4 5 Clybiau Plant Cymru Kids The Kids' Club Project	£3,690,236		08/11/2005 £5,732,432
After discussions with the Welsh Assembly Government and WEFO, it was agreed that Clybiau Ibid alongside the main Welsh Assembly Government childcare application so that CPCKC could childcare clubs. The proposed project complements the Welsh Assembly Government bid and is strategy to develop additional childcare places and support the sustainability of childcare gener the economic health of Wales. It will not duplicate the Welsh Assembly Government project. At this project and the Welsh Assembly Government project team will be established to ensure for experience. Informal consultations have already taken place. The overarching goal of The Kids' sustainable childcare sector which can grow to meet demand while maintaining quality. The profession which this project will contribute significantly, will allow for quality progression which will, in the analysis of more than 17,000 children aged 4-14. Most clubs are located in schools or registered with the Care Standards Inspectorate in Wales and meet the standards required by the children to attend and arrangements for delivery and collection of children is agreed between so clubs before school in breakfast clubs, after school, and during school holidays in holiday clubs nursery children who attend school either in the morning or afternoon and need care for the wild directly address general objectives set out in the Wales European Funding Office Programme Composer Measure 4.5. More affordable, sustainable childcare places will be created to support an increase in the labour market and in training courses. The Single Programming Document [SPD] outlines government policy to improve the opportunities for women to participate equally in the labour low wages and poverty; so childcare, education and training are too often unaffordable. For the childcare provision. And, for women entrepreneurs, start-up funding is lacking. The Kids' Clubs identified in the SPD under the measure: childcare initiatives, support for childcare entrepreneurs are access and learning, and trainin	focus on chills an integral pally which are formal system consultation. Clubs Project offessional infigure, attract phool childcar reommunity the Inspectora at firmal system complement as see in participals the Objective market. 5 9 Ceredigion County Council Ceredigion Fishing Port Facilities Enhancement	£87,750	57311	19/05/2006 £117,000				
1) To invest in facilities in Ceredigion fishing ports of Cardigan, Newquay, Aberaeron and Aberys improve services offered to them. 2) To bring about lasting improvements to the conditions in w safeguard gross sales of operators using these ports, all of whose boats are UK registered. 3) To fishermen operate on the quaysides.	hich catch is	landed and	I sold and hence help				
5 9 Coastal Scientific Ltd Machine for Testing Crab Quality	£200,110	56540	14/04/2005 £291,394				
This pilot project is to investigate the use of a device to ascertain meat quantity and quality in edible crab before they are landed, without the need to damage the crab in anyway. The equipment is to be tested on board a fishing vessel to determine if use of the technology will give an improved financial return. The device is intended to enable fishermen to sort their live catch and return poor quality crab to the sea where the animals can continue to mature, improve in quality and reproduce instead of being landed and wasted. The findings of the Pilot Project will be produced in a scientific report.							
5 9 Conwy County Borough Council Port Improvements, Conwy	£1,205,397	57211	28/10/2005 £1,607,196				
The priority purpose of this project is to provide investment to ensure the continuing survival an The industry has declined in recent years and suffers restrictions through poor infrastructure, ac overall harbour development scheme that will ensure that Conwy Quay can accommodate the intindustries and that both industries profit from the mutual benefits that will result.	cess and faci erests of bot	lities. 5 Q Llyn Fishermans Association Safety Equipment Upgrade for the Llyn Fishermen's	£38,420	54952	10/07/2003 £51,227				
The project proposes to upgrade the safety equipment of its members (79 life jackets and 44 rac requirements of the Maritime and Coastguard Agency (MCA). Part of the project will be to provid radio qualifications.							
5 9 Llyn Fishermans Association Development Officer and Admin support Llyn Fishermen's Association Phase 2	£125,350	57427	04/08/2006 £267,150				
The project is in harmony with the Welsh Assembly's initiatives aimed at supporting and indeed promoting the Welsh Fishing Industry. It also accords with the accompanying rationales, contained within the project plan enclosed and within Gwynedd Council's Economic Strategy L.A.P. It will seek to build on the work already done, which comprised of a network of Development Officers pan-Wales who individually and collectively seek to market, promote, enhance value, increase safety and augment the various aspects of the industry in Wales. The activity also provides the support that the Fishermen require in the face of continual change in legislation on the UK and European fronts- that directly impact on the industry.							
5 9 Myti Mussels Dock Improvements At Porth Penrhyn	£50,610	54872	02/06/2003 £144,600				
The aim of the project is to improve the quayside area of Porth Penrhyn. It will deliver a durable traffic, lighting for winter working, power and water supplies for boats and appropriate dockside CCTV. The project will improve the conditions under which fishery products are landed, handled increased operating efficiency and secure employment opportunities within 3 SME'S and will also of the companies.	safety equip and stored in	ment included in the port a	ding the installation of nd will therefore lead to				
Stackpole Quay Stackpole Quay, in the south west of Pembrokeshire, provides one of the safest havens along thi notorious for big tides and unpredictable sea conditions. The
5 9 South Wales Sea Fisheries	South and West Wales Lobster V Notching Programme	£252,612	55875	22/04/2005	£336,816

The purpose of the project is to return to the sea quantities of female lobster broodstock which would otherwise been harvested. In doing so thousands of eggs are saved from which more lobsters will hatch, themselves becoming future breeding lobsters and so on. The policy aims to kick - start" the processes under which fishermen take further voluntary action, and managers put in place statutory protection in order to maintain future lobster productivity - a situation which would not have itself occurred without financial assistance. Welsh Assembly Government | Hisheries & Aquaculture Single | Modernisation of the Fishing Fleet Fisheries & Aquaculture Small Grant Scheme Renewal and £8,750 06/02/2004 £25,000 The aim of the Fisheries and Aquaculture Small Grant Scheme is to enable fishing businesses and aquaculture enterprises to access grant funding for small projects up to a project value of £25,000. This particular project will target the needs of the fisheries sector. Welsh Assembly Government | Hisneries & Aquaculture Sindin Grant Solicity | Marketing of Fishery and Aquaculture Products Fisheries & Aquaculture Small Grant Scheme Processing and 55482 06/02/2004 £25,000 The aim of the Fisheries and Aquaculture Small Grant Scheme is to enable fishing businesses and aquaculture enterprises to access grant funding for small projects up to a project value of £25,000. This particular project will provide funding for processing and marketing. Welsh Assembly Government | Compensation Scheme for Burry Inlet Cockle Gatherers £169,037 54530 16/04/2003 £225,383 The aim of this project is to provide a compensation scheme that would compensate the cockle gatherers for loss of earnings, following the closure of the Burry Inlet cockle fishery, in July 2001, due to an outbreak of Diarrhetic Shellfish Poisoning (DSP). Holyhead Fishermen's Slipway £280,845 57272 5 9 Ynys Mon County Council 27/07/2007 £374,460 The scheme will provide new and improved facilities for landing and launching small fishing boats at Bol Sach. This will involve the widening and straightening of the existing boat slipway, together with the provision of excavated areas to accommodate boats by the side of the slipway. The scheme has been developed by the area's fishermen to meet needs identified by them over many years. The local fishermen's association has secured funding via Communities First to undertake a development study to plan and cost the scheme.

1	1	Arena Network	Sustainable environmental support for SME's in Newport	£75,600	54898	15/07/2003	£205,893

This programme will provide the driving force to encourage businesses to improve their environmental performance through a range of supported programmes which will provide opportunities to reduce their impacts on the environment by the application of innovative technologies. As a result, businesses will benefit from access to professional support and linkages to research institutions to develop products and redesign processes which can lead to potential businesses benefits to higher profitability, increased competitiveness and stronger growth. The work will be delivered through a Business Environment Co-ordinator who will provide the focal point and key contact between the businesses and providers of the support from all sources. This programme of work will extend the existing successful programmes of work within the Objective 1, Objective 2 and a number of unassisted areas supported by the Welsh Assembly Government, Welsh Development Agency and the Local Authorities where existing Co-ordinators were in Partnerships with the supporting Local Authorities.

1 | Arena Network | Green Dragon Environmental Management in Powys | £143,681 | 55889 | 19/07/2004 £320,790

This programme will provide the driving force to encourage businesses to improve their environmental performance through a range of supported programmes, which will provide opportunities to reduce their impacts on the environment by the application of innovative technologies. As a result, businesses will benefit from access to professional support and linkages to research institutions, to develop products and redesign processes which can lead to potential business benefits e.g. increased profitability, increased competitiveness and stronger growth. The work will be delivered through a Business Environment Co-ordinator who will provide the focal point and key contact between the businesses and the providers of the support from all sources. This programme of work will extend the existing successful Environmental Management System programmes of work within the Objective 1, Objective 2 and a number of unassisted areas supported by the Welsh Assembly Government, Welsh Development Agency and the Local Authorities where existing Co-ordinators work in partnerships with the supporting Local Authorities. One major objective will be to optimise the co-ordination of support for business from the key service providers maximising the benefits of assistance to businesses without any unnecessary duplication. This will, in addition, focus upon the Welsh Assembly Government objective of encouraging uptake of environmental management systems and the project will deliver the Green Dragon ® environmental management standard and ISO14001 /EMAS. A comprehensive range of consultancy support will be available both directly from the project and from other partner organisations to reduce the business impact on the environment. An existing Business Environmental Co-ordinator will be appointed to cover Powys. The benefits and objectives and targets in this bid cover only SMEs in the Objective 2 Powys area. The Business Environment Co-ordinator will raise awareness within business of environmental issues, provide advice and guidance through environmental assessments for reduction in impacts, access consultancy support, and encourage the adoption of an appropriate environmental management system. An outline job profile is attached.

1 1 Arena Network Environmental Innovation for a Sustainable Economy in Powys 53645 07/01/2003 £256,290

This programme will provide the driving force to encourage business to improve their environmental performance through a range of supported programmes providing opportunities to reduce their impacts on the environment by the application of innovative technologies. This will result in improved products and processes leading to potential business benefits of higher profitability and increased competitiveness. The programme will extend an existing Objective 1 project supported by the NAFW, WDA and the Local Authorities to this area of Wales. One major objective of the project will be to extend the services to Powys and to optimise the co-ordination of support for business from the key service providers maximising the benefits of assistance to businesses. The project will provide grant support for the acquisition of equipment to reduce environmental impact by addressing the issues of sustainable development.

Opportunity Wales is a partnership project to help make businesses benefit economically through the application of e-Commerce. The programme has been running in the Objective 1 area of Wales since April 2001 and has proved to be of valuable support to SME's. Research undertaken in April 2000 by NOP, signified a low take-up of e-Commerce in Wales, which remains as pertinent today. Poor take-up of e-Commerce and Internet application undermines the competitiveness of many SME's and retards the economic growth in the Objective 2 area. Opportunity Wales 11 builds on the work being undertaken in the Objective 1 area to expand the service into the Objective 2 area. The programme provides hands-on assistance through quality e-Commerce business advice and easily accessible implementation support facilitating the realisation of tangible e-Commerce benefits by SME's. The package of support will assist SME's to: i) Understand the benefits of e-Commerce. ii) Give advice on how to exploit the latest developments in technology, including broadband, for the benefit of their business. iii) Pro actively and confidently plan the introduction of appropriate e-Commerce within their business. iv) Implement solutions v) Access client aid. Opportunity Wales 11 will offer small and medium sized businesses a trained and independent e-Commerce Advisor to carry out two days of free support to deliver an e-Commerce review. Further subsidised implementation support is available to ensure the full benefits are realised by the businesses, as is client aid to purchase products and services, to enable the recommended e-Commerce strategy to come to life. An e-Commerce centre of excellence will be available to ensure up to the minute quality e-Commerce knowledge is transferred to both the Advisers and the businesses themselves. An e-Commerce Web Site (www.opportunitywales.co.uk) will provide a 24 hour on-line facility to aid learning and understanding of all aspects of e-Commerce. Dedicated content for the Objective 2 area will be available on the site. Provision of one to one support from a trained e-Commerce adviser will be a key delivery to SMEs in the project. To complement this, additional support mechanisms will be provided. These include awareness raising and marketing activities to engage businesses in the imperative to adopt e-Commerce. The Contact Centre will act as a professional client interface to assess needs and suggest next steps whilst the community portal provides information on appropriate support services, the range of assistance available and give further information on best practice and sources of advice. In pursuit of the aims and objectives of the programme, five principal elements to the Opportunity Wales 11 project will be delivered: a) Centre of Excellence b) SME Community Web site c) Trusted e-Commerce business advisers d) Contact Centre e) Client Aid The impact of the service and the consequent use of e-Commerce by the SMEs will be monitored via a 6 monthly benchmarking exercise.

3 1 Cardiff City Council Ruperra Square Environmental Improvements £86,000 53451 08/01/2003 £172,000 Environmental improvement works to be carried out in Ruperra Square to create an enhanced 'gateway' into Splott. The area of the project is approximately 0.21 hectares. The project will involve consultation with the local community, local ward members and local businesses. Surveys
and exhibitions will be carried out to determine local people's views and ideas on the proposals. Specific works will include: redesign of a traffic calming initiative at entrance to the square using materials to enhance the local environment - landscaping proposals in the square,
including planting of trees, and pedestrian access - new pavements to ease access around the square - re-alignment of road junction. 1 2 Cardiff City Council SME Financial Assistance Scheme £133,000 54714 17/06/2003 £940,419
The project aims to stimulate, strengthen and diversify the economy of Cardiff by encouraging the creation and safeguarding of jobs through the
relocation and creation of new businesses and supporting the expansion of indigenous businesses. The project proposes the provision of a financial assistance package to small and medium sized enterprises. The project has four components: Entrepreneurship Grant - provision of up to £5,000 to encourage new business growth · Technology Fund - to support high growth SME's · Environmental Improvement Grant - for industrial premises · Employment of a Business Development Officer and an Administrative Assistant to undertake administrative and technical assessments for the scheme. The project relates to the expected outcomes as detailed in the Cardiff Local Action Plan by providing a simple, unbureaucratic, small grants scheme for businesses. The project also targets high growth sector through the provision of a Technology Fund,
which is another target of the Local Action Plan. 1 3 Cardiff City Council Willowbrook Business Technology Units £330,000 54711 22/07/2003 £1,320,000
The project involves the development of 4 units in 2 blocks constructed to a standard suitable for high technology businesses on a 1.5 acre (0.49 hectare) unused vacant site adjacent to the existing Willowbrook Technology Units in Llandago Road, St. Mellons. The total floorspace proposed is 1030 square meters gross. There is a growing demand for quality modern units in Cardiff to accommodate the needs of high technology
businesses with a particular need to provide units in a size range of 200-300 square meters enabling businesses to expand and progress from incubator space. The unit will become part of the managed workshops portfolio of the Council benefiting from both business support assistance, mentoring and links via the Cardiff Business Technology Centre to increase economic spin off from higher education / university in Cardiff. The putcome of the project will be the operation of 1030 square meters of floorspace to accommodate up to 4 SME's employing up to 15 people.
Jasmine Enterprise Centre Community Regeneration Project £973,220 55194 23/07/2004 £1,946,441
The project involves the construction of a 1,138sqm community regeneration centre in the ward of Caerau which will house a unique and extensive range of agencies and services designed to address socio-economic deprivation and exclusion, increase the capacity of local people to create, co-ordinate and organise progressively, and to provide opportunities for individual and community improvement and growth for residents of Ely and Caerau. In addition to the building, the County Council owned site will provide in excess of 1,000sqm of car parking space 900m2 of landscaped gardens and established trees and shrubbery.
3 1 Cardiff City Council Grand Avenue Public Realm Environmental Improvements £184,166 55542 16/06/2004 £368,333
Grand Avenue is a principal thoroughfare through the heart of the Ely housing estate, and the Grand Avenue shopping parade is situated at a key gateway' location along this road. The project is aimed at improving the physical environment of the local shopping parade at Grand Avenue, through a selection of public realm environmental improvements. The overall condition of the parade is generally very poor which makes this
gateway' location visually unattractive and of limited commercial or community appeal. Cardiff Council have already committed £290,000 capital funding (2003-2004) for the improvement of the commercial shop frontages, located within the parade. This application is for a second phase of
environmental improvements focussing on the public realm. The principles of the project are derived from the outcome of consultation exercises
undertaken in November 2002 with the local community, local ward members and local businesses. However, further public consultation will be carried out to determine local people's views on the details of the project. 1.New paving to the existing pedestrianised footway to the front of the
shopping parade, incorporating ramped access to each doorway, public art paving and new drainage channels. 2.Reconstruct footways to the rear
and side of shops serving pedestrian access from adjoining housing areas. 3. Traffic management improvements, including the realignment of the roundabout and its associated road network serving the shopping parade, including pedestrian crossing points. 4. New pedestrian crossing points
with tactile paving. 5.New and replacement street lighting in line with improved pedestrian footways and road alignment. 6.Improvements to
existing parking bay serving the shopping parade, including realignment to make more efficient use of space and new loading bays. 7.Introducing soft landscaping to footway. 8.Enhanced litter bin provision. 9.Introduction of additional street furniture including, cycle stands and public art. 10.Address community safety concerns relating to pedestrian safety in the area. Although, as outlined above, this project includes
improvements to the highway, street lighting and pavements within the shopping parade, all works are over and above statutory provision and are for environmental improvement purposes only. The works would not be carried out as part of the Council's statutory requirements.
1 3 Cardiff City Council Splott Industrial Estate £224,135 55783 26/08/2004 £748,110
The aim of this project is to develop an existing industrial site in the disadvantaged ward of Splott, Cardiff, so that environmental improvements
are made that will promote energy efficiency and recycling in addition to making the site more attractive to new start and expanding SME's,
are made that will promote energy efficiency and recycling in addition to making the site more attractive to new start and expanding SME's, particularly in the manufacturing sector. the Domestic and Commercial Waste Management sector, is seen as a natural extension of the needs of the land regeneration industry in dealing with priority waste streams. uIn terms of new activities, the provision of a high quality reliable information service is proposed. This includes building and strengthening links with related organisation through Wales, the UK and Europe. Through this information service, this project will strive to assist stakeholders adopt a co-ordinated approach to waste minimisation, as well as raising the levels of awareness and understanding of waste issues. uThe project will look to disseminate this information through a number of channels, from new media and Internet systems, meetings, seminars and evening lectures through to dedicated mailshots of newsletters and journals. uThe project will develop inventories of industrial waste streams to initiate the basic structure and elements of an industrial waste exchange (i.e.reduce, reuse, recover and recycle) and complete a detailed technology Audit of the Industrial Waste Management Sector throughout the objective 2 region. uThis project will provide ongoing mentoring and assistance for the creation and development of new SMEs in Wales to recover value from waste materials through processing and value-added treatment to develop raw material for use by other industries. Essentially this will involve the Geoenvironmental Research centre (GRC) providing the R&D input that will be required to enable this process to take place. uSocial, environmental and economic sustainable development will form the core interest and focus of this project and the network. uThis proposal focuses on Objective 2. A complimentary Objective 1 proposal is currently being prepared.

Cardiff University EMC Testing for SMEs (Objective 2) £107,527 53890 07/07/2003 £240,069 An EMC (electromagnetic compatibility) unit will be set up primarily to support and assist manufacturing sector SMEs based in Cardiff. The new unit will provide the following EMC pre-compliance test facilities for conducted and radiated emissions and immunity testing of new electrical and electronic products and devices. The development of the Wolfson Centre's EMC activities is a logical expansion of its current activities within the field of magnetic and electromagnetic technology. The Centre has recently been awarded the status of 'Centre of Excellence for Technology and Industrial Collaboration' (CETIC) in a new programme managed by the WDA. The expansion of EMC services to SMEs is an aim outlined in the Centre's business plan. The award of CETIC status builds on the establishment of a successful, ERDF supported Industrial Magnetics Group (project duration 1998-2001) in which facilities and expertise in the field of magnetic/electromagnetic technology have been developed. The group has performed well in meeting its targets during the project and the project management skills required to run a small unit which can respond effectively to the needs of SMEs have been demonstrated. The proposed unit will comprise a Project Manager, Project officer, and partial technical and secretarial support, together with the following facilities and services: 1. Fully anechoic-screened test chamber plus two smaller screened chambers. 2. Test equipment suitable for conducted and radiated emissions immunity testing. 3. A technical information service to provide information in the area of EMC and to publicise the facilities by means of newsletters and seminars. The Wolfson Centre has recently augmented its range of magnetic measurement facilities including the installation of screened chambers described in point (1) above and the acquisition of some items of equipment suitable for use in point (2). These new facilities are available for use in setting up the proposed EMC unit. In order to set up and operate the unit, recruitment of a suitably qualified Project Officer and purchase of some additional items of instrumentation will be required. This application is made in response to the call in the Cardiff Local Action Plan for Objective 2, Key Action Plan Priority 1, Measure 1 "Support for Enterprise, Innovation and SME Development". This project is primarily targeted towards SMEs in the Electrical, Electronic, Instrument, Medical, Health, Telecoms, Automotive, Aerospace and other related manufacturing and service industries. Demonstration projects performed for one SME in the eligible wards will be but used as a case study for a technology demonstration to other SMEs. Where projects are pertinent only to a single SME, financial support will be sought for these projects (from programmes such as Help-Wales, WDA Technology Exploitation Programme, etc.) where appropriate. The total project costs will be £229,695 over a three-year period.

