landscape change for with these projects.

Focus on reducing what we already use in terms of energy/power, then promote self generating.

15. Further comments

- Are there any further comments that you would like to make on the NDF, or any alternative proposals you feel we should consider?

Need to recognise, protect, value what we already have in terms of assets and always consider what is best for Wales.
