Subject: industrial scale proposed development of wind and solar energy in mid Wales
Date: 17 October 2019 21:33:11

dear Sir

Russel George has informed me in his newsletter of these proposals and I would like to voice my concerns YET AGAIN over what will result in the destruction of our beautiful mid wales countryside. and there is no indication of how they will be joined to the national grid

The assembly was made aware of local residents utter opposition to these developments over 5 years ago when they were first introduced. How dare you now reintroduce these plans without any consultation with us

This is hardly a democratic decision when you are running roughshod over our opinions

I am bitterly disappointed in the way the WA behaves by ignoring the people it is voted to represent

Kath morrell
