	1	B All Wales Ethnic Minority Association	Curiad Calon Cymru	£58,052	56253	19/01/2006	£116,994

This DP addresses Theme B. Its fundamental purpose is the improvement of the economic situation of black and minority ethnic communities throughout Wales. Its Objectives are to: Deliver focused activities to BME members to empower them to gain and retain sustained employment and make and active contribution to the Welsh economy, · Empower community organisations to overcome inequalities, and · Fill gaps in BME labour market intelligence. Activities will be thematically clustered and deal with the main hurdles to equality faced by BME people in Wales, including: · Women: childcare, patriarchy, skills, language, racism · New arrivals: language, skills/qualification conversion · Isolated families: remoteness of rural areas and valleys, support networks · Young people and men: transition to work, access to skills and learning opportunities, role models, coping with racism at work, gaining/ keeping jobs The DP is representative of the target groups. It includes BME organisations (AWEMA), women's groups (MEWN Swansea), volunteer organisations (BVSNW, SOVA), training institutions (Bridgend College), refugee support bodies (Welsh Refugee Council) and policy makers (Welsh Assembly Government (WAG)). An open management process will assure fair and equal partnership working. Innovation will be in the development of new methods/ approaches, training, and qualification through national and transnational activities. An Equal Opportunities Action Plan (EOPAP) covering all aspects from design, development, implementation and management will ensure that this is considered throughout. Transnational co-operation will add value to national activities through exchanges (physical and experiences), conferences and collaborative working. Inclusion of beneficiaries, community and voluntary organisations in the DP design, development, delivery, management and evaluation will lead to empowerment. Mainstreaming will occur horizontally and vertically through the partners, their extended networks the TNG and ETNG. Action 1 includes consultation and research; setting up DP systems; production of the DPA and EOPAP; and development of the TCA and MPA. Action 2 will implement activities set out in the DPA and TCA. Action 3 will be mainstreaming. Target audiences include community groups, employers, policy makers.

1 A Antur Teifi Capacitate

£25,167 56260 19/01/2006 £50,335

This project has been prepared in the light of recent governmental deliberations regarding the need to support Incapacity Benefit Claims (IBCs) back into the workforce. In the Government Green Paper "Pathways to Work" it has been decided to give the issue a high priority and has outlined the need for piloting and innovation on how IBCs are dealt with. The Project promoters are fully aware of the work currently being proposed by Jobcentre Plus in Objective 1 in Wales and of the Pathways pilot at Bridgend in dealing with the issues. Essentially, the Capacitate Project will work in West Wales and focus in Action 1 on research into the current infrastructure of the support network, the services available to support IBCs and developing innovative actions for delivery in Action 2. In Action 1 the partners will: Map the existing support infrastructure Research the problem Offer innovative solutions for Action 2 Influence policy at a strategic level The effect will be to move West Wales ahead more quickly than what would have happened otherwise in this field and support for IBCs will happen much faster than what is planned at present. Actions within the project will: Involve the following stakeholders as subjects of the research and within the DP: Policy makers and strategic enablers (Jobcentre Plus, NHS, Local Authorities, other e.g. MPs and MEPs, the disabilities Rights Commission) Providers of services (Mencap, Eich Dewis Chi, Shaw Trust, Local Authority provision etc.) Incapacity Benefit Claimants (empowerment issues, the findings of the research, additional feedback) Individual Employers and employer organisations The community

1 | A | Antur Teifi | Capacitate | £189,195 | 57223 | 19/01/2006 £378,390

The DP is a strategic group of stageholder organisations, working towards a common target under Theme A to improve access to the labour market and empowerment of a large percentage of the population of Carmarthenshire. Adhering to teh key principles of Equal and the DP's equal opportunities policy we will carry out innovative activities both nationally and transnationally and disseminate the successes of teh DP for mianstreaming.

1 A Antur Teifi Capacitate 3 £31,496 57550 17/12/2007 £62,992

The aims of Action III of the Capacitate project will be to: review the impact of the innovative elements piloted within the projects; disseminate and share information on the project's achievements with stakeholders and interested parties; and actively promote and facilitate adoption of the outcomes to delivery organisations and decision makers with a view to mainstreaming. The Objectives will be to: * Carry out research based thematic networking with the DP and relevant policy makers through discussion on the project outcomes; and identifying and mainstreaming messages flagged up by the DP and policy makers. * Disseminate the pilot results through: information and awareness raising activities; publishing the final outcomes of the DP's work; organisation of conferences, seminars and events. * Mainstreaming the project outcomes by: meeting with policy makers; designing, delivering and supporting implementation strategies; and capacity building for future services based on the pilot. The activities employed in order to achieve the aims and objectives will be: Attendance at key conferences and events and where possible offering to speak and provide information. * Organisation of awareness raising events and seminars with potential mainstreaming audiences. Events along with other EQUAL partner in Wales will be organised in order to disseminate policy and decision makers in Cardiff, London and Brussels. * Seminars to share good practice. An event will be organised in Carmarthenshire for practitioners supporting IBCs in order that they can learn best practice from the project that will support their future delivery content. * Research to examine the impact of the project on its target audience and produce a final report of the project. This will be carried out with the support of DPs and key decision makers in order that the final report is given "ownership" by all stakeholders and that its content becomes pertinent to the needs of its client group. Production of a printed report and project summary based on the research work above. Also, updating the website so that it becomes fully accessible as an exemplar and ensuring the completeness of the database therein so that its use by practitioners will continue after the project has ended. The site will also serve as a portal linking other key information websites in accordance to the identified need of the client group. Study visits by the DP to similar projects in the UK in order that additional knowledge from other areas and other activities can feed into the final report and mainstreaming proposals. * Proposing a future service in Wales based on the outcomes, evaluation and further research.

1 B AWEMA Curiad Calon Cymru £366,208 57559 14/09/2007 £732,567

Black and minority ethnic (BME) people represent 2.1% of the Welsh population but 1.7% of the workforce, with only 56.3% of those of working age in employment compared to 69.6% of white people (NC-ELWa Baseline data and intelligence 2003 refresh, April 2004). Disadvantages experienced by BMEs include 'employment/unemployment rates; earning levels; progression/occupational attainment in the workplace; and levels of self-employment'. The most important factors are 'education and skills, the ability to access employment opportunities and discrimination in the workplace' (Ethnic Minorities and the Labour Market, March 2003, p13). The target groups for this DP are BME individuals and communities, including women, people with disabilities, young and older workers, economic migrants, refugees, and those facing social exclusion, eg. through isolation. The project has a all Wales focus and will operate under Theme B. The main MP partners are the All Wales Ethnic Minority Association (AWEMA), Black Association of Women Step Out (BAWSO), Black Environment Network (BEN), Cardiff Race Equality First, Cardiff and the Vale Coalition of Disabled People (CVCDP) Minority Ethnic Womens Network (MEWN) Swansea, North Wales Equality Network (NWREN), Scarman Trust, South East Wales Racial Equality Council (SEWREC), Supporting Others through Volunteer Action (SOVA),

University of Wales Institute Cardiff (UWIC), Valleys Race Equality Council (VALREC) and the Welsh Refugee Council, Community groups involved are the Swansea African Caribbean Society, Bangladeshi Welfare Association - Cardiff, Black Heritage Association Cymru, Filipino Association of South West Wales, Somali Community of Cardiff, Swansea Chinese Community Co-op Centre and Swansea Bay Asylum Seekers. Thus the MP is representative of the target groups. The MP's overall aim is to disseminate how activities have been developed to improve the employment prospects of black and ethnic minorities (BME's) and migrants through combating racism and xenophobia in the Welsh society. Its strategic objectives are to: i) improve the situation of BME women especially young women in the labour market, ii) support the inclusion of European economic migrants, contract workers and refugees, iii) combat the isolation of isolated households and individuals, iv) enable BME young men and other individuals to gain and progress in employment, and v) empower BME communities. Under Action 3, the DP will carry out a range of activities, including disseminating our new research together with the innovative training, work experience, mentoring and support provision, awareness raising, networking and new working arrangements that have been developed. We shall co-operate across a series of Action 2 Development Partnerships to jointly present findings covering all the DP communities demonstrating how the impact of activities has currency across all the segmented disadvantaged groups with which each DP works. The main outputs will be a series of Seminars and workshops run by the individual Partners leading to a Conference timetable for November 2007 at which Conference Publications will be launched detailing the work at Partner and Development Partnership level. Mainstreaming opportunities will occur horizontally and vertically through the partners, their extended networks (which include the Welsh Assembly Government, Jobcentre Plus), the TNG an

1 B AWEMA Curiad Calon Cymru A2 £2,156,336 57305 19/01/2006 £4,312,673 Black and minority ethnic (BME) people represent 2.1% of the Welsh population but 1.7% of the workforce, with only 56.3% of those of working age in employment compared to 69.6% of white people (NC-ELWA Baseline data and intelligence 2003 refresh, April 2004). Disadvantages experienced by BMEs include "employment/unemployment rates; earning levels; progression/occupational attainment in the workplace; and levels of self-employment". The most important factors are "education and skills, the ability to access employment opportunities and discrimination in the workplace" (Ethnic Minorities and the Labour Market, March 2003, p13). The target groups for this DP are BME individuals and communities, including women, people with disabilities, young and older workers, economic migrants, refugees, and those facing social exclusion, e.g. through isolation. The project has an all-Wales focus. The main DP partners are the All Wales Ethnic Minority Association (AWEMA), Black Association of Women Step Out (BAWSO), Black Environment Network (BEN), CEED (Charity) Ltd., Minority Ethnic Womens Network (MEWN) Swansea, Scarman Trust, South Wast Wales Racial Equality Council (SEWREC), Supporting Others through Volunteer Action (SOVA), Swansea College, University of Wales Institute Cardiff (UWIC), Valleys Race Equality Council (VALREC) and the Welsh Refugee Council. Community groups involved are the African Caribbean Society, Banladeshi Welfare Association, Black Heritage Association Cymru, Filipino Association, Somali Advice Centre, Swansea Chinese Community Co-op Centre and Swansea Bay Asylum Seekers Support Group. Thus the DP is representative of the target groups. The DP will contribute to the Equal Theme B by helping BME individuals and communities to combat discrimination through empowerment. It will achieve this through activities designed to address the barriers to employment faced by BMEs (as set out above), so that they are able to gain sustainable employment and progress along their chosen career path. Equal opportunities, empowerment and partnership-working are key drivers for this DP, its leading principle being equality of opportunity and embracing diversity by fighting discrimination through empowerment. Innovation, transnational co-operation and mainstreaming are also incorporated into DP activities as described below. The DP's overall aim is to improve the employment prospects of black and ethnic minorities (BMEs) and migrants through combating racism and xenophobia in the Welsh society. Its strategic objectives are to: i) improve the situation of BME women in the labour market, ii) support the inclusion of European economic migrants, contact workers and refugees, iii) combat the isolation of isolated households and individuals, iv) enable BME individuals to gain and progress in employment, and v) empower BME communities. Under Action 2, the DP will carry out a range of activities, including carrying out new research, developing innovative training, work experience, mentoring and support provision, awareness raising, networking and encouraging new working arrangements. At the transnational level, activities will include exchange of information and the import/export/adoption of new approaches through thematic workshops, working groups, study visits and case studies; exchange of beneficiaries, trainers and staff including study visits and training the trainer. The main outputs include a BME childcare social enterprise; new ESOL provision for orientation and employment; incubation and drop-in centre; new working arrangements between BME community groups and voluntary/statutory/employer organisations; physical and virtual networks; a database of skills, training and employer information; and an anti-discrimination package and good practice guides on combating discrimination. Mainstreaming opportunities will occur horizontally and vertically through the partners, their extended networks (which include the Welsh Assembly Government, Jobcentre Plus), the TNG and the ETNG to influence policy and strategy development.

3 E Bangor University

£573,285 57225

24/05/2006 £1,146,570

The GWLAD DP works within the adaptability thematic field of EQUAL. This involves promoting lifelong learning and inclusive work practices which encourage recruiting and retaining people suffering discrimination and inequality in the labour market. The GWLAD DP consists of education providers, community agencies, voluntary agencies and employers and is led by the Department of Lifelong Learning, University of Wales, Bangor. The aim of the GWLAD DP is to explore and provide opportunities for target groups to gain access to education and training in rural areas of North Wales. The GWLAD DP will achieve this aim by developing and teasting innovative and empowering approaches to lifelong learning in rural areas.

3 E Bangor University GWLAD A3

£109,127 57555 14/09/2007 £218,254

LLAIS (Lessons Learned and Ideas Shared) GWLAD The work of the GWLAD DP has responded directly to many of the Welsh Assembly Government's plans for lifelong learning and inclusive work practices e.g. one of the objectives of the Skills and Employment Action Plan (2002) is to "help more people overcome barriers to work and training, develop skills and obtain sustainable employment". Objective 1 of the GWLAD DP responds directly to ICT for Learning programme by researching and trying out innovative have also responded to DELLS' objectives of promoting lifelong learning and the four themes of sustainability, equal opportunities, bilingualism and social inclusion. The mainstreaming process will take place: - Vertically aiming at influencing national policy (and respond to policy gaps) by producing evidence of innovation and good practice to transfer key messages in a useable form to policy makers such as Wales Assembly Government, Dysg, Lifelong Learning Partnerships, Job Centre Plus and other learning and service delivery providers. - Horizontally aiming at the DP, partner organisations, other DP's within Wales and UK, TNG's and agencies and groups with similar interests and will focus on practical lessons learned. The collaborative work within the DP and with other partner organisations will enable us to develop a shared approach to the themes of equality, diversity and discrimination and have a greater impact on national policies and mainstreaming powers.

The Partnership is drawn from organisations and agencies that have experience in working with community groups and individuals. The Partnership reflects a wide range of expertise including working with marginalised groups and also experience of community education. The partners will be made up of organisations interested in contributing to a work programme designed to tackle the issues of barriers to training/advice and guidance/ education in rural areas. By using a participatory approach the DP will ensure that the programme benefits those who suffer from the main forms of discrimination (based on sex, race or ethnic origin, religion or belief, disability, age or sexual orientation). The objectives of the Partnership will be to utilise a collaborative approach to explore access to training/education opportunities in rural areas experiencing multiple levels of deprivation. The DP will work with its partners in rural areas of Ynys Mon, Gwynedd, Conwy and Denbighshire. Each of the partners will bring specific expertise and in some cases experience of local interventions. The objectives address directly the common to different types of discrimination and inequality and respond to Pillar Three of EQUAL - Adaptability - Theme E "Promoting lifelong learning and inclusive work practices which encourage recruiting and retaining people suffering discrimination and inequality in the labour market" and also responds to the strategic objectives of Theme E "to test innovative approaches to attract non-traditional learners to improve their basic and new skills". The objectives also respond to key priorities in the WAG programme for developing Wales as a 'Learning Country' in devising new approaches to bring more people into learning and in piloting new approaches and progression to community based vocational learning and in piloting new approaches and progression to community based vocational learning to help the economically inactive into work.

3 F BTC Group Ltd

Engaging Diversity Development Partnership A3

£30,000 57557

14/09/2007 £60,000

The Mainstreaming Partnership will disseminate and mainstream the results, conclusions, guidance and best practice, that have resulted from the Engaging Diversity Development Partnership Action 2 Programme. The overall aim of the Mainstreaming Partnership is to create a centre of excellence for the use of ICT to raise awareness, tackle discrimination, promote equality, and share best practice. This Mainstreaming Partnership will address the cross-cutting themes of innovation, empowerment, equal opportunities, the use of ICT, work life balance and environmental sustainability. There are four key objectives to the Mainstreaming Partnership. 1. To vertically mainstream the results and conclusions to policymakers in Wales. This includes policymakers at an organisational level and policymakers at a national lever. This also includes bodies whose advice may be taken into account during policy formulation, such as the Welsh Language Board, Stonewall Cymru and the new Commission for Human Rights. 2. To horizontally mainstream the results conclusions and best practice to practitioners in organisations across

Wales. 3. To create a single online learning module containing all the conclusions, research, guidance and best practice from the DP, to be available on an open access web site. 4. To develop an open access e-community for practitioners across the UK to disseminate research conclusions from the DP and to encourage discussion and the sharing of ideas. The Mainstreaming Partnership is needed as recent surveys suggest unwitting and unknowing discrimination of disadvantaged groups still exists in the workplace. Recent changes to legislation affecting most equality and diversity strands, are still not fully understood by those at work. The Mainstreaming Partnership will provide solutions and guidance on implementation, that will enable large numbers of people at work to receive awareness training in diversity issues, and to engage in a process of sharing best practice. The Mainstreaming Partnership is clearly focused on increasing adaptability of those in work, particularly in relation to the effect of their working practices on equality and diversity issues. The Mainstreaming Partnership is comprised of partners from the Engaging Diversity Action 2 Development Partnership including Local Authorities, NHS Trusts and NGO's. Included as partners are some of the target organisations for mainstreaming including the Welsh Local Government Association. To achieve this the Mainstreaming Partnership will host two conferences, one in North Wales and one in South Wales. It will arrange a series of briefing seminars aimed at managers and policymakers from target organisations. To enable widespread horizontal mainstreaming the Mainstreaming Partnership will develop an e-learning module containing research conclusions at practical guidance, as well as an open access e-community the continuing sharing of ideas, case studies and best practice amongst a wide group of practitioners. BTC Group Ltd Engaging Diversity Development Partnership £777,510 57218 19/01/2006 £1,555,020 The purpose of the 'Engaging Diversity' DP is to develop and provide an innovative, updateable internet based e-learning approach suitable to reach large numbers of people from public and non-public sector organisations at work, quickly and effectively. The approach will involve e-learning modules and e-communities of practice that focus, engage and inform across a range of diversity issues in support of recent government legislation. The e-learning process will affect attitudes and understanding of the beneficiaries, raise awareness and encourage positive conduct, enhance collaboration between local and transnational communities, provide empowerment and sharing of best practice, which will reduce discrimination in the workplace towards disadvantaged groups. BTC Group Ltd Engaging Diversity Partnership £56,865 56236 19/01/2006 £115,947 The Development Partnership seeks to harness cutting edge web-enabled ICT solutions to deliver the following: · An extensive and extended community of interest that can collaborate and share knowledge resources in order to further develop best practice in the field of developing equality of opportunity within the Welsh Labour market · A suite of bilingual awareness raising modules that can be rapidly and flexibly deployed. Designed to roll-out training to a large number of people, building on the start already made with the Race Module Enabling representatives of groups vulnerable to discrimination as well as employers to share in the development and evaluation of the resources produced. E-learning materials that are culturally contextualised and operate on the affective domain of learning in addition to the cognitive domain 4 H Chwarae Teg Cytgord £56,234 57212 19/01/2006 £112,469

The DP will be established to examine the reasons for the existing gender pay gap in Wales, this will include collating published research and information, undertaking new research and developing models of good practice. The findings will be published in a document that will include a toolkit and guidelines for the target audience of employers, training and education providers, policy makers, women and lone parents. The document will be launched in a seminar and disseminated as widely as possible, UK and Europe wide. Our trans-national partners will focus on pro-activity in correlation to the DP's work programme to ensure complimentarity.