3 1 CBAT The Arts & Regeneration Agency Cardiff Community Arts & Regeneration Programme £98,030 56485 27/10/2004 £196,061

CBAT is committed to engaging residents, workers and communities in understanding and improving their local environment. Cardiff's Community Arts & Regeneration Programme consists of the following projects: Angelina Street To develop a public art project related to the re-development of Angelina Street is in response to social problems and multiple deprivations. Bute Street Works Responsible for the upgrading of Bute Street, Butetown, CBAT commissioned a team of artists to engage the local community in a programme of workshops that would lead to the integration of artworks along the improved Bute Street. Quaystones - Setting Out An artist was engaged by CBAT to redesign a disused and redundant piece of land in Cardiff Bay in collaboration with Butetown History and Arts Centre and the local community. The scheme includes six green oak posts, carved with poems relating to the seafaring history of Cardiff Bay. The scheme also includes 22 huge dock coping stones that once formed the walls of the Bute West Dock, tree planting and landscaping. Community participants on all projects were encouraged through multi-artform workshops to consider the history of their community. Two of the projects ran concurrent with the wider regeneration schemes to redevelop Bute Avenue and Angelina Street.

2 1 Centre for Alternative Technology Charity Ltd Wales Institute for Sustainable Education (WISE) £1,210,000 56541 23/12/2005 £5,889,306

WISE will create at the Centre for Alternative Technology a state-of-the-art complex for research and development, information transfer and business support.

1 1 Chapter (Cardiff) Limited Creative Pioneers £172,396 56545

The aim of the project was to expand the SME base in the region by developing entrepreneurship within the creative industries. The project provided specialist business support with a view to increasing entrepreneurial activity: this included advice on grants, marketing, export opportunities, production techniques, professional development. The project also developed the use of ICT; people had access to broadband, web streaming, wireless Internet, e-mail and video editing, among other technologies. The project developed networking opportunities, including those linked to exports; individuals participated in weekend events and monthly meetings, bringing together a variety of participants along with representatives of the HE sector and established creative industries SMEs. The project encouraged a culture of innovation; individuals were enabled to take risks in trying new production techniques and also had the opportunity to see the diverse work of other entrepreneurs.

09/11/2004 £384,900

1 3 Chapter (Cardiff) Limited Chapter Workspaces III £19,168 53445 06/02/2003 £64,000

Chapter provides managed workspaces for the cultural industries in Cardiff. This project provides for:- 1) A fire escape and other necessary improvements to re-open the first-floor west wing of Chapter, enabling the conversion of 156 sq m of currently redundant spaces into five secure, managed work spaces for SMEs, located within a complex offering business advice and support. 2) The creation of 24 sq m of accessible toilet facilities on the same floor, to enable workers with disabilities to access these and other first-floor work spaces and improved accessibility for parents with young children.

3 | Charter Housing Association | Stow Hill Access, Resource & Enterprise (SHARE) Centre | £329,265 | 55916 | 20/09/2005 | £681,101

The project will renovate a building for use by the Stow Hill community. It will provide an important resource in both facilities and information that is currently unavailable in the area. This lack of facilities hold back community groups in developing innovative projects that address gaps in service provision. The building comprises of the ground and lower ground floor of 88 Stow Hill. The building has a previous history of a 'Family Centre' and resource centre for lone parents and families in need of support but this ceased 5 years ago. The building provides 3 rooms, a large hall, an open informal area, kitchen, toilets, storage and an open outside space which links with a park to the rear. It is proposed that the building be renovated to provide the following accommodation and uses: · Two multi purpose meeting rooms to be used for small training sessions, group meetings, creche or playgroups and surgeries and information sessions. · Cyber & Positive Images Café with informal open space. · Kitchen to service the café · Main Hall to provide an important asset for local groups wishing to carry out a variety of activities. · IT suite. This room will enable IT training to be carried out at the centre along with acting as an important facility to local groups and organisations who do not have access to such equipment. · Office space to provide a base for staff operating in the centre. · Toilets · Storage - four large storage cupboard will be provided to enable equipment for specific users to be stored to ensure that rooms are used to their full potential. A Centre Manager will be employed to oversee the running of the centre and staff but also to promote the project with local agencies who provide services in the area and to individuals in the community. A part time volunteer co-ordinator / business advisor will be employed to enable the centre to be available throughout the day and at weekends to maximise use of the centre.

3 1 Computers in the Community Community Regeneration IT Programme 1 £70,875 53480 10/01/2003 £161,214

This project is aimed at those disadvantaged groups in Objective 2 wards, as above, and indirectly at individuals in these wards to improve access to IT and as a result capability to capacity build, helping themselves and indirectly their community. The project involves the collection, recycling, refurbishing of obsolete computers and the redistribution and support to those most disadvantaged in the local communities. The project works with Business in the Community (BITC), community groups, charities, residents association's, voluntary organisations to ensure strengthening and capacity building. The project will involve the partnership of private and public sector companies who will donate their obsolete equipment. The programme will be further enhanced by the support of an online and mobile Engineer and volunteer trainers.

2 | 1 | Dyfi Mountain Biking Ltd | Dyfi Epic Cycle Routes (Phase 1) | £41,543 | 55901 | 03/06/2004 £138,383

The Dyfi Epic Cycle Routes will be spectacular way-marked off-road bike rides in the Dyfi Forest North East of Machynlleth, incorporating a series of looped routes to suit all abilities above beginner level and taking riders up to the most challenging levels available. The routes will combine half specially built 'single track' and half based on existing forest trails.
1 1 Earthfall The Culture and Business Project £29,100 53904 08/01/2003 £65,600 The Culture and Business Project is a 12 month business development project within a key growth sector of the Cardiff, Welsh and European economies. This project will: carry out research into new opportunities and potential for the cultural industries in Cardiff; advise a network of local companies on the results of that research; support the development of innovative production solutions and working practises; assist in local
companies to maximise their potential. The culture sector is characterised by a large number of small companies, which engage in inter-trading to deliver projects. Sectoral success is dependent on the development of clusters, strong networks, collaborative working practises and the constant transfer of skills and knowledge along the supply chain. This creates business to business interdependency. This project has been designed specifically to support development and growth within the framework of this sectoral dynamic. The Culture and Business Project will build on existing provision to enable a network of companies within the cultural sector in Cardiff to expand and diversify and achieve sustainable
success. The project has been development as the result of an extensive process of consultation and discussion among a range of Cardiff producers and distributors and is designed to deliver an integrated package of support and advice to address collective development needs and fill collectively defined gaps in current provision. This project will deliver: · Marketing analysis and customer profiling · Identification of market opportunities · Identification of local enterprise and opportunities for the collectivisation of enterprise · Identification of production development opportunities and the creation of new and enhanced local supply chains · Identification of enhanced export opportunities and the potential for
transnational partnerships · Identification of new forms of cross-sectoral collaboration and multi-media product development The project will advise beneficiaries on how to take advantage of the new opportunities identified, and how to maximise the impact of entrepreneurial solutions of achieving sustainable growth. The Culture and Business Project will support: · The development of business to business networking and the institutionalisation of network practises · Development of a cluster of high growth potential companies · Knowledge transfer and the effective sharing of expertise · Access to international markets and increase exports This will enable network members to: · Develop a strong local supply
chain · Achieve most cost effective solutions · Expand and diversify product · Develop innovative practice · Achieve sustainable growth 2
The Severn Natural Assets Project covered three elements contributing to the health and wealth of the river and its local inhabitants: 1.Reversing acidification of feeder streams to the River Severn 2. Salmon rearing and restocking 3. Sustainable management and habitat enhancement in the Severn Valley Corridor.
2 1 Environment Agency Midlands Severn Natural Assets Project Phase 2 SNAPP2 £331,645 56439 09/09/2004 £740,445
This project focuses on the upper reaches of the River Severn and River Vyrnwy, their tributaries and associated wetland habitats. The project aims to enhance these natural assets; improving water quality and hence fish stocks and fisheries; integrating wetland habitat enhancements with supporting rural tourism especially countryside activities such as angling, bird watching and walking, thereby boosting the local economy.
2 1 Festival of the Countryside WILD WATCH IN POWYS £395,107 53895 07/01/2003 £1,156,382
Wild Watch in Powys is a sustainable tourism project. It will provide visitors to Powys with new opportunities to see, enjoy and learn about a range of wildlife by visiting a number of specified and monitored wildlife watching centres. The project will support this activity through investment in: Improve access for all at all sites where logistically possible including facilities for disabled visitors, creation of new trails
complementing existing facilities, creation of new trails on farms and in local communities; adding value to the customer experience where
appropriate through new activities - open days for children, for example. Provision of new and improved interpretation (boards, guided walks, open days, for example) at all sites. Training of site staff in planning and organising events and activities, customer care; interpretation skills; safety; sustainable operating practices to raise the standards and skills for interpretation, site management and customer enjoyment and
satisfaction. Extensive marketing of the sites and events, an events programme, development and marketing of a website, entertaining visiting journalists, production of booklets, videos and other merchandise, development of the Tourism to Conservation Scheme. Monitoring of the project as a whole, customer satisfaction surveys; assessments of sites; independent wildlife impact assessments. To co-ordinate this project a
Project Officer will be appointed; a Partnership Group (all partners representing sites, funders, other public, tourism and conservation bodies) will oversee the strategic development, co-ordination and management of the project.
1 2 Finance Wales PLC Objective 2 Finance Wales Investment Funds £8,243,550 54626 20/11/2003 £23,553,000 The Objective 2 Finance Wales Investment project ("The Project") will provide affordable risk capital not otherwise available, targeted at various groups of SMEs, to complement existing sources of finance. Clients of the funds will also be assisted by appropriate management support programmes. Loans will be provided to viable SMEs located in the Objective 2 Programme Area that have not been able to find appropriate finance elsewhere and loans will be provided via Local Investment Funds (£10,000) and investments on a regional basis (over £10,000). Finance
Wales will secure, through a public procurement exercise, the private sector finance and professional fund management for the project. The Funds will be accessible by SMEs located in the Objective 2 Area. Equity will be provided to viable SMEs located in the Objective 2 programme areas that have not been able to find appropriate finance elsewhere. The Loan, Mezzanine and Equity Project includes the following indicative elements for the Objective 2 area: Small Loan Fund Phase II £2.760m Micro Fund £5.120m Start up Fund £1.404m Renewable Energy £1.944m
Spinout £2.225m Technology Application and Business Succession Fund £3.600m Seedcorn, Growth & Premium Fund £6.500m 1 2 Finance Wales PLC Xenos Phase 1 Interim (Obj 2) £25,152 56493 08/11/2004 £75,465
The Xenos Business Angel Network is a business introduction service that matches private investors with companies that require growth funding in return for an equity share in their businesses. The aim of the project is to provide specialist support targeted at increasing private sector equity investment and facilitating more opportunities for SMEs to access high-calibre individuals who can provide management guidance and advice. The project is unique in that it addresses a market failure in the business support market that can't be served through other mediums of support. Because of these multiple benefits, Xenos also aspires to actively change the attitudes of Welsh SMEs so that this type of equity
investment is seen as more attractive and is increasingly utilised. This finance is vitally important for Wales and the Objective 2 region, to succeed in producing robust-growth businesses.
1 2 Finance Wales PLC Small Loan Fund Phase 1 (Interim) Obj 2 £136,995 56494 15/10/2004 £411,025 The project provides affordable loan finance to SMEs, not otherwise available, targeted at various groups of SMEs to complement existing
sources of funding. Loans are provided to viable SMEs located in the Objective 2 Programme area, that have not been able to find appropriate finance elsewhere. By so doing, the Project is giving individuals and firms opportunities that would not otherwise have been available to them, providing confidence to aspiring entrepreneurs and playing a part in changing business culture and expectations. This, in turn, leads to more jobs and higher incomes. Clients of the funds are also required to make use of appropriate management support programmes.
3 Finance Wales PLC Community Loan Fund Phase I £33,000 56662 08/11/2004 £66,000 In line with the main thrust of Priority 3 of the SPD, the project provides loans to support a wide variety of not-for-profit enterprises in the social
economy across Wales, that have not been able to secure funding from elsewhere and helps bridge the gap in financial support for a growing social economy. The aim of the project is to raise economic activity within disadvantaged communities and contribute to wealth creations. The loans encourage community enterprises to become less grant dependent and more self-sufficient, by allowing them to plan for the future. Many community/social enterprises have difficulty in obtaining funding from traditional sources, due to lack of financial track records, or the ability to provide security for a loan, especially if they are based within a disadvantaged community. The project allows community/social enterprises to
build up track records that will allow them to access a wider range of funding from the private sector in the longer term. The project has assisted local communities to establish and develop social enterprises to specifically address the local needs of the community.
1 2 Finance Wales PLC Xenos Business Angels - The Untapped Potential (Objective £36,167 56925 20/02/2006 £108,510
The Xenos Business Angel Network is a business introduction service that matches private investors with companies that require growth funding in return for an equity share in their businesses. The aim of the Network is to provide specialist support targeted at increasing private sector equity investment and facilitating more opportunities for SME's to access high-calibre individuals who can provide management guidance and advice. The Network is unique in that it addresses a market failure in the business support market that can not be served through other mediums of support. This project aims to raise productivity and the value of their output and encourage development of new firms through introducing business angels to the SME's and also raising awareness of the value and benefits of equity investments by Angels and to complement work to be undertaken by the proposed pre-investment support programme to encourage investor ready SME's. Specifically the Xenos Network aims and objective are to: Assist existing SME's through a culture change that will lead to improving business standards Improve SME understanding of

the equity market an how to access it Increase the level of co-operation and joint ventures Improve the flow of finance to SME's Upgrade the
the equity market an how to access it Increase the level of co-operation and joint ventures Improve the flow of finance to SME's Upgrade the skills and knowledge base in SME's. I venture Wales PLC Investment Ready SMEs (Pre-Investment Support) £21,964 56929 16/12/2005 £65,902
A suite of projects which will be free of charge to the user and designed to attract more visitors to these venues, in order to boost visitor spend and increase duration of stay in Powys. To improve the attraction of these areas as a tourist destination in order to generate economic, and tourist benefits to Powys. These improvements will generate a sense of welcome to rural areas and attractions. This sense of welcome will generate a greater degree of visitor relaxation, enjoyment and a sense of well being thus they will likely be more disposed to purchasing local products, goods and services. Professional expertise of Forest Enterprise and the project partners will be deployed to design and implement these facilities to improve bio-diversity, have positive environmental impact and use wherever possible, locally produced environmentally sustainable goods and services. e.g. Llanidlose and hinterland farms, bed and breakfast, hotels and restaurants. Also opportunities will be generated for activity holidays, ornithological, botanical and wildlife safaris. 2 2 Glasu Energy for Sustainable Communities (ESC) £149,999 57568 15/11/2007 £301,568
Llanidloes Task Force - Enhancing the Tourism Product Offer £94,500 57298 09/03/2006 £215,000 The project will ensure that tourism SMEs in the Llanidloes area can compete effectively with other areas of Wales by providing a focused and seamless marketing and sales resource in response to the changing needs of the market place as a result of the changing customer demands. The project will integrate local marketing activity, from the provision of specific tourist information and aftercare print relating to walking, cycling, sailing, fishing and other outdoor activities, heritage and culture, accommodation and food and drink. The project will also support marketing campaigns and new media activity.
1 Mid Wales Energy Agency Greener Homes & Buildings - Group marketing project £233,832 56671 13/04/2005 £522,064 The Greener Homes and Building Marketing project aims to promote the Powys sustainable building sector. In total there are 30 companies involved in the supply of materials and services. The project will include the following activities: · Establish eco cluster for the sustainable building sector in Powys to encourage co-operation and sharing of market intelligence · Establish the Greener Homes and Building flagship event annually at the Royal Welsh Show ground will give practical information to consumers and the trade on sustainable approaches to the design, construction, refurbishment and DIY of homes and buildings. · Organise group exhibitions at key UK consumer events · Publicise the Powys sustainable building sector to the UK and European markets (architects, builders, contractors, surveyors, renewable energy equipment and services suppliers)
2 Mid Wales Energy Agency Energy for Sustainable Communities £233,753 55775 03/06/2004 £583,882 Mid Wales Energy Agency Ltd, working with like-minded bodies and community groups in Powys, will implement community initiated renewable energy systems through provision of advice, support and capital grants. Utilising personnel and resources, Mid Wales Energy Agency Ltd will:- Meet existing demand, and seek out opportunities that are led by and benefit the communities involved, for appropriately sized renewable energy schemes. Nurture community renewable energy projects during their development. Provide advice and information on sources of technical financial and in-kind assistance, etc. Work with existing support (e.g. Renewable Energy Advice Link, Wales) to advise on renewable energy and energy efficient measures. Assist with statutory procedures, e.g. planning permission; and Give other support to enable completion of community based RE schemes. Renewable energy technologies supported will be solar-electric, hydro and wind based and solar-thermal systems innovative wood-fuel systems and those embracing CHP and anaerobic digestion with renewables (e.g. wood-chip or slurry). Energy efficiency measures will be included, where they are part of a community renewable energy scheme being supported by this project. This can include insulation (including comparable innovative technologies, e.g. sheep-wool and hemp), energy efficient lighting, etc. 2 Mid Wales Energy Agency Community Renewable Energy Developments - Extra £136,675 55545 02/09/2004 £371,598 Mid Wales Energy Agency currently runs an Objective 2 fund in Powys to support appropriately - scaled renewable energy projects. Recent
interest and applications to the fund have shown that over the term of the project the current fund will not be sufficient. This application is to draw down more funds, with the particular aim to support a solar-electric system at Bronllys Hospital (Powys Health Care Trust). The funding wil support an installation of around 60kWh. This will contribute towards the hospital's base electricity requirements, Powys' commitment to sustainable development and move significantly forwards to achieve its Renewable Energy Partnership targets, reducing fossil fuel use and carbon dioxide emissions.
2 Mid Wales Energy Agency Community Renewable Energy Developments £219,200 53616 10/01/2003 £781,116 The proposal is to establish a delegated grant fund for small-scale, community owned and operated renewable energy schemes. Officers would be appointed with responsibility for seeking out opportunities, nurturing schemes during their development stages, finding other sources of financial and in-kind assistance, advising on the best utilisation of the energy produced (including where appropriate best prices in the market-place) and assisting with any statutory consents procedures. It would rollout the successes and the important lessons learnt from the "Encore" project of the Dyfi Eco Valley Partnership (project applicants, Powys CC). The grants would be offered to projects in the field of solar electric, non-domestic solar water heating, innovative wood fuel, solar space heating or other biomass heating or small-scale CHP, anaerobic digestion, heat pumps, small-scale wind, and hydro. It is anticipated that this would be the first phase of a project that would continue to 2006. 1 1 Mid Wales Manufacturing MANUFACTURING NETWORKS Acquiring and sharing £71,783 54818 17/07/2003 £160,723
The aim of the project is to develop the profitability of manufacturing SME's to encourage their growth. Opportunity exists for significant improvement in business practice by the sharing of information between SME's and the development of local suppliers and services to combat the negative aspects of Powys's rural location. The project will employ one networking officer who will facilitate regular and structured meetings between employers / employees within SME's who share similar responsibilities coupled with 'experts' presentations on best practice, relevant legislation and 'market information'. Networking Groups will be established across the following disciplines: IT, purchasing, finance, production, distribution and marketing. The anticipated areas for these groups are: Newtown / Welshpool, Llandrindod Wells, and Machynlleth. MWMG will act as facilitator providing information on best practice, legislation, relevant business issue and generally prompting an exchange of information