4 H Chwarae Teg CYTGORD £14,509 56197 19/01/2006 £31,597

1. Rationale: the Development Partnership will be established due to evidence suggesting that the gender pay gap remains an issue in the economic development in Wales. In addition lack of opportunities and career choices for women and men lone parents continues to be a barrier for economic prosperity. 2. Aims and Objectives: the aims and objectives of the DP will be to explore some of the reasons behind the gender pay gap and collate all known research and information from partner organisations to enable a holistic overview in Wales. It will also, explore and record self-employment opportunities for lone parents as a viable option in the labour market. 3. Methods: the work will be undertaken by collating information and best practice, co-ordinating the recording of all relevant information and publishing and disseminating the findings. 4. Partners- Chwarae Teg will be the lead partner- Other key partners will be: Equal Opportunities Commission; Wales TUC; WDA; the Fawcett Society; the University of Wales Bangor. Fair Play Scotland Other advisory bodies may include - the Welsh Language Board, MEWN Cymru, Age Concern; Disability Wales and the Commission for Racial Equality. 5. Outputs - the main output of the project will be a good practice guide for policy makers, employers, training and education providers and other equality organisations. 6. Beneficiaries - the overall beneficiaries of the project will be women, lone parents, young people and women who may be doubly disadvantaged and socially excluded. It is hoped that the guide will empower these groups by creating better opportunities, choices and financial gain in the labour market. 7. Transnational partners - may be Basque region of Spain or Scandinavia who have commonalties and models of good practice in gender mainstreaming and Work life Balance.

Innovate Trust
A (formerlyCardiffUniSocialServ Equals Shares for All £1,130,653 57219 19/01/2006 £2,261,306 (CUSS)

The Equal Shares for All partnership will remove barriers to employment for people with learning disabilities; implement preventative measure to address the needs of 'at-risk' groups such as those who may leave mainstream education early due to learning difficulties and potential unemployed. Employers and employment services will be influenced, students with learning difficulties mentored, personal development plans implemented and employment opportunities created. Participation in policy making will be improved, methods for the prevention of bullying developed, employment opportunities and access to canal network will be identified. Personal and Social skills for employment will be developed and pilot videos created by people with learning disabilities.

Innovate Trust

A (formerlyCardiffUniSocialServ EQUAL SHARES FOR ALL £135,639 56249 19/01/2006 £271,387

LEAD PARTNER Innovate Trust, which has over twelve year's experience of running ESF projects. THE OTHER PARTNERS · Council for Education in World Citizenship - Cymru.(CEWC) · All Wales People First · Bridgend People First · Vision 21 · British Waterways · People Enabling Co-operative Ltd This Partnership will identify, research and trial innovative solutions from across Europe with people in Wales who are socially excluded, Particularly: · People with disabilities · Young people at risk of being unemployed · People at risk of becoming homeless This is because of the high number of people with disabilities without jobs, young people leaving school without qualifications and people at risk of homelessness. The aim is to empower beneficiaries to become recognised as valued citizens of the community. ACTION 1 ACTIVITIES We will develop and build the capacity of the Development Partnership in order to design and plan a Work Programme for Action 2 based on the identified needs of the beneficiaries at the heart of the process. We will agree specific areas of work to suit each partner's skills. ACTION2 ACTIVITIES · Promote citizenship and trial innovative methods of learning. · Provide personal development for those at risk of becoming socially excluded. · Provide interventions in schools to prevent bullying of people with learning disabilities. · Influence employers on the value of employing people with disabilities. · Develop innovative approaches for providing access to employment in the countryside. · Explore new ways of making the transition from school into employment for young people. Use videos to promote social enterprise. ACTION 3 ACTIVITIES · Influence Government policy using our own expert base from the Development Partnership. · Continue to mainstream the lessons learnt from this project into all levels of Government from local to European · Make the results of the project available to a wide audience including key professionals and managers. · Publish the results of the project via the internet and profes

CUSS)

[£226,130]

£226,130

£226,130

Positive solutions have been developed to help people with learning disabilities overcome the various barriers to employment. Activities in Action 2 has addressed the causes of disempowerment such as bullying, learning difficulties, lack of consultation, lack of employment opportunities and negative attitudes; as well as the effects like low educational attainment, low self-esteem, dropout from education, lack of participation and unemployment. Action 3 will focus on disseminating and mainstreaming the good practice developed in Action 2. The DP's mainstreaming partnership will seek to influence policy makers and instigate strategic change on a local, regional, national and European level. The strategy will also focus on the vertical dissemination / mainstreaming of products / practices to other support organisations and service providers. The need for the MPA is supported by the high numbers of PWLD who are unemployed, school leavers without qualifications and people at risk of homelessness. The need is also evident in current policy areas / strategic frameworks Wales - A Better Country, DEIN Business Plans, A Learning Country 2006, WAVE and Convergence and Competitiveness funding. The MPA contributes to Theme A. The project has developed innovative

solutions to help people with learning disabilities overcome barriers to employment. Positive solutions have been developed to assist people with learning disabilities over the various barriers to employment. Activities have addressed the causes of disempowerment such as bullying, learning difficulties, lack of consultation, lack of employment opportunities and negative attitudes; as well as the effects like low educational attainment, low self-esteem, dropout from education, lack of participation and unemployment. The MPA will focus on disseminating and mainstreaming products developed in Action 2. As an example Bridgend People First will disseminate their findings from their Anti Bullying project. They will encourage other service providers to deliver similar activities. British Waterways will seek to mainstream the accessibility audits developed in Action 2 - allowing other waterways to benefit from their work. CEWC will disseminate the teaching materials developed in Action 2 to LEA's and WAG's Education Unit. All Wales People First will disseminate their Guidance Handbook on Participation - encouraging wider participation of people with learning disabilities in decision making; at a local and national level. Innovate Trust and Vision 21 will disseminate DVD's, produced by project beneficiaries, and encourage other service providers to develop similar training opportunities.

A National Probation Service Unlocking Potential £11,901 56247 19/01/2006 £23,802

The DP core partners will be HMP Service, National Probation Service, WDA Employment Services, Careers Wales, UNLOCK, representative from employers organisations, Trade Unions, Chamber of Commerce, Summit Skills and CITB. The DP will address Pillar One - Employability, Theme A - Helping People who have difficulty in being integrated or reintegrated into a labour market. The application will cover all of Wales. The DP will increase the number of ex-offenders who find work, by helping employers to understand the economic and social arguments for equality and diversity in the workplace and proving employers with practical support to develop and implement effective equalities policies. The DP will increase employer's awareness of the barriers faced by ex-offenders and the significance of employment in reducing re-offending rates. The DP will research examples of best practice in the UK and other member states, and test these to influence policy in Wales, UK and other Member states. The rationale behind the application is the correlation between re-offending rates and unemployment for ex-offenders when it is known that one of the most significant factors is preventing re-offending is employment. The DP will create a new partnership working with better links with employers. The DP supports the EO agenda by increasing the awareness of barriers and developing strategies to overcome them, learning from best practice in other member states and piloting with ex-offenders to empower ex-offenders to find work. Action 1 - Brings together a Focus group to research the attitudes and barriers with employers, identify good practice in UK, identify transnational partners. Action 2 - Test work with employers to demonstrate to social and economic argument of employing ex-offenders in Wales and EU. Action 3 - Inform WAG, Employment services of the effective strategies for convincing employers to employ ex-offenders, which may lead to increase uptake in New Deal for Ex-offenders.

1 A National Probation Service South Wales Unlocking Potential £178,600 57220 19/01/2006 £357,200

The Unlocking Potential DP will work with a snall group of prolific offenders to demonstrate to employers that by diversifying their recruitment strategies to include ex-offenders that this can have a positive impact on their business. Our DP's overall aim is to work with employers. We will increase the number of employers who address ex-offenders in their recruitment policy. Increasing awareness of the social and economic argument for employing ex-offenders is a priority for Unlocking Potential. We will also increase the number of SME that will offer work placement to NEW Deal and engage with a range of employers and attempt to break down the barriers that exist in employing an ex-offender. Out DP will highlight the employability of suiably trained and qualified ex-offenders will be highlighted to employers.

3 E Niace Dysgu Cymru Valuing Learning - Strengthening Communities £445,750 57215 19/01/2006 £891,501

The DP is a Theme E consortium of voluntary organisation, addressing voluntary sector support for learning by individuals from marginalised groups, including; - Men and women, in black and minority ethnic communities - People 50+ - Disaffected young people - Women with mental health difficulties - Men and women on low incomes We will work in communities to establish innovative workable models for informal learning to be recognised as a basis for progression, and link to the national qualification framework. We aim to work thin pationally to develop

customised learning programmes, in community organisations, and associated accreditation and recognition, within national frameworks.

3 E Niace Dysgu Cymru Valuing Learning - Strengthening Communities £67,011 56250 19/01/2006 £135,377

The partnership is a consortium of voluntary organisations, all members of the Voluntary Sector Training Providers Forum in Cardiff: Voluntary Action Cardiff, WEA South Wales, South Riverside Community Development Centre, Fairbridge Cymru and Women's Workshop, working with NIACE Dysgu Cymru. It is a local Theme E application, addressing wider participation in learning by individuals from hard to reach and

Action Cardiff, WEA South Wales, South Riverside Community Development Centre, Fairbridge Cymru and Women's Workshop, working with NIACE Dysgu Cymru. It is a local Theme E application, addressing wider participation in learning by individuals from hard to reach and vulnerable groups. It is innovative in addressing recognition and accreditation of informal learning and potential links to the national qualification framework. We will develop the capacity of community and voluntary organisations to enable informal learning to be recognised and serve as a platform for progression to accredited learning pathways, and enhanced employability. We will address ways of strengthening the infrastructure of the voluntary sector to optimise its educational role with marginalised groups. We will involve representatives of targeted groups, in planning, management, delivery and evaluation, with equal opportunities and empowerment of individuals intrinsic to all activities. Action 2 includes: Learner- centred work with groups, individuals, learning providers and others to establish workable models for recognition of informal learning. Men and women, in black and minority ethnic communities. People 50+. Disaffected young people. Women with mental health difficulties. Men and women on low incomes Involving public, private and voluntary organisations, in delivery, including partners we seek to influence, including Wales Assembly Government, ELWa and ACCAC (responsible for the Credit and Qualification Framework for Wales). Sharing with transnational partners methods of developing customised learning programmes, in community organisations, and accrediting individuals' achievement, within a national credit and qualification framework. Evaluating the wider implications and applicability of outcomes. In Action 3, we will disseminate best practice within all appropriate sectors, and aim to influence policy and practice at all levels in Wales, UK and EU.

3 F OAKE Europe Ltd Asaph £2,629,984 57216 19/01/2006 £5,564,315

Only about 16% of the 1.2 million people who work in Wales receive work-based learning. This is despite the fact that many surveys have shown that the Welsh skills base is relatively low. Nearly 50% of the Welsh workforce is qualified below the level of NVQ3 and Wales has been said to be a low skills trap that needs innovative solutions to resolve the problem. ASAPH will innovate the use of ICTs to provide skills and training opportunities to people who, although in work, experience exclusion from training opportunities because of their work and social situations. Shiftworkers, part time workers, people with childcare responsibilities, disabled people, and employees in micro companies are often denied training opportunities available to others.

3 | F | OAKE Europe Ltd | ASAPH A3 | £8,287 | 57554 | 14/09/2007 | £16,574

During Action 2 the ASAPH project is investigating innovative ways of helping to retain and upskill workers who face disadvantage at work as a result of their working situation. Such disadvantage can arise because of personal circumstances and/or organisational constraints. This Action 3 proposal is designed to take the outputs and lessons learned during Action 2 (including from the transnational network that has been developed) and apply them to a wider audience, disseminating and mainstreaming them at appropriate points into organisational culture and national policy developments. Three coordinated approaches will be taken to develop these objectives: - a sequence of newsletters and briefing materials, in both hard copy and electronic formats, designed to highlight specific actions and outputs from Action 2. Feeding into: - workshops and briefing sessions generated by individual partners for specially targeted audiences, specific to the nterest and applications of particular partners Culminating in: - a cross-partner event to present the overall outcomes from Action 2 to a range of stakeholders from employer and employee organisations and national/European policy makers.

3 F OAKE Europe Ltd ASAPH £42,216 56210 19/01/2006 £84,539

The central focus of the ASAPH Partnership is to generate the innovative use of ICTs to provide skills and training opportunities to current employees, in particular to improve access to training for people in employment who do not have existing capabilities or opportunities to gain additional skills. By highlighting categories of employees currently disadvantaged in Wales and using ICTs to deliver innovative and equal training opportunities the work fits closely with Theme F The DP involves a range of partners from across Wales with experience and expertise to ensure that these aims are realised. It comprises local authorities, NGOs, consultancies, Training providers, and large manufacturers, all of whom have a strong interest in helping to ensure that people can balance their life between work and home. The Partnership will be innovative through novel approaches to the use of ICTs to target training opportunities of employees who are currently disadvantaged at work. The outcomes will ensure that employers develop and maintain a culture of social responsibility with their employees and the society in which they operate. The ASAPH DP will use a 'Team Wales approach' to support the development of a cohesive partnership between SMEs, relevant training and service providers to respond to the identified needs of individuals to overcome barriers they face due to dependant/ child care responsibilities, age, low level of skills, access to ICT, geographical ward deprivation, etc. the DP will also be extremely innovative in relation to the extent and nature of its dissemination and mainstreaming activities. The impact of the Partnership will extend beyond the partner organisations into national and transnational policy arenas and will impact positively on a range of policies identified as being crucial to the development of Wales.

PACES has beene developed by Prime Cymru and Age Concern Cymru. PACES will address the significant problem that people aged 50 plus suffer from age related discrimination in the labour market. In Wales alone some 250,000 people aged between 50 & 65 years are exonomically inactive. A significant proportion of these wish to re-enter the labour market. This is a growing European wide problem. There are a number of major barriers to people over 50 in Wales and elsewhere accessing work. These include discrimination, and also misperceptions about what older workers can contribute to employers operations. This problem is compounded by the fact that most employers in Wales are SME's. PACES will a provide advice and assistance to ecnolocally inactive older people who need help to find a routeway back into the labour market, particularly aiming to assist people not registered with the 10b Service The project addresses the theme of employability and is a regional initiative. Our objectives are ** in phase 1 to refine our understanding of the problem and our response ** in phase 2 to break new ground by overcoming barriers within SME's to the recruitment of older workers and to assist them in the recruitment of older workers in the UK and in other EU countries ** to provide innovative methods of advice and guidance to people over 50 to help them fing paid employment or voluntary work with paid employment prospects ** to establish new good practice guidelines for recruitment, training and retention of older workers for dissemination in phase 3 to employers and public bodies. 3 E Remploy Limited	will be involved in commissioning a of these organisations to create opp example funding criteria that reinfor practices that do not directly benefit of more than one beneficiary group other rural communities, e.g. training work for a long period, to be sup timebanks to reward involvement. 3 skills, confidence and self-esteem. with appropriate, timely and targeted information 5. Adding value through transnational co-operation - exchange of best practice, joint working, and bringing a wider perspective to our work. Cyfenter2 is a partnership of equals. Members are empowered through effective ways of working, active participation from all partners and innovative actions (e.g. Theatre Forum Cymru that identifies and resolves problems through theatre). THEME C The primary Objective of the Cyfenter2 DP will be to deliver a programme of action-based research that will, through the use of questionnaires, in depth interviews, case studies, and focus groups, draw on the experiences of individuals who are now considering starting - or have recently started - a business in Wales and are now looking to mainstream business support agencies for support and training and establishing a viable and sustainable business with the potential for growth. RATIONALE The research findings from Cyfenter1 have shown the need to consider a wide range of issues that may be impacting on the long term viability of m any of these businesses because of any additional, and sometimes multiple barriers being experienced due to gender, race, disability, language or age. Action 1: Re-establish and re-focus Partnership. Prepare detailed work plans for actions 2 & 3. Establish a transnational partnership Action 2: Conduct a programme of action research, which is lead by qualitative research and supported by quantitative and secondary research. Publish research findings. Action 3: identify appropriate audience. Mainstream and disseminate research findings through targeted methodologies.

1 A WAG - DEIN (WDA) Development Employability Equality Partnership (DEEP) A3 £69,244 55935 24/05/2006 £138,488

DEEP's Mainstreaming Partnership consists of voluntary, public and private sector organisations and higher education institutions with expertise in equality mainstreaming and dissemination of project outcomes. It will seek new partners with dissemination expertise, including media

in equality mainstreaming and dissemination of project outcomes. It will seek new partners with dissemination expertise, including media organisations such as the BBC. Working under Theme A of Employability, DEEP will vertically mainstream its findings through EU, National and Regional Politicians and intermediary organisations (for example the Welsh Local Government Association). DEEP will horizontally mainstream through its peers, partners, other Development Partnerships and employers. DEEP envisages mainstreaming equality in employability by utilising the action research reports in the three key areas of: Achieving Diversity Self Identity Valuing Volunteering Activities that DEEP will undertake to do this are: Joint work with the other Welsh DP's (Cyfenter & Cyfartal) at a series of seminars to take place in North & South Wales, Westminster and Brussels Dissemination event at European Parliament Production of various dissemination materials, for example, a book, DVD/CD ROM, as well as dissemination pack detailing the programme and outcomes so far. Develop a database containing information on dissemination channels, partnership contacts and policy contacts, to be used for reaching DEEP's target audiences. The Mainstreaming Partnership is essential in order for the DEEP partners and beneficiaries to bring together all their experience and lessons learned, and to use these to highlight good practice within employment policy.

2 C WAG - DEIN (WDA) CYFENTER Development Partnership £24,311 55635 19/01/2006 £97,247

Cyfenter Development Partnership will represent the interests of under-represented entrepreneurs in Wales comprising national organisations, equality and enterprise support organisations representing the interests of Women, disabled people, ethnic minorities and those in rural areas. Cyfenter builds upon the existing Under-Represented Groups partnership, which has been leading a major Objective1 programme as part of the National Business Birth Rate strand within the Entrepreneurship Action Plan that delivers start-up support to excluded entrepreneurs. EQUAL principles lie at the heart of Cyfenter's purpose: to identify and implement innovative policies within mainstream enterprise support so as to actively empower disadvantaged groups to access support. Identifying and strategically selecting transnational partners with experience of developing and implementing integrated enterprise support strategies foe excluded groups will be a key aspect of Cyfenter's activity. Cyfenter's main objective will be to undertake action-based research to influence and develop mainstream policy within pre-start and enterprise support for entrepreneurs who have not been assisted by the public sector to the levels one would expect. Impact will be experienced in two main waysfirst, enterprise support will be better tailored to the needs of all groups establishing enterprises and secondly, the proportion of excluded entrepreneurs accessing support incerases. Activities in Action 1 are based on developing a strong partnership, a needs analysis exercise, researching and strategically selecting transnational partners to support activities that will lead to an inclusive mainstream enterprise support strategy in Wales Activities in Action 2 will include action-based research, transnational exchanges and discussion facilitation, innovative enterprise support projects, targeted support for specific excluded groups, and actively encourage change within mainstream enterprise support policy and strategy. The focus will be on benchmarking activities in Wales with emaples from Europe and developing policy recommendations for public policy consideration in Wales to ensure equality throughout the Assembly's drive to create and entrepreneurial Wales.

A WAG - DEIN (WDA) Development Employability Equality Partnership (DEEP) £450,000 55934 19/01/2006 £900,000 Led by the Welsh Development Agency, the Development Employability Equality Partnership (DEEP) itself is innovative being composed primarily of voluntary organisations, including Chwarae Teg, Disability Wales, Age Concern, Oxfam Cymru, Scope, and others representing tyhe target groups which it aims to empower. Other members of the Partnership include Jobcentre Plus, Higher Educational Institutions, Swansea and Cardiff, the Welsh Consumer Council and Careers Service Wales. The principal objective of DEEP is context oriented innovation: the mainstreaming of equal opportunities into the policy making process affecting employability in Wales. (Theme A EQUAL, regional). the DEEP Partnership will focus on the integration / reintegration of excluded groups of people into employability. Primarily, DEEP will work on issues relating to gender, race, older workers and all those covred by the Disability Discrimination Act, and other socially excluded groups of people. DEEP will work to empower these excluded groups of people through; Process innovations, including development of new approaches, materials and technology for training technical/communication support workers and Equal Opportunities changeAgents. DEEP will support work with all relevant excluded groups of people, finding new ways to develop skills, confidence and deal with self-identification. Social diversity and the recognition of differences must be addressed. DEEP will promote policies that positively encourage and enable participation by excluded sectors. our aim is to change attitudes towards physical, institutional and attitudianl barriers to employability. Impacts will be measured and mainstreamed in Wales and Europe. During Action 2, DEEP will design action research into three areas of employability, Project 1 - Self Identity This project will focus on the personal barriers that exist to employment and the retention of employment by excluded groups of people. Project 2 - Valuing Volunteering This project will focus on the cultural, geographical and social values of volunteering in Wales, and the aspect of volunteering leading to /from employment. Project 3 - Achieving Diversity This project will focus on employer practices in developing and monitoring diversity at all levels. The intended outcome is to affect policy at a Regional, National and European level, on equality and equal opportunities issues surrounding employability. Other innovations and outputs could include development of non-stereotyping careers packs, new qualifications, and new roles for equality agents. Transnationality The DEEP Partnership has identified two transnational partners for Action 2 at this current stage. Westmeath Equal Development Partnership (Ireland) Work aspects include joint development and multi agency approach to mainstreaming equality into policy at all levels. The Opportunita Diritti Eguaglianza Abilitza (ODEA) (Italy) Work aspects include parallel working, exchange of information tools and skills, focusing on the developmant pf policy around the integration and retention of excluded groups of people in employment. The WDA provides advice to the Equality, European and Economic Development Committees of the NAtional Assembly for Wales, and provides access to regional policy makers and employers' networks. Through these main channels the partnership will be monitored and evaluated, in accordance with DEEP's Equal Op;ortunities Policy. All activities will be disseminated at all appropriate levels as decided by the partnership, and ESF funding will be acknowledged.

2 | C | WAG - DEIN (WDA) | Cyfenter 2 (Action 3) | £75,000 | 57482 | 27/07/2007 | £150,000

The aim of the Cyfenter 2 Mainstreaming Partnership Agreement is to influence the development of business support policies and practices (at a regional, national and European level) which are client focused and respond to the prinicple of diversity, through a programme of action research. "The purpose of (action) research and discourse is not just to describe, understand and explain the world - but also to change it"

Coglan and Brannick (2001). The additional aim of the Cyfenter 2 MPA is not only to disseminate the primary research findings of the Cyfenter 2 DP but to also emphasise the research findings of the longitudinal study that will highlight the distance travelled by URG's in enterprise in the past 12 - 18 months when growing and sustaining their business. This is a critical study that will inform mainstream business support and policy makers as to how business support have developed and responded to diversity within their support policies and practices. Tackling social exclusion by encouraging enterprise in the wider community is a high priority for not only the Welsh Assembly Government (Enterpreneurship Action Plan for Wales 2000 and Entrepreneurship Action Plan Review 2002-03) but also for theh UK Government policy agenda (A Comprehensive Strategy for Start-ups - Encouraging a more dynamic start-up market - a strategic framework and action plan 2003) and a wider European perspective (Entrepreneurship Green Paper 2003). The Cyfenter 2 work with under represented groups in enterprise that are growing and sustaining their business (women, disabled people, minority ethnic groups, lone parents, 18-30 and 50+) which are specifically mentioned in Theme C as groups who need additional targeted support to establish in enterprise. The Primary objectives of Cyfenter mainstreaming strategy are outlined below however it is not out intention to exclude other activity that may present itself as an opportunity to be reactive and responsive to policy target audiences or agendas.

Development Employability Equality Partnership (DEEP) £34,769 56445 19/01/2006 £77,266

Led by the Welsh Development Agency, Development Employability Equality Partnership (DEEP) itself is innovative being composed primarily of voluntary organisations representing the target groups we aim to empower. Other members include the Employment Service, HEIs, ELWA, Welsh Language Board and Careers Service Wales. the principal objective of DEEP is context orientated innovation: the mainstreaming of equal opportunities into the policy making process affecting employability in Wales. (Theme A, regional.) The WDA provides advice to the Equality, European and Economic Development Committees of the National Assembly for Wales, and provides access to regional policy makers and employers' networks. Primarily, DEEP will work on issues relating to gender, race older workers and all those covered by the DDA. During Action 1, DEEP will strategically select transnational partners, one able to provide good practice examples and one seeking to learn about equality mainstreaming in employment. Management and Development Project plans will be finalised. During action 2 objectives include work with employers to inform and support activities to change recruitment/retention policies and practices for disadvantaged people. Action research will demonstrate the effectiveness of equality mainstreaming re employability. transnationality will take place at all levels in all projects. process innovations include development of new approaches, materials and technology for training technical/communication support workers and equal opportunities change agents. DEEP will support work with all relevant disadvantaged groups, finding new ways to develop skills, confidence and deal with self-identification. Goal-orientated innovations include development of non-stereotyping careers packs and new qualifications. Social diversity and the recognition of differences must be addressed. DEEP will promote policies that positively encourage and enable participation by disadvanteged sectors. Our aim is to change attitudes towards physical, institut

2 C WAG - DEIN (WDA) Cyfenter 2 £313,875 57217 19/01/2006 £627,750

Cyfenter 2 is a pan-Wales partnership and brings together a wealth of knowledge and experience of enterprise support form the WDA, Welsh Assembly Government, and equality and enterprise support practitioners. Cyfenter 2 DP will conduct a programme of Action Based Research to identify the issues now being experienced by new under-represented entrepreneurs and provide an evidence base to inform the development of mainstream business support policies and practices. Cyfenter 2 will use the following methods to expand on the research conducted during Cyfenter 1: 1. Longitudinal study of approximately 1,000 individuals 2. Primary research with a further 3,000 individuals at quantative post-start stage 3. Regional focus groups in eight venues across Wales 4. 100 in-depth longitudinal study 5. Secondary research 6. 20-30 case studies 7. Specialised Surgeries The impact of Cyfenter 2 will be experienced in two ways - firstly, mainstream business support will be better tailored to the needs of all groups looking to grow and sustain their business, and secondly, the proportion of under-represented entrepreneurs successfully growing and sustaining their business will increase.

2 C WAG - DEIN (WDA) Cyfenter £450,000 57294 19/01/2006 £923,952

The Cyfenter Development Partnership will represent policy makers such as they Welsh Development Agency (as lead body) and the National Assembly, as well as experienced practitioners who represent the interests of particular groups of entrepreneurs in Wales - women, lone parents, young people, over 50's, ethnic minorities, refugees, disabled people and Welsh speakers. For the first time in Wales, the Cyfenter Development Partnership will bring together enterprise policy-makers and the equalities and enterprise practitioners to actively engage in discussion about mainstream enterprise support and excluded entrepreneurs. The aim of the Cyfenter DP is to influence and develop mainstream business support policies and practices within pre-start and enterprise support for excluded groups of entrepreneurs which will enable them to start up new enterprises. To achieve this aim the Cyfenter partnership have identified as their objectives four thematic areas for action based research: Appropriate finance being made available to under represented groups of entrepreneurs. Sustainability/growth of businesses being set up within these target groups. · Benefit/grant dependency for these under-represented groups during the establishment of their business. · Design for diversity - looking at the stereotypical image of an entrepreneur which is currently being portrayed. Impact will be experienced in two main ways - first, enterprise support will be better tailored to the needs of all groups establishing enterprises and secondly, the proportion of excluded entrepreneurs accessing support will increase. To support this action based research the Cyfenter DP will: · Represent the interests of underrepresented entrepreneurs in Wales comprising national organisations, equality and enterprise support organisations representing the interests of women, disabled people, ethnic minorities and those in rural areas. Bring policy makers and practitioners together to identify and implement innovative policies within enterprise so as to actively empower disadvantaged groups to access support. · Identify and work with transnational partners to exchange good practice, jointly develop policies and develop common European solutions. Work towards developing an inclusive enterprise support policy across Wales. It further expected that members of the DP will: 1. Contribute to the strategic direction and development of the project, engaging in project decision making processes. 2. Identify innovative policy development opportunities and actively engage in developing these areas. 3. Contribute to and/or oversee project activities, including monitoring project progress against objectives. 4. Attend monthly DP meetings and participate (on a voluntary basis) in transnational visits and working groups. 5. Provide specific target group expertise and draw upon relevant experiences. 6. Implement the principals of Cyfenter Equal Opportunities Policy. 7. Encourage participation and empower groups suffering from discrimination and inequality to participate and benefit in the project. By facilitating national and transnational development within this field it is anticipated that innovative policies can be put in place where enterprise support is more relevant and appropriate for all excluded groups in society and will lead to an increase in the proportion of excluded groups accessing enterprise support. The Development Partnership is seen to be the main vehicle for the delivery of EQUAL and an effective, inclusive partnership is identified as a key factor in promoting empowerment throughout the project.

2 | C | WAG - DEIN (WDA) | Cyfenter A3/1 | £12,536 | 57295 | 19/01/2006 £25,073

The proportions of SME's which are owned by under represented entrepreneurs - women, Welsh speakers, black and ethnic minority groups, refugees, lone parents, people aged 50 plus, disabled people and young people aged 18-30 are much lower in Wales that their relatives presence across society as a whole. Mainstream business support services available seem to respond less well to their specific needs. The aim of the Cyfenter Mainstream Partnership will be to influence the development of mainstream policies and practices which are truly client focused and respond to the principle of diversity - both reaching and supporting a wider range of potential entrepreneurs - through networking, mainstreaming and dissemination to business support agencies and policy makers at a regional, UK and European level. To achieve this aim the Cyfenter research will seek to bring together: - enterprise policy-makers; - mainstream business support agencies; - individuals who are considering starting a business, as well as those currently starting, running or growing a business; to actively engage in discussion about the needs, issues and drivers for excluded entrepreneurs - with the aim of creating a business environment in Wales where support and encouragement is available for all in their quest to start up, sustain and grow their businesses and recognises that most potential entrepreneurs from under represented groups have further to travel along the pathway to self employment before they are ready to start up in business.

4 H Welsh Assembly Government Cwlwm £1,447,358 57224 19/01/2006 £2,894,716

Cwlwm is a ground-breaking, sectoral partnership of key national organisations and grassroots practitioners working together for the first time to give a co-ordinated voice to the childcare and play sector and support a high quality, integrated childcare service for the children and families of Wales. Equal opportunity is the primary driver in our coming together and we welcome the opportunity to learn and exchange best practice with other member states as well as between members of the DP. We are convinced that empowering the childcare sector and building capacity is critical for the sector's successful development. We will develop and test innovative strategies to raise the profile of the sector and draw new workers into the workforce.

4 H Welsh Assembly Government CWLWM £223,150 57524 31/10/2006 £446,300

CWLWM is a pan Wales partnership of childcare and play organisations including the Children Strategy Division of the Welsh Assembly Government, Play Wales, Clybiau Plant Cymru, Cardiff City Council, Communities That Care and Wales PPA. Our principal objectives are to help create high quality, accessible, affordable childcare in Wales provided by qualified staff from a profession equally accessible to men and women. In Action 2, CWLWM is working towards these objectives by; *designing, testing and implementing new training and accreditation models for childcare, targeting pre-school and out-of-school providers, accessible and appropriate for both men and women, meeting the needs of potential and current childcare workers *researching alternative methods of funding the childcare sector *researching ways of encouraging new workers into the sector and design, development and testing of strategies to support this *designing, developing and implementing targeted support for childcare start-ups in the community and voluntary sector and business advisors working with the sector. Our purpose in Action 3 is to ensure our achievements towards these objectives are disseminated and mainstreamed across Wales both vertically to policymakers and national childcare and play organisations and horizontally to practitioners and local support organisations for the sector. CWLWM was originally created in response to the findings of a report (2003) by the Fusion Partnership on behalf of WAG and WDA. Key findings were; 1) The childcare sector is significantly under funded - CWLWM will report on innovative research into innovative and sustainable funding methods. 2) Whilst worth c.£1m per week the sector lacks an entrepreneurial culture - CWLWM is producing resources to support individual and third-sector start-ups. 3) There is a lack of adequate funding for training - CWLWM is designing and testing new methodologies for training delivery and accreditation. 4) There is perceived inequality of provision - CWLWM will report on how it is increasing childcare provision including through medium of Welsh and community languages. 5) Childcare providers do not perceive themselves to be businesses - CWLWM is researching, designing and testing a new community business toolkit. 6) Low pay is a key problem - CWLWM is working towards raising funding and pay in sector. 7) Engagement of stakeholders is key - CWLWM is adding value to Genesis Wales and other projects, including the private sector, and supporting the creation of a Childcare 'Forum'. Having produced the research reports and developed these resources for workforce development, CWLWM must now, ensure maximum awareness and take up within government and the childcare and play sector through a targeted mainstreaming strategy, using partners networks and links to local and central government and through 10 local workshops and one high level, international event. CWLWM addresses theme H by focussing on the Childcare and Play sector to overcome barriers of access to employment and training for women and other excluded groups, including minority language groups and men in a gender imbalanced sector. In Action 3 CWLWM will publicise and promote its Action 2 research and disseminate best practice methods for increasing access to sustainable and affordable quality childcare. Lack of childcare is a significant barrier to women's equality in the workforce and widening access to qualifications and training will help to combat low pay as well as combating job segregation and gender stereotyping by giving both men and women wider career choices. Workers in the sector will be empowered through the support CWLWM will provide in Action 3 to have a co-ordinated voice to influence strategy and policy, overcoming exclusion, promoting equality of esteem for the sector and for the bi-lingual culture of Wales. MPs potential for mainstreaming equal opportunities outcomes through its links with policy makers and grassroots practitioners is significant. It has to do with increased gender balance in the sector, appreciation of the value of diversity and opening up the profession to those who may in the past have been excluded. The project's mainstreaming of equal opportunities is targeted at changing attitudes to childcare among those working in the sector and attitudes to childcare among those with responsibilities for funding policy in childcare by offering robust research on the effectiveness of current and alternative models and recommending models which increase accessibility and choice.

3 E Womens Workshop Valuing Learning Strengthening Communities £51,584 57563 20/12/2007 £103,171

The Valuing Learning - Stregthening Communities (VL-SC) Mainstreaming Partnership aims to mainstream and disseminate the lessons of its work completed in Action 2. VL - SC is a Theme 3E DP and its work under Action 2 covered two main areas 1) Piloting recruitment, retention and recording systems to increase the participation in learning of individuals from hard to reach groups including women with mental health issues, young people, older people and people from a black or minority ethnic background. 2) Capacity building within teh community and voluntary sector organisations in Cardiff and responding to identified training needs e.g. Development of a Community Work Skills course in partnership with the University of Glamorgan They key objective of this MPA is to now disseminate the work and inform future approaches adopted in teh planning and delivery of lifelong learning and advice for individuals across the many sectors. It is acknowledged within nearly all Welsh Assembly strategic documents that skills and qualifications of working age adults in Wales are still too low; that quality of FE and work based learning is variable and that flexible but quality provision is essential to engage with those not presently in learning or work. This partnership will be promoting a flexible but quality approach to learning that can be adopted or further developed by organisations across the sectors. The main target audiences will be those concerned with learning in its broadest sense from both the statutory, private and voluntary sectors. The main target audiences will be DELLS, DELLS providers, FE Colleges, WCVA, Chamber of Commerce, County Voluntary Councils, Careers Wales, Job Centre Plus and smaller voluntary or community organisations The partnership organisations include:- Women's Workshop (lead partner) Voluntary Action Cardiff WEA South Wales South Riverside Community Development Centre The main outputs will be:- * A report on the resources and tools developed under Action 2. The report will detail the resources developed to a) access and retain in learning the target groups specified under Action 2 b) the tools developed to recognise and record a learner's initial experiences of learning and c) their progress and achievement in informal learning. * A website to hold all resources developed under Action 2 and those completed in Action 3. * One dissemination event targeted at private and statutory sector organisations engaged in learning, education, training, advice or guidance. * One dissemination event targeted at voluntray sector organisations engaged in learning, education, training, advice or guidance The partnership will participate in the WEFO showcase event in October 2007

1 A Wrexham County Borough Council North East Wales EQUAL Cyfartal Partnership £225,000 57296 19/01/2006 £450,000

EQUAL - CYFARTAL aims to test support mechanisms to help individual facing all forms of discrimination, within our geographically targeted local authority areas. By addressing leading principles of EQUAL (thematic approach, innovation, equal opportunities, trans-national co-operation, mainstreaming and empowerment), it is hoped that the new structures put in place within our project will allow out target groups to benefit first hand from any impact or benefits arising from the changing attitudes and perceptions of our policy makers, decision makers and local employers. The membership of the working group/technical advice will ensure that the target groups identified to date will receive expert advice and support throughout the development of possible innovative and creative projects. The full involvement of the target groups will deliver the outcomes required, such as higher levels of confidence, levels of skills and sense of inclusion for those currently excluded.