and experience between participating SME's. As the network groups develop the time, venu determined by the participating SME's. MWMG will then source requested information, advindividual SME's outside the meeting forum where appropriate. MWMG will act as a conduit on the needs and opportunities identified in the networking groups.	ice and 'expert' ir	put for foll	owing meetings or to
2 1 Ministry of Defence (Defence Epynt Way Infrastructure	£27,483	57310	04/09/2006 £70,289
The Epynt Way is being established as a Permissive Bridle Path on land owned by the Minis dedicated officer in close consultation with representatives of user groups. A total of approavailable to the public by Autumn 2005. This project has aroused great interest amongst real major addition to the attractions of this part of mid Wales. However the basic track lacks most adventurous users. It is located in a wilderness area with poor access, little shelter, a have particular access requirements that are best met by provision of 5 special receptor and Irails. These consist of unloading areas for horseboxes/lorries together with corrals and she will enable the creation of circular routes and links with other recreational trails. Interpreta archaeological riches of the area. young people in assessing their transport needs for training and employment and in developing appropriate schemes), and the extension of eligibility in schemes to cover work journeys. In addition, Community Transport creates employment and training opportunities. Community Transport schemes employ a substantial number of people, (At the present time 16 full-time and 17 part-time jobs in Powys), and high quality training is provided through the Training Agency. There is increasing emphasis on income generation through contracts and S.L.A.'s. Fourthly, the project will develop a partnership approach. It will support the partnership of organisations on the Community Forum, but beyond this it will develop partnership working. It will support the Transport, Health and Wellbeing Strategy in its attempts to co-ordinate approaches to community transport provision. The project will also develop partnership around specific initiatives, such as developing core-funding streams for community transport schemes, and car sharing initiatives for local communities. The project will fund development officer time, (27 hours Objective 2) administrative support, publicity/promotion and associated office accommodation and consumable costs. Powys Association for Regeneration Seed Corn Fund £189,600 53624 09/01/2003 £432,228 Voluntary Organisations To provide a regeneration 'seed corn' grant fund to Powys based voluntary organisations and community groups, to empower them to partake and contribute to social and economic community regeneration. Priority will be given to small groups, with grants of up to 90% and to a maximum of £3000. Funding will be given to projects, which give evidence of sustainability and also address the needs of the socially excluded and communities of interest. This project complements the WDA grant scheme, e.g. the Community Regeneration Tool Kit (which offers a programme of support for the sustainable economic development of towns in rural Powys). Examples of projects that could be included under this scheme include: environmental activities, support for social economy initiatives, development of revenue generating community owned assets and links to strategic development such as ICT and Community Transport. Powys Association for 53678 09/01/2003 £67,845 Powys Community Transport Project £27,139 Voluntary Organisations This is a partnership application led by PAVO, with the Community Transport (CT) Steering Groups in Llanidoes and Llanwrtyd Wells, to fund two part-time co-ordinators, who will work with these newly formed Steering Groups to develop and manage appropriate CT Schemes, to meet the identified transport needs of the two communities. REACH (Objective 2) Promoting Participation and Supporting £405,105 Powys Association for 54309 09/01/2003 £853,391 Voluntary Organisations Enterprise The aim of the project is to develop the social economy in Powys. Opportunities exist for social economic activity in rural communities. REACH will exploit these opportunities. This it will do by building on networks of community organisations. PAVO has established such 14 networks. Most of these networks are informal in nature; meetings in order to discuss issues or share information. Networks include the Recycling Forum, Village Halls Forum, Powys Social Economy Forum and the ICT Forum. Each of these has an important part to play in the support of local enterprise. The project aims to employ four development officers in the Objective 2 area, whose role it will be: u To support and advise social economy activity. u To provide regular briefings on issues of interest to the social economy. u To develop partnerships with Business Connect and other advisory services. u To publicise the work of networks and encourage greater involvement. u To cultivate links between businesses in the social economy and other sectors. u To encourage the sharing of good practice. Development Officers will be supported by administration and finance time. The project will include a "Kick-Start" Fund of a maximum of £500 per project supported. The project will contribute to the development of a range of social economic activity involving recycling groups, social enterprises and voluntary service provision. It will assist effective and co-ordinated working between businesses in the social economy and contribute to stemming the decline in rural services. It has the potential to reach deep into the rural economy and make a real difference to the well being of the rural community. CELF CELTICA ARTS Powys County Council £43,500 53870 17/01/2003 £101.000 CELF CELTICA ARTS WILL BE SET UP AS A DIVISION OF CELTICA. THE MAIN PURPOSE IS TO CREATE A CULTURAL OFFICER'S POST WITH THE REMIT TO DELIVER ON THE FOLLOWING KEY OBJECTIVES. TO ESTABLISH A COMMERCIAL APPROACH TO CULTURAL TOURISM TO ESTABLISH HIGH PROFILE EVENTS AT CELTICA COVERING ARTS CULTURE AND CUISINE. TO ESTABLISH AN OPEN AIR THEATRE FOR USE IN THE COMMUNITY TO DEVELOP AN ENTERTAINMENT AGENCY WHICH WILL USE LOCAL TALENT AS A MEANS OF DELIVERING CULTURE AND THUS REDUCING ECONOMIC LEAKAGE AND INTRODUCE FRESH INCOME INTO THE RURAL ECONOMY. TO ESTABLISH A SELF-FINANCING DIVISION. Powys County Council Integrated Promotional Activity £167,414 53685 07/01/2003 £620,500 This innovative project will enable tourism SME's in Powys to fully benefit from the development of the Wales Tourist Board's Destination Management system and marketing campaigns for both the domestic and overseas by the provision of hardware, software and network linkages, to allow access to the new national interactive website. Only four of the ten tourist information centres managed by Powys County Council are currently on the Powys network. The project will ensure the inclusion of key centres such as Newtown, Llandrindod Wells, Builth and Llanidloes. It will ensure that Powys can compete effectively with other areas of Wales by providing a focused, and seamless marketing and sales resource in response to the changing needs of visitors. Customer demand for information and tourist services is changing as information is sought electronically as well as in the form of traditional hard copy. The project will develop the electronic information facilities available to visitors, backed up by general and niche market print. It will also provide a vehicle through which the private sector can advertise their tourism products to wider markets, as well as developing new marketing activities such as direct mailshots, increased media activity etc. targeted at recovering market share following the effects of foot and mouth disease. The project will integrate local marketing activity, by co-ordinating tourist information and niche market print relating to walking, cycling, gardens and food and drink. The project will enable the Council to continue to support national marketing campaigns and new media activity by contributing directly through the production of 150,00 copies of the Mid Wales Lakes and Mountains Guide and in support of co-ordinated media advertising and promotion at tourism trade and consumer shows. The main focus for the promotion of Powys will be through the Mid Wales Lakes and Mountains Campaign, which is one of the twelve marketing areas of Wales identified by the Wales Tourist Board. The Mid Wales Lakes and Mountains marketing area is coterminous with the administrative area of Powys, and is marketed through the UK Co-ordinated Marketing Group in domestic markets and through the TRAMOR group for overseas marketing activity. Both TRAMOR and the UK Co-ordinated marketing groups are partnerships between the Wales Tourist Board, the Regional Tourism Companies and Local Authorities. This ensures compatibility with regional and national strategies and ensures that there is no duplication of marketing effort. Powys County Council Powys Food Links (Objective 2 area) £106,460 53671 17/01/2003 £237,850 1 Powys Food Links will: 1. Provide a central resource for the acquisition and dissemination of information to food producers and consumers and provide a sign-posting service for producers seeking advice and assistance. 2. Provide advice and administrative support for local initiatives such as farmers' markets, local food processing etc. 3. Develop local and wider markets and supply chains through producer co-operation, promotion, branding and marketing of Powys products. The project will create 3 FTE posts: two full-time project officers (points 1 & 2 above) and a full-time equivalent marketing officer (point 3) Powys County Council Coed Cymru - Powys £166,920 53668 07/01/2003 £380,621 1 The project will act to increase the cohesion, interaction and diversification within the native hardwood sourcing, processing and manufacturing sectors in the Objective 2 area of Powys. It will strive to strengthen supply chains and foster working relationships between compatible SME's and where feasible, encourage joint ventures and clustering. Concurrently, it will bolster the supply of the required raw material by the provision of a free management and marketing service to owners of economically marginal native woodlands. This will be done under the auspices of the Forest Stewardship Council (FSC) which accredits environmentally appropriate, socially beneficial and economically viable woodland management. Delivery will be through a team of 1 Project Manager and 2.4 woodland managers/technical advisors, based in two offices, who will co-ordinate hardwood timber flow with the contractor base and the markets External Face Lift & Refurbishment to the Ystradgynlais 3 55400 Powys County Council £69,600 26/11/2003 £240,010 Enterprise Workshops Background: Powys County Council are the owners of an ex-advanced built factory in Ystradgynlais. The factory floor area is 2884 sq metres and in 1985 the property was converted into starter units by subdividing the internal area of the building into individual workspaces. These workspaces are rented on licence on easy in easy out terms. Because of the age of the building i.e. pre 1960 the exterior brick work is in need of major face lift. The Project a) Complete face-lift and refurbishment of the exterior to the Ystradgynlais Enterprise Workshops. The scope of the works includes the re-roofing and cladding of this 1960's factory building thus creating a modern prestigious looking building enabling the attraction of a broad spectrum of SME clients. b) The Workshops when this work is undertaken, will enhance the economic well being of the Ystradgynlais Ward area by creating a more welcoming building for the SME's to undertake their business and will also offer a far more modern attractive letting proposition thus leading to quality job creation. 07/11/2003 £525,847 4 1 Powys County Council Powys Partnership Technical Assistance Objective 2 £262,923 55182

Powys County Council will provide a Secretariat to the Partnership; support potential applicants to develop projects, in liason with WEFO; publicise the programme in the area; liase with Regional Partnerships to discuss projects development and assessment; ensure project assessment procedures are adhered to, that all sectors are involved in the process and that propriety is maintained at all times; keep full records of all project assessment meetings and procedures; prvide information to WEFO and to Partnerships in the agreed format on projects considered for support by the Local Partnership. 1 2 Powys County Council Powys Business Development Grant £405,625 54986 15/09/2003 £2,813,833 The Powys Business Development Grant is a capital grant scheme designed to provide assistance for business start-up and for the expansion of existing businesses. The grant will be available to eligible businesses located within the county of Powys, or wishing to locate/relocate within the county. The grant will be administered by Powys County Council and delivered through four Business Centres at Welshpool, Llandrindod Wells, Brecon and Ystradgynlais in close liaison with the Business Connect Gateway and New Business Starts Programme. Applicants will be given access to the full range of business advisory services. In addition the Council will allocate 50% of the time of a Business Information Support Officer, in each of the centres, plus 1/8th of a Manager's time per centre (2½ FTE posts in total). To assist and advise applicants, and will also contract business/financial consultants to advise applicants and carry out the follow-up monitoring of all private sector projects, supported at six months post completion of individual grant projects. A grants monitoring officer/adviser (1FTE post) will carry out monitoring visits, to ensure that all grants project comply with conditions of grant and assess client's future needs. There will be two levels of grant: Start-up - up to 50% of project costs to a maximum of £2,500 Expansion up to 30% of project costs up to a maximum of £10,000. Powys County Council Community Tourism Capital Grant Scheme £199,652 54590 27/02/2003 £505,754 The project is a delegated capital grant scheme to support small scale tourism development schemes at the community level. The grant would offer up to 75% of the eligible cost for any one scheme to a maximum of £10,000. The grant scheme would be competitive and would be open to the Local Authority, Town and Community Councils, Community Enterprises, Tourist Associations and the voluntary sector. The following are examples of the type of schemes which could be eligible for support under this grant:- * Tourist Information Points both internal and external * Interpretation Boards and branded waymarking * Small scale tourism/environmental improvement with associated interpretation * Development of small scale heritage sites with interpretation and information * Integrated footpath development and improvement * Integrated bridleway development and improvement * Integrated cycle route development and improvement * Provision of secure cycle storage * Pedestrian fingerposts. £710,517 57479 24/08/2006 £1,583,082 2 1 Powys County Council Llandrindod Wells Townscape Heritage Initiative The major aim of this project is to act as a catalyst to the town's regeneration plan. By creating an environment that looks attractive it is hoped that additional retail and tourism business will be attracted to the town centre, generating additional revenue and increased employment. Money will be circulated in the local economy to local building companies to renovate old buildings. This work will increase the skill level of local contractors giving them additional opportunities outside the immediate Llandrindod wells area. 1 3 Powys County Council Caersws Village Workshops, Demolition and New Build £207,946 56934 18/10/2006 £831.786 The Project aims to provide high quality, village type starter workshops, by replacing the existing buildings with new class 1 type accommodation thus encouraging the SME Businesses to develop their business potential in the village and surrounding area of Caersws. It is expected that the outcomes of the project should relate to the Powys Local and Regional Action Plan. Against these it will contribute to the first two activity targets (namely sq. meters of premises built, and second number of sq. metres built to a specified environmental performance). It also relates to the final result (namely: - number of Jobs accommodated). The workshops should house upwards of twenty full time equivalent jobs, with a medium, to long-term aim of a contribution to the GDP per head level of the area. More specifically, the application seeks to contribute towards the objectives laid out under Priority 1 Measure 3 of the Regional Action Plan - the provision of sites and premises for SME and potential start up Powys Zero Waste Limited Powys High Diversion £832,063 56824 18/04/2006 £1,857,877 Powys Zero Waste seeks to establish a geographically specific delegated grant scheme that will enable Powys-based voluntary, community and not-for-profits organisations to undertake time-limited projects that will: Promote sustainable waste management methodologies within effective business practice. Further the development of Powys as an exemplar in the high diversion of waste from landfill. The project will require the recruitment of five part-time staff, two of whom will be home-based in order that the geographic spread of Powys can be covered efficiently without undue travelling costs. All projects to be supported by this scheme will be time-limited, and intended to provide the necessary information to enable the preparation of specifications for future developments and/or the resourcing of management contracts to be subject of competitive tendering. It is intended that this will provide a practical route to ensuring that projects demonstrate their intention to becoming fully sustainable within the wider commercial community. 07/01/2003 £182,700 Princes Trust Cymru The Prince's Trust - Cymru Enterprise Tasters £60,900 53655 The project will aim to assist the development of new Small, Medium Enterprises in individuals between the ages of 18-30. The target group will be from the Powys Area and will include the disadvantaged; unemployed/under-employed, disabled groups, ethnic minorities. The Prince's Trust - Cymru, will act as a last resort funder. The project will assist to create and support start-up ventures and encourage the growth of SMEs and attract new SMEs to Powys. The funding will allow the target group to be better prospects and provide access to the capital that cannot be obtained through traditional sources, such as High Street Banks, family and traditional lenders. This project will start up 45 SMEs in Powys and support these through the provision of aftercare in the form of mentoring support. This means that 31 of these businesses will be surviving after three years of trading, contributing to the increase of self-employment in Powys. 2 Princes Trust Cymru Starting and Supporting SME's £28,394 53892 08/01/2003 £132,506 This project will seek to increase levels of grant aid available to young people between 18-30 who are looking to set up in self employment, or have recently set up in self employment and are looking to expand their business idea within the objective 2 wards in Cardiff. Three types of start up loans will be available in Cardiff and these comprise of- Test Marketing Grants- grants of up to £250 available for individuals who wish to further develop or test a business idea through undertaking further market research or development of a proto-type. Applicants can apply for this support through submitting an outline of their idea to the Cardiff business panel, a group of volunteers, who are experienced in the business world, will assess each application. Start Up grants- through the provision of grants for business funding in order to allow the applicant to purchase capital items in order to support their business. These are applied for through submission of a business plan to the relevant business panel and are only payable upon receipt by the loan department of invoices for the approval capital items. Refundable grants - these grants are available to individuals who are asking to consider repaying these loans back to The Prince's Trust over a three year period, in order for the funds to be re-used for other young entrepreneurs. With all of the above funding the applicants have to be aged between 18-30 and to be eligible are not to be in full time employment. In addition they have to develop a business plan and illustrate the sustainability or their proposed enterprise, and the fact that they have been unable to access funding through any other source. Upon set up, each of the businesses is allocated a volunteer mentor who will provide support and advice to the young person in order to improve long term survival rates within the Cardiff area. In light of this support two thirds of the businesses set up by The Prince's Trust are still trading in their third year. Under this proposal businesses which have been established within three years by The Prince's Trust-Cymru will be able to apply for an expansion grant (refundable) upon production of viable expansion propositions ProMo Cymru Ltd DepCult Social Economy Marketing Co-op £60,000 53894 04/07/2003 £160,000 DepCult is a social economy marketing co-operative development facility through Cymru-Wales Co-operative Development Association working in conjunction and devised with a growing, presently information membership This project will formalise and consolidate DepCult which will include constituting DepCult as a non profit sharing Company Limited by Guarantee and provide network and skills development to ensure sustainability DepCult has been devised out of client contact and research of needs indicating a general marketing and business development skill deficiency At least 50% of DepCult's membership and collaborators are women, disabled people and people from ethnic minorities. DepCult will involve over 250 collaborators (NB this initiative will directly involve a large number of people) DepCult will act as a marketing and business development hub in order to promote the services of its membership and develop collective business ventures. Its main business focus' are the cultural and digital media industries many of these relevant to tourism development within Cardiff Bay as the 'Gateway to Wales'. The developing presently informal membership includes a visual projection SME, a sound studio, Digital production individuals, music promoter and event managers, dancers, and musician's administrators. This horizontal integration of skills and collective working co-ordinated by the DepCult hub allows for larger more comprehensive business proposals to be developed and the maximisation of its members business potential. Business ventures include prestigious events based at the Coal exchange and festivals in Cardiff Bay inner Harbour, production of multi-media CD-ROM, DepCult services agency and DepCult training services. Business projects will involve up to 100 people. 3 1 ProMo Cymru Ltd 10/11/2004 £99,979 Social Economy Foundations £49.989 56659

This application for retrospective funding was based on work in the field of the cultural sector social economy development and the ability to offer practical, innovative and responsive solutions to the capacity building of existing and emerging social economy business located throughout the southern arc of Cardiff. The projects aimed to promote urban community regeneration in Cardiff across the targeted wards of Butetown, Grangetown, Riverside, Caerau and Splott, by stimulating and supporting the development of a cultural sector social economy network, which has enabled the formation and development of cultural clusters. The project will be achieved through the provision of targeted cultural sector support, advice and information, which will enable and encourage social enterprises to:- - Develop formal and information partnership working arrangements - Develop sustainable solutions for social businesses - Provide networking opportunities - Exchange best practice - Use ICT as a means to disseminate information and marketing support

2 2 Rhayader & District Community Support Rhayader One - Stop Community Centre £92,925 53617 09/01/2003 £187,350

To purchase a 3-storey building in the centre of Rhayader and re-furbish to create a fully wheel chair accessible one-stop shop for community services with disabled lift to upstairs, which will support individuals, groups and businesses within the community. The proposed property is in a central location with ample space and excellent access to house community & voluntary services. Within the building we would expand our own services as well as other organisations, which will also re-locate. Having such a central multi-purpose community facility will be sustainable in the long term, as it will be a revenue-generating community owned asset. Within the building we will create an information centre on all community, voluntary, public & statutory services. We would also provide a fund raising information point with the latest reference material and software.

2 | 2 | Rhayader 2000 Ltd | Cambrian Images (Community Photolibrary) | £63,001 | 54614 | 01/12/2003 £128,219

The creation of a web-based community photolibrary to develop and support local services, expand broadband provision and help overcome peripherality, generate income from outside the area and in the process to promote Mid-Wales and boost sustainable tourism. The library will store thousands of images in digital form. These will be provided by local photographers. The images will be displayed on a website in low resolution where they can be viewed by tourists and film companies as well as potential clients. The last group - which will include publications, local businesses, charities and public bodies - will be able to buy the pictures at a higher resolution (or in hard copy) by conventional post although we will have the capacity to send relatively high resolution images by an ISDN line to some clients. There will be one full-time member of staff who will be responsible for setting up the website, in-putting and archiving images, liaising with the public, training volunteers, marketing the project to potential customers and publicising its activities to increase local awareness.

RSPB Cymru Newport Wetlands Environmental Education and Visitor Centre £1,166,298 57193 21/12/2005 £3,555,785

The project will design, develop and construct an environmental education and visitor building and environs at Nash Gwent levels as part of the Newport Wetlands nature reserve. Employ community - focused staff to seek community input, volunteer opportunities and develop community based programmes to use the centre. Provide a community meeting facility. Employ lifelong learning staff to provide high quality, outdoors real-world learning for young people of all ages in conjuction with the local authority. Create 7 FTE's.

1 | SA Partners | £294,534 | 55195 | 01/07/2004 £659,750

Lean Thinking is an approach to business management that focuses on value and waste. By identifying value from the customer's perspective, non-value adding activities (waste) can be highlighted and then systematically removed through the active involvement of employees at all levels within the organisation. Consequently a Lean Thinking approach to business is primarily an enabler for growth. Whilst its development has been in manufacturing, it is eclectic in its roots, drawing upon many other strands of thought and disciplines. Lean Thinking has both strategic and operational elements. It is strategic in that it emphasises that each business is an element of on "extended enterprise" comprising all companies which form part of its product value stream. It is operational in that it provides an array of tools and techniques to assist participating business to remove waste and affect lean orientated change at all levels within the company. Whilst implementing physical changes in terms of product, service and production techniques, Lean Thinking also focuses on changing the methods of working within the organisation, ensuring that the ethos of Lean Thinking is inherent throughout the organisation. The support offered to companies recruited onto the project therefore, will offer a specific improvement technique and toolset, the economic benefits of which centre on: quality, cost and delivery - becoming better, cheaper and quicker after lean application.

The aim of the project is to build a healthier, more cohesive community that will help lift Adamsdown out of a continued rating as one of the most deprived wards in Cardiff and in doing so have a positive impact on the local economy. It intends to support and build the capacity of community groups to implement (and continue development of) a community action plan within the Objective 2 ward of Adamsdown. The preparatory work had been undertaken to enable a mix of residents, community groups and agencies working in the area to produce a series of action plans. With the help of ERDF and existing resource the trust propose to provide support with a small team of development workers and provision of community facilities that will provide a base for community organisations. One part time worker will concentrate on providing a base for community groups, with facilities and help in developing individual and collective skills. Another worker will have a greater outreach function helping implement changes, engaging people in their delivery and review and encouraging the growth of new groups and partnerships. The partners can supply a community base, resources and part time staff to work on the project and ERDF would primarily provide for an additional full time post.