1 A Wrexham County Borough Council North East Wales Equal CYFARTAL Partnership £8,874 55634 19/01/2006 £21,698

The north East Wales DP core partners include: Wrexham CBC; Flintshire CC; Denbighshire CC; Yale, Deeside, Llandrillo and Welsh Colleges; ELWa; Careers Wales; AVOW; Chwarae Teg; Wales TUC; Stepping Stones. the Partnership will be guided bu EQUAL's leading principals. the DP will seek out innovative projects that empower people and communities to take greater control of their future regardless of race, sex, ability, or other discriminating factors. The Partnership will be fully inclusive, and be guided by Partnership members Chwarae Teg, in ensuring equal opportunities best practice. The Partnership will work with transnational partners who're carrying out similar/complementary activities, seeking innovation, ensuring that best practice is disseminated and mainstreamed to policy makers. this regional DP will address Theme A, Employability. the main purpose is the testing of support mechanisms to help groups and individuals facing all forms of dicrimination. the main impact will be promoting equality in the work place. the regional geographical focus will allow the development of a coherent programme and a cohesive partnership based around the urban areas of North East Wales. The rationale for the DP is that Social Deprivation and Exclusion within our urban areas dramatically affects any prospects for their economic development and growth. the groups the DP seeks to help include, but are not limited to, disabled, ethnic minorities, women, lone-parents, socially excluded, disadvantaged and non-traditional groups (non-traditional groups within the context of education, employment and training). within Action 1, the DP plans to develop the implemention plan of projects for Action 2, a Developmant Partnership Agreement (DPA), and a Transnational Co-operation Agreement (TCA). Action 2 activities will be focused on seeking to address the wider issues that restrict access to employment, with the outcomes shared with the intention of mainstreaming into public policy.

1	1 Colea Menai	Celt-Net Computer-aided Engineering Learning and Technology transfer Network	£217,594	56299	23/03/2005	ĺ
С	he overall aim of the Celt-Net proje omputer-Aided Engineering to prod	ct is to develop a cross border support service and technolog uct innovation, design and prototype. This aim will be realise product development in order to assist the growth of busines	ed by achiev	ing the foll	owing object	tives: -

Facilitating access to the modern manufacturing systems and expertise of the two institutions of Coleg Menai and Institute of Technology, Tallaght for design, virtial prototyping, rapid prototyping and prototype manufacture. -Creating a cross-border network for information exchange, learning and technology transfer in modern computer based product design and manufacturing techniques. -Exploring the potential for further collaborative cross-border research and development projects that innovative products and modern manufacturing techniques. -Developing e-learning and web based support material for the application of Computer-Aided Engineering principles in innovation, product design and manufacture. Development of a range of innovative, high quality, value 1 Coleg Menai £152,318 56294 26/04/2005 £203,093 added, speciality meat & cheese products The aims of this project are to identify and develop a number of innovative, high quality, value-added, speciality meat and dairy products, including continental-type fermented products. The projects' focus is to support the further growth and expansion of the food processing sector in North West Wales and Eastern Counties of Ireland by facilitating the development of new speciality products and process technologies, within the meat and dairy sectors. The project would address the deficiency of exclusively imported products from continental Europe, and the lack of technical knowledge in the UK regarding the manufacturing processes, by developing a small number of key meat products and the accompanying processing methodology, using the expertise of both partners and inputs from experienced consultants and meat processors, in order to enable SME's in the region to avail of the exciting potential of such speciality products in an adventurous and convenience driven market. This project will be bring together the facilities and expertise within the Food Technology Centre in Llangefni, NFC in Dublin and DPRC at Moorepark with the knowledge and ideas of local businesses to research and develop new innovative, speciality, continental-type meat and dairy products which the market desires. BUSNAS- An evaluation of the needs of food businesses for 3 £30,109 22/09/2003 £40,146 Coleg Menai 54566 on line training To identify and address the joint training and skills needs of employers on both sides of the border, and to meet the challenges and explore the opportunites that new technology presents to education, training and Human Resources Development. Specifically it will evaluate the need for on-line learning among food businesses in the selcted area; determine the needs of the respondents with regards to course content; and establish the resources available to them to make use of on-line training Conwy County Borough Joint Education Development Initiative (JEDI) £128,054 55123 26/03/2004 £171,907 Council see file 55122 Irish lead file Countryside Council for HABMAP- Habitat mapping for conservation and 2 £309,286 55444 17/08/2004 £412,383 Wales management of the Southern Irish Sea The aim of this project is to produce working habitat maps of the seabed of the Southern Irish Sea. The habitat maps will be used by coastal managers (conservation and fisheries) but also aims to disseminate the results to a wider audience (including eduactional facilities and industry) through the production of a CD and website. Countryside Council for THE CELTIC COUNTRYSIDE PARTNERSHIP £41,776 54155 22/09/2003 £55,702 Wales This is a pilot project to develop an innovative Irish/Welsh model facilitating the participation of rural communities in integrated environmental, social, cultural & economic development. The project will promote sustainable development through twinning of communities and their relevant public authorities, statutory & other agencies in the INTERREG area. The project will build on the successful North America/UK Countryside exchange programme which annually organises exchanges of experienced professionals to help local people/agencies adapt to change. Innovative aspects include the participation of key individuals within the communities to create new partnerships, The project will explore how public authorities can facilitae and support the participation of local actors through the whole management process. 25/11/2004 £212,739 Cyngor Gwynedd Council Celtic Tri £155,725 55104 The project aims to deliver joint initiatives and shared pilot studies in the provision of family heratige support services, and will create services in common. The project will also explore the existing genealogical and cultural connections between the two countries in a series of joint conferences. Cyngor Gwynedd Council CELTIC GARDENS £70,348 54766 29/09/2003 £93,798 2 2 The aim of this project is to establish and promote a genuine relationship between two similar public ornamental woodland park landscapes, with benefits of training, professional development and exchange of expertise, the sharing of pilot projects and joint marketing; and encourage the wider twinning of the park-gate communities and local schools in the two areas. Also to undertake active research into cross-border markets for both sites and promote joint marketing initiatives, building on site similarities and common interests, thus increasing the sites' contribution to the visitor activity of the respective areas; To provide better interpretation in a variety of forms, learning from best practice between partners, to inform, engage and enrich the experience of visitors, and foster the understanding of the public of environmental issues generally in an enjoyable and unconscious manner; To provide joint educational and informational off-site website content, to extend or enrich visitor experience, assist marketing and the preparation of educational visits, and provide maximum accessibility to the resources of both sites; To establish common standards for monitoring success against targets, plan for future developments and secure ongoing project management by regular virtual and physical meetings of partners. Regular e-mail contact will be kept, and management/monitoring meeting every 4 months. Living Coasts - Living Seas £113,475 56999 21/10/2005 £151,300 2 1 Cyngor Gwynedd Council The aim of this project is to raise the awareness of the marine and coastal environments of the Counties Fingal, Meath, Wicklow and the marine environment of "Penllyn a'r Sarnau" Special Area of Conservation. The prime objectives will be:- To simulate an interest and greater understanding within the coastal community of the coastal and marine environment; To engender a sense of pride and ownership in the coastal and marine candidate Special Areas of Conservation and Special Protection Areas amongst local people; and To encourage activities which are sympathetic to the aims of the candidate Special Areas of Conservation and Special Protection Area Denbighshire County Council RHYL/ATHY REGENERATION PROJECT £338,085 54141 22/09/2003 £450,780 This project is to encourage the regeneration of business & enterprise in the towns of Rhyl & Athy, both of which have similar problems in terms of high unemployment & deprivation. The 2 towns have a clear awareness of their problems - developing research/action plans identifying problems & solutions. Resources to support intervention by a public/private partnership regenerating enterprise activity through provision of business support, establishment of resources & actions targeted specifically to improve business start up & survival espeicially in the community enterprise sector. Through engaging with companies & social enterprises in the 2 towns the project will - reduce unemplyment, engage young people the inactive and minority groups in the local economy, create an innovative business environment and promote effective collaboration & co-operationn among businesses & enterprises in the areas where there can be mutual benefits 1 2 Deudraeth Cyf CARP- Content and Access for Rural People £98,488 55489 23/09/2004 £131,318 See Irish lead file 55488. 2 Deudraeth Cyf E-VOLVE £132,000 57487 05/12/2006 £176,000 See Irish Lead File 57485 Partners Collaborating in Training for Individuals with 16/06/2004 £341,446 3 1 Dyscovery Trust £256.084 55121 Specific Learning Disabilities (PACTS) Farmers Union of Wales TERRACELT £235,450 55475 16/06/2004 £321,750 2 TERRACELT is an exciting and innovative development designed to provide a comprehensive service for the agricultural service and the agricultural and the rural communities in Wales and Ireland by using the latest techniques in information technology. Dalkey Irish Heritage Town Company and the Isle of Anglesey County Council's Museums and Culture Service aim to promote a better understanding of both regions' archaeological and creative elements. Their histories demonstrate an array of shared cultures, historic roots and current artistic themes as well as a strong desire to present and celebrate this archaeological heritage in a variety of ways. This joint project aims to deliver a better understanding of cross-regional archaeology, culture and language by providing tours and visits to key sites in the Dalkey and Anglesey areas, workshops aimed at exploring the Irish-Welsh language and art residencies. The specific objectives of this are to increase visitor numbers to both centres, to make general improvements in the exchanges between both communities, to extend the scope of the tours and to make it all a more user friendly experience. The aim is also to develop the role of the Anglesey County Museums, Culture Service and Dalkey Irish Heritage Town Company and to encourage greater participation and understanding of Anglesey and Dalkey's past through the exchange of audiences and practitioners.

3 1 Ynys Mon County Council This project aims to support the development of the Interreg programme locally in North Wales and facilitate the growth of cross-border working

as a sustainable, variable and mutually beneficial method of working. The employment of a North Wales Interreg Development Officer and Administrative Assistant will give advice to local groups wishing to develop projects. The Officer will also work with those organisations requiring more in depth assistance to develop thier projects and their applications for Interreg funding.

3 2 Ynys Mon County Council WIN-Wales Ireland Networking

£35,400 55859

Since the commencement of INTERREG III A in 2002, potential applicants have enquired about the availablility of a similar scheme to provide financial assistance to travel in order to find and forge partnerships. The aim of the application is to introduce encouragement of Wales-Ireland networking and partnership building (WIN). The new scheme shall be set up to encourage and incentivise the formation of partners that lead to the submission of INTERREG IIIA applications. The project WIN will provide for approximately six organised networking events over the three years throughout the duration of the project. The WIN project has two components of travel and substistance for partnership forming leading to application and also measure specific networking.

Ynys Mon County Council Interreg Development Team £129,014 54168 22/09/2003 £172,252

The Interreg Programme as an European Community Initiative is aimed at grass roots organisations, often without experience of European Funding and who experience a lack of resources. In these circumstances the Interreg programme and the ethos of cross-border working could not establish itself independently. The project aims to support the development of the Interreg programme locally in North West Wales and facilitate the growth of cross-border working as a sustainable, viable and mutually beneficial method of working.

1	5	Adventa	Adventa - Management of LAG	£96,425	55702	02/07/2004	£203,000

The purpose of this project is to provide management and administration services for the Adventa LEADER+ programme. The project is designed to deliver Action 1 Measure 5 of the LEADER+ SPD through the provision of funding for administrative and operational costs. The project objectives are as follows: Employment of Programme Manager and Programme Co-ordinator Management of the LAG. ICT Development Monitoring and evaluation.

Adventa Project Officer's Salaries £244,033 55703 02/07/2004 £513,755 2 Adventa

The project is designed to deliver Action 1 Measure 2 of the LEADER+ SPD by providing support resources that will: * Increase the number, strength and viability of micro and small businesses. * Allow businesses to gain access to new markets locally, nationally and internationally. * Encourage more businesses to benefit from co-operating in collective actions. * Increase income generated from adding value to local products.

£176,082 55753 2 1 Adventa Adventa - Woodland Revival 07/03/2005 £370,700

The project will encourage the LAGs to develop complementary innovative techniques to add value to the timber industry in the two LEADER+ areas of Monmouthshire and Conwy whilst satisfying a growing demand for local timber from indigenous manufacturing businesses. The project seeks to address the issues of diminishing traditional/basic skills through bringing together complementary skills and know-how through the provision of training facilities. The project aims to add value to the timber products currently being produced in the LEADER+ areas through the provision of facilities for manufacturing, adding value to current marketing activities, researching potential new markets and encouraging new product development.

1 2 Adventa Adventa Green Tourism Co-operative

31/08/2004 £158,550 £75,311 56155

To add value to Monmouthshire's existing tourism through increased awareness of the diversity of tourism activities available. Also to lengthen the tourist season with a view to generating sustainable employment opportunities. This project replaces a previous submission that had the project number 55689.

2 Adventa Monmouthshire - a Living History

56158 05/08/2004 £101,000 £47,975

1. Identifying villages/communities, with a historical offer, that will add value to Monmouthshire's tourism. 2. Using circular trails to recount each village/community history. 3. Production of interpretation panels/leaflets for each trail. 4. Undertaking a promotional campaign in order to raise awareness of the trails. This project replaces a previous submission that had the project number 55691

1 2 Adventa Adventa Food Forum £26,656 56159 02/08/2004 £56,117

To identify consumer needs and address the barriers to food production, thus raising awareness of the benefits of local food procurement and stimulating the rural economy. This project replaces a previous submission that had the project number 55686.

Adventa Adventa - Back to Basics £41,756 56172

of a series of interpreted walking trails This project replaces a previous submission that had the project number 55687.

15/07/2004 £87,908 The purpose of the project is to develop and promote initiatives that will raise awareness of healthy locally procured food. Activities will include: *Development and promotion of work based CSA schemes. *A recipe/food publication *A marketing skills training programme for stall holders of local food *Local cooking skills events for children and young women *Development of a community walks/exercise programme *Development

56173 31/08/2004 £61,000 1 2 Adventa Adventa - Arts and Crafts Showcase £28,975

This project is designed to add value to Monmouthshire's existing tourism offer and high quality environment, through increasing awareness of the diversity of tourism activities available, attracting key target markets and encouraging longer visitor stays. It is anticipated that these activities will culminate in succeeding to lengthen the tourism season thus generating more sustainable and higher quality employment opportunities for the under employed. The aims and objectives of this project are as follows: * To enable Monmouthshire arts and crafts businesses to access key target markets innovatively. * To facilitate multi sector working and joint promotional activities * To develop market focused products that celebrate the strong arts and crafts culture of the county * To raise the profile and status of artists and crafts people in the county so that youngsters perceive the creative sector as a valid career option. * To explore the potential for developing and piloting accreditation schemes for the sector. * To add value to the visitor experience through development of interpretative materials at key arts and crafts venues. * To make use of new technologies in product development and promotion. This project replaces a previous submission that had the project number 55690.

15/07/2004 £71,250 £33,843 56174 2 Adventa Adventa - Food Links

The purpose of this project is to develop direct linkages between food producers and tourism providers to raise awareness of healthy locally procured food and rejuvenate the local economy. Activities will include: * Development of a series of promotional events to improve direct procurement links between food producers and tourism providers * Development of a programme of showcase exhibitions promoting local produce * A marketing campaign to promote the events * Attendance at trade events promoting the Food Links concept and message outside the mainstream programmes. * To facilitate the process of applying for Protected Designation of Origin within Monmouthshire This project replaces a previous submission that had the project number 55688.

5 7 Caerphilly County Borough Council	Caerphilly Common Sustainable Management	£87,105	55150	22/01/2004 £181,710			
Caerphilly Common and mountain is a very important area of 'rural wedge' of the county from recreational, landscape and biodiversity points of view which is not being managed at present. This project aims to build on the findings of a study undertaken which identified 6 primary elements of intervention: - Agriculture - To bring parts of the common back to agricultural use Recreation - To develop the recreational use of the common in a co-ordinated fashion, building upon high levels of usage. Ecology - To protect and enhance both species and habitats identified within the Species Action Plan and Local Biodiversity Action Plan through sensitive management. Anti-social behaviour - To reduce this, particularly in terms of litter reduction Landscape - To manage key sites Voluntary sector - The active involvement of a large volunteer base through the Caerphilly Woodlands Trust.