3 | Scarman Trust | Adamsdown Key Community Skills | £6,462 | 53899 | 08/01/2003 £15,288

This project is a project within a project and essential for the long term success of the Adamsdown Community Project. This is a training programme aimed at imparting key skills to local residents that will enable them to take part fully in the local partnerships with service providers. These are skills that will be invaluable in building the capacity of local organisations (new and existing) in which these individuals are involved. The skills learnt can be disseminated to other key members of those groups. Although this is the pilot, it is intended to replicate with the next generation within the community and it can easily be exported to other communities in the process of regeneration. It will consist of a core series of 9 modules aimed at key aspects of leadership for active community members aimed at between 12 and 20 participants. To engender the more positive motivational aspects of competitiveness and encourage mutual support and the development of team working. Skilled participants will be organised into 4 teams of 3 to 5 members. Each team will have a facilitator who may also act as a mentor to some of the team members. The format for each module is to have an introductory training session which may utilise a quest trainer or, on occasions, use someone with proven well defined skills in the subject of the module to take the participants though his understanding of what the module means in practice, and how they exercise those skills. The teams then meet with their facilitator, who will assist the team in producing their definitive work on what they understand by the module's topic. One member of the team will lead the discussion and be responsible for producing the final piece of work. This leadership task will rotate around the team for each topic giving everyone at least one chance in the role. The way in which that team member leads the task will depend very much on their style and the peer support provided by the other members. The work produced may vary in nature depending on the module topic - for instance a written report, a short presentation, a video message, a role play, use of theatre etc. Field trips may also be a useful component.

3 2 Scarman Trust Adamsdown Feasibility Study (Business and Jobs) £1,800 54046 15/04/2003 £4,000

This project is primarily a feasibility study, and is intended to be the first step in identifying the best routes for social economic development in the ward of Adamsdown. Adamsdown has been the subject of an extensive community planning process. One of the key domains that have arisen for action out of that is that of jobs and businesses. The small business sector has been deteriorating and there are high levels of unemployment and labour inactivity. The commercial sectors are particularly run down and there is little job creation. The findings and recommendations made a result of this feasibility study will inform the Business and Jobs sub-groups of the community plan in determining its priorities for action. The feasibility study will be carried out by the regeneration and Retail institutes of Cardiff University during the summer of 2002. They will do this in partnership with the The Scarman Trust, Business & Jobs sub-group, local traders, small businesses, service providers and residents of the area. The feasibility study will cover the needs of the whole ward but with a specific focus on those areas where most economic activity currently takes place - namely Clifton Street and Broadway. We wish to both take stock on the reasons for the existing decline and to identify the best options for regenerating the social economy of the ward over the next five years.

3 2 Splotlands Credit Union Sustainability £29,661 54701 05/06/2003 £60,485

The essential aim of this project is the sustainable development of a Community Credit Union, to a point of self-sufficiency. The project will be offering the Local Community significantly better financial services, a greatly expanded social enterprise training capability, and a source for the

offering the Local Community significantly better financial services, a greatly expanded social enterprise training capability, and a source for the creation of new social businesses and activities in the local economy. The project will provide Splott and Tremorfa Credit Union (CU) with a resourced development worker team at a crucial point in its 8-year history. The project will fund a development worker, a Volunteer Recruitment and Training worker, and an Administration Worker to develop 3 areas of the organisation: the membership strength and profile, the

membership's participation, and the CU's administration. With a motivated volunteer core the paid workers will form a development team that
will promote membership growth, expand voluntary participation, substantially improve the CU's administration and provide 'on the job'
employment and enterprise skills training programmes within the co-operative's voluntary structure. Thereby the project will bring the CU to
self-sustainability and provide the volunteers with a greatly expanded capacity for practical training in social enterprise and employment skills.
3 1 Splotlands Credit Union Sustainability phase 2 £51,336 56657 11/01/2005 £129,907
Splott Credit Union is run and managed by local residents. This project will provide a sustainable funding period which will enable the Credit
Union to develop and consolidate its work and establish a sufficient revenue stream to become self-sustaining The project will fund a
Co-ordinator/Centre Worker and an Outreach/Volunteer Worker. The staff will provide a professional team able to provide affordable loans to
support existing and emerging social enterprises within the area. They will have shared duties which will include promoting the Credit Union and
its potential benefit to those who live and work in the area, whilst also providing development advice to other organisations. The project will air
to continue to support local social enterprises and private sector SME's through personal loans, particularly to those who will find mainstream
financial services difficult or impossible to access.
3 1 St Davids Catholic College Community Building Through ICT in Saint Mary's £9,450 53898 17/01/2003 £18,900
The project involves the conversion of a vacant room in a primary school into a community facility for ICT. The School is located in the Objective
2 area of Riverside and draws catholic children in from Riverside, Canton and surrounding areas, many of which are also in Objective 2 areas.
The room is at present being used as storage space and the dimensions are: Length 7.5m Width 5.9m Height 3.7m The room is basically an
empty box at present and the project would allow its complete conversion into an ICT facility for use throughout the day and evenings. The
conversion would allow significant sections of the community access to ICT facilities and classes. The room would be equipped with 16
computer, printers benching and teaching aids. The room does not have sufficient electrical supplies at present and the cost of the conversion is
included in section 25. Due to demographic changes in the surrounding areas the room is not needed by the school for teaching purposes and
would be available permanently for community based ICT work. The intention is to provide a facility utilising its location in the school to draw in
members of the community who would not normally access opportunities for education and training. Through using the school as the contact
point with the community it would draw many of the individuals who have not been economically active for some time as they are looking after
their children. In many cases the familiarity of the surroundings and the fact that they would be dropping off their children would give them the
confidence to access training. Market research undertaken by the college supports the view that the location would attract learners, as does the
success of the existing community partnership being managed by the college using a similar model. All of which would contribute towards the
National Assembly's commitment to Wales as 'a learning Country'.
3 The Beacon Trust The Beacon Centre (Y Goleufan) £669,369 54043 16/01/2004 £1,403,587
The aim of this project is to build a multi-purpose community facility which will be called The Beacon Centre. It will incorporate a Community
café, Youth Drop-in, advice and counselling surgeries, nursery and crèche facilities, a Community laundrette, Community offices, Education and
Training rooms, and IT suite and Conference facilities. St Mellons has been identified as an area with substantial social and economic problems
and the centre is key to enabling young people to overcome disadvantage and isolation. Through the provision of a meeting place, education and
training, advice and other opportunities and facilities our aim is to remove the barriers to employment and improve like skills. We will be
specifically targeting · Young people through the creation of a dedicated youth area. The objective is to improve their employment chances thus
assisting long-term sustainability of the area. In addition, social provision will assist in reducing incidents of anti-social behaviour and crime,
benefiting not only young people but the area as a whole. · Lone parents through the provision of childcare facilities and training. · Disabled
people by the creation of a centre with full disabled access. Those from ethnic minorities through the provision of education, support, advice
and access.
3 1 The Salvation Army Salvation Army Hall, Aberthaw Road, Ely £275,000 54048 17/01/2003 £601,405
2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
The project will involve the demolition of a derelict building in Aberthaw Road Ely and the development of a new build premises for community
purposes. The main purpose of the work proposed at the hall is relative to employment and training, however The Salvation Army has a
programme of social work and this aspect is also to be addressed in the total scheme. These aspects indirectly provide employment
opportunities. The new community facility will include: Creche - Mother Toddler Group - Commercial facilities such as providing meeting rooms
social facilities, local advice etcDrop-in centre which would provide catering facilities for those where an identified need has been established

Too much reliance is placed on landfill, which is expensive to businesses, and if improperly managed, can cause environmental damage and health damage. In addition, the new EC Landfill Directive requires major changes in the way municipal waste in managed in the region. This Directive, and other EU and UK waste policies, require more sustainable management of waste, with re-use, recovery and recycling preferred to landfill. While clean technologies will eventually help to reduce the levels of waste produced, their benefits will take some time to realise and will not provide the complete solution. Creation of markets for 'waste' recyclates is crucial to ensure that EU

These aspects indirectly provide employment opportunities. 1 1 The Wales Environment Trust Ltd Business, Innovation and the Environment: 2 1 1 The Wales Environment Trust Business, Innovation and the Environment: 3 2 3 4,856 Business, Innovation & The Environment - CWMRE (Creating Welsh Markets for Recyclates) The East Wales area lags behind the rest of Europe in the way it manages its solid waste. Too much reliance is placed on landfill, which is expensive to businesses, and if improperly managed, can cause environmental damage and health damage. In addition, the new EC Landfill Directive requires major changes in the way municipal waste imanaged in the region. This Directive, and other EU and UK waste policies, require more sustainable management of waste, with re-use, recovery and recycling preferred to landfill. While clean technologies will eventually help to reduce the levels of waste produced, their benefits will take some time to realise and will not provide the complete solution. Creation of markets for 'waste' recyclates is crucial to ensure that EU and UK legislation on waste management can be achieved (including the UK Waste Strategy, and the Waste Strategy for Wales). One of the most

The main purpose of the work proposed at the hall is relative to employment, however the Salvation Army has a programme of social work and this aspect is also to be addressed in the total scheme. These aspects indirectly provide employment opportunities. 1

WAG - DEIN (WDA) £1,050,000 55649 18/06/2004 £5,670,000 Newport Unlimited Property Development Fund

Newport Unlimited Property Development Fund (NUPDF) is a property development fund set up to provide gap funding to developers of new and refurbished office floor space in Newport City Centre, as part of the wider regeneration of Newport. The fund will be promoted by Newport Unlimited on behalf of the applicant the Welsh Development Agency. Newport Unlimited is an Urban Regeneration Company set up by the WDA, Newport City Council and the Welsh Assembly Government. The funding will help to overcome abnormal development costs and market failure on individual schemes, which hitherto have deterred investment in office development. The Fund will bring about additional office floor space for SMEs, additional jobs, and will stimulate a stronger office market for the future. It is proposed that £3m be made available (£2.25m from ERDF and £0.75m from NU) to the Fund in order to bring forward 8.360m2 (90,000 ft2) of new floor space, up to 226 net additional jobs, and £10m of private sector investment. The project will pilot a 'one stop shop' gap funding mechanism for private sector developers. Marketed as a straightforward property development 'fund', with the attractive connotations this type of branding holds, it will offer developers a streamlined route through which to access gap funding. NU will promote the overall scheme, assessing eligible bids from developers and, if approved, WDA will award grant to cover the gap demonstrated on the basis of a state aid limit of up to 25% based upon total costs and an ERDF intervention threshold of 25% of eligible costs. Projects requiring a level of gap funding that would breach State Aid limits, will not be considered by NU. £250,628 55246

25/08/2004 £561,193

General Business Advisory Service

WAG - DEIN (WDA)

The aim of the project is to provide a unified, consistent and quality approach to the delivery of general business advisory support. Offering a flexible response to client need, based on local understanding, the service will improve clarity for businesses by presenting a single, flexible approach which replaces the current multiple products and will assist businesses to access and utilise other business support from the private, public and voluntary sector. Whilst promoted as a single 'product', the support will be tiered with a focus on appropriate support linked to the resulting impact on the business. The project builds upon the success of regional initiatives such as the GAS (general advisory service) service in mid and North Wales and the PBA (personal business adviser) service in West Wales. These different services have demonstrated that there is a significant need for the provision of quality general business advisory personnel to assist businesses achieve growth and development, as well as ensuring sustainability. However, there is currently a lack of consistency across the various services on offer and this project aims to put in place a more coherent approach to delivery that adopts the best features of all its precursors. The project, to be delivered through local delivery contractors, will be both flexible and responsive. It will provide a wide variety of general business advice and help: ranging from guidance in applying for available grants or other support to help with constructing a business plan and longer-term strategic planning. The general support will include help with accessing specialist support where needed. The depth and level of support offered will be dependent upon the size, type and nature of the business with the level of resources offered being linked to the likely resulting impact on the business as indicated in the diagram below. Three levels of support will be applied, based on: Level 1 - SMEs with no to low growth potential Level 2 - SMEs with low to modest growth potential Level 3 - SMEs with modest to real growth potential Gateway and GBAS Advisers will be making professional value judgements in relation to the particular level that a company is offered, with appropriate controls being in place on the level of service to be delivered. The majority of businesses accessing the proposed service are expected to do so via the Business Support Gateway. As a logical "next step" for many users of the Gateway Service, the project will also assist businesses to access and utilise more effectively other business support in the private, voluntary and public sectors. There will be a strong local focus in the delivery of the project, ensuring that local needs are met. This will be combined with central co-ordination and management within the WDA regional offices. ELWa have committed their support to the project and will contribute funding to cover Advisers undertaking a Training Needs Analysis, as part of the diagnostic / review of business requirements. This is being considered as providing a 'joint field force' approach, reducing the number of advisers approaching businesses and ensuring appropriate support at the right time for the SMEs supported. The provision of support within a quality structure is essential to the successful delivery of the project. Higher quality standards will be attained through a combination of robust management, monitoring and evaluation of the service coupled with on-going professional development of Business Advisers. Ensuring consistency of approach, a single client management system (Link Track) will be used for tracking and monitoring activity and the resulting impacts upon the business. In addition to GBAS Managers located in the regional WDA offices, an all Wales management group involving WDA and ELWa will take responsibility for strategic direction of the service. Flexibility to move between the 'Levels'. GBAS Quality will be ensured by Monitoring Management Personnel employed by the WDA

WAG - DEIN (WDA) Community Regeneration Toolkit 2 £322,875 55247 15/04/2004 £717,500

The Community Regeneration Toolkit is a programme designed to support the sustainable economic and social regeneration of communities in the rural economy of Powys. This combines activities such as community capacity building, preparation of Action Plans and project implementation as pioneered and refined in both the successful Market Towns Initiative and the initial phase of the Community Regeneration Toolkit; both of which were supported by ERDF funding. The Toolkit consists of 8 core 'tools' (different levels of funding and support) as a mechanism for the delivery of key elements of the Mid Wales Community Regeneration Strategy managed by the WDA in partnership with the region's statutory organisations. This project principally relates to the tools to provide: * Direct Revenue Funding: for operating costs and projects of the community groups. * Development Officer funding: for each community group. * Specialist Consultancy and Professional Support (consultants from outside organisations). * Sector based intervention: activities undertaken collectively by groups on a specific theme, i.e. tourism or ICT. A community group wishing to access support from the Toolkit will need to work up an Action Plan for their area and meet the criteria set for each tool.

£150,792 55394 1 1 WAG - DEIN (WDA) Local Supplier Development 05/07/2004 £516,944

A study carried out by University of Wales College Newport and Newport and Gwent Enterprise in 2001 entitled "SME Engagement in Public Sector Procurement", highlighted the fact that the public sector in Wales spent £3 billion pounds per annum, and recommended a number of actions to enhance the SME engagement in public sector procurement. Three of the actions identified were: 1. All Wales Public Sector Contracting Web Site-which is currently being developed and due to be launched in November 2003. 2. Pre-Qualification Health Checks for SMEs - this forms part of the project and the "How to Tender" workshops will assist the SMEs in obtaining the necessary public sector accreditation. 3. SME Supplier Development Programme - which is this basis for this project. The Local Supplier Development Project will dovetail with (1) above by providing the necessary support for SMEs within Wales to improve their skills and increase their confidence to tender for both public and private sector contracts. It is intended to employ Supplier Champions throughout Wales, and in East Wales it is proposed to employ two Supplier Champions in the Objective Core area, and one in the Transitional area. A job description for the Supplier Champion is appended at the end of the application, and the key activities of the project are listed below. Additionally, two administration staff will be employed in East Wales, one covering the non assisted area, whilst the other person's duties will be split 50:50 between the Objective 2 and Objective 2 Transitional areas. A job description is included at the end of the report. The aim of the project is to develop and deliver cohesive support to facilitate inter-trading activity and provide practical assistance to SMEs in securing both public and private sector contracts. The service will be delivered throughout the programme area, with a focus on local delivery mechanisms. The project builds upon the success of regional initiatives such as Contract Shop and the Public Sector Local Supply Chain Initiative which originated in North Wales. It is intended to utilise the best practice from both within the Programme area. The key activities will include: 1. Proactively encouraging and facilitating businesses to purchase goods and services from local suppliers with a single point of contact on a local basis to support such activity. 2. Developing tools to assist inter-trading activity, such as the development of comprehensive website, CD-Rom, regular newsletters, as well as organising events such as "meet the buyer". 3. Establishing links with strategic buyers in both the public and private sectors and encouraging them to maximise the use of local suppliers in their procurement processes. 4. Working with local businesses to develop their capacity to meet the requirements of major buyers including for example, workshops on how to prepare a tender. 5. Facilitating the opportunities for businesses to work on a collaborative basis with the potential to access larger contracts, which they would be unable to achieve on their own. 6. Providing information to local businesses on potential contract / business opportunities-Opportunity spotting. 7. Provide central management, co-ordination and quality control, to ensure consistency of approach throughout the Programme area. The above will be implemented by utilising existing business support network mechanisms within the programme area, together with private sector partners where applicable. It is envisaged that a "Supplier Champion" will be employed on an area basis. This has been determined by the number of VAT registered businesses within the counties. It is proposed that the "Supplier Champions" will be assisted with the provision of administration support on a regional basis. The Supplier Champion will be expected to: a) Provide a single point of contact to businesses. b) Make proactive visits to businesses on regular basis. c) Establish links and develop networks within the operating area for buyers and suppliers. d) Identify opportunities for businesses. e) Collate articles for the quarterly newsletter. f) Arrange "How to Tender" courses, either delivering themselves or call upon third parties to deliver the workshops. This will depend upon who is successful in obtaining the contract to deliver the project. g) Where necessary call upon the services of "experts" in the field of public sector procurement to provide in depth One to One consultations to the businesses. h) Liaise closely with other "Supplier Champions" in other areas and share best practice, and organise joint events. i) Work closely with strategic buyers and suppliers within the region. j) Develop links with the Welsh Assembly Government Procurement Initiative team. k) Refer businesses to other specialist programme and organisations, such as Source Wales, Timber 11, Environmental Goods and Services and Welsh Tourist Board. I) Work closely with other general business

	s. Additionally, the following will be employed to provide cer Supplier Champion. b) Collation of information for sponsor a yer events.

Programme: Number of matching projects: Totalling: Fund: Number of matching projects: Totalling: **Grant** M Sponsor Name **Project Title** ProjectID Approved ProjectCost 2 | 1 | Abergavenny Food Festival | Development of Abergavenny Food Festival £55,836 53644 08/01/2003 £124,355 The aim of the project is to develop the Festival into a national event like the Hay Festival of Books. The attainment of a national profile event in Abergavenny will bring economic benefits to food, tourism and town businesses, both directly through spend at the Festival by festival visitors, and indirectly through the "place marketing" of the town and the region via publicity generated by the Festival. As an example, Abergavenny Food Festival was recently listed in The Independent as one of the "50 best summer festivals in Britain". It was one of six food festivals featured and the only one in Wales. It was one of only three festivals of all kinds in Wales, along with the National Eisteddfod and Brecon Jazz Festival. 2 | 1 | Abergavenny Food Festival | Abergavenny Food Festival Phase 2 £95,356 57573 The overall aim of this project is to make the Abergavenny Food Festival sustainable in the long term. Objectives: - to increase non-statutory income - to keep upgrading and improving the Festival and its administration (includes extension to new venues and expansion through the town as well as improving existing facilities and the use of resources) - to keep developing and evolving as a festival to keep it at the forefront of food festivals. Environmental Innovation for a Sustainable Economy in 08/01/2003 £164,736 Arena Network £64,867 Monmouthshire. This programme will provide the driving force to encourage business to improve their environmental performance, through a range of supported programmes, providing opportunities to reduce their impacts on the environment by the application of innovative technologies. This will result in improved products and processes leading to potential business benefits of higher profitability and increased competitiveness. The programme will extend an existing Objective 1 project supported by the NAfW, WDA and the Local Authorities to this area of Wales. One major objective of the project will be to extend the services to Monmouthshire and to optimise the co-ordination of support for business from the key service providers maximising the benefits of assistance to businesses. The project will provide grant support for the acquisition of equipment to reduce environmental impact by addressing the issues of sustainable development. Environmental Innovation for a Sustainable Economy in the Arena Network £41,250 54307 01/07/2003 £135,750 Vale of Glamorgan This programme will provide the driving force to encourage businesses to improve their environmental performance through a range of supported programmes which will provide opportunities to reduce their impacts on the environment by the application of innovative technologies. As a result, businesses will benefit from access to professional support and linkages to research institutions to develop products and redesign processes which can lead to potential business benefits of higher profitability, increased competitiveness and stronger growth. Sustainable environmental support for SME's in Newport Arena Network £57,375 15/07/2003 £149,750 (Transitional) This programme will provide the driving force to encourage businesses to improve their environmental performance through a range of supported programmes which will provide opportunities to reduce their impacts on the environment by the application of innovative technologies. As a result, businesses will benefit from access to professional support and linkages to research institutions to develop products and redesign and a number of unassisted areas supported by the Welsh Assembly Government, Welsh Development Agency and the Local Authorities where existing Co-ordinators were in Partnerships with the supporting Local Authorities. Environmental Innovation for a Sustainable Economy in Arena Network £40,065 54591 24/02/2003 £173,464 South East Powys

processes which can lead to potential businesses benefits to higher profitability, increased competitiveness and stronger growth. The work will be delivered through a Business Environment Co-ordinator who will provide the focal point and key contact between the businesses and providers of the support from all sources. This programme of work will extend the existing successful programmes of work within the Objective 1, Objective 2

This programme will provide the driving force to encourage businesses to improve their environmental performance through a range of supported programmes providing opportunities to reduce their impacts on the environment by the application of innovative technologies. This will result in improved products and processes leading to potential business benefits of higher profitability and increased competitiveness.The programme will extend an existing Objective 1 project supported by the Welsh Assembly Government, Welsh Development Agency and the Local Authorities, and existing Objective 2 projects in Powys and Monmouthshire supported by the WDA and the Local Authorities to this area of Powys. The major objective of the project will be to extend the existing services to South East Powys and to optimise the co-ordination of support for business from the key service providers maximising the benefits of assistance to businesses. The project will also provide grant support for the acquisition of equipment to reduce environmental impact by addressing the issues of sustainable development.