The purpose of the project remains unchanged from the first phase - the improvement of farm business viability; improving the quality of the farm environment; and developing expertise in farm business management and technical husbandry skills (through a combination of training, business developments, and grants). Increasing income generation and wealth retention - the use of grants will assist farm businesses to increase their competitiveness and to become more viable enterprises. The development of the primary producer sector will contribute to the whole of the food chain's economic productivity and viability. 27/03/2002 £40,438,642 Welsh Assembly Government Agri-food Development Scheme £8,087,728 52844 The scheme will provide a complete package of support for the Agri Food sector consisting of a series of components aiming to develop the processing capacity of agricultural products within Objective 1 area of Wales. The project will aim to stimulate investment, improvement and rationalisation from farm to plate. Welsh Assembly Government Agri Food Development Scheme £4,410,000 53693 An integrated scheme of development for the Agri food sector. Farm Improvement Grant - help farmers to adopt best practice, improve animal welfare, hygiene and product quality and to enhance, protect, and maintain the environment of the farm. Farm Enterprise Grant - help farmers to diversify into a wide range of activities and thereby help them generate alternative sources of income. 5 | 7 | Welsh Assembly Government | Wales Catchment Sensitive Farming Demonstration Project | £425,785 57105 12/10/2005 £1,559,253 The project aims to develop, test and evaluate a strategy for mobilising farming communities within the selected catchments to adopt catchment sensitive farming practices to improve the health of local water bodies. The lessons learned will assist the development of targeted measures within Wales to improve water quality to meet new standards arising from EC Water Framework Directive. The project involves evaluation of existing farm practices, advice on fertiliser and manure management, financial assistance for farm capital works, demonstration and promotion of good practices plus water quality monitoring, catchment modelling and independent project evaluation. In doing so it will provide employment, encourage land managers to adopt conservation measures and create buffer zones along watercourses. Welsh Lamb & Beef (NST) Improving the Health and Welfare of Farmed Animals £1,010,261 56699 20/09/2005 £2,055,261 Promotions Ltd The project aims to raise the standard of animal health and welfare on Welsh farms, through the development and use of animal health plans in a partnership approach between farmers, veterinary surgeons and the Farm Assured Welsh Livestock scheme. Restoration and sustainable management of degraded Woodland Trust £249,607 52726 27/03/2002 £650,872 ancient woodlands The overall aim is to achieve the restoration of degraded ancient woodlands throughout the objective 1 area and thereby generate economic activity, expand employment, produce sustainable certified timber, and reverses the decline of the habitats and species effected. £71,500 5 7 Ynys Mon County Council Anglesey Landscape Improvement Grant 2003-2006 54875 23/09/2003 £215,000 To contribute to the sustainable management, amenity and biodiversity of the Anglesey Landscape, by *Improving the landscape, biodiversity and agricultural value of Anglesey hedgerows and traditional boundaries *Improving the sustainability and amenity of planted landscape

features, small woodlands and traditional orchards *Improving the traceability of local provenance plants on Anglesey *Improving the mechanical management of hedgerows on Anglesey Fund: Number of matching projects: Totalling: P M Sponsor Name **Project Title** ProjectID Approved ProjectCost Grant Aber Valley YMCA Aber Valley YMCA Community Development £429,365 52922 22/03/2002 £640,055 The project aims to provide a community facility for the residents of Abertridwr and Senghenydd which directly contributes to the economic, social and environmental regeneration of the Aber Valley ward. This facility will be an extension of the existing YMCA building and will comprise a multi purpose hall with storage and changing facilities. The YMCA will expand its comprehensive programme of activities to address the problems faced by the community it serves. The extension of facilities will free the space for a greater focus on the development of education and training provision in the locality and will create an additional 1025 sq metres of floor space 4 | 4 | Aberdare College ENHANCED CNC TRAINING/WORKSHOP FACILITY £36,472 02/04/2002 £75,590 To provide local employers and industries with a new Computer Numerical Control (CNC) trainimng facility. The project will comprise Refurbishing/upgrading of CNC laboratory/workshop, Mew advanced CNC machinery (lathe/mill0 and latest development high powered IT equipment and support software. Aberfan & Merthyr Vale Youth Community led action in Ynysowen £603,642 53777 15/05/2002 £901,245 & Community Project The project seeks to establish and all-embracing community enterprise that will build upon the community regeneration initiatives that have already been developed. It will provide IT training, Transport for employment,community education, youth work and creche facilities Aberfan & Merthyr Vale Youth Out of School Childcare Provision £93.949 52981 22/03/2002 £136.741 & Community Project The Aberfan and Merthyr Vale Youth and Community Project are seeking to establish and out of school provision in the Merthyr Vale Electoral Division. The out of school provision aims to: *provide parents and carers of the Ynysowen area with a facility, which will enable them to take paid employment or undertake training for employment while providing the young people with a sare environment to stay *motivate young people by providing them with facilities in the interest of social and informed education for recreation and leisure time activities Aberfan & Merthyr Vale Youth Supporting the Social Economy in Ynysowen £703,381 56867 30/06/2005 £1,391,456 The project will build on the developments of the Aberfan and Merthyr Vale Youth and Community Project establishing itself as a sustainable community enterprise within the Merthyr Tydfil area. The project includes a local Community Transport scheme, Healthy Living Centre, Childcare provision, and will also develop e community and youth work provision. Aberglasney Restoration Aberglasney Mansion Restoration £296,000 55181 11/11/2003 £1,160,860 To restore Aberglasney Mansion and provide an additional indoor facility to the existing Aberglasney gardens. This will enable Aberglasney to attract tourists all year round and promote out of season economic activity in the area. Abergynolwyn Village Hall 55660 06/09/2004 £735,979 £451.743 Abergynolwyn Community Centre Management Committee This project is to provide a new community centre on an existing site. The ward in which Abergynolwyn lies - Corris Mawddwy - is recognised as one of the most deprived in Gwynedd. This community centre which replaces the existing one will meet the demands of the community. It will provide services and facilities for everyone in the community. Its training and other courses will increase skills and employability within the community. Through the cafe and part-time post office it will provide direct employment. The centre will also serve as an outlet for locally produced crafts and other services. Abertillery Sculpture Garden Abertillery Sculpture Garden Project £70,700 53896 22/04/2002 £101,000 Committee The project will result in a sterile and under used space at the Community Education / Community Theatre and Comprehensive School, Abertillery being transformed into an outside covered performance area with lighting and sound system. 2 3 Aberystwyth University Centre of Excellence for Visualisation in Wales £4,106,452 55323 05/01/2005 £9,897,498

The Centre of Excellence for Visualisation will provide an innovative, world-class virtual reality environment which will be used by SMEs across the Objective 1 region to enhance their competiveness and profitability. Its prime functions are to help Welsh SMEs to solve complex problems and create new products through the versatile imaging of complex information. The Centre of Excellence, which will be based at the University of Wales, Aberystwyth, will be equipped with "state-of-the-art" high level visualisation equipment, driven by high performance computing engines - a Reality Theatre, Immersadesks and a unique, fully-immersive "Hemispherium" - housed in a purpose-designed building which will include extensive micro-incubation areas for both spin-out and other newly-emerging high tech companies. The Centre's facilities will also link to smaller workstations particularly suited for use by SMEs and will provide a highly creative working environment. The Centre of Excellence project directly

```
addresses the need for Objective 1 SMEs to embrace new, leading-edge technologies which will significantly improve their competitiveness, and
to stimulate SMEs to invest in innovation in order to develop new products, processes and services. For many Welsh SMEs, the rapidly-
developing knowledge-based global economy has led to enormous changes in business processes and the way in which they organise their work,
and has placed increasing emphasis on the need to innovate and remain competitive. In particular, the new on-line market place is driving
companies to provide solution-led services and products designed to meet a customer's unique and immediate requirements. Markets are getting
smarter, more informed, and faster. Therefore, Welsh SMEs must be helped to become more adaptive and to be able to anticipate and implement
change more rapidly, in order to gain a competitive edge. Those that are the most innovative in their use of technology and adapt their business
processes and products to meet customers' changing requirements and specifications will be the winners, and this will in turn boost the Welsh
GDP. It is therefore becoming vital for many companies to be able to rapidly communicate their ideas and designs to customers in an easily
understood manner. Advances in information and communication technologies (ICT), especially via high performance computer facilities capable
of processing vast amounts of data in real time, can provide a solution to this - Visualisation. Seeing is believing, and is the most intuitive route
to decision making and assessing the impact of changes. The new Virtual Reality (VR) technologies are ideal for a wide range of visualisation
applications, for providing a new way of quickly identifying solutions to complex problems, and for designing new products without expensive
and time-consuming prototyping. They allow customers to visualise a new design, permit high-resolution "walk-through" animations, and enable
users to interact in real time with the model. Virtual reality also has a key role to play in training by creating a more interactive learning
experience, and is particularly useful in many industries where training may have to be undertaken in a hazardous environment or where
equipment downtime must be minimised. One further major issue for SMEs is knowledge management. The growing use of ICT has meant that
most organisations now have to store and process vast amounts of data, both for their own internal processes and to communicate with
customers, suppliers, etc. Turning these huge amounts of information into useable knowledge and ideas requires a totally different approach to
using technology, and the medium best suited to translating data into readily-understood information is visualisation. Visualisation/VR, therefore,
is a rapidly maturing technology that within a few years will become an essential tool for competitive enterprise in many different fields, such as
biotechnology, computer games and simulation software, the development of new materials, pharmaceuticals, geophysical exploration and
environmental studies, renewable energy generation, architecture, engineering design, manufacturing and fabrication, museums and galleries,
heritage tourist sites, etc. The problem for most Welsh SMEs, however, is that the costs of modern VR installations currently prohibit individual,
direct investment. In addition, it is still a comparatively new technology, and the skills required to make effective use of the facilities are in very
short supply. Consequently, whilst many companies can see the need for visualisation technology to provide them with a competitive advantage,
both now and increasingly in the future, they are reluctant to invest in the equipment and skills needed. At the same time, VR technologies are
developing exponentially, and if Welsh SMEs are unable to access and use these facilities, they are in danger of losing their competitive edge to
larger, global companies who have already invested in visualisation technology. Continued overleaf/ Continued/ These are the drivers behind the
proposal to establish the Centre of Excellence, which will be run by a team of expert technical and commercial staff. The team will provide
visualisation facilities for SMEs and public sector organisations throughout Objective 1 Wales, plus familiarisation sessions in visualisation
technologies for SMEs, consultancy in the optimum use of these technologies, provision of appropriate software, and an incubation facility to
encourage the growth of new enterprises. The high-level visualisation equipment at the Centre of Excellence will complement, but differ
significantly from, the medium level VR facilities at UW Cardiff and UW Swansea, and planned for the Digital Technium. Medium level VR
facilities require only moderate HPC facilities, and allow only 1 or 2 observers to visualise an object or an environment in three dimensions. The
Centre's high-level visualisation technology, however, will enable groups of users (potentially up to 10 or 20) to enter into and interact with a
simulated product or environment on a multi-dimensional level and even at a multi-sensory level (e.g. touch). This will allow them to manipulate
and adjust multiple variables and data, and visualise the results in real time with a high degree of realism and accuracy. This "human interface"
is where the Centre will be different from other visualisation facilities in Wales. The other main differentiating factor is that the Centre will focus
on developing the technology for use by SMEs and other organisations, via the application of the Centre's high-level equipment. SME users will
be helped to carry out commercial solution applications, e.g. to model solutions to complex problems without impacting on actual systems or
equipment, to analyse the impact of any changes on specific processes or structures, or to design new products without the need for extensive
prototyping. In addition, the Centre will focus on developing the technology on a multi-platform level, so that there is an easier interface
between the high-level computing facilities in the Centre and the users' own computer facilities, allowing results and images to be distributed
widely. This means that SMEs will have a choice of working at the Centre to produce new designs, prototypes, solutions, processes, etc, or using
their own facilities to work on the project, albeit at a more simple level. The Centre of Excellence will be based in a purpose-built facility located
on the University campus, initially covering 1,800m2 but with scope for expansion to 2,500m2 at a later date. Although based on campus, the
project has been structured to ensure that the Centre will be managed as a separate venture - a centre for Third Mission visualisation and ICT
activities exploiting university Second Mission programmes. The activities undertaken by the Centre will focus primarily on commercial (revenue-
generating) projects in support of Objective 1 SMEs. Some technology development will also be essential to ensure that the Centre is innovative
and remains at the forefront of visualisation technology, producing jobs and companies at the forefront of this new technology. The Centre's
activities will include: L Visualisation Consulting: The scope of this work will cover technical consulting for Welsh SMEs, i.e. the provision of
expert advice on visualisation technology and all related hardware and software for companies wishing to find out more about the technology or
to develop their own systems, and solution consulting, which will focus on solving specific issues or complex problems within industry, e.g.
modelling process streams, materials and three-dimensional objects (buildings, molecules etc.). Typical projects could include 3-D modelling of
the impact of mine waste management on watercourses and modelling of changes to land use (e.g. the development of on-shore and off-shore
wind-farms). The Centre will also undertake commercially-orientated project work (e.g. to develop and licence a specific 'product' or application)
which is sponsored by an external client. 占 Technology Transfer: The Centre will work with Objective 1 SMEs to enable them to become more
familiar with visualisation as a technique and also to help them use visualisation as an enabling tool. This will include short familiarisation
sessions for companies and also help for SMEs to develop specific training packages/products for their clients where visualisation is used to
simulate certain environments and tasks where direct experience of the task is not feasible due to its nature (e.g. rare events, hazardous
environment, etc.). ե Facility: The Centre's visualisation equipment and high performance computing facility will be made available to SME users
from the Objective 1 area. The market research and case studies undertaken to date has already stimulated considerable interest from SMEs,
from different sectors, in the potential use of the Centre's facilities to help them develop innovative new products for their businesses. 1
Incubation services: Space will be allocated for start-up companies to gain access to the equipment and staff. Such companies would be from the
emerging technology sector and have innovative ideas to sell to the market place, and it is anticipated that the service will encourage University
'spin-out" companies to be formed. Continued overleaf/ Continued/ 🗕 Innovation: In order to remain at the cutting edge of visualisation,
developing innovative, practical applications of the technology will be an integral part of the Centre's use, and developing and licensing new
products for SMEs will be an important ingredient of the Centre's activities. To deliver these services, the Centre of Excellence will be a project of
considerable scale and importance. The initial start up will require investment of c.£2.95m for the visualisation and ancillary equipment plus
c.£4.49m for the building/land, and c.£2.34m for the project support staff and other running costs. The financial model for the project shows
that break-even is expected in year 5, and that even with the on-going expenditure needed to maintain the visualisation equipment at the
leading-edge of innovation and technology, the Centre represents a viable long-term business proposition. A project of this scale will have a
substantial positive impact on the region, both in terms of the economic benefits represented by the creation of new jobs, enhanced turnover
amongst existing Objective 1 SMEs and the birth of new high tech companies, but also with regard to the raising of the regions' skill base and its
overall technological profile. The demand for the technologies and services to be made available to Welsh SMEs via the project has been
assessed by undertaking a benchmarking study, a market research survey which formed part of a detailed Scoping and Feasibility Study,
interviews and sector-specific case studies/scenario-building exercises. The Centre of Excellence has been taken forward by a Steering Group,
and has been designed to be a long-term, self-sustaining commercial venture. This project is an application for Objective 1 ERDF funding to
pump-prime the first three years of the Centre's development, and is essential to recruit the technical support staff needed to encourage and
assist SMEs to use and exploit the technologies, to contribute to the construction of a high quality, business-friendly building to house the
visualisation/VR equipment, with technology transfer and incubation facilities, and to add the Hemispherium, which would be unique in the UK.
Without the Centre and its commercially-orientated supporting staff, the impact that the visualisation equipment could make in transferring
knowledge to, and thereby increase the competitiveness of, Welsh SMEs, would be severely limited. The project will be directed by a Board of
Directors representing all stakeholders, with the Chairperson elected by the members. By the end of the 3-year period covered by the Objective 1
project, the Centre itself will create up to 211 new high value jobs across the Objective 1 region, and safeguard a further 411 jobs. These figures
are directly related to the Centre's activities and take no account of the indirect economic benefits that the Centre will generate. Likewise, the
project will encourage the development of around 70 new high tech/knowledge-based sector companies, many of whom will be spin-out
developments or will make extensive use of the Centre's incubation facilities. By the nature of the project, these results are likely to increase
significantly over the longer-term. With investment in R&D currently standing at 0.6% in Wales compared to 2.6% in England, there is a clear
need for projects which are focused on stimulating Welsh SMEs to invest in research and innovation in order to develop new products, processes
and services, and to work more closely with Higher Education Institutions to derive added value from their research work. The Centre of
```

Excellence project directly addresses this need and will become one of the most advanced Visualisation Centres in the UK, with a world-leading facility in the way that its prime function is to address the diverse needs of SMEs. The Centre of Excellence project is fully consistent with the objectives and priorities of the Wales Regional Technology Plan and the Innovation and R&D Partnership's Action Plan. It also has full support from a range of partner organisations, e.g. the Techniums, CETICs, other UW colleges and departments, IGER, the National Library, the National Botanic Garden, etc, all of whom have indicated that the Centre's activities would complement, support and enhance their own commerciallyorientated work. In addition, the strong associations already in place with the global companies offering visualisation and HPC equipment will enable strategic alliances to be formed to allow Welsh SMEs to gain access to the rapid advances in technology. SwyddfAgored - Welsh Software Localization Aberystwyth University £155,650 55329 27/07/2004 £320,599 AIMS & PURPOSE The rationale included in the SPD under Priority 2 clearly emphasises the importance of ICT and its potential for breaking down physical barriers that isolate businesses and the need to increase access to ICT as a means to tackle peripherality, especially in rural communities. Barriers to access also include language barriers and this project will translate the open source office suite software OpenOffice to Welsh and combine it back to back with the already existing English version so as to offer a choice of screen languages without exiting the programme. An existing Welsh spell-checker will be integrated with the Welsh office suite. OpenOffice is a well-established programme developed by Sun Microsystems which holds 30% of the market in Germany and is gaining ground in the UK and elsewhere. It exists in over 20 language-versions including, to our knowledge two European minority languages. Translation of open source software is the most cost-effective way, and very often the only way, for minority languages to acquire office software (see Mercator Centre report to the European Parliament; http://www.europarl.eu.int/stoa/publi/99-12-01/default_enhtm#top The aim of the project is to stimulate demand and usage of ICT technologies through the removal of the language barrier and the creation of a Welsh language option for Welsh speakers and those wishing to interact with ICT through the medium of Welsh. IMPLEMENTATION The project is labour intensive and will be carried out mainly at the Mercator Centre, Department of Theatre, Film and Television, University of Wales Aberystwyth but with some input from Canolfan Bedwyr at University of Wales Bangor. The work will be carried out under the direction of a Project Manager (working on a fee basis approximating to half-time) who will write the job descriptions, liaise with outside partners and the monitoring group, lead the launch and publicity effort, and coordinate the following five strands of the project within the time framework. 1 All technical aspects will be in the hands of a full time software engineer with the exception that the programming needed to switch between the Welsh/English versions will be commissioned externally. 2 The translation will be carried out by a large number of free-lance translators (perhaps as many as ten) managed by a full-time translation coordinator who will review and standardize the translations. The bulk of the work on strands 1 and 2 will be done in year 1, though as the result of trialing in year 2 some extra programming and revision of the translation may need doing in year 2. New features may be added to OpenOffice while the project is running, and within time constraints we shall update to the last possible moment. 3 Trialing by SMEs willing to test the software will be coordinated by the software engineer in year 2. This will involve a programme of visits and telephone support for the trialers. 4 The translation coordinator will write the Welsh manual in year 2 and see it through the press. 5 Launch and publicity will be led by the Project Manager but the preparatory work will have ben done throughout year 2. Great emphasis is placed on getting the software out to users. There will be a half-time post in administrative support for the project. We shall pay a terminology expert on a consultancy basis. (see Background) 1 3 Aberystwyth University Ceredigion Tourism Quality Initiative £286,500 54730 08/12/2003 £612,067 The aim of the Ceredigion Tourism Quality Initiative is to deliver a high quality provision of advice and support relating to initiatives in tourism quality to 856 tourism related SME's in Ceredigion. 4 Aberystwyth University Sci - by Bus £239,984 56360 31/01/2005 £533,296 The aim of this project is to raise the awareness of the importance of science in society. The project aims to generate interest in science and increase the uptake of science based learning opportunities for adults in rural areas of Ceredigion through the provision of a mobile facility. The 'bus' will be equipped as a laboratory, exhibition space and classroom. Amgen Cymru (Cynon Valley Bryn Pica Landfill Site £510,000 55892 17/09/2004 £1,900,000 Waste Disposal) Co Ltd To develop a recycling and composting facility at the Bryn Pica landfill waste disposal site. The recycling facility will be designed to accept industrial and commercial waste arisings. The composting facility will be able to process suitable waste arisings from municipal and commercial waste streams Amlwch War Memorial Refurbishment of the Annex Building of the Amlwch £129,609 55897 21/07/2004 £182,273 Institute Memorial Hall The project is the 2nd phase of the Memorial Hall's improvement programme. Improving the building (Annex part of the Hall) will provide a multi purpose resource space for the provision of facilities that will house a range of community support activities. These will include training and learning, a creche facility, a meeting room for community groups; and to host informal capacity building events Amman Valley Enterprise AVE Regeneration Scheme £173,708 53270 20/03/2002 £238,414 The overall aim of this project is to help community groups in the project area develop and implement plans for the economic, social and environmental regeneration of the area. It will build community capacity in the area through support, advice and grass roots community development work so that partnership and joint working can empower the community to deliver. Anglesey Agricultural Society NW Wales Events & Exhibition Arena 07/07/2003 £540,000 £226,800 54722 The project will develop a new and multi purpose facility to attract Events and Exhibitions and other activities to North Wesr Wales. It aims to develop a large indoor contemporary facility capable of drawing new events and exhibitions to the area and to develop substantial community facility capable of holding 1200 persons (seated) Objectives- To enhance and increase the use of one of the existing units on the Anglesey Showground, considered by locals and independent consultants to be under utilised. Develop a venue capable of attracting top quality events to this corner of Wales. Develop the showground as a major facility for events and exhibitions:concerts, trade and craft shows, large meetings / conferences and dramas. Create a new and modern Centre for North West Wales to comliment similar facilities in Llandudno and Llangollen. Develop an all year round programme of events in order to sustain full time employment Attract additional visitors to the Island and encourage them to stay overnight in local accommodation. Provide an additional centre for the new "wet weather" facilities in the area. To safeguard/create 22 jobs. 5 6 Antur Teifi Producer Support Service Phase 2 - Finding new markets £147,000 55855 16/12/2004 £259,126 Building on the success of the Phase 1 initiative, the project will support the sustainable economic development of the product sector (food, craft and local culture) in Ceredigion. The project will provide support and advice to SMEs through a range of activities to identify new markets, create cross-sectoral networks, develop local supply chains and develop innovative ways to promote local products Producer Support Service (Food and Craft) 19/03/2002 £423,356 £211,678 The project involves offering specialist support and assistance for local food and craft producers and diversified farm operations in Ceredigion as well as co-ordinating networking activities and event organisation. MOBILE ICT TRAINING UNIT £364,766 52834 08/04/2002 £755,994 4 4 Antur Teifi The project will provide innovative ICT based training from a mobile unit targeted specifically at the agricultural sector. This would include farming families and their employees, as well as related agricultural businesses and providers to the sector including contractors; machinery retailers and engineers; merchants; feed companies; etc. Training woud not only be delivered to these sub-sectors, but would also be provided through a variety of community based groups. 2 Antur Teifi CARMARTHENSHIRE TOURNET £443,622 52832 13/06/2002 £887,244 To improve the quality, professionalism, competitiveness and innovativeness of services and businesses within the tourism, hospitality and cultural industries in Carmarthenshire. This is to be facilitated by the use of ICT in business co-operation and marketing of relevant local products and services. LLANDYSUL COMMUNITY DEVELOPMENT PROJECT Antur Teifi £52,819 53704 21/03/2002 £106,639 The aim of this project is to create a sustainable partnership involving public, community and voluntary groups to design and implement long-term capacity building programmes for the regeneration of the area. A community needs study will be undertaken to identify local needs and support the development of community based projects. This project was incepted by a group of residents who were concerned at the economic and social decline of their community over recent years. 3 Antur Teifi Carmarthenshire TradeNet £228,825 54286 01/07/2003 £465,661