Green Dragon Environmental Management In £81.181 56190 19/08/2004 £182,797 1 Arena Network Monmouthshire.

A comprehensive range of consultancy support will be available both directly from the project, and from other partner organisations, to reduce the business impact on the environment. A Business Environmental Co-ordinator will be appointed to cover Monmouthshire. The Business Environment Co-ordinator will raise awareness within business of environmental issues, provide advice and guidance through environmental assessments for reduction in impacts, access consultancy support and encourage the adoption of an appropriate environmental management system.

3 1 Barry YMCA The "Hub" Community multipurpose centre £1,115,890 55918 16/11/2004 £2,748,013 The project will create a Community Multipurpose Centre by extending and refurbishing the existing YMCA building and provide associated car parking at Court Road in the Cadoxton area of Barry, making use of a large plot of derelict land adjoining the current site. The new centre will be called "The Hub" to reflect its position as a centre of an integrated programme of educational, social, health, recreation and personal support services within its local community. The project will work with the targeted communities within the Objective 2, Priority 3 areas of the Vale of Glamorgan, Court, Cadoc, Buttrills and Castleland. The project will aid the economic, social and environmental regeneration of Court Ward as well as facilitating the three other wards by providing a diverse programme of community education, training and community activities which can help overcome barriers, develop new skills and confidence and make a real difference to the residents of these deprived communities. The overall aim is to launch and operate a successful, not for profit, community multipurpose centre for the benefit of local people which is capable of sustaining itself financially through its own operational revenues.

1 | Better Business Wales (holdings) Limited | Opportunity Wales II Transitional | £290,119 | 55266 | 19/01/2005 | £1,520,000

Opportunity Wales is a partnership project to help make businesses benefit economically through the application of e-Commerce. The programme has been running in the Objective 1 area of Wales since April 2001 and has proved to be of valuable support to SME's. Research undertaken in April 2000 by NOP, signified a low take-up of e-Commerce in Wales, which remains as pertinent today. Poor take-up of e-Commerce and Internet application undermines the competitiveness of many SME's and retards the economic growth in the Objective 2 area. Opportunity Wales II builds on the work being undertaken in the Objective 1 area to expand the service into the Objective 2 area. The programme provides hands-on assistance through quality e-Commerce business advice and easily accessible implementation support facilitating the realisation of tangible e-Commerce benefits by SME's. The package of support will assist SME's to: i) Understand the benefits of e-Commerce. ii) Give advice on how to exploit the latest developments in technology, including broadband, for the benefit of their business. iii) Pro actively and confidently plan the introduction of appropriate e-Commerce within their business. iv) Implement solutions v) Access client aid. Opportunity Wales II will offer small and medium sized businesses a trained and independent e-Commerce Advisor to carry out two days of free support to deliver an e-Commerce review. Further subsidised implementation support is available to ensure the full benefits are realised by the businesses, as is client aid to purchase products and services, to enable the recommended e-Commerce strategy to come to life. An e-Commerce centre of excellence will be available to ensure up to the minute quality e-Commerce knowledge is transferred to both the Advisers and the businesses themselves. An e-Commerce Web Site (www.opportunitywales.co.uk) will provide a 24 hour on-line facility to aid learning and understanding of all aspects of e-Commerce. Dedicated content for the Objective 2 area will be available on the site. Provision of one to one support from a trained e-Commerce adviser will be a key delivery to SMEs in the project. To complement this, additional support mechanisms will be provided. These include awareness raising and marketing activities to engage businesses in the imperative to adopt e-Commerce. The Contact Centre will act as a professional client interface to assess needs and suggest next steps whilst the community portal provides information on appropriate support services, the range of assistance available and give further information on best practice and sources of advice. In pursuit of the aims and objectives of the programme, five principal elements to the Opportunity Wales 11 project will be delivered: a) Centre of Excellence b) SME Community Web site c) Trusted e-Commerce business advisers d) Contact Centre e) Client Aid The impact of the service and the consequent use of e-Commerce by the SMEs will be monitored via a 6 monthly benchmarking exercise.

2 | 1 | British Waterways | Pontcysyllte Aqueduct - The Canal in the Sky | £713,680 | 55189 | 13/01/2004 £1,763,777

The Pontcysyllte Aqueduct, both the highest and the longest aqueduct in Britain, has more than 10,000 boats and many tens of thousands of pedestrians who cross it each year. The Aqueduct is the dominant feature of the Trevor Basin Conservation Area, attracting visitors from outside the area, to experience the grandeur and scale of the structure. The structure has the country's first ever-constructed cast iron trough that carries the canal 42 metres above the River Dee valley floor. The towpath is cantilevered over the trough and the Aqueduct is carried on 17 tapering stone piers. CADW Welsh Historic Monuments has designated the structure as a Scheduled Ancient Monument. The Aqueduct was the most influential feat of engineering, setting the model for many aqueducts and iron bridges that followed. British Waterways, in January 2000, undertook a trial contract on the structure. The investigation identified a number of areas of work including the replacement of the existing towpath across the Aqueduct. It was recognised that the work to restore the structure was essential to safeguard its future for tourism and leisure. The project will look to meet this main objective. Description of works: Re-sealing and painting of the iron water trough Structural metalwork repairs Restoring and replacement of nuts and bolts Replacement of the towpath Parapet and masonry repairs Information Point Recent community consultation identified that an information point interpreting the structure and telling the story of the waterway, was required to promote both the Aqueduct and the area of Trevor to visitors. An original canal side brick-built stable will be converted to meet this end, with members of the community inputting into the final content and future management of the building. Description of works: Site clearance New roof / slates / fascias and rainwater goods New windows Internal plastering / brick / walls Decoration New floor Insulation and heating Electrical and water supply Interpretation

2 | 1 | British Waterways | Trevor Basin - Waterside Regeneration | £62,057 | 54486 | 10/03/2003 £173,141

The project aims to promote and enhance Trevor Basin and associated canal corridor with a variety of environmental schemes, community-led artwork and improvements to physical access creating an attractive, green waterside. The project will encourage more cycling and walking along the canal and promote links with the local vicinity, surrounding residential areas and business - particularly the tourism sector. Awareness of the waterside and the surrounding businesses and facilities will be raised through events and activities, interpretation and promotion of the project.

Tourism & Access Improvements, the Monmouthshire & Brecon Canal Corridor Llangynidr - Talybont-on-Usk £62,958 53628 17/01/2003 £142,913

This phase of the Monmouthshire and Brecon Canal development will enhance the towpath link between Llangynidr and Talybont, improving and increasing access to this important environmental and heritage attraction, and contributing to a sustainable transport corridor, linking the canal with other local attractions, including the popular trail along the Brynoer tramline and the Brynich aqueduct and reservoirs. The improved canal will be used as a link to the World Heritage Site, a major tourist attraction at the Big Pit. The existing 2.3km towpath will be excavated and a geotextile membrane will be laid. Integrated bank protection programmes, using coir roll matting will improve the canal infrastructure balancing

access improvements with the enhancement of an important wildlife habitat.

2 | 1 | British Waterways | Llangollen Canal: Aqueduct Links Project | £175,196 | 56825 | 18/02/2005 £389,500

British Waterways along with its partners have implemented the waterside regeneration of Trevor Basin and the Pontcysyllte Aqueduct on the Llangollen Canal for both leisure and tourism. In cooperation with Wrexham County Borough Council, this scheme builds on this initial investment to create a safe tourism and leisure routeway linking the two visitor destination sites of Pontcysyllte and Chirk Aqueducts. The enhancement of the canal corridor under this Programme will extend the opportunities for visitors to both explore and experience this unique setting and the wider countryside. This project is also an integral link of the Urban Village Initiative Package which aims to promote sustainable transport around Wrexham. The Safe Lonks Initiative along the waterway will encourage more cycling and walking along hte canal and promote links with the local vicinity, surrounding residential areas and business and inparticular the tourism sector. As part of this section of the Urban Village Package the areas of Ruabon, Plas Madoc, Cefn Mawr, Trevor, Chirk and Froncysyllte will be connected enabling greater opportunites for sustainable tourism throughout the district. Work to improve access and service facilities will meet the needs of those with disabilities to encourage a still wider use of the routeway and hence waterside.

1 | Business in Focus Ltd | Total Business Resource Programme (Vale of Glamorgan Transitional) | £77,975 | 54311 | 02/04/2003 | £177,577

The Total Business Resource Programme (TBR) has been designed to continue the holistic business support approach provide under the WDA's New Business Starts Programme (NBSP). The TBR programme will provide a comprehensive programme of tailored consultancy, advisory services, mentoring and training support to companies that have a potential for growth. From an initial business benchmark analysis and a diagnostic review a series of action points will be identified which will be used to assist the companies to access a wide range of support services provided by the Partners and other companies and organisations in Wales.

1 | Business in Focus Ltd | Total Business Resource Programme (Cardiff Transitional) | £77,975 | 54361 | 02/04/2003 £177,577

The Total Business Resource Programme (TBR) has been designed to continue the holistic business support approach provided under the WDA's New Business Starts Programme (NBSP). The TBR programme will provide a comprehensive programme of tailored consultancy, advisory services, mentoring and training support to companies that have a good potential for growth. From an initial business benchmark analysis and a diagnostic review a series of action points will be identified which will be used to assist the companies to access a wide range of support services provided by the partners and other companies and organisations in Wales. The principal objectives are: To deliver over 3 years an initial business analysis, to assess the performance of up to 60 SMEs which have a potential for growth. These companies should ideally employ at least 5 people, be in the third or fourth year of trading, and be based within the ten transitional wards of the City which are eligible for Objective 2 funding under Priority 1 · As a result of the assessment, to provide skilled practitioner support to deliver both short and long term

tailored projects, which could consist of consultancy, training and mentoring, to aid business development and expansion \cdot To allocate an Adviso
as a long term Personal Business Advisor (PBA) and facilitator to involve partner organisations Llanrumney Environmental Improvement Scheme for 667, 205 55542 2004 5124 701
3 1 Cardiff City Council Elandamies Environmental Improvement Scheme 101 £67,395 55543 30/07/2004 £134,791
Burnham Avenue and Countisbury Avenue shopping parades provide a valued community resource for Lower Llanrumney, as they provide services to an area currently limited in such provision. The parades have been experiencing problems arising from vandalism and anti-social
behaviour. The Burnham Avenue improvements comprise of new paving, disabled access to the shops, mature trees, tree grilles for protection,
the replacement of bollards defining the public realm, replacement of litterbins and the installation of cycle stands. A youth graffiti art project will also be delivered as part of the scheme. The Countisbury Avenue element of the project aims to contribute to the renewal of the existing
public realm, through the introduction of mature trees, new and enhanced street furniture and improved pedestrian access to the parade. The
overall aim of the project is to visually enhance the area, provide a positive impact on the community and contribute to a sustainable future of the local shopping parades.
4 1 Cardiff City Council Cardiff Partnership Technical Assistance £66,250 55755 06/04/2004 £132,500
To provide a Secretariat to the Partnership; Support potential applicants to develop appropriate projects, including liaising with specialist Private
and Voluntary Sector Support Teams to help develop projects from applicants in those sectors; Publicise the programme in the area; Liaise with WEFO on all aspects of project development and assessment; liaise with Regional Partnership to dicuss project development and assessment;
ensure project assessment procedures are adhered to, that all sectors are involved in thr process and that propriety is maintained at all times;
keep full records of all project assessment meetings and procedures; Provide information to WEFO and Partnerships on projects considered for support.
3 1 Cardiff City Council Llanrumney Learning and Information Centre £634,143 56838 01/03/2006 £1,860,716
The key aim of the project is to create a 21st century learning and information centre that meets the needs of the community. This project
involves the much-needed replacement of the current learning and information facilities in the Llanrumney area. There are currently two facilitie standing adjacent to each other that are under utilised due to the poor condition, namely the Llanrumney Library and the Llanrumney Communit
Education Centre at Countisbury Avenue. Whilst there is a good range of leisure, youth and play service in the area, there is only limited adult
and family education provision. This is mainly due to the poor condition of the facilities and therefore the limited availability of use. The new development will include: A learning centre designed to meet local, social and economic needs including ICT provision. Quiet learning / study
area for homework / research Community Resource Room for meetings, outreach community groups etc to meet the local needs Information
regarding services relevant to the community eg. Community safety, Neighbourhood Watch, Housing Help, Citizens Advice etc Facilities for children including a creche and play area BuZZ Café Although not included in the funding application, the project will include a Library facility
offering a range of reference materials and loan materials including books, music, video, games etc.
A Land Regeneration Industrial Waste Management and Sustainable Development Network in the Transitional Area. A Land Regeneration Industrial Waste Management and Sustainable Development Network in the Transitional Area.
This project will extend and develop the highly successful "Land Regeneration Network", currently operating in Wales, to include new
membership and new activities. In terms of new membership the work proposed will focus on expanding the network to accommodate the Industrial Waste Management sector. The industrial waste types of this project include controlled bulk wastes such as slags, sludges and slurries
and priority waste streams such as construction and demolition wastes, including the processes of land regeneration, remediation, recovery, and
brownfield development. It is emphasised that the proposed incorporation of the Industrial Waste Management sectors, which does not include the Domestic and Commercial Waste Management sector, is seen as a natural extension of the needs of the land regeneration industry in dealing
with priority waste streams. In terms of new activities, the provision of a high quality reliable information service is proposed. This includes
building and strengthening links with related organisation through Wales, the UK and Europe. Through this information service, this project will strive to assist stakeholders adopt a co-ordinated approach to waste minimisation, as well as raising the levels of awareness and understanding
of waste issues. The project will look to disseminate this information through a number of channels, from new media and Internet systems,
meetings, seminars and evening lectures through to dedicated mailshots of newsletters and journals. The project will develop inventories of industrial waste streams to initiate the basic structure and elements of an industrial waste exchange (i.e.reduce, reuse, recover and recycle) and
complete a detailed technology Audit of the Industrial Waste Management Sector throughout the objective 2 region. This project will provide
ongoing mentoring and assistance for the creation and development of new SMEs in Wales to recover value from waste materials through processing and value-added treatment to develop raw material for use by other industries. Essentially this will involve the Geoenvironmental
Research centre (GRC) providing the R&D input that will be required to enable this process to take place. Social, environmental and economic

The Centre has recently has awarded the status of 'Centre of Excellence for Technology and Industrial Collaboration' (CETIC) in a new programme managed by the WDA. The expansion of EMC services to SMEs is an aim outlined in the Centre's business plan. The award of CETIC status builds on the establishment of a successful, ERDF supported Industrial Magnetics Group (project duration 1998-2001) in which facilities and expertise in the field of magnetic/electromagnetic technology have been developed. The group has performed well in meeting its targets during the project and the project management skills required to run a small unit, which can respond effectively to the needs of SMEs, have been demonstrated. The proposed unit will comprise a Project Manager, Project Officer*, and partial technical and secretarial support, together with the following facilities and services: 1 Fully anechoic screened test chamber plus two

1 2 Finance Wales PLC Xenos Business Angels - The Untapped Potential (Transitional)	£19,793	56926	20/02/2006	£60,178

The Xenos Business Angel Network is a business introduction service that matches private investors with companies that require growth funding in return for an equity share in the business. The aim of the Network is to provide specialist support targeted at increasing private sector equity investment and facilitating more opportunities for SME's to access high-calibre individuals who can provide management guidance and advice. The Network is unique in that it addresses a market failure in the business support market that can not be served through other mediums of support. The project aims to support indigenous SME's to raise productivity and the value of their output and encourage development of new firms through introducing business angels to the SME's and also raising awareness of the value and benefits of equity investments by Angels and to complement work to be undertaken by the proposed pre-investment support programme to encourage investor ready SME's. Specifically the Xenos Network aims and objectives are to: Assist existing SME's through a culture change that will lead to improving business standards Improve SME understanding of the equity market and how to access it Increase the level of co-operation and joint ventures Improve the flow of finance to SME's Upgrade the skills and knowledge base in SME's. Finance Wales PLC Investment Ready SME's (Pre-Investment Support) (Trans) £18,957 56928 The Project aims to address the market failures in financial support mechanisms (particularly where a conversion to equity is hindered by barriers in knowledge of investment instruments) to create new enterprises and develop existing ones. It aims to improve the competitiveness of businesses, support and accelerate the development of strong risk capital culture and help to facilitate and increase the number of entrepreneurs who can see the benefit of equity investment. Often SME's may require equity finance but managemnet within the company struggle to come to terms with understanding and can become uncomfortable with equity investment and what it entails and how to ensure to negotiate properly. It aims to move SME's from a totally grant dependant culture to consider more sustainable forms of assistance. In line with the objectives of Priority 1, the programme helps to support SME's through the provision of co-ordinated, focused corporate finance input, to increase access to funding for viable existing SME's. This approach will add value to existing and proposed business support to ensure SME'S can access existing funds in the region as well as being prepared for additional external private sector finance. In this way the Programme enables applicant SME s to play a pivotal role in the economic and social regeneration of the loca; and national economy. Finance Wlaes recognises that pre-growths form a pivotal role in determining the success of the future welsh economy and by providing hands on advice to companies at hte pre-investment stage, will spur the growth of such firms , thus promoting economic development . The project will also add value and complement available business support schemes, through the input of of corporate finance and support. Small Loan Fund Phase 1 (interim) Transitional £80,741 14/10/2004 £245,488 2 Finance Wales PLC 56495 The project provides affordable loan finance to SMEs, not otherwise available, targeted at various groups of SMEs to complement existing sources of funding. Loans are provided to viable SMEs located in the Transitional Programme Area, that have not been able to find appropriate finance elsewhere. By so doing, the Project is giving individuals and firms opportunities that would not otherwise have been available to them, providing confidence to aspiring entrepreneurs and playing a part in changing business culture and expectations. This, in turn, leads to more jobs and higher incomes. Clients of the funds are also required to make use of appropriate management support programmes. Groundwork Wrexham & Ceiriog Valley Bridleway Improvements £7,219 55187 16/03/2004 £20,582 Flintshire The Chirk and Ceiriog Valley Partnership (C.C.V.P) in partnership with Groundwork will develop 2 equestrian routes in the Ceiriog Valley. One bridle path section needs opening up with relevant fencing and surfacing work. The remaining bridle paths need new easy to open gates to enable easy access for all, especially horse riders who would no longer have to dismount for each gate. The surfacing, fencing and gates will be improved to the standard recommended by the British Horse Society. Groundwork Wrexham & 08/01/2003 £17,105 Ceiriog Valley Cycle Network £6,242 54066 Flintshire The project aims to: 1. Identify a number of cycle routes centred on the village of Glyn Ceiriog. These routes will be identified by Groundwork's Countryside and Access Officer, in partnership and consultation with: a) The Chirk and Ceiriog Valley Partnership (CCVP) and their Public Rights of Way sub-group (PEOWs-g). b) Local Groups, landowners and Wrexham County Borough Council's Highways Department. c) Cycling Organisations, both regional and national. d) The Black Environment Network. e) The People with Disabilities Access Forum for Wrexham County. 2. To obtain all relevant permissions to way-mark the chosen cycle network. 3. To employ local contractors to undertake way-marking activities. 4. To produce a Cycle Network Leaflet that links the cycle routes to areas of economic activity, centred around the village of Glyn Ceiriog, and to wider transport networks through Chirk Station. 5. To launch the leaflet and cycle route network at a suitable and accessible location in the community and involving all those local people and sponsors who participated in its successful development. Gwent Association of GAVO Voluntary Action Centre £563,634 55781 01/11/2004 £1,151,206 Voluntary Organisations Gwent Association of Voluntary Organisations (GAVO) seeks funding for the refurbishment of the property known as 'Fairoak School,' Maindee, Newport in order to strengthen it's capacity to enhance and expand it's current services to voluntary organisations, community groups and individuals in the Newport area with specific focus on the wards of Victoria, St Julians and Shaftesbury. GAVO will continue to provide a sub-office in Pilgwenny which will include a dedicated Action Team for Jobs unit plus ethnic development/voluntary advice. Community Development will continue throughout the Newport area. The establishment of the Voluntary Action Centre will significantly add to GAVO's current voluntary action agenda/remit as an umbrella group for the Newport voluntary sector, with the provision of a central point 'One Stop Shop' for voluntary organisations, community groups and individuals. Also the Fairoak project will provide six meeting rooms plus conference facilities. These will be put to optimum use. Llanrumney Community Llanrumney Community Forum, Community Development £78,907 18/08/2005 £169,564 56832 Forum Co-ordinator The Llanrumney Forum Community Development Co-ordination Project will consolidate and take forward the community regeneration and empowerment work of the Llanrumney Community Forum by employing a full time Community Development Co-ordinator and a part time Administrative Officer over three years. The project aims to: Conduct community consultations, identify gaps in service provision and ensure new projects reflect the needs of the community. Establish and manage a mediation centre for neighbourhood disputes. Work with employment and skills agencies to identify and arrange training opportunities to meet the skill deficits identified by local residents. To develop the skills of local volunteers and increase the opportunities available for accrediting voluntary work. To work with the Healthy Living Centre on health-related issues that impact on well-being and employability. To co-ordinate liaison between the police and local residents to identify and improve community safety and crime reduction issues. To work alongside partner agencies in re-engaging disaffected young people who have a perceived negative effect on community well-being. Powys SECRET - Powys South East Community Renewable £32,588 54812 15/07/2003 £99,385 Mid Wales Energy Agency Energy Technologies. The proposal is to establish a delegated grant fund for small-scale, community owned and operated renewable energy schemes. The grants would be offered to projects in the field of solar electric, non-domestic solar water heating, innovative wood fuel, solar space heating or other biomass heating or small-scale CHP, anaerobic digestion, heat pumps, small-scale wind, and hydro. It is anticipated that this would be the first phase of a project that would continue to 2006. MANUFACTURING NETWORKS Acquiring and Sharing Mid Wales Manufacturing 17/07/2003 £122,588 Knowledge and Best Practice. The aim of the project is to develop the profitability of manufacturing SME's and to encourage their growth. Opportunity exists for significant improvement in business practice by the sharing of information between SME's and the development of local suppliers and services to combat the negative aspects of Powys's rural location. The project will employ one networking officer who will facilitate regular and structured meetings between employers / employees within SME's who share similar responsibilities coupled with 'expert' presentations on best practice, relevant legislation and 'market information.' Networking Groups will be established across the following disciplines: IT, purchasing, finance, production, distribution and marketing. The anticipated areas for these groups are: Brecon and Ystradgynlais. MWMG will act as facilitator providing information on best practice, legislation, relevant business issue and generally prompting an exchange of information and experience between participating SME's. As the network groups develop the time, venue, direction and style of each group will be determined by the participating SME's. MWMG will then source requested information, advice and 'expert' input for following meetings or to individual SME's outside the meeting forum where appropriate. MWMG will act as a conduit of information to partners and government agencies on the needs and opportunities identified in the net working groups Monmouthshire County 54927 28/01/2004 £208,500 £31.275 Capital Grant Scheme for New Businesses Monmouthshire Council