This project aims to create more and better business and employment oppourtunities in the country. Objectives: To write a joint business plan for the TradeNet Networking Project and to bid for objective 1 funding. To facilitate SME creation and growth through improving the quality, content and variety of networking oppoutunites foe SMEs in Wales. To develop a partnership of networking organisations that have a shared view of how to enhance and increase the effectiveness of their work. To create new networking oppourtunities where no activity currently exists. To avoid duplication. To co-ordinate and manage the funds obtained in order to ensure best value and their targeted use. To provide additional funding and support to new and existing networking organisations so that they can improve their effectiveness. To provide 'downstream' support through existing business support services and provide new services where identified. To set up a co-ordinating infastructure that would support the project and individual organisational needs where applicable. To ensure that an ongoing mechanism of reasearch, feedback, idea generation and evaluation is in place. 30/10/2002 £452,289 5 6 Antur Teifi Development of 'Papurau Bro ' - Welsh Community Papers £189,961 54199 Aim is to build close links between 5 existing monthly Welsh Language Community Newspapers in Carmarthenshire and to ensure the sustainable development of those newspapers. The project will specifically target the issue of linguistic exclusion. Project will provide a professional basis for developing media interaction between the various Welsh speaking communities.The 5 newspapers are currently being run on a purely voluntary basis with very limited resources. This project will recruit dedicated full time staff to co-ordinate the developments. The staff will consist of a Senior Editor, Youth/Women's Editor, Recreation/Disabilities Editor, Advertising & Marketing Officer and a Secretary. A 15% increase in both readership and volunteers is anticipated each year. The core volunteer team will be involved in editorial, design, print and distribution of the monthly publication which will help increase the skills base of local people in rural communities. 3 Antur Teifi Prosiect Papurau Bro Dwyrain Sir Gaerfyrddin £123,862 56943 27/04/2005 £170,000 The purpose of this new project is to provide a service to two Welsh language community newspapers in Carmarthenshire, Glo Man in the Amman Valley and Sosbanelli in the Llanelli area. Specifically, the project will employ a development officer who will be responsible for developing the voluntary run papurau bro, extending the volunteer base and strengthening social, community and economic roles. Antur Teifi Prosiect Papurau Bro Ceredigion a Sir Benfro £325,458 57068 29/03/2006 £501,707 This project will establish community enterprises through the sustainable development of 7 existing Welsh language community newspapers (providing a community information service) in Ceredigion and Pembrokeshire. The project also aims to establish a new community paper in the Pembroke Dock area. The project will work with groups of volunteers, providing editorial, structural and marketing advice. 4 Antur Waunfawr Antur Werdd £79,987 54036 09/07/2002 £212,601 Cynllun ailgylchu ac ailddefnyddion dodrefn wedi'i leoli yn ward Peblig yw Antur Werdd, a fydd yn diogelu 8 swydd ac ar yr un pryd yn gwarchod yr amgylchedd lleol. Antur Waunfawr Ailgylchu fydd yn rhedeg y prosiect newydd, busnes cymunedol sy'n bodoli'n barod sydd eisioes yn cynnig gwasanaethau ailgylchu cymunedol ac ailgylchu deunydd swyddfa yn yr ardal. Nodir y nodau a'r amcanion isod: Darparu cyfleoedd gwaith a hyfforddiant i bobl dan anfantais mewn diwydiant newydd sy'n tyfu. Sefydlu'r rhwydwaith mewnol ar gyfer busnes cynaladwy i ailddefnyddio ac ailgylchu dodrefn nad oes ei angen yng Ngwynedd. 3 4 Antur Waunfawr WARWS WERDD £518,325 54936 30/07/2003 £910,282 The aim of this project is to build a Green Warehouse that is environmentally friendly centre to serve the people of Gwynedd. The project will create a viable business that will collect, select, repair, and sell and distribute re-cycled goods and provide work and training for underpriviliged people. The Green Warehouse will be located on the Cibyn Industrial Estate (Welsh Development Agency Site) at Cwm Cadnant in the Peblig Ward. 3 Arena Network Green Dragon Environmental Support for SME's £2,080,916 55137 26/02/2004 £4,488,216 The aim of the project is to support businesses within the Objective 1 region to improve their competitiveness and potential for growth as a result of implementating Green Dragon environmental management systems or other recognised EMSs. 2 3 Arena Network £1,530,194 52706 26/03/2002 £3,185,080 Environmental Innovation and Competitiveness This is a strategic and co-ordinated programme to provide the driving force to encourage business to improve their environmental performance. 3 4 Arts Factory Going for Growth £279,008 54053 15/07/2002 £549,008 The project will enhance existing Arts Factory Community enterprises such as Environmental design, Graphic design and Managed Workspace. These enterprises have reached capacity with current resources. Unmet market needs have been identified in the business plan and the organisation is seeking to grow these existing enterprises. The project will support the creation of new Arts Factory community enterprises to operate in new markets- energy efficiency, recycling, consultation/market research, renewable energy and additional managed workspace. The main aim of the project is to respond to increasing buisness opportunities in Rhondda Cynon Taff, gear up the Graphic Design enterprise to respond immediately to broad band challenge and offer a wider range of learning oportunities for local people. The project will also invest in the development of new Arts Factory community enterprises. Going for Growth will meet the strategic aims of the Objective 1 Programme through the creation of high quality jobs in diversified innovative nad knowledge driven economy, building sustainable communities, building a dynamic and comptetitive business sector as well as providing a skilled adaptable work force. The project will complement Better Wales, Winning Wales and Cymru Ar Lein strategic frameworks. Parc 21 Feasibility Study 3 4 Arts Factory £30,000 54679 21/01/2003 £55,000 This is a feasibility study to investigate the options and related costs for the redevelopment of Highfield Industrial Estate in the List 2 ward of Maerdy. This Estate was previously in the ownership of the local authority and is semi-derelict. The vision for this Estate is that the applicant will bring it back into community ownership and redevelop the whole site providing industrial/commercial premises for other community enterprises. This site would then be known as 'Parc 21'. The vision also includes the possible use of some floorspace for training activities (related to the development of the social enterprises and more general community training) and possibly linking the site to renewable energy plans for the area as well as visitor opportunities. ICT links - including broadband access - will be explored as part of the study. 4 Arts Factory Going For Growth Phase 2 £200,396 55695 22/12/2004 £308,385 The project is intended to grow the capacity of Arts Factory Environmental Design SErvice to provide more services to community based partnerships. The project will undertake environmental design projects in partnership with community based organisations that will enhance local space and involve local people and groups in the regeneration of their areas. The project will undertake a wider range of environmental design projects using new forms and materials and will create an annual Art Camp to respond to the need for skilled community arts practitioners in the area. The project will also extend the range of consultation techniques available for staff and volunteers engaged in environmental design projects **Building Community Assets** £286,000 56661 22/12/2004 £440,000 3 Arts Factory It is envisaged that the project will provide facilities in the Rhondda enabling participation in a range of community led activity, support local people in taking on unpaid volunteering roles, deliver a range of services and advice to local people, and run festivals, open days and fayres. Awel Aman Tawe Community Wind Farm £94,072 53948 18/09/2002 £180,201 Awel Aman Tawe Research into developing a community-led wind farm and energy efficiency project in the Upper Amman/Swansea Valley area. B & P Industrial Goat Mill Road (East) Industrial park £307,813 54753 10/09/2003 £1,198,709 Developments Limited The project will provide 3 single storey industrial units totalling 5,130m2 on a brownfield site at Goatmill Rd. The buildings will be constructed in accordance with BRESC|U or similar standards and a BREEAM assessment will be undertaken. 4 4 Bangor University N. W. Wales Management Developent Centre £6,404,606 54809 18/07/2003 £12,809,210 The aim of this £12.81 million capital project is to create a flagship, state-of-the-art Management Development Centre (MDC) as part of an expansion to the School for Business and Regional Development (SBARD). The MDC will enhance SBARD's capacity to serve the higher level learning and management development needs of students, businesses and organisations in North West Wales. This will be achieved through the innovative use of a unique and self-sustaining set of resources in the form of historically unique Grade II listed buildings, allied with premier teaching facilities and a high technology audio visual/telecommunication infrastructure. The MDC will give North West Wales a learning facility for business and management education that will rank with the best in Europe. Building on the reputation and location of the University of Wales Bangor and the academic status of SBARD, the project will be located within the University campus in the City of Bangor. Bangor University Sharing the Vision £654,121 03/11/2004 £1,438,331

3 Blaenau Gwent County Borough Council	Community Link - Cwmcelyn, Glanystruth and Blaina	£95,617	53805	25/03/2002	£136,595	
The project is to replace a footbridge across Cwmcelyn Pond (the previous footbridge having been demolished by the County Borough Council because it was dangerous) to link the communities of Cwmcelyn, Glanystruth and Blaina. The footbridge will provide a safer route to school for children and parents attending Cwncelyn Infant and Nursery School and Blaina Junior School. A safer journey to Cwmcelyn Chapel and to the newly regenerated heart of Blaina. The project is being developed by the Council with through regular meetings / consultation with a range of residents and local agencies. The residents of Cwmcelyn have formed a tenants and residents association (Friends of Cwmcelyn) as part of a campaign to regenerate the village and replace the footbridge. The local community has come together to improve the area of Cwmcelyn, in particular to make environmental improvements to the pond and make it a place where the community can enjoy and use its natural beauty. The plan is to put a path around the pond, place litter bins, plant heather and other shrubs and put benches and tables in the picnic area. The project has developed from a single issue into the catalyst that will help to increase self esteem and community capacity and to increase confidence amongst local people so that they feel more able to identify, develop and access future opportunities for a range of regeneration initiatives. Nantyglo and Blina Town Council has submitted a petition of 265 names in support of a replacement footbridge. Numerous letters of support

The Wales Spatial Plan contains support for the implementation of the recommendations of the Five Court Regeneration Report (Appendix F).	l's Corporate t of 'A				
2 5 Bluestone Mansford Estate Bluestone Renewable Energy Support Project £665,000 56552 24/04/2007 £1	1,900,000				
This project will complement the aim of the main Bluestone Holiday Village. The project includes capital expenditure for solar water he panels to appropriately orientated chalet roofs, a bio-fuel (bio-diesel) generator for on-site supply to lodges and other facilities, associ building works to house the generator and electricity infrastructure to the public network for power supply and site back up.					
6 4 BP D'Arcy Developments New D'Arcy Business Centre - Remediation Works £300,779 55646 16/09/2005 £8	,				
The former Llandarcy Refinery Site, which is over 1,300 acres in area, is to be transformed into an Urban Village comprimising new hower 65,000m2 of employment and supporting facilities. The development will be high quality inclusive and sustainable, facilitating reg of the area and strengthening the economy of the region. The mixed use development is designed for people to live, work and enjoy so leisure time within the area. It will provide significant employment and new homes along with other commercial and community facilitii improve the environment in the area and provide employment and high quality sites for new business and industry or relocation sites for businesses. Extensive remediation, earthworks and infrastructure are necessary to provide access and services and these will be incorp phased manner over a period of around 30 years. This element of the project aims to remediate a total of 2.5 ha of contaminated land Llandarcy site as a pre-requisite for the development of the new D'Arcy Business Centre & Britannic Office Village. The area to be decor is detailed on figure 1. Specifically the project will decontaminate 2.5Ha of land that is subject to moderate to severe petroleum hydroc pollution. Remediation of hydrocarbon contamination will be achieced by biotreatment of the soils, with reuse of the soils as part of the development.* The project will cover both statutory and non-statutory remediation works. However, Objective 1 funding is only require finance part of the non-statutory remediation. BP, as current owner of the site, will bear the cost of all statutory remediation works. Ad remeditation work - over and above statutory requirements - is necessary on order to creat a safe, clean and high-quality environment for the development of Llandarcy to go forward successfully. The final outcome will be the bringing forward of 2.5Ha prime employment which in turn will enable the development of the new D'Arcy Business Centre and Britannic Office Village. This will provide close to 5,4 high quality of	generation ome es. It will or existing orated in a on the ntaminated carbon ed to ditional required and land, 198m2 of ategic oremises				
The Trust is established to promote fro public benefit the urban regeneration of areas of social and economic deprivation, in particular,					
of Blaenymaes, Portmead and Penplas, Swansea. In so doing, the Trust manages a local venue called the 'Action Resource Centre' or 'Al	the areas RC'.

To trial biomass crops new and indigenous to Wales and explore the potential environmental improvements. The improvements are invisaged to be heavy metal removal and conversion of sewage/slurry waste to energy by applying it to enhanced growth biomass crops. The aim of the project is to contribute to the goal of making Wales a global showcase for clean energy. 2 3 Cardiff University Geoenvironmental Research Park £2,506,714 53766 11/06/2002 £5,013,428 This project is aimed at creating a Geoenvironmental Research Park (GRP) on a former industrial site in the Wales Objective 1 area, which has been identified as a suitable location for the GRP and will be used to carry out a range of Geoenvironmental field experiments. In addition to creating a facility to carry out front line research, the GRP will have the potential to create a number of high technology SMEs working in the broad field of Environment and Sustainability. The GRP will work towards programs of research, application and development for problems dealing with environmental sustainability.	The project is to relocate a unique Combustion Test and Research Centre ("CTC") to Neath Port Talbot from its current location in England. The successful establishment of this centre will contribute towards the project applicant's aim of developing Wales into a global showcase for sustainable energy innovation. QinetiQ plc, who currently own the equipment, have taken the decision to close the facility and unless an alternative suitable site can be identified, the facility will be decommissioned. It is proposed that the equipment is donated to Cardiff University and a contractual relationship established between the two organisations to secure the CTC and enable further sustainable energy research and development work to be undertaken in Wales. Circuit of the proposed that the partner after consultation and conscious of a range of

1 3 Denbighshire County Council Denbighshire Tourism Promotion & Development Project	£498,770	52700	02/04/2002 £1,204,173

The project seeks to develop and enhance these brands through a new co-ordinated, promotion and development campaign, this will bring aded value to the current marketing facilities by increasing the volume and value to the current marketing facilities by increasing the volume and value of tourism within Denbighshire and thus support private sector investment and viability in the local tourism area. The project will be implemented and led by Denbighshire County Councils tourism unit in collaboration with the National and Regional tourism bodies and the private sector. The promotion and development campaign involves a project co-ordinator and will aim to raise the profile of the county in the UK and overseas markets. This will stimulate interest and act as as catalyst to the local tourism economy. The project is intended to grow tourism SMEs and tourism employment through Marketing enhancement ; research into new and niche markets; Promotion and development; Improve distribution; Overseas promotion; Improved PR.

Denbighshire County Council Denbighshire Business Support Project

£653,063 52697 20/03/2002 £1,386,871

The project is a phased project providing a business advice service for eligible SMEs micro businesses and start ups within Denbighshire. This project will be provided by Denbighshire County Council Economic development Unit and also its Library and Information Service in partnership with Clwydfro Enterprise Agency and will complement the Business Connect Plus regional project. The project will facilitate access to business and enterprise support. Encourage Management Expertise and innovation Stimulate the survival rate and expansion of businesses through the maximisation of competitiveness and expansion of markets. Provide opportunities for IT and telematics development and improve quality control systems. Facilitate networking opportunities for SMEs Foster an enterprise culture to bolster the local economy Generate new employment opportunities. The project is located in part in the most socially disadvantaged ward in Wales and in whole will directly benefit areas of social disadvantage. The project will attempt to couteract this degeneration through researching businesses/sectors identified as possessing growth potential, focusing on rural business development and business support specific to the tourist sector.