The provision of a grant scheme administered by Monmouthshire County Council to assist start-up businesses, including community businesses that have the potential for growth and sustainability within the eligible Objective 2/Transitional areas of Monmouthshire. The grant will be aimed at sole traders, partnerships, limited companies and community enterprises to help them to purchase capital equipment and carry out minor building adaptations. Could include installation of a test laboratory, mezzanine floor to give additional space, or installation of extraction units to provide a clean air environment. The assessment and evaluation of applications for these grants is to be provided by Monmouthshire County Council's Business Support Team as part of their responsibilities in handling business enquiries. Grants will be encouraged from applicants who:

1. Have successfully completed the business start programme, administered by Newport & Gwent Enterprise Agency and Venture Wales and are in a position to start operations. The agencies will refer potential grant applicants to Monmouthshire County Council where a funding gap for capital equipment has been identified in their start up costs and these cannot be met from other sources. 2. Are seeking to establish businesses in the new technology sectors e.g. ICT, web design etc. 3. Are currently under-represented within the economy, e.g. women, disabled people, people from ethnic minority's etc. 4. Are setting up their business in the more rurally isolated areas of Monmouthshire. The introduction of these grants will create more local employment and encourage entrepreneurial activities for people wishing to start their own businesses within Monmouthshire. The grants offered, would be in the form of 50% capital expenditure with the maximum grant available being £5,000. The target is to distribute 25 grants per year over two years, giving a total of 50 grant allocations.

1 2 Monmouthshire County Capital Grant Scheme for Growth Businesses in Monmouthshire 54928 28/01/2004 £308,500

The provision of a grant scheme administered by Monmouthshire County Council to assist existing businesses, including community businesses, which have the potential for growth and sustainability, within the eligible Objective 2/Transitional areas of Monmouthshire. The grant will be aimed at SMEs with a minimum of 2 employees, that have been in operation for a minimum of 2 years, and who are solvent. Grants will be made available towards the purchase of plant, capital equipment and towards the cost of minor building adaptations. Expenditure on capital equipment would include items that are directly associated with the business, enabling it to operate eg. a lathe for an engineering activity. Minor building adaptations could include installation of a test laboratory, mezzanine floor to give additional production space or installation of extraction units to provide a clean air environment. The assessment and evaluation of applications for these grants is to be provided by Monmouthshire County Council's Business Support Team as part of their responsibilities in handling business enquiries. Grants will be encouraged from applicants who:

1. Are seeking to increase their product range or diversify. 2. Are seeking to purchase additional equipment to improve their competitiveness. 3. Will be increasing their staff numbers as a result of the capital investment in equipment. The introduction of these grants will create more local employment opportunities and encourage the growth of small businesses within Monmouthshire. The grant scheme will form part of a package of information and advice that can be identified for a growth businesse. The grants offered, will be up to 50% of the eligible capital expenditure with the maximum grant being £5,000. Grants will only be offered to businesses either already based within the County or who are seeking to locate in the County. The target is to distribute 20 grants per year over the two years, giving a total allocation of 40 grants.

4 1 Monmouthshire County Council Monmouthshire CC Technical Assistance - Objective 2 £100,724 54685 18/03/2003 £201,448

To provide a secretariat to the Monmouthshire Partnership

1 3 Monmouthshire County Council Rural Conversion Grants £74,426 54327 17/01/2003 £728,500

The provision of a grant scheme, administered by Monmouthshire County Council for conversion of redundant buildings in the rural area. The grants will be aimed at private individuals or property developers wishing to convert their under utilised or deteriorating barns/rural buildings, to units suitable for occupation and use by SMEs. The intended use for the converted buildings is office or workshop space. The assessment and evaluation of applications for barn conversions is to be provided by Monmouthshire County Council's Business Support team, as part of their responsibility handling business enquiries. Grants will be encouraged from applicants who: i) Use local, environmentally friendly building materials from sustainable sources. To be linked closely to the timber initiative of Monmouthshire's Adventa programme. ii) Sufficiently equip the units with the ICT requirements of Monmouthshire's cutting edge firms. iii) Provide no barriers to entry for under represented sections of the local economy. The creation of the new converted barns/units will create more local employment and encourage entrepreneurial activities for people close to where they live. The grants offered will be in the form of 50% of the total conversion cost; with the maximum grant available being \$20,000. The target is to distribute 6 rural conversion grants per year over two years, giving a total of 12 grant allocations.

2 2 Monmouthshire County Council Rural Community Action Programme £255,008 55168 07/01/2004 £810,151

Match funding for Monmouthshire's participation in the Rural Community Action Programme (RCA). RCA aims to help people in rural communities to take advantage of the programmes available to them to support rural regeneration and development. This will be achieved through building capacity in rural areas, through informing, upskilling and empowering communities to take control of their own destiny. For Monmouthshire, RCA offers far more than a source of funding for rural areas. It will provide the county with a catalyst for a whole new approach to community development, focused on collaboration between agencies, local area working, accountability and community empowerment. The RCA Programme will be managed by a new partnership, which combines the sectoral expertise of the Adventa. (Leader+) programme with enhanced local area representation and a strengthened voluntary sector role. The Partnership will engage three new Rural Community Development workers to complement existing GAVO (voluntary sector) provision. This will create a collaborative Community Development Team, with area responsibilities and reporting to four Area Forums across the county, but managed by the new Partnership. Benefits will include: Benefits to communities in terms of joined-up provision & access to support, delivered through area workers and answerable to the Area Forums. Benefits to partners in terms of added value and closer community links to existing programmes and activities. e.g. GAVO / MCC / Adventa. It will also link the activities of Adventa, MCC area working, GAVO, the Area Forums and input into the emerging Community Strategy for Monmouthshire. Benefits to WAG in terms of funding / provision synergies / leverage / rationalisation. This joined up approach will allow residents of Monmouthshire to work together to build a more vibrant, forward-looking rural community to take on the challenges of the 21st Century. The programme will focus on developing projects and initiatives under the following broad themes: Community hubs Rural isolation and access to services Rural enterprise and skills Culture and heritage.

2 1 Monmouthshire County CHEPSTOW HIGH STREET REGENERATION SCHEME £856,815 55352 15/03/2004 £2,325,037

This project aims to enhance the environmental quality of Chepstow town centre, specifically the primary shopping area of Chepstow High Street. The historic market town, at a major gateway into Wales, is experiencing economic decline, due to competition from stronger competing retail centres and due to its poor environmental quality and traffic management related issues. This project involves improvements to traffic management, so that the existing two way High Street is changed to one-way downhill. The creation of new public squares, wider pavements and a better setting for key landmark buildings within the town centre, will enhance the town's tourism and retail offer, and the competitiveness of local business. The creation of high quality public spaces will be achieved through the use of natural stone materials, such as quality flooring materials and with the introduction of be-spoke street furniture, street lighting, and planting. To ensure that the scheme is cohesive and connects with the main tourist attraction at the Castle and Riverside area, comprehensive signage and interpretation will be used at key nodal and meeting places. The integration of art across the scheme has been identified, which will be introduced through street furniture, within the floor-space and the key public squares. The artwork will reflect the historical and cultural development of Chepstow, as an ancient port and walled town. The introduction of a heritage town trail within the scheme has also been identified, which will identify and link together places and buildings that have historical significance. The re-investment in the redundant Lloyds Bank building for ground floor retail and first/second storey residential is a key consideration of the wider project, so that its immediate frontage, access and setting is improved for the wider economic benefit of the town centre. No financial assistance is being sought for the building, but the immediate public space is a part of this application. The completed scheme will provide an enh

2 1 Monmouthshire County Council #60,710 53879 02/07/2003 £147,000

Management of local Tourist Information Centres (TICs) transfers to Monmouthshire County Council (MCC) in October 2001, and the Council wishes to use this opportunity to review and develop the way information, marketing and new technology is used to assist tourism throughout the area. The County is rural in nature and characterised by many small-scale tourism businesses, often situated in isolated locations. It is therefore vital that these operators take advantage of new ICT to market their businesses, both via the TICs and independently. It is proposed to employ a Tourism Information Systems Development Co-ordinator to review current information delivery and marketing from the TICs, and to develop initiatives to assist the private sector to introduce ICT in their businesses to improve marketing, recording and monitoring.

The Project is to undertake physical works to expand and calcular provide any analysis of the property and produces the provided and the provi	1			1	1

The Total Business Resource Programme (TBR) has been designed to continue the holistic business support approach provided under the WD was business Starts Programme (NBSP). The TBR programme will provide a comprehensive programme for tailored consultancy, advisory services, mentoring and training support to companies that have a good potential for growth. From an initial business benchmark analysis and diagnostic review a series of action points will be identified which will be used to assist the companies and access a wide range of support services provided by the partners and other companies and organisations in Wales. The principal objectives are: To deliver over 3 years an initial business analysis, to assess the performance of up to 60 SMEs which have a potential for growth. These companies should ideally empt at least 5 people, be in the third or fourth year of trading, and be based within the ten transitional wards of the City which are eligible for Objective 2 funding under Provinty 1 - Xa a result of the assessment, to provide skilled practitioner support to deliver both short and long ten tailored projects, which could consist of consultancy, training and mentoring, to aid business development and expansion · To allocate an Ad as a long term Personal Business Advisor (PBA) and facilitator to involve partner organisations. 3	New Business Starts Programme (NI through to the end of the second ye accessed via Newport & Gwent Ente ceases to be available from the beginning of the third year vacuum. The project will build capacity in local communities as well as improve the environment. It will build on existing local action plans and priori providing a technology demonstration project and a sustainable approach to development and the environment. It aims to deliver:- Environmental improvements Environmental Art & Design projects Locally based sculpture/mosaic Locally designed open space areas Plaques and signage e.g. to improve accessibility Street furniture e.g. bins, lighting, seating Improved security and:- Fund a community-based urbaid designer Work with local communities to capacity build/empower Involve communities in physical improvement and design Link existing communities to new schemes Improve consultation on new projects Produce trails, brochures, maps Link to environmental education/schools In Newport City Council Community Grants Scheme Transitional E146,249 54741 17/06/2003 £292,500 Fals project aims to form a community grants scheme which can offer voluntary and community groups up to 100% grant towards a project may wish to undertake to support community regeneration. The project will work with targeted communities under the Objective 2 and Transitional Programme to help them develop small-scale schemes within their areas. The grant scheme will be distributed to local community through the Steering group comprising of representatives from the Voluntary and Community Sector and the Public Sector. This group will make decisions on potential schemes, which come forward requesting funding from the community grants scheme. The Capital led grants will be feeconomic, environmental and social projects. Projects that could potentially be supported under the grants scheme include: Crime Preventic Environmental Improvements · Minor Refurbishment's · Community Based Waste Products and Energy Efficiency · Improving Disabled Access may also be possible to consider revenue projects that are directly linked to capital schemes such as feasibility studies; community groups do own the land or buildings where	1 2 Newport City Council The purpose of this project is to end of a grant towards the cost of a smathe modern business world. This project involves the construction of a section of walkway, which will link the new footbridge across the River Usk with Corporation Road, and the construction of an associated length of riverside walkway. The walkway will create a link between the east and west banks of the river, linking the deprived community of Victoria (Maindee) with the city centre. It will also form part of a longer distance network of cycle paths, linking the communities in eastern Newport (including Ringland, Alway and Somerton) with the city centre. The walkway will be built through th forecourt of an existing primary school, and through a site currently occupied by a builder's yard, which is being acquired for redevelopment. The walkway will be surfaced in high quality materials, and will be landscaped to provide a sustainable and pleasant pedestrian and cycle link. The walkway will be at the core of a network of pathways, and will link the community with the River Usk. The person employed through this approval will seek to generate cultural links, enabling the local community to see the river as part of their environment, and the development sites as part of their community.	and Volunt the WEFO assessmen	tary Sector Support Teams on all aspects of project d nt; ensure project assessm	ership; Support potential applicants to develop appropriat to help develop projects from applicants in those sectors levelopment and assessment; liase with Regional Partnersl ent procedures are adhered to, that all sectors are involve	; Publicise the phip to discuss pend in teh proces	orogramme rojects dev s and that p	in the area; liase with relopment and propriety is maintained at

Retrospective Project The Commercial and Industrial Improvement Grants Scheme was a grant based programme to assist Newport SME's throug physical regeneration of business premises and associated land. The six defined areas, generally located in central Newport are: Cardiff Road, Corporation Road, Newport and Market Arcades, Lower Commercial Street/Charles Street. Old Town Dock/South Pillgwelly and Commercial Road (retained areas). The scheme, delivered by Newport City Council's Business Services (Economic Development Section), was implemented between April 2001 and March 2004. The target group of business premises owners and tenants, and prospective owners and tenants were contacted either through direct mailshot, community advertising or signposting through the business support network of Business Eye (formerly Business Connect). Grants of up to a maximum of 40% of eligible costs were offered towards the physical improvement / upgrading of business premises and curtilage of business premises. This could include: Improvements of building facades Extension of building Renewal and repair of roofs Replacement and repair of windows including shopfronts Installation of security measures Internal improvement / upgrading of buildings including floors, ceilings, doors, electrical work, toilet facilities and fire escapes Construction of fencing and boundary walls Construction of parking spaces and yard areas Planting of trees and shrubs Maximum allowable grants were £10,000 in all transitional areas. The Phoenix Project will refurbish and remodel an existing community facility - Ringland Community Centre (RCC) - in the Communities First area of Ringland (East Newport), with the intention of significantly increasing local community capacity building. The large Ringland housing estate, which the centre currently serves, was built in the early 1960's and has suffered particular socio-economic deprivation due to the rundown of the nearby Llanwern steelworks, once a major source of employment for local people - hence Ringland's designation as a Communities First area. Through a form of partnership working which, it is hoped, will become a template for future community capacity building projects across the city, Newport City Council (NCC) will refurbish a well known facility badly in need of upgrading in order to deliver a fuller, more comprehensive range of services to local people. The key purpose of NCC's Community Centres Service is to contribute to the Council's vision, aims and objectives in improving the quality of life of the citizens it serves. The Service has a positive contribution to make to the social, economic and environmental objectives of the city. Community centres are focal points for community involvement, development and identity; their multipurpose facilities allow all sectors of society to benefit in any number of ways. The majority of centres are user led and so benefit from ongoing and evolving consultation to provide venues for activities championed by the communities in which they are located. RCC is one of three in Newport that is directly managed by NCC, with Council employees working closely with the community to provide a safe, clean and friendly environment for user groups utilising the facility. Situated next to the library and health centre, and in very close proximity to the major bus route serving Ringland, it is recognised as a familiar community hub. Currently, the centre provides an administrative base and kitchen facility for 'meals on wheels' and accommodates a unit for adults with special needs, Monday to Friday during office hours. There are also some limited additional activities currently provided to the community, these include dance classes for all ages, mothers & toddlers, educational classes, youth provision, cookery classes and senior citizens social groups. Unfortunately the building has suffered over the years from spates of vandalism and antisocial behaviour that have proved to be disruptive to provision. However, the Phoenix Project, through engendering a strong sense of community ownership with the proposed method of partnership working will enable RCC to be remodelled in such a way as to provide a renewed economic, social and environmental focal point for the area and in particular its disadvantaged groups. The Phoenix Project will provide access to additional facilities that can be used by voluntary groups (for meetings, training, exhibitions etc) and by various groups and organisations that provide services to the community such as legal advice, job seeking information and housing and debt problems. Youth provision will be expanded, and a Learning Action Centre will be set up that will link into the citywide RISE network. It is also envisaged that the centre will provide space and facilities that will support the development of community lead social enterprise schemes. A cafe area will serve both the office and training areas as well as the adjoining multi-use hall. The project will be planned, designed and delivered by NCC, in partnership with key community groups - primarily the Ringland community Association (RCA), acting as the overarching organisation for many voluntary and community groups based within or operating in the Ringland area - through the medium of a management advisory group, the long term intention being to build the capacity of this management group sufficiently in order for it to fully take over the running facility. A dedicated manager will be employed for the life of the Phoenix Project, whose function will be essentially twofold: to oversee the project's physical development and seek to maximise future opportunities in terms of the continued development of the centre. Specifically, the renovation will provide: * Multi-use hall; (266 sq m) * Changing Facilities and toilets: Internal (62.6 sq m) and External (102.1 sq m) * Kitchen; (38 sq m) * Foyer area; (112 sq m) * Storage area; (42.5 sq m) * Room 1; (50.4 sq m) * Room 2; (32.4 sq m) * Room 3; (104 sq m) This project will form a hub for regeneration of the disadvantaged community of Ringland. It is expected that growth of the community use arising from the scheme will generate the on-going upkeep of the building. The centre will be sustainable, as the demand for such facilities has been identified in the Ringland Community Profile. (Indeed the demand is currently being demonstrated through the existing providers' requests for space and facilities in the area). Newydd Housing Association Thompson Street Improvement Works (Phase B) £40,661 55267 19/05/2005 £294,314 This project is co-ordinated by Newydd Housing Association (1974) LTD. It aims to bring significant environmental improvements in the targeted

This project is co-ordinated by Newydd Housing Association (1974) LTD. It aims to bring significant environmental improvements in the targeted urban community within the Objective 2 Transitional, Priority 3 ward of Castleland. Newydd aims to use the project to bring about changes on the Thompson street estate. The project initially commenced with a consultation exercise with the local community, which led to piecing together of a Plan for Action. The Plan for Action contains a list of areas where action can be taken, including physical plans, which aim to bring about the long-term goal of improving the quality of life across the Community. The project has developed through the process of consultation with the community, including the local residents association and tenants. Newydd Housing Association and the local community are actively working in Partnership with the local Communities First initiative, a local community business called Avian and other agencies including supporting bodies to combat social deprivation and improve the quality of life in the area. The project forms part of the long-term goal to improve the quality of life for residents in the Thompson street estate area and effectively help tackle wider social deprivation issues.

4 2 North Wales Chamber of Commerce and Industry National Facilitators

To create a contact point in order to encourage the Private Sector (in particular SMEs) to participate in the Objective 2 Transitional Programme

Powys Association for Voluntary Organisations

Community Link (Transitional)

E27,151 54846 20/10/2003

Efficient and effective community economic development depends on communities having networks in place to engage effectively with regeneration programmes. This they can do through networks of local community groups. However, in many communities, these networks do not exist due to problems in local dynamics, history or particular circumstance, linked to isolation and exclusion. The aims of the Community Link project are: 1. To promote the full involvement of Powys people of all ages in with the regeneration of their local areas. 2. To work with communities in their efforts to overcome dysfunctional dynamics within local areas, through the building of alliances, promoting joint working and organising activity. 3. To increase engagement of community groups with Countywide regeneration activities and increase opportunities through these activities for communities. 4. To develop partnerships both at local and County level, including creating linkages between groups. The project will employ one part time (.75 hours) full time equivalent posts in the Transitional area. The Community Link officer will be charged with engaging the community groups within the area, developing local networks and helping to link into regeneration strategies. Linking "hard to reach" communities into the process of community planning will be central to the work undertaken. They will enable communities to create holistic views of their position and visions for their futures. In particular, the engagement of communities in the overarching framework of the preparation of a Powys Community Plan will be a priority.

2 2 Powys Association for Voluntary Organisations REACH (Transitional) Promoting Participation & Supporting £47,907 54306 08/01/2003 £106,461

The aim of the project is to develop the social economy in the Transitional area of Powys. Opportunities exist for social economic activity in rural communities. REACH will exploit these opportunities. This it will do by building on networks of community organisations. PAVO has established such 14 networks). Most of these networks are informal in nature; meeting in order to discuss issues or share information. Networks include the Recycling Forum, Village Halls Forum, Powys Social Economy Forum and the ICT Forum. Each of these has an important part to play in the support of local enterprise. The project will employ one Development Officer in the Transitional area whose role it will be to develop social economic activity, using networks as hubs of community based regeneration. The role of the Development Officer will be: u To support and advise social economy activity. u To provide regular briefings on issues of interest to the social economy. u To develop partnerships with Business Connect and other advisory services. u To publicise the work of networks and encourage greater involvement. u To cultivate links between businesses in the social economy and other sectors. u To encourage the sharing of good practice. The project will be supported by administration and finance time. The project will include a "Kick-Start" Fund of a maximum of £500 per project supported. REACH will contribute to the development of a range of social economic activity involving recycling groups, social enterprises and voluntary service provision. It will assist effective and co-ordinated working between groups and contribute to stemming the decline in rural services. It has the potential to reach deep into the rural economy and make a real difference to the well being of the rural community.

2 2 Powys Association for Voluntary Organisations Spirit / Ysbryd 2 (Transitional Area) £60,991 55776 06/12/2004 £131,275

The aim of the project is to establish a "seed corn" grant fund for Powys based voluntary organisations and community groups. This is phase 2 of the project. It gives community groups the opportunity to take the first steps towards participation in community regeneration projects. Some changes to the operation of the scheme are proposed. The proposal is to continue with a grant rate of 90%, to a maximum grant of £10,000. The fund will continue to prioritise sustainable community regeneration projects and continue the targeting of smaller, rurally isolated groups. The aim is to reach out to the most socially isolated individuals through these groups and we believe that this focus is most appropriate within the context of the WDA Toolkit, WCVA's Social Risk Fund and the Community Fund's Awards for All schemes. Larger town based groups will continue to qualify but the emphasis will be on encouraging outreach and work in outlying areas.

2 2 Powys Association for Voluntary Organisations Powys Community Transport Forum Project (T) £18,672 55836 14/09/2004 £38,396

The extreme rurality of Powys brings into sharp focus the limitations of the public transport infrastructure. The Powys Community Transport (C.T.) Forum has a track record of developing initiatives and good practice in support of locally based solutions to this lack of provision. The Forum has been in existence since 1992 and is a partnership of both grassroots and strategic organisations, bringing together Powys C.T. Schemes, other voluntary groups with a transport interest and County and Regional organisations e.g. Powys County Council (C.C.), Powys Local Health Board (L.H.B.) and the Transport P9licy Division of the Welsh Assembly Government (W.A.G.). There are 51 member organisations in the Forum and the mix of members ensures that information is exchanged, advice and support given and that initiatives pay regard to both local and strategic issues. Since its inception it has received 50% of its annual funding from Powys C.C. and further funding has come from amongst others the Community Fund and W.A.G. Examples of developments and policies that the Forum has initiated and co-ordinated include; support for innovative C.T. groups, the development of good practice guides and service level agreements (S.L.A.) and the setting up of a Community Transport Training Agency. The Forum has through these projects, demonstrated the benefits of networking of groups and agencies and has helped to develop as strategic approach to transport provision within Powys. The Forum is supported and advised by the C.T. Development Officer, and the present project will enable them to continue this work and develop additionality as described below. The project has four strands of additionality. Firstly to promote sustainability. The sustainability of Community Transport activities will be a major part of the Forum Development Officer's work in the future. The Forum and development officer will work with Powys County Council and the Local Health Board, to confirm on the importance C.T. in the Powys transport network and relate funding of core activities schemes to S.L.A's. This will give the sector greater financial sustainability. Secondly, to promote environmental sustainability by encouraging and advising schemes to consider cleaner vehicle operations and more generally to reduce the number of vehicles on the road e.g. through the development of car sharing initiatives; by increasing use of shared vehicles e.g. minibuses. Thirdly, to promote Community Transport schemes as part of the Social Economy and thus help in the regeneration of local communities. In particular, providing co-ordination and increasing provision of transport to work and training e.g. the proposals in the Community Transport and Young People project. (This is a project being developed through the forum to involve young people in assessing their transport needs for training and employment and in developing appropriate schemes), and the extension of eligibility in schemes to cover work journeys. In addition, Community Transport creates employment and training opportunities. Community Transport schemes employ a substantial number of people, (At the present time 16 full-time and 17 part-time jobs in Powys), and high quality training is provided through the Training Agency. There is increasing emphasis on income generation through contracts and S.L.A.'s. Fourthly, the project will develop a partnership approach. It will support the partnership of organisations on the Community Forum, but beyond this it will develop partnership working. It will support the Transport, Health and Wellbeing Strategy in its attempts to co-ordinate approaches to community transport provision. The project will also develop partnership around specific initiatives, such as developing core-funding streams for community transport schemes, and car sharing initiatives for local communities. The project will fund development officer time, (8 hours Transitional) administrative support, publicity/promotion and associated office accommodation and consumable costs.

2 | 2 | Powys Association for Voluntary Organisations | (P1) Regeneration Seed Corn Fund | £47,400 | 53625 | 08/01/2003 £105,600

To provide a regeneration 'seed corn' grant fund to Powys based voluntary organisations and community groups to empower them to partake and contribute to social and economic community regeneration. Priority will be given to smaller groups, with grants of up to 90% and to a maximum of £3000. Funding will be given to project, which give evidence of sustainability and also address the needs of the socially excluded and communities of interest. This project complements the WDA grant scheme, e.g. the Community Regeneration Tool Kit (which offers a programme of support for the sustainable economic development of towns in rural Powys). Examples of projects that could be included under this scheme include: environmental activities, support for social economy initiatives, development of revenue generating community owned assets and links to strategic development such as ICT and Community Transport.

Powys Association for Voluntary Organisations Enterprising Community Building Scheme (Transitional) £51,022 56915 06/03/2006 £104,921

The aim of the project is to develop, through exemplar projects and associated support to community halls in Powys, an increased critical mass of good social economic projects. These will act as role models for other community buildings considering developing social economic projects. Exemplar projects may include social care businesses, ICT initiatives, conference facilities, and training bases, to name but a few examples. The objectives are: To develop a series of exemplar social economic projects based in community buildings. To use the exemplars as a way of raising awareness and encouraging a more entrepreneurial approach to the sustainability of finance for community buildings within the voluntary sector. To develop new services for rural communities. To create employment within small rural communities both directly through the social economy projects created and indirectly through the income such projects bring to their local communities.

2 | 1 | Powys County Council | Integrated Promotional Activity | £11,688 | 53670 | 06/01/2003 £76,950

This innovative project will enable tourism SME's in Powys to fully benefit from the development of the Wales Tourist Board's Destination Management system and marketing campaigns for both the domestic and overseas by the provision of hardware, software and network linkages, to allow access to the new national interactive website. Only four of the ten tourist information centres managed by Powys County Council are currently on the Powys network. The project will ensure the inclusion of key centres such as Newtown, Llandrindod Wells, Builth and Llanidloes. It will ensure that Powys can compete effectively with other areas of Wales by providing a focused and seamless marketing and sales resource in response to the changing needs of visitors. Customer demand for information and tourist services is changing as information is sought electronically as well as in the form of traditional hard copy. The project will develop the electronic information facilities available to visitors backed up by general and niche market print. It will also provide a vehicle through which the private sector can advertise their tourism products to wider markets as well as developing new marketing activities such as direct mailshots, increased media activity etc. targeted at recovering market share following the effects of foot and mouth disease. The project will integrate local marketing activity, by co-ordinating tourist information and niche market print relating to walking, cycling, gardens and food and drink. The project will enable the Council to continue to support national marketing campaigns and new media activity by contributing directly through the production of 150,00 copies of the Mid Wales Lakes and Mountains Guide and in support of co-ordinated media advertising and promotion at tourism trade and consumer shows. The main focus for the promotion of Powys will be through the Mid Wales Lakes and Mountains Campaign, which is one of the twelve marketing areas of Wales identified by the Wales Tourist Board. The Mid Wales Lakes and Mountains marketing area is coterminous with the administrative area of Powys, and is marketed through the UK Co-ordinated Marketing Group in domestic markets and through the TRAMOR group for overseas marketing activity. Both TRAMOR and the UK Co-ordinated marketing groups are partnerships between the Wales Tourist Board, the Regional Tourism Companies and Local Authorities. This ensures compatibility with regional and national strategies and ensures that there is no duplication of marketing effort.

2 | 1 | Powys County Council | Powys Food Links (Transitional Area). | £11,900 | 53675 | 17/01/2003 £26,500

Powys Food Links will: 1. Provide a central resource for the acquisition and dissemination of information to food producers and consumers and provide a sign-posting service for producers seeking advice and assistance. 2. Provide support for local initiatives such as farmers' markets etc, through officer support/administration. 3. Develop local and wider markets and supply chains through producer co-operation, promotion, branding and marketing of Powys products. The project will create 3 FTE posts; two full-time project officers (points 1 & 2 above) and a full-time equivalent marketing officer (point 3).

1 2 Powys County Council Powys Business Development Grant £78,640 55795 30/04/2004 £742,920

The Powys Business Development Grant is a capital grant scheme designed to provide assistance for business start-up and for the expansion of existing businesses. The grant will be available to eligible businesses located within the Transitional Wards of the County of Powys or wishing to locate/relocate within these wards. The grant will be administered by Powys County Council and delivered through the Powys Business Centre at Brecon in close liaison with the Business Eye Gateway and New Business Starts Programme. Applicants will be given access to the full range of business advisory services. In addition the Council will allocate 30% of the time of a Business Information Support Officer from the centre plus 10% of a Manager's time to assist and advise applicants and will also contract business/financial consultants to advise applicants and carry out independent financial appraisals of project proposals. The Council will also carry out the follow-up monitoring of all private sector projects supported at six months post completion of individual grant projects. Grants monitoring will be carried out by PCC officers and/or contracted consultants through monitoring visits to ensure that all grants projects comply with conditions of grant and assess client's future needs. There will be two maximum levels of grant: Start-up - up to 50% of project costs to a maximum of £2,500. Expansion - up to 30% of project costs up to a maximum of £10,000.

Powys County Council Powys Partnership Technical Assitance Objective 2 £39,394 55183 07/11/2003 £78,788

Powys County Council will provide a Secretariat to the Partnership; support potential applicants to develop appropriate projects, including liaison with WEFO; publicise the programme in the area; liase with WEFO on all aspects of project development and assessment; Liase with Regional Partnerships to discuss projects development and assessment; ensure project assessment procedures are adhered to, that all sectors are involved in the process and that propriety is maintained at all times; keep full records of all project assessment meetings and procedures; provide information to WEFO and to Partnerships in the agreed format on projects considered for support by the Local Partnership

2 | 1 | Powys County Council | Community Tourism Capital Grant Scheme | £9,175 | 54589 | 27/02/2003 £25,404

The project is a delegated capital grant scheme to support small scale tourism development schemes at the community level. The grant would offer up to 75% of the eligible cost for any one scheme to a maximum of £10,000. The grant scheme would be competitive and would be open to the Local Authority, Town and Community Councils, Community Enterprises, Tourist Associations and the voluntary sector. The following are examples of the type of schemes which could be eligible for support under this grant: - * Tourist Information Points both internal and external * Interpretation Boards and branded waymarking * Small scale tourism/environmental improvement with associated interpretation * Development of small scale heritage sites with interpretation and information * Integrated footpath development and improvement * Integrated bridleway development and improvement * Integrated cycle route development and improvement * Provision of secure cycle storage * Pedestrian fingerposts

2 1 Powys County Council Brecon Visitor Centre and Resource Bureau £146,716 54587 15/07/2003 £352,113

The project is to provide an exciting new information facility in the town of Brecon, in the heart of the Brecon Beacons National Park. It will be accessible all year round and will provide information and educational resources to visitors, users of the park, schools, other educational providers and the local tourist trade. The project will totally refurbish the building to provide not only enhanced information services, but also a new research and information resource centre (the resource bureau) on the first floor. The project will eliminate the current confusing division of the ground floor by providing a singly manned contact point to meet the requirements of visitors to the National Park and of tourists seeking more general information. In addition to the manned presence, the ground floor will house an imaginative interactive display which will use state of the art ICT technology to provide information and interpretation of the National Park. This will allow the National Park to increase the availability of information for visitors from the current operation, which is only open during the main summer season, to an all year round facility. The first floor will be converted to create a number of offices and a resource bureau. The bureau will be a multi purpose room, primarily used as a resource centre providing information and research facilities relating to tourism. It secondary purpose will be as a meeting suite for use by visitors, local tourism SMEs and community groups.

2 2 Radio PYF Hospital Radio Society AM Transmission for Nevill Hall Sound, enabling community of Abergavenny to receive service £12,544 53877 10/01/2003

Provision of AM transmission equipment to enable hospital radio station to broadcast to the whole of the hospital site and to the town of Abergavenny. In doing so, it will provide significant opportunities to satisfy a wide range of needs for the community of Abergavenny and also to develop the station as a considerable benefit to the local area, providing numerous services and directly working towards and assisting community enterprises to develop and succeed. It will act as a means to assist in diversification and vastly improving communication, via a recognised media, accessible to virtually the whole of the community. The project will enable the station to secure better revenue income from sponsorship thereby securing its ongoing future. Reaching a greater audience will provide benefits for the community. Examples are demonstrated as part of this application, indeed the interest already created has provided practical benefits and is generating linkages with a range of organisations - the potential once this project has been carried out, is almost limitless.

2 2 St Michael's Centre (Abergavenny) Trust Ltd St Michael's Centre, Abergavenny £252,215 55955 04/02/2005 £552,716

The new St Michael's Century project will provide a community building which will primarily be used for training purposes, on the site of the old church hall, in the heart of the transitional wards of Cantref, Priory, Mardy and Lansdown. The building will provide a strategically based venue to sustain a vibrant community, allowing for the provision of: · additional training activities and networking at a community and small business level in order to increase skill levels and assist economic development and community regeneration \cdot additional support services to disadvantaged groups in transitional areas of local deprivation · additional cultural events and exhibitions to promote local festivals and contribute to the development of tourism. The old single story wooden church hall has provided a thriving secular community centre and cultural venue for the past 25 years but is now substandard and unfit for the intended purpose. It has limited access for disabled users and limited space and resources to accommodate the development of innovative ideas and expansion of activities. The new build layout will provide: 1. Ground Floor · Reception/lobby area with dedicated computer terminal linking with websites for information plus display space to promote both Centre activities and other agency promotional material and information · Fully equipped kitchen with space to accommodate demonstration training/work experience for economically inactive individuals and to provide catering facilities for community based activities e.g. community/ computer café, seminars, training and other Centre events etc. Open floor area, in total 120sq ms, providing areas of 25sq ms and 95sq ms (which can be divided into 39sq ms and 56sq ms to be used simultaneously) to accommodate open meetings, seminars, events, exhibitions, workshops or occasional performances. The space will be equipped with sliding, sound proofed partition to accommodate two concurrently running training sessions/workshops or other Centre activities as appropriate · Fully equipped toilets and disabled access · Lift to first floor for disabled access · Storage space for training/exhibition equipment - display boards, flip charts, screens, overhead projector and other required training resources, plus stacking tables and chairs for use of building to develop community/ computer café and restaurant facility. 2. First Floor Meeting/training/workshop room (3.7 x 6.6sq ms) to accommodate groups of approximately 12, can be used for separate activities or as an extension to lower floor activities · Office space (2.5 x 2.4ms) for Centre manager, with computer, photocopier and fax facility for Centre use. 3. The building will have networked laptop computers and printers utilised for training activities. The building will be broadband enabled. 4. Use of materials Building materials will include stonework and a Welsh slate roof, locally resourced, to complement the nearby church, a Grade 2 listed building. 5. A Patio area and hard landscaping Hard landscaping (flagstones/cobble) will link the centre with the nearby listed church building; the main hall of the Centre will open out onto a pleasant outdoor secure patio area.

2 1 St. Marys Priory Development Trust TITHE BARN PROJECT ST. MARY'S PRIORY £172,445 54015 13/03/2003 £400,445

The Tithe Barn was part of St Mary's Priory, founded by Benedictine monks in 1087, originally constructed to receive one tenth of the annual produce of the tenants of the Priory and Lords of Abergavenny. The recent archaeological survey shows the foundations to be 12th Century, extended building in the early 14th Century, alterations in the 16th Century (post dissolution of the Priory), and conversion to a stable/coach house in the 17th Century. More recently the Barn was used as a 'discount carpet warehouse' and had lapsed into a poor state of repair. The Church Trustees managed to raise the funds internally to purchase the Barn in November 1999 for £75,000 plus legal fees. The first phase of the project is intended to save and restore this historically important building, (we have already had to carry out some urgent repair work, and these costs are not included in the amount of ERDF requested). Coupled with this phase is landscaping which will provide a Courtyard alongside and at the front of the Barn. The second phase is to convert the Barn into an Art/Heritage/Visitor Centre for the community of Abergavenny, and the much wider Monmouthshire area. There will be facilities for local artists to work, have workshops for youngsters and space for exhibitions. A dual purpose lecture area/music rehearsal area also on the upper floor. In the central area will also be an exhibition area displaying the 'Abergavenny Tapestry', paintings and will also feature inter-active data bases, detailing information about the history of St. Mary's and Abergavenny more generally. There will also be a fifty-seater restaurant, a shop selling local goods and produce and a Visitor Centre. The location of the Barn is ideal for stimulating greater numbers of visitors, with ample car parking nearby. We are seen by the Welsh Tourist Board as important to the tourist industry and there is considerable opportunity to work with other providers of tourist facilities (hotels etc) and the local TIC. At present we support both the Arts and Food Festivals, both of which have the capacity for growth. There is sufficient space to accommodate all the activities proposed for the internal dimensions of the Barn give 211 square metres usable space on the ground floor and 191 square metres on the upper floor. When the whole project is completed, it will meet aims and objectives of the MCC Action Plan by 1) improving the environment. 2) Providing support for the development and marketing of local products and services. 3) Supporting tourism. 4) Generating growth in the local economy. 5) Creating 6 new jobs

2 1 St. Marys Priory Development Trust Tithe Barn Project St Mary's Priory Church £217,000 57257 22/05/2006 £1,346,104

Phase 3: This will be the major piece of work to complete the repairs and refurbishment of the whole of the interior of the Tithe Barn, including all services. It will give 4,628 sq ft of space on 2 floors. On the ground floor will be a Visitor Reception area to provide guidance and information on all the facilities in both the Tithe Barn, the Priory, Abergavenny and the surrounding area. Also on the ground floor will be the public toilets. On the first floor will be an Interpretation Centre using ICT, video systems and traditional displays to outline the history of the Priory, the Castle, Abergavenny and this part of the Welsh Marches. Also on the first floor will be the multi-functional Learning Space to help with all levels of education working in conjunction with Monmouthshire County Council. The first floor will be a focal point for the Food Festival and other "food