Denbighshire County Council FFORDDLAS ENTERPRISE CENTRE

£261,320 53545 04/07/2002 £688,697

The Fforddlas Enterprise Centre is a proactive and targeted strategic development on a brownfield site designated for employment development in the Denbighshire Priority 3 target area. The project will create employment opportunities ,improve the local environment and bring into productive economic use some 513 sq.m/5,520sq. ft of currently redundant property alongside 6 newly constructed units offering some 479sq.m /5,156 sq ft of additional employment space. Redundant property brought back into use will comprise of 2x256sq m/2,760sq ft large business expansion units. Additional employment space created by the project will comprise of 2x68.5sq m/737sq ft expansion units and 4x85.5sq.m /920sq. ft expansion units. The most significant aim of the project is to stimulate indigenous SME growth. Equally important the project will assist in encouraging inward investment. The project will provide a catalyst for further economic development and assist in the diversification of the economic base away from the traditional low paid seasonal employment structure in the target area.

3 | 4 | Denbighshire County Council | FFORCE-Fforddlas Community Enterprise

£211,415 53568 04/07/2002 £424,831

The project is a unique proactive and targeted project that aims to support the creation and expansion of opportunities in the social economy. It will enable the involvement of local people in providing community enterprise solutions to problems of social exclusion and will create employment and learning opportunity. The project is located on a brownfield site in Rhyl SW and will improve the local environment whilst bringing back into productive economic use some 497 sq. m (5,350 sq. ft.) of currently redundant property. The project forms part of a combined approach to supporting the formation and growth of a more diverse range of indigenous enterprise within Denbighshire, alongside a related development seeking support from Priority 1 measure 5. The total combined development will create some 1,489 sq. m (16,027 sq. ft) of employment and human resource space by bringing into productive use a derelict former depot/civic amenity site. A range of fully accessible starter and expansion units will be provided alongside the provision of shared administrative office and employee development space. The project has been developed in response to an identified demand for suitable low cost community enterprise employment and development space and will support community activity to improve the local skills base, create employment and provide services of social, economic and environmental significance. The project is located within the Denbighshire Priority 3 target area and will serve a community that is recognised as living in the most severely deprived electoral wards in Wales.

Denbighshire County Council | DUNE-Denbighshire Project.

DUNE-Denbighshire's Unique Natural Environment

£164,800 53569

20/03/2002 £351,387

The project will provide a fast track route into accessing Objective 1 resources for target groups, which include community groups, tourism providers, local environmental associations, specialist groups (such as angling clubs canoeists, ramblers and other recreational groups) and the private sector. Its main aim will be to promote the sustainable management and enhancement of the natural environment in the coastal and riverine habitats of Denbighshire Funds. Funds will be available in the form of grants and the scheme will support eligible projects such as improving access to the coast and river environments, promoting environmental recreation, alleviating flooding, providing environmental interpretation facilities and other general habitat improvements. The project will improve the physical environment of these areas, promote tourism and serve as a catalyst for further private investment. It will increase Denbighshire's tourism potential by responding to the emergence of special interest sectors and niche markets such as rural, green and activity based tourism.

5 | 6 | Denbighshire County Council | A Jewel in Ruthin's Crown

£190,000 54726 20/08/2003 £710,000

This project will develop a new business centre targeting new start-up and micro businesses and a community facility in the centre of the town. The scheme will involve the conversion of "Crown House", a semi derelict building, totalling 550 m sq. The new facility will provide a business advice centre, micro units for new businesses, cyber-cafe and training facility serving the town and its rural hinterlands. The development aims at harnessing, enhancing and nurturing the wealth of community skills, knowledge and ideas and directly engaging the community in the local economy.

Denbighshire County Council Denbighshire Tourism Promotion & Development Project Phase 2

£672,260

54903

16/01/2004 £1,530,048

The Denbighshire Tourism Promotion & Development Project phase II is the second stage of a development which aims at regenerating Denbighshire's tourist related economy. Phase I made considerable inroads in achieving this goal but in order to complete the process additional resources are required to support and strengthen the local tourism industry which is vital to Denbighshire's local economy: tourism is the second most important contributor to the county's economic wellbeing. Phase 1 started the process of assisting tourist businesses. It is anticipated that by the end of the Phase 1, 100 jobs will be created and 4,000 jobs safeguarded and additional visitor spend brought into local economy leading to increase private sector confidence and investment. Phase 2 will build upon the lessons learnt and the strengths identified by the experiences of Phase 1, and endeavour to take advantage of emergent new markets and new routes to market. Phase 2 is intended to respond to identified local needs, voiced through the experience of Phase 1, in order to build a sustainable, successful tourism industry. This phase 2 bid thus targets resources to fulfil local needs but with solutions that are flexible and can be local, regional, national and international as appropriate. This Phase 2 bid covers the whole of Denbighshire and tackles both marketing areas of coast and rural Denbighshire. Phase 1 identified 6 main areas of work:- 1. Marketing enhancement 2. New and niche markets 3. Promotion & development of the shoulder season 4. Improve distribution 5. Overseas promotion 6. Improved PR Phase 1 took into account the Wales Tourist Board's activities and avoided duplication. Phase 1 had the support of the Wales Tourist Board and in Phase 2 this support is maintained and enhanced by the support of the North Wales Regional Tourism Partnership. The six areas of work above remain important to us but we intend to take into account changes in the marketplace and embrace new ways of tackling the problems of the tourism industry. The industry is a fiercely competitive one in a fast moving market place. During Phase 1 it endured the events of September 11th, the ravages of Foot & mouth disease, the vagaries of the volatile financial climate and foreign competition. All of these factors undermine business confidence in the industry and contribute to under investment in terms of facilities, and marketing. The Wales Tourist Board and the Regional Tourism Partnerships have strategies to combat this on a national and regional scale but Denbighshire's bid aims to tackle issues facing the tourism SMEs at a local level. Phase 2 is focused on identified local needs recognised during Phase 1. It is also a proven fact that in business marketing cannot stand still. Those firms that in time of recession or difficulty cut their marketing activities are much slower to recover when the business climate improves. Continued and innovative marketing is a key to SME success. Phase 2 thus will support the local tourism industry in the following ways:- 1. Marketing enhancement: the Foot & Mouth crisis made it increasingly clear that marketing through the use of ICT was particularly important and although we have made progress in this field we see this as still important in Phase 2. We wish to improve and extend the IT provision that allows us to data capture and deliver promotional messages to our customers. We wish to investigate the possibility of devising and delivering short message service (SMS), campaigns. In Phase 1 we undertook a pilot SMS campaign and wish to pursue this innovative route to market further. We also wish to explore and adopt where appropriate the new technology to quide visitors around parts of the county. We would like to further improve our existing web sites. In addition we would like to provide a 'Enjoy Medieval Denbighshire' web site. This would build upon the success of the 'Enjoy Medieval Denbighshire' project, which was an Article, 10 supported project and we wish to explore the possibility of new technology to give it wider access. We also wish to explore further accessible means to promotion e.g the use of audio guides, we also wish to purchase PowerPoint equipment and training so that we can present the area in up to date ICT format. We need to enhance the basic level of marketing normally undertaken e.g. by increasing print runs,

advertising spend and reprinting/updating/ producing new material as appropriate. Whilst Phase 1 went some way towards plugging gaps in

provision of marketing material, in phase 2 as well as continuing this work we intend to commiss commissioning conversation research and visitor surveys. 2. Niche Markets: progress has been in heritage based tourism and we wish to continue this in other ways and address areas and marked Activity tourism has been identified by the WTB as a growth niche market. The Local Authority is projects concerning for example Ancient Monuments and heritage assets, canal based tourism, we countryside in its varied forms, and in this bid we would aspire to assisting with the marketing of tourism SMEs and raise the profile of the area in the appropriate markets. Phase 1 allowed us to market and whilst we still see this as a viable market to develop in terms of niche interests rather market to attack. We intend to work with our fellow Local Authorities in N Wales and the Regional Denbighshire for Groups. 3. Promotion & Development: Phase 1 identified promotion of projects strength and as confidence building for the industry, and without further objective one funding we wish to explore the possibility of pilot TV/radio advertising and support promotion/fulfillment caprovision referred to in 1, above will assist us in maintaining and developing distribution of markourism. The increased amount of promotional material produced in Phase 1 must be maintained visibility in the marketplace. In order for us to penetrate markets in the UK and abroad phase 2 falready play a large part in disseminating of information and literature and it is envisaged that we distinctiveness may be enhanced by e.g. acting as showcases for local produce 5. The proximity has been identified both as a threat - the availability of cheap flights out of the area has grown to opportunity to cater more for the needs of overseas consumers. Phase 1 went some way towards language based web pages but as yet there is no provision for foreign visitors when they reach twhere appropriate provide foreign language tourism material for the area. Links have been kindle	nade in promits we have not as sought assignations and expensions and events to the work and distribution of Mancheste and the profession of the profession of the profession of the area. Denbighshire. Two other ERDF and an ESF application have been made to support this project This ERDF projects' primary objective is to stimulate and support the demand of ICT in the county. It will: Provide the revenue costs for the upgraded to the Learning network in Denbighshire to enable connection to Cymru ar Lein' · Video conferencing in all 7 High Schools within Denbighshire · e-learning access at all: High Schools, Denbighshire Libraries, primary schools, and existing community ICT learning centres Corwen Learning Centre Coleg Llandrillo Coleg Llysfasi Coleg Yale · Develop and implement a managed bi-lingual virtual learning environment and infrastructure · Develop e-learning courses to support the teaching of minority bilingual subjects. These materials will be developed jointly by the partner colleges, Denbighshire Life Long Learning Directorate and High Schools, funding will be used to develop, pedagogy models, learning objects, software infrastructure and learning environments. · Lease charges for ICT resources to support e-learning · Provide a Project Manager · It's anticipated that 5% of courses will be delivered via e-learning by 2005 The centres will build on the broadband communications infrastructure within Denbighshire, providing access to high quality e-learning and video conferencing systems. The bid under this measure is for communication links revenue and the development of e learning. The existing infrastructure will not support video conferencing to the Welsh Video Conferencing standards. The seven new learning centres will be the only centres to be supported by ERDF funding, to reach the Welsh Video Conferencing standards. There is a severe shortage of high quality e-learning in Welsh, particularly in vocational subjects. This project will address this by pooling the expertise of the partners to develop specific courses that are appropriate for delivery via e-learning and meet learner and local needs. It will allow businesses to access courses and support form colleges and remote access

The Xenos Business Angels Network is a business introduction service that matches private investors with companies that require growth funding in return for an equity share in their businesses. The aim of the network is to provide specialist support targeted at increasing private sector equity investment and facilitating more opportunities for SMEs to access to high-calibre individuals who can provide management guidance and advice. The network is unique in that it addresses a market failure in the business support market that can not be served through other mediums of support.

Phase I Finance Wales PLC Phase I Finance Wales - Renewable Energy Management Support Programme £180,956 52573 27/03/2002 £361,912

The initiative has been developed by the Finance Wales Partnership and is part of the development of an Enterprise Fund for Wales. Finance Wales - the Wales Regional Development Fund - is taking forward the principle of "Money with Management". This approach has the support of the Assembly and is reflected in a range of Funds and Management support programmes (MSPs) proposed in the Finance Wales Regional Action Plan.

1 | Finance Wales PLC | Small Loan Fund - Phase 1 (Interim) | £251,730 | 56387 | 23/11/2004 £510,091

1 Finance Wales PLC Wales Spinout Programme £967,486 56389 23/11/2004 £2,569,724

Priority 1 Measure 1 aims to generate wealth and employment for the region by developing and supporting the growth of Small and Medium-Sized Enterprises (SMEs) throughout the Objective 1 area. The Wales Spinout Programme (the Project) delivers the aims of the priority and measure by stimulating and supporting the creation of businesses in the context of the higher education sector in the Objective 1 area. The Project enables start-ups with the ability and drive to grow and be successful to access funding, that would otherwise not be available, along with relevant support. The Project provides funding to start up SMEs as part of a package of measures to support them in their early stages of growth. This financial support is in the form of recycling funding up to £25,000. The support provided by the Project is in the form of: professional business counselling and mentoring provided by a Spinout Manager; technical assistance from the HEI; rent-free space to start up businesses within the HEI; specialised consultancy services to support management and marketing; basic market research to assist in providing market intelligence; and a series of measures to stimulate demand amongst potential entrepreneurs. The Project is managed by a Spinout Programme Manager base in Finance Wales and dedicated staff within higher education institutions (HEIs). The HEIs are responsible for the local delivery of the Programme. The Programme was developed following targeted research and widespread consultation under the auspices of the Wales Regional Technology Plan. Integral to the success of the Project is the management support activities provided by Spinout Managers who are employed by the HEIs. The Spinout Manager's are experienced advisors whose remit is to identify potential opportunities and work closely with individuals to help them establish and growth companies and to provide continuing mentoring support. Due to the strength of general management experience, the Spinout Managers are able to discuss all aspects of the business and are not constrained by any particular discipline. Higher Education Institutions contain significant potential for creating high quality businesses - demonstrated by the limited number of examples of business creation in this context within Objective 1 but more importantly from the significant successes from other regions within the UK. When the Spinout Programme was established there were no other dedicated programmes to exploit this potential within Wales. The Project encourages the competitiveness of SMEs which has been identified in the SPD as being vital to prosperity and economic growth of the region. As the emphasis of the Project is to create new businesses and encourage their development, it directly contributes to growth in new sectors that the SPD aims to achieve. The mentoring and management support provided by the Project addresses the issue referred to in the SPD that skill levels among managers and employees are often low, by imparting a wealth of knowledge and experience within a business environment. Once the funding provided to the SME is paid back, the funds are recycled, this allows the Project to contribute to sustainability and can continue to assist businesses in the area over a longer term. In summary, the project addresses the following issues identified in the SPD and Programme Complement: · Lack of investment capital; · Lack of access to targeted range of grants and loans; · Inability to expand beyond initial scale of business. · Support for innovative enterprises or projects; and · Incomplete and inexperienced management teams

3 | 4 | Finance Wales PLC | Community Loan Fund Phase 1 | £142,957 | 56393 | 07/09/2004 £220,375

The project provides loans to support a wide variety of not-for-profit enterprises in the social economy across Wales that have not been able to secure funding from elsewhere. The aim of the project is to raise economic activity within disadvantaged communities and contribute to wealth creation. This will lead to an increase in skills and employability to improve conditions and encourage sustainable growth in both employment and income among enterprises within the social economy. The loans encourage community/social enterprises to become less grant dependent and more self-sufficient by allowing them to plan for the future. It also enables enterprises to create financial track records that will allow them to access a wider range of funding from the private sector in the longer term.

1 | 1 | Finance Wales PLC | Wales Spinout Programme Phase 2 | £931,927 | 57307 | 17/11/2005 £1,863,856

The Aim of Priority 1 Measure 1 is to "ensure that SMEs with the ability and drive to grow and be successful, including community-based businesses, have access to appropriate finance from the earliest stages of a business idea through the expansion of a viable business". This project assists business start-ups emanating for the Higher Education Sector with the drive and ability to grow which helps to develop a stronger enterprise culture for the Objective 1 region. By providing support and guidance via experienced Spinout Managers, who nurture the companies for up to two years, the project ensures the right package of support measures to companies in their early stages of growth and helps overcome barriers to new business formation. This allows the project to be truly customer-led, and encourages entrepreneurial activity within the HEI sector. The Aim of Priority 1 Measure 1 is to "ensure that SMEs with the ability and drive to grow and be successful, including community-based businesses, have access to appropriate finance from the earliest stages of a business idea through the expansion of a viable business". This project assists business start-ups emanating for the Higher Education Sector with the drive and ability to grow which helps to develop a stronger enterprise culture for the Objective 1 region. By providing support and guidance via experienced Spinout Managers, who nurture the companies for up to two years, the project ensures the right package of support measures to companies in their early stages of growth and helps overcome barriers to new business formation. This allows the project to be truly customer-led, and encourages entrepreneurial activity within the HEI sector. As one of the first integrated support schemes, Spinout has contributed to cultural changes within the HEI environment through the integration of the spinout managers within the structure of the HEI whilst still retaining the commercial approach relevant to support the creation of new businesses. They have also found that potential entrepreneurs value an initial discussion of their proposal which is either suitable for the spinout project or can be referred to other schemes which may be more suitable. The support provided by the Project is in the form of: professional business counselling and mentoring provided by a Spinout Manager; technical assistance from the HEI; rent-free space to start up businesses within the HEI; specialised consultancy services to support management and marketing; recycling funding up to £25,000, basic market research to assist in providing market intelligence; and a series of measures to stimulate demand amongst potential entrepreneurs. The Project is managed by a Spinout Programme Manager in Finance Wales and dedicated staff within higher education institutions (HEIs) which underpins the integrated nature of the totality of the support package. The HEIs through their spinout managers are responsible for the local delivery of the Programme. The Programme was developed following targeted research and widespread consultation under the auspices of the Wales Regional Technology Plan and contributes to the outputs of the Entrepreneurship Action Plan for business start ups. . The success of the project in its initial phase now means that all HEIs in Wales participate. Integral to the success of the Project is the high quality management support activities provided by Spinout Managers who are employed by the HEIs. The Spinout Manager's are experienced and bring the commercial reality into the process of building new businesses and whose remit is to identify potential opportunities, encourage entrepreneurship, and work closely with individuals to help them establish and growth companies and to provide continuing mentoring support. Due to the strength of general and commercial management experience, the Spinout Managers are able to discuss all aspects of the business and are not constrained by any particular discipline. Higher Education Institutions contain significant potential for creating high quality businesses demonstrated by the level of new business creation in this context within Objective 1 which contributed to raising the profile of new HEI business starts in Wales. The Project encourages the competitiveness of SMEs which has been identified in the SPD as being vital to prosperity and economic growth of the region. As the emphasis of the Project is to encourage entrepreneurship, create new businesses, and support their development, it directly contributes to growth in new sectors that the SPD aims to achieve. The mentoring and management support provided by the Project addresses the issue referred to in the SPD that skill levels among managers and employees are often low, by imparting a wealth of knowledge and experience within a business environment. It builds on the existing best practice of spinout activity throughout Europe with its network and links such as UNISPIN and GLOBALSTART. The presence of the recycling funding ensures robust business plans are a given and that strong monitoring and repayment of funding builds in a sustainability element as a natural outcome of the project. To-date the default of participating businesses is around 10% which is extremely low in the start up business environment and reflects the value of the combination of good quality integrated support in this field.