The Council seeks funding approval in support of a small capital element of the larger Barry Steam Railway Project. The proposal would further extend the steam rail line and provide a physical link between the existing track, which currently terminates at the Woodham Halt platform alongside the Council's / Barry College's Information Technology Centre, and proposed platform alongside the Morrisons Store. The new track and platform would sit alongside the Morrisons Car Park and would allow a huge increase in footfall and usage of this community scheme. The details of the access from Morrisons to the new platform is currently under discussion with the store who have responded positively to the principle of the scheme. The scheme would specifically lay an additional circular 600 metres of track along a corridor of land alongside the main railway line that the Council has previously purchased for this purpose. The platform would be fitted with steps and access ramp and would, in design terms, match the platform constructed at the Woodham Halt site that the First Minister, Rhodri Morgan and Jane Hutt AM opened in April 3 1 VIBE EXPERIENCE £103,433 56396 01/01/2006 £207,998 Vibe Young People Inclusion Project The Vibe Young People Inclusion project is a positive form of crime prevention focusing on reducing the levels of crime and the fear of crime experienced by the communities of the four targeted wards in Barry. The project aims to deliver diversionary activities for young people to have a positive effect on reducing the amount of youth annoyance and youth offending, targeted specifically on the young people aged 10-17 from the wards of Castleland, Cadoc, Court and Buttrills in Barry. The VIBE Young Peoples project has been designed to deliver diversional activities that have evolved from substantial local youth research and feedback from the young people that this project is aiming to help. VIBE (VIBE Experience is a voluntary organisation) has been recognised as a service that consults young people about their needs and interests, it invites and positively encourages user participation to empower young people to take a greater responsibility in devising services and activities. The project activities focus around innovative new technology and media-based activities, including the website design and management, mixing, recording and singing. These activities are attractive to young people and develop a wide range of practical and social skills. The website will provide young people with the mechanism to display their work and communicate with a wider audience, encouraging them to participate in further positive activities within the community. WAG - DEIN (WDA) Business Birth Rate Strategy - Transitional £820,912 56487 22/10/2004 £1,848,488 The project will provide a more dynamic, diverse and appropriate portfolio of start up support, which is flexible, timely and tailored to the specific, diagnosed needs of the particular individual. Further the project recognises that a whole range of different types of support may be required by the different businesses and individuals. Implementation of the programme will be by means of the Business Support providers, which have been procured through an open tender process via OJEC. A small team of staff will be recruited by the appropriate WDA regions to ensure that the project achieves the objectives set and act as a catalyst to ensure that the project dovetails with the work already being undertaken in other areas such as Potentia, KEF and the Objective 1 New Business Start Programme. Each potential business that seeks public sector support will be seen by a business advisor who will make a decision whether to proceed or not. If it is agreed to proceed, an action plan will be developed, which should lead to the development of the business plan etc. By the end of March 2005 we are confident that the programme will be on target of providing advice to some 1463 individuals and creating a total of 1000 new businesses. £63,338 56475 18/10/2004 £142,625 WAG - DEIN (WDA) Reactive Development The programme provides support to individual SME's in the South East of Wales, to achieve specific business improvements which will improve their efficiencies, thereby helping them to increase competitiveness, reduce costs, retain existing business and secure new business. Each individual company project is specific to the needs of that business. All potential projects will be assessed against the likely benefit to the client, measured as the potential value of business that could be retained or the potential new business that could be won. Each project ensures documentation of this "opportunity value" from the client in writing and is retained on file. Actual achievements are recorded individually against each project and certified by the participating client. The programme is managed by a staff member of the WDA, based in the Treforest office. All SME's except from excluded sectors, based in Objective 2 areas of the WDA SE Region, are eligible for support. The key outputs will be the number of clients supported and the value of new business and business retained. Where clearly identifiable, the number of jobs safeguarded will also be recorded. Other opportunities are expected to result from the support activity and these will actively be progressed or forwarded to the relevant support/partner bodies, including requirements for ICT support and export assistance. WAG - DEIN (WDA) Powys Property Development Grant 2000/2004 (Trans) £58,049 56482 18/11/2004 £375,061 The aim of the project is to provide a Property Development Grant fund for speculative development by private sector landlords of new units, or the refurbishment of existing units, for SME's throughout the Powys Objective 2 Transirtional areas. There is a significant gap between cost of construction and resultant value in the Objective 2 Area, which discourages private sector investment in industrial premises. The Powys PDG fund is designed to fill this gap and generate optimum private sector investment. The scheme will operate entirely within State Aid limits. When complete, the units and extensions will be occupied by SME's either indigenous or inward investors, so helping to diversify the local economy, and improve local GDP levels. By accommodating business expansions and new businesses, the fund will contribute to higher economic activity levels and lower economic leakage from the area. The fund will be managed and delivered by the WDA Mid Division Property Management Team. 2 WAG - DEIN (WDA) Powys Property Development Grant 2000/2004 (T) £199,342 56483 18/11/2004 £1,433,147 The aim of the project is to provide a Property Development Grant fund for SME's to build new business premises or extensions to their existing premises, and for adapting their premises to their individual or changing needs, throughout the Powys Objective 2 Transitional area. There is a significant gap between cost of construction and resultant value in the Objective 2 Transitional Area, which discourages private sector investment in industrial premises either by end-users or property developers. The Powys PDG fund is designed to fill this gap and generate optimum private sector investment. The scheme will operate entirely within State Aid limits. When complete, the units and extensions will be occupied by SME's either indigenous or inward investors, so helping to diversify the local economy, and improve local GDP levels. By accommodating business expansions and new businesses, the fund will contribute to higher economic activity levels and lower economic leakage from the area. The fund will be managed and delivered by the WDA Mid Division Property Management Team. WAG - DEIN (WDA) General Support for Business (GSB) - Transitional £999,635 57413 The aim of the programme is to provide high quality advice and support to potential, new and existing SMEs in Wales through a consistent, flexible, comprehensive offering available throughout the lifecycle of the business. The service has been developed from best practice gained through delivery of the GBAS and NBS programmes and is an amalgamation of the key characteristics and best practice of both. It aims to provide relevant support to address individual needs whether pre-start, for sustainability or for businesses seeking to generate significant growth. An essential element of the new single service is the close working relationship that has developed with ELWa. This will ensure that all clients aswell as accessing appropriate specialist support are also able to access the full suite of ELWa products and services, for holistic development of the company. The major advantage of the new single service is that it will allow a greater level of consistency for clients through this integrated mechanism. It will also offer the client flexibility of maintaining relationships with their advisor through pre-start to post-start, or as they develop and grow, to change the type and nature of support they receive (subject to tendering arrangements). The service is unique in that businesses throughout their life cycle can now access all the general support they require through a single consistent framework. 2 2 WAG - DEIN (WDA) Community Regeneration Toolkit £45,000 53681 17/01/2003 £100,000 The Community Regeneration Toolkit is a programme to support the sustainable development of communities in the rural economy of Powys. A range of Tools will be made available to community groups within the social economy at appropriate stages in their development. Tool 1 (Seedcorn funding) will be administered by PAVO through their complimentary Obj 2 bid, whilst Tool 2 (Partnership) and 3 (Training and Mentoring), have been successful in attracting Obj 3 funding. This application is for Tool 4 (Revenue Funding), Tool 5 (Development Officer Support), Tool 6 (Consultancy / Professional Support) and Tool 7 (Sector Based Intervention). A community group wishing to access support from the Toolkit, will need to work up a proposed future plan for their area and meet the criteria set for each tool. Through working with PAVO to support initial seedcorn stages, groups will be encouraged to reach their full potential. 1 3 WAG - DEIN (WDA) Speculative Factory Premises Talgarth £93,515 53996 07/01/2003 £317,000 The project is to construct a speculative mixed-use business premises of 500 sq. metres on land owned by the WDS at the Talgarth Enterprise Park, Talgarth. The project will have an external waste area and adequate parking spaces, and the whole will be landscaped to the high standard evidenced on th4e estate. In total the scheme should occupy c. 1/4 hectare. The development is also intended to be an environmental exemplar

The aim of the project is to provide a unified, consistent and quality approach to the delivery of general business advisory support. Offering a flexible response to client need, based on local understanding. The service will improve clarity for businesses by presenting a single, flexible approach which replaces the current multiple products and will assist businesses to access and utilise other business support from the private, public and voluntary sector. Whilst promoted as a single "product" the support will be tiered with a focus on appropriate support linked to the resulting impact on the business. The project builds upon the success of regional initiatives such as the GAS (general advisory service) in Mid

£152,427 55899

project, fitting into the local surroundings as unobtrusively as possible and using indigenous species as landscaping. General Business Advisory Service (GBAS)

WAG - DEIN (WDA)

and North Wales and the PBA (personal business adviser) service in West Wales. These different services have demonstrated that there is a significant need for the provision of quality general business advisory personnel, to assist businesses achieve growth and development, as well as ensuring sustainability. However, there is currently a lack of consistency across the various services on offer, and this project aims to put in place a more coherent approach to delivery that adopts the best features of all its precursors. The project, to be delivered through local delivery contractors, will be both flexible and responsive. It will provide a wide variety of general business advice and help: ranging from guidance in applying for available grants or other support to help with constructing a business plan and longer-term strategic planning. The general support will include help with accessing specialist support where needed. The depth and level of support offered will be dependent upon the size, type and nature of the business with the level of resources offered, being linked to the likely resulting impact on the business, as indicated in the diagram below. Three levels of support will be applied, based on: Level 1 - SMEs with no to low growth potential. Level 2 - SMEs with low to modest growth potential. Level 3 - SMEs with modest to real growth potential. Gateway and GBAS Advisers will be making professional value judgements in relation to the particular level that a company is offered, with appropriate controls being in place on the level of service to be delivered. The majority of businesses accessing the proposed service are expected to do so via the Business Support Gateway. As a logical "next step", for many users of the Gateway Service, the project will also assist businesses to access and utilise more effectively other business support in the private, voluntary and public sectors. There will be a strong local focus in the delivery of the project, ensuring that the local needs are met. This will be combined with central co-ordination and management within the WDA regional offices. ELWa have committed their support to the project and will contribute funding to cover Advisers undertaking a Training Needs Analysis as part of the diagnostic / review of business requirements. This is being considered as providing a 'joint field force' approach, reducing the number of advisers approaching businesses and ensuring appropriate support at the right time for the SMEs supported. The provision of support within a quality structure is essential to the successful delivery of the project. Higher standards will be attained through a combination of robust management, monitoring and evaluation of the service coupled with on-going professional development of Business Advisers. Ensuring consistency of approach, a single client management system (Link Track) will be used for tracking and monitoring activity and the resulting impacts upon the business. In addition to GBAS Managers located in the regional WDA offices, an all Wales management group involving WDA and ELWa will take responsibility for strategic direction of the service.

WAG - DEIN (WDA) Local Supplier Development £95,025 55938 05/07/2004 £221,948 1 1 A study carried out by University of Wales College Newport and Newport and Gwent Enterprise in 2001, entitled "SME Engagement in Public Sector Procurement." This highlighted the fact that the public sector in Wales spent £3 million pounds per annum, and recommended a number of actions to enhance the SME engagement in public sector procurement. Three of the actions identified were: 1. All Wales Public Sector Contracting Web Site-which is currently being developed and due to be launched in November 2003. 2. Pre-Qualification Health Checks for SMEs this forms part of the project and the "How to Tender" workshops will assist the SMEs in obtaining the necessary public sector accreditation. 3. SME Supplier Development Programme - which is the basis for this project. The Local Supplier Development Project will dovetail with (1) above by providing the necessary support for SMEs within Wales to improve their skills and increase their confidence to tender for both public and private sector contracts. It is intended to employ Supplier Champions throughout Wales, and in East Wales it is proposed to employ two Supplier Champions within the Objective 2 core area, and one in the Transitional area. A job description for the Supplier Champion is appended at the end of the application and the key activities of the project are listed below. Additionally, two administration staff will be employed in East Wales, one covering the non assisted area, whilst the other person's duties will be split 50:50 between the Objective 2 and Objective 2 Transitional areas. A job description is included at the end of the report. The aim of the project is to develop and deliver cohesive support to facilitate inter-trading activity and provide practical assistance to SMEs in securing both public and private sector contracts. The service will be delivered throughout the programme area, with a focus on local delivery mechanisms. This project builds upon the success of regional initiatives such as Contract Shop and the Public Sector Local Supply Chain Initiative, which originated in North Wales. It is intended to utilise the best practice from both within the Programme area. The key activities will include: 1. Proactively encouraging and facilitating businesses to purchase goods and services from local suppliers with a single point of contact, on a local basis to support such activity. 2. Developing tools to assist inter-trading activity, such as the development of comprehensive website, CD-Rom, regular newsletters, as well as organising events such as "meet the buyer". 3. Establishing links with strategic buyers in both the public and private sectors and encouraging them to maximise the use of local suppliers in their procurement processes. 4. Working with local businesses to develop their capacity to meet the requirements of major buyers including for example, workshops on how to prepare a tender. 5. Facilitating the opportunities for businesses to work on a collaborative basis with the potential to access larger contracts which they would be unable to achieve on their own. 6. Providing information to local businesses on potential contract / business opportunities - Opportunity spotting. 7. Provide central management, co-ordination and quality control to ensure consistency of approach throughout the Programme area. The above will be implemented by utilising existing business support network mechanisms within the programme area, together with private sector partners where applicable. It is envisaged that a "Supplier Champion" will be employed on an area basis. This has been determined by the number of VAT registered businesses within the counties. It is proposed that the "Supplier Champions" will be assisted with the provision of administration support on a regional basis. The Supplier Champion will be expected to: Provide a single point of contact to businesses. Make proactive visits to businesses on regular basis. Establish links and develop networks within the operating area for buyers and suppliers. Identify opportunities for businesses. Collate articles for the quarterly newsletter. Arrange "How to Tender" courses, either by delivering themselves or call upon third parties to deliver the workshops. This will depend upon who is successful in obtaining the contract to deliver the project. Where necessary, call upon the services of "experts" in the field of public sector procurement to provide in depth One to One consultations to the businesses. Liaise closely with other "Supplier Champions" in other areas and share best practice, and organise joint events. Work closely with strategic buyers and suppliers within the region. Develop links with the Welsh Assembly Government Procurement Initiative team. Refer businesses to other specialist programme and organisations such as Source Wales, Timber 11, Environmental Goods and Services and Welsh Tourist Board. Work closely with other general business support provision within the counties. Additionally the following will be employed to provide central support for the project: Administration Support: Central support for the Supplier Champion Collation of information for sponsor and European Community. Arrange meetings, courses and assist with meet the buyer events.

The aim of this project is to provide high quality business premises within the Objective 2 Transitional area. The Project will construct two speculative mixed-use business premises of 500 sq.metre each on land owned by the WDA at the Brecon Enterprise Park, Brecon. The units aim to provide flexible, high quality business premises for both indigenous and inward investors within value added based industries. The design elements of the units will reflect the potential tenant's business goals and professional image and incorporate BRECSU best practice. The units will have an extensive waste area and adequate parking spaces and the whole area will be landscaped to the high standard evidenced on the estate. In total the scheme should occupy approximately 0.5 hectares. When complete, the units will be let to SME's, either indigenous or inward investors, requiring modern manufacturing or light assembly facilities, so helping to diversify the local economy and improve local GDP levels. By accommodating business through advance premises the units will contribute to higher economic activity levels and lower economic leakage from the area. The project will be managed and delivered by the WDA Mid Division Construction Team. The WDA will market the units during the construction phases to potential occupiers and negotiate tenancies/ leases with eligible companies following a detailed assessment as to the suitability of the tenant. The application is designed as part of a rolling programme of advance build projects throughout the Powys Transitional and Objective 2 Area.

Welsh New Business Start-up Programme for High Growth SME's

Welsh New Business Start-up Programme for High Growth £257,492 54672 30/04/2004 £579,806

The project will provide customised, specialist professional advice, e.g. legal, marketing, IPR, financial, to individual entrepreneurs or teams of entrepreneurs seeking to establish new high growth SMEs with a turnover of £1 million plus within two years, in the East Wales Objective 2 Transitional area. This project is one of a number of strategically linked applications submitted as part of the implementation of the Entrepreneurship Action Plan, and has been developed to provide a focused development programme for high growth business start-ups co-ordinated by the WDA. This project will actively seek entrepreneurs and teams of entrepreneurs who believe they have a business idea capable of meeting the eligibility criteria of the scheme who would then prepare their case for support. These proposals would be received by a panel of individuals experienced in bringing such companies to the market. This panel would include financiers, legal advisors, accountants and sector specialists (as appropriate to individual proposals). Those proposals gaining approval would receive dedicated assistance to bring the company to market. It is envisaged that the assistance to each entrepreneur and teams of entrepreneurs would be different from that received by any other entrepreneur on the project. Those entrepreneurs who do not receive approval from the panel, would receive support through the mainstream Business Starts Programme, which is capable of providing support to companies with up to £1M turnover in year 2. A small team of staff will be recruited by the WDA to ensure that the project achieves the objectives set. Sit on the panel as an observer and to act as a catalyst, so as to ensure that the project dovetails with the work already being undertaken in other areas, such as the New Business Starts Programme, Potentia and KEF, so as to ensure that we optimise the combined impact of these programmes.

The project will encourage the creation of innovative new businesses through indigenous and inward investment in order to support business start-ups and to provide employment opportunities for the population of West Wrexham. The project will also provide business awareness and signpost individuals or groups to a tailored business support service.				
1 2 Wrexham County Borough Council	West Wrexham Urban II Business Grants	£558,345	56535	01/01/2005 £1,116,690
To develop competitive businesses, both those recently created and those who have matured that are sustainable. In particular to provide innovative business support to SME's located within the strategy area. The project has been tailored to address local business needs to secure re-investment in existing businesses, promote and encourage private sector investment, to deliver suppport to safeguard jobs and aid in expansion. The project will also signpost applicants to appropriate advice and guidance to further assist in the growth and development of all existing businesses within the strategy area. The programme will cover the designated areas within the West Wrexham strategy area. However, applications from companies within close proximity to the area programme boundary that employ local people (minimum 50% of the workforce) and will also have the opportunity to submit an application.				
2 1 Wrexham County Borough Council	Southsea and Brynteg Community House	£85,263	56465	03/09/2004 £170,527
This project was developed as a result of a Needs Audit carried out within the local community. Community House which involved the renovation of an existing property now provides a central meeting point for socialising, a healthy lifestyle support, informal learning/training, and a food co-operative.				
3 2 Wrexham County Borough Council	URBAN II Technical Assistance 2006	£28,492	57506	31/07/2006 £56,984
This project will fund staff and other costs to support the URBAN II programme in West Wrexham after March 2006. In April 2006 the Technical Assistance team was reduced to the Programme Manager and the Finance and Administration Officer to continue to support the financial, technical, management and monitoring aspects of the Programme. The roles to the Technical Assistance team now include the following: 1) Assist WEFO in providing a Secretariat to the Programme Monitoring Committee. 2) Support the work of associated Working Groups and Forums 3) Support potential applicants in financial/monitornig issues 4) Programme Management 5) Raising awareness, Networking and dissemination				
3 2 Wrexham County Borough Council	Technical Assistance	£13,409	57547	26/02/2007 £51,898
To provide administrtive and secretariat support [in conjunction with WEFO] to the PMC.				
1 2 Wrexham County Borough Council	Coedpoeth Enterprise & Lifelong Learning Centre	£110,826	57522	13/12/2006 £384,068
The strategic context for the proposed Enterprise & Lifelong Learning Centre in Coedpoeth lies in both Priorities 1 and 2 of the West Wrexham Urban II programme, but mostly within priority 2. This part of the application represents the Priority 1 element of the Centre, which will lie at the heart of the Coedpoeth community. It will provide resources, activities, facilities and support. This will enable local people to access work opportunities, including self employment, participate in programmes of training and to take part in the economic and social regeneration of the communities in which they live.				
2 1 Wrexham County Borough Council	Coedpoeth Enterprise & Lifelong Learning Centre	£730,123	57523	13/12/2006 £2,270,403
The strategic context for the proposed Enterprise & Lifelong Learning Centre in Copepoeth lies in both Priorities 1 and 2 of the West Wrexham Urban II programme, but mostly priority 2. The Centre has been designed to accommodate and provide a wide range of community focussed facilities including: ICT Training Suite, Education/Information Resource Centre, Childcare/Playgroup facilities, Meeting space and a Refreshment Area.				
2 1 Wrexham Homework Clubs	Wrexham Homework Clubs [WHC] - 'Opportunity' Project	£100,412	56594	15/03/2005 £200,824
The 'Opportunity' project will run alongside the WHC ' Extra' Clubs at venues suggested by the community committees from the Urban II programme. The project aims to research the best way to provide and then deliver: 1/ learning opportunities for adults/young people to re-engage and encourage their learning educationally and socially in order to provide them with greater opportunity and aspiration when approaching the employment market. 2/ encourage participation of the wider community within WHC 's session format to raise capacity and skill levels for the beneficiaries themselves and the on-going benefit of the future work force across West Wrexham.				
,	Coedpoeth Youth Project	,	55675	07/04/2004 £18,500
This project will focus on providing a package of training and wide-ranging activities for young people within Coedpoeth. The project is designed to engage young people locally and encourage them to become involved in a range of activities, supported further by a period of youth outreach work. The package of support and activities will take place within a number of meeting points throughout Coedpoeth. The training and activities package will cover a number of themes, including fun and practical, social and quality arts short courses, some of which will be formally assessed and accredited. The overall aims of the project are to engage, support and develop key skills in youngsters who do not currently engage with any local services. The project will provide a means of including the youngsters in village life and will focus on building up transferable skills and increasing confidence and employability.