The project will create a new focus for creative endeavour, media and multimedia industries, community development and talent and skills development in Caernarfon. The new building on the Victoria Dock will be home to a significant number of enterprises in this strategically important creative industries sector in the region, providing a focal point and catalyst for the development of the clusters in media, and the cultural industries in North West Wales The integration of economic, cultural, community and skills development into one building project will provide a focus for the continuing strengthening of local communities, local economic confidence and capacity and the attraction and retention of tourist visitors. The building which has already received both full planning approval and critical acclaim for its design, will provide just over 2,500 sq metres of space overall. The building will centre on a 420 seat flexible auditorium/production studio which will be available for proffessional cultural events, film production use by media and performing arts companies, adult education, use by schools and colleges and for the widest range of community activity. Two substantial rehearsal spaces, four tuition rooms and space for offices and library will enable the building to become home to key cultural and educational agencies in the region, principally William Mathias Trust, Cwmni FranWen, Dawns i Bawb and Theatr Bara Caws. All of these companies are committed to education work and the development of talent among the young people of the region.

3 Garnsychan Partnership

53729 £174,940 10/09/2002 £269,490

CAST provides a framework of locally developed and initiated projects to combat the environmental decay of the Garndiffaith area. The project, which will be led by the Garnsychan partnership, will employ an environmental artist and provide a community fund for the undertaking of the environmental improvements. The environmental project teams will comprise mostly of local volunteers from the local community and will be assisted in managing the projects by the Garnsychan Partnership's new Project Manager employed through a successful People in Communities bid. The project is part of the regeneration of mid-Torfaen which aims to secure the future of the area. It focuses on improvements to the environment as a vehicle for engaging the community and community groups increasing confidence and self-esteem. The people engaged in the improvements will be gaining work experience and developing skills. In effect the scheme is providing training, improving the environment and increasing the confidence of the community supporting the social regeneration of the area. The consequent improvement to the environment will make the area more attractive to businesses leading to economic regeneration this in turn will help to slowdown the outward migration of young people from the area. A community animateur will work with the environmental artist to encourage individuals and groups within the community to become involved in regenerating the local environment, the project will provide the funding to undertake the improvements (through grants). The group will be required to plan their projects detailing the outcomes and impacts of their work before they receive any funding and they will be accountable for any funding received.

Garnsychan Partnership Garnsychan 'Reach Out' Project

£159,852 56423 24/01/2005 £284,402

Reach Out will engage excluded groups within the Priority 3 target area in the ward of Abersychan, Torfaen, and support their involvement in community activities relating to culture, health and theenvironment. The project will employ a Young People's Co-ordinator, a Health and Well Being Officer and Community Finance Officer. The Young People's Coordinator will engage young people aged 14-25, working alongside community groups to support young people's involvement in the Health and Well Being Action Plan, specifically addressing the fear of crime and crime as it relates to young people. The Health and Well Being Officer will be responsible for writing and developing the Health and Well Being Action Plan in partnership with local agencies, including health professinals, to engage excluded groups, primarily women with low self esteem, to develop activities that lead to improvements in the quality of life of local people and support community regeneration. The Community Finance Officer will develop the finances of the Garnsychan Partnership, local groups and support the project steering group, providing advice and support on financial systems, grant monitoring, annual accounts, charitable and company status.

3 | Gellideg Foundation Group | Raising Aspirations and Fulfilling Potential

£855,763 56866 12/05/2005 £1,362,766

The project intends to tackle the issue of deprivation on the Gellideg estate, recognising the inter-related issues that affect the most marginalised; poor health, low skills and educational levels, and low self-esteem. The project will provide an healthy living facility and creche, renovate a block of flats (for community/training uses) and carry out environmental improvement projects on the estate. These facilities/activities will help involve and empower local people to take control of their own development in a community based learning environment through hands on experience to develop basic and practical skills.

Gellideg Foundation Group Engendering Change on Gellideg

£497,605 53708 02/04/2002 £721,170

The project will improve the physical environment of Gellideg by cerating a recreational facility. It will provide a drop-in for ICT training; establish an information and advice centre; set up a carers drop-in and provide a creche for those accessing training; transfrom wasteland into recreational area for tennis , football etc

Geoscience Wales Cluster Development and Marketing 3 Geoscience Wales Limited Project

£425,095 55653

11/06/2004 £882,749

The project is a private sector cluster-based development project focussing on the geoscience products and technical consultancy services sector in North West Wales. Origin of the Project Geoscience SMEs based in Conwy approached Conwy County Borough Council (CCBC) in 1999 in order to explore the possibility of creating an Objective 1 partnership. The Geoscience Cluster was duly formed and it has since been sustained by exploratory funding from CCBC and the WDA. Geoscience Wales Limited, a company limited by guarantee, was created as the vehicle for the Cluster's commercial aspirations and to manage the funds received. Sponsors The Cluster has an active Membership of some 20 companies and individuals. It also has a number of Affiliated larger organisations that are not eligible for Membership, including Bangor University and Robertson Research. Aims of the Project The primary aim of this project is to foster the growth of the earth sciences-based SME sector in North West Wales by establishing a shared resource for its development, particularly for collective marketing and promotion, nationally and internationally. Implementation of the Project The project will be implemented by Geoscience Wales Limited (GWL), a not-for-profit company limited by guarantee and registered in Wales in April 2002, for the benefit of its Members. Membership of GWL is restricted to North Wales-based SMEs working in the geosciences and currently comprises 20 companies, partnerships and sole traders. The project expects to facilitate an increase in the number of Members both by encouraging existing SMEs to join and by providing an environment in which new SMEs are encouraged to set up. Work Required to Achieve the Aims of the Project The aims of the project will be achieved through the following strands of work: \cdot Co-ordinate and promote the delivery of geoscience services by utilising the collective experience and expertise of Associates of Geoscience Wales Ltd (GWL); · Stimulate the growth, competitiveness and profitability of the Members of GWL; · Market the group collectively and raise the profile of the GWL brand: locally, nationally and internationally; · Facilitate the sharing of market intelligence amongst Associates of the group; · Provide information, advice and support on appropriate financial, manufacturing and marketing activities that could offer opportunities and/or enhance the performance and profitability of Associates; Develop new products and services based on the shared skills of the group, in particular capitalising on opportunities arising from applications of new technologies; Facilitate opportunities for Continuing Professional Development and cross-fertilisation of ideas in niche sub-disciplines, including holding regular networking meetings; · Develop and present technical training courses to outside companies and organisations, where these can raise the awareness of new technologies, and hence provide product opportunities for GWL; · Provide a central co-ordinated focus for potential clients to make contact with Associates; · Act on behalf of the Associates collectively on subjects relevant to their business operation and to discuss such subjects with third parties; Lease with the appropriate organisations for the benefit of Associates and to lobby for Associates' interests on industry-specific standardisation bodies and committees; · Provide opportunities for Associates to collaborate on projects and secure new projects previously beyond the scope and resources of the individual collaborative partners.

Gilfach Goch Community Association

Gilfach Goch Community Association

£361,301 53809

06/08/2002 £894,300

The Gilfach Goch Community Association has been active in in Gilfach Goch through establishing a range of activities which meet the aims and objectives of the organisation which ar to encourage the participation of community members in in the support of community led initiatives which provide economic, social, cultural and environment opportunities for themselvesand other community members. The project is currently providing a varied programme of activities for all ages within the community which addresses the needs of the community identified in surveys that have been undertaken. These include: Youth clubs, junior clubs, intermediate clubs, drama and clubs, study club, play scheme, special events, arts development initiatives and support for other voluntary organisations with arts based projects, community development initiatives, volunteering development support and a varied programme for training opportunities. The main aim of the project is to research the underlying causes of socio-economic problems currently faced by inhabitants of the valleys and widen access to mainstream activities. These objectives will be achieved by the employment of a partnership co-ordinator.

The main purpose of the project is to provide a means of co-ordinating and facilitating the delivery of community-led/centred landscaping projects which, whilst helping improve the appearance of the local physical environment, also addresses local social and economic problems. It also maximises the effectiveness of all partners through co-ordinating their input and engaging with those partners best suited to assist in the implementation of each component stage of each individual project. This negates duplication and ensures the communities receive joined-up method of working. By engaging with those difficult-to-reach members of the community and motivating them and providing them with new skills, their prospects for future employment and their general health and well-being, are also improved.

A Groundwork Caerphilly Community Furniture Enterprise £258,606 [54727 16/05/2003]£398,653. The aim of the project is to increase and expand its collections and suppleies of unwanted household goods, reusable furniture, electrical appliances, all other waste items, undertaking repairs and renovation as appropriate and redistribute them to increasing numbers of families, individuals and community groups on means tested benefit or low income, specifically targeting List 1 and 2 wards made up of 17 deprived wards with a population of 48,569. This will be acheived by providing outreach sales and events within each ward, extending collection services and enhanging repairs and renovations. The community Furniture Enterprise will be able to offer increased waste minimisation services that are locally based to householdsers and businesses that retain and recycle wealth within communities. In addition The CFE will increase its economic activities by linking its services with local employment needs in terms of manufacturing and commercial, increasing the employability of local people and placements from disadvantaged backgrounds including unemployed, lone parents, disaffected youth, people with special needs and inactive due to ill health or disability. Those who have traditionally been excluded from local employment opportunities, by creating opportunities for participation in the activities, workshops and delivery of the CFE services.

RESEARCH AND DEVELOPMENT TO ENCOURAGE ENTREPRENEURIAL BEHAVIOUR AMONGST COMI BY WELSH SPEAKERS. ENCOURAGE WELSH SPEAKERS TO START NEW COMPANIES ESPECIALLY I CULTURAL INDUSTRIES AND OTHER HIGH GROWTH POTENTIAL SECTORS			
The Welsh Advantage The main aim of the project is to promote cultural and linguistic identity as a valuable source of the project, Menter Iaith will employ an officer for Denbighshire who will be the point of contact businesses. The officer will deliver information on grant sschemes available for bilingual material help businesses with short translations and offer a scheme where translations can be provided by also organise Welsh in the workplace classes through co-operating with local Welsh for Adult cen awareness of the benefit of using the Welsh language as a marketing tool for businesses. The project will relevant information and guidelines. It will also produce other bilingual materials us Welsh First schemes in some towns within the county. (This project will finance marketing materiencourage shop assistants in traditional Welsh speaking areas to use Welsh first in their conversafirst). The officer appointed will act as a point of contact within the Business Connect network and of the Welsh language within their business. The project will add to and enhance the provision of	economic act for all Welsh ls and signag / local transla tres and org oject will see eful for shop ials for the "' ations and for d for busines	tivity in Der language in lang	ssues within local ith grant applications, anies. The officer will hars that will raise e a welsh language pack es. It will promote the scheme - a scheme to alike to greet in Welsh ek guidance on the use
shop for Denbighshire. 5 6 Menter Iaith Dinbych The Welsh Advantage - Phase 2	£21,829	56642	13/07/2005 £51,977

The main aim of this project is to build on the Welsh Advantage Project Phase 1, which promotes the Welsh language and bilingualism in businesses throughout Denbighshire. Phase 2 will continue to add the unique Welsh flavour of rural Denbighshire. Through extolling the virtues of the County's rich cultural heritage and impacting upon visual promotional material the project will enhance the quality of the County's local attractions. 3 Menter Mon MONASED £910,000 56441 11/01/2005 £1,300,000 The aim of this project is to provide a CAPITAL KEY FUND for P3 M3 in Ynys Mon. This key fund will be directed towards the redevelopment of community owned buildings for new socio economic purposes as intended within the measure. A key fund allows easier accessibility to development funds for community groups and partnerships. It also provides a dedicated support mechanism for such groups, helping them secure eligibility and auditable record keeping. MONASED is presented in response to increasing demand from community partnerships for capital funds to adapt and modify community owned assets so that they can be put to new and improved socio economic use. MONWEITHRED £615,582 54237 20/11/2002 £948,948 3 4 Menter Mon The aim of the project is to develop new businesses and encourage employment within social and community enterprises by providing advice, finance, and the means by which deprived communities can formulate and manage their own solutions to local socio economic problems. The project will establish sustainable New commuity enterprises to act as engines for the provision of local services and employment creation. To establish a grant fund to support and extend existing community enterprises and to improve and adapt buildings to act as premises for such enterprises. Each enterprise will have two aims: To create sustainability employment and to restore and extend community services in the targeted area. Monweithred will work closely with othe local projects in Priority 3 to provide a progression route from capacity building projects in 3.1 and 3.2 to actual developments and employment opportunities. 3 Menter Mon MONADFYW £1,065,975 54119 21/11/2002 £1,525,000 The primary aim of thr project is to provide the means by which community led initiatives for social and community economic development can flourish in order to tackle the underlying issues which prevent sustainable economic development in the spatially targeted areas of Ynys Mon. The objectives are to work through voluntary and community organisations in the targeted areas using a system of community consultations to establish an infrastructure for regenerating the environment, community buildings resource, community based services and a range of opportunities for extending the role which community centres play in the local economy. The improvement of buildings, environs and facilities within the community, based upon existing infrastructure, which will provide multi purpose resource space for the provision of facilities for a range of community actions, including arts, cultural and environmental, child and dependent care and the provision of links to the shaping of the local environment, community development and workspaces for micro business start ups. This will also include the provision of support for physical and environmental improvements e.g public art initiatives, Local Agenda 21 initiatives etc. which prove beneficial in terms of motivational participation, improved employment prospects and economic relevance. The improvement of community and mainstream services which contribute to the greater involvement of excluded sections of the population where such services are carried out by organisations in the voluntary sector To harness local energy and aspirations in making community centres more useful to the communities they serve, with the accent on community economic development. The development of multi purpose Community Centres, including the improvement and adaptation of derelict environs. In some cases the degree of capital expenditure to create optimum conditions will be minor. In other cases where the existing community resource is derelict and underused, greater capital expenditure will be required. An important feature of the project centres on its determination to involve socially, excluded individuals and young people especially in the shaping of improved community buidings and environs. With a network of community buildings, well distributed through the targeted area, optimum conditions will have been generated to establish an innovative range of services to benefit the socially excluded and reassimmilate them into the social and economic mainstream. Isle of Anglesey Coastal Path £669,925 54051 To create a strategic long-distance walking route of quality that will be known as the "Isle of Anglesey Coastal Path". The project aims: *To create a strategic long-distance walking route that exhibits a high quality infrastructure linking into both new and enhanced visitor facilities, the wider community and an integrated transport network *To integrate the planning and management of access along the coastal zone 5 8 Menter Mon MONAMGYLCHEDD £411,476 52978 25/03/2002 £875,485 This project consists of two actions which are designed to improve opportunities for recreational use of the countryside and to harness economic opportunities therefrom. These actions are: * Establishment of Anglesey's first off road cycleway, called Lon Las cefni, connecting Llangefni, through the Cefni river basin / Malltraeth Marsh SSSI to the Newboruogh Dune. * The establishment of a new bridleways on the island on or near the coast most of which is within the Anglesey areas of Outstanding Beauty, and support for improved access to existing rights of way. * The establishment of an integrated transport linkage to coastal footpath areas on the Island, improving access to areas for coastal walking and the links therein. Menter Mon MONYMLAEN 5 6 £692,000 55819 01/06/2004 £1,384,000 To provide funds for the regeneration of rural areas in Ynys Mon. This project will fund revenue and capital actions in local communities based upon the needs of locally based community and business partnerships. Beyond the core actions of capacity building among community and business groups, it will operate as a KEY FUND for the delivery of local regeneration activity, providing a substantial resource for the delivery of P5M6 actions into the market towns and rural areas of Ynys Mon. 53435 20/03/2002 £312,024 Mentrau Iaith Myrddin Community Translators £122,986 The project involves setting up a newtork of community businesses in the north and west of Carmarthenshire by appointing two full-time translators to work primarily with community groups, voluntary organisations and community development agencies to enable them to extend their bilingual provision through the use of written and simultaneous translation services. Increasing the community's capacity to function bilingually is important as it provides a choice of language use for both Welsh and English language speakers. Providing choice encourages social inclusion and breaks down linguistic barriers that have traditionally, in formal domains, discriminated against first language Welsh Speakers. The main aims of the proejct are To set up a network of social enterprises to work in the communities covered by Carmarthenshire County Councils three area fora. To employ a team of full time translators to work in the communities designated by the local authority's area fora in the north and west of the county. To develop a support team of part time translators to meet the predicted increase in demand for both written and translation work ove the coming years in the voluntary, private and public sector. To assist community groups, voluntary organisations area fora and public service providers to extend their bilingual provision. The project would work closely with the three mentrau laith are active in the north and west of the county in order to utilise their expertise in the field of community language planning and access their extensive data-base of local contacts and voluntary groups. 3 4 Mentrau Iaith Myrddin Community Translators £265,837 The project invloves setting up a network of community businesses in the Priority 3 area by appointing three full time translators to work primarily with community groups, voluntary organisations and community agencies to enable them to extend their bilingual provision through the use of written and simultaneous translation services. Increasing the community's capacity to function bilingually is important as it provides a choice of language use for both Welsh and English language speakers. providing choice encourages social inclusion and breaks down lingustic barriers that have traditionally, in formal domains discriminated against first language Welsh speakers. The language act 1993 is based on this principle and clearly states that in the conduct of public business the english and welsh languages should be treated on the basis of equality. The project would work closely with the three mentrau iaith that are active in the Priority 3 area in order to utilise their expertise in the field of community language planning and access their extensive data base of local contacts and voluntary groups. Merthyr Institute For the Blue Print for the Future £1,562,347 55963 10/01/2005 £2.599.855 The project aims to encourage the participation of individuals who are marginalized by their disability in providing them with opportunities that will enable them to enter the employment market. This will be achieved by expanding a community led social enterprise which provides sheltered employment opportunities. The project involves relocating an existing facility to a new site that will enable MTIB to increase its capacity and services so that it is able to deliver to a disadvantaged client base in South East Wales. This will improve the long term sustainability as a social enterprise catering for the needs of disabled people in the region. Merthyr Tydfil County Trevithick 2004 Celebrations £258,375 55757 24/06/2004 £615,178 Borough Council The project is part of a wider programme of celebrations throughout Merthyr Tydfil County Borough to celebrate the 200th anniversary of the world's first steam train journey, which ran from Merthyr Tydfil to Abercynon. The main purpose of this bid is to take elements of the festival into two of the most deprived wards of the County Borough. In addition the project will create a routeway which will bring benefit to the community.

	f 1-2-3 to ICT - Acheivable steps to community involvement in ICT	£160,918	55224	18/12/2003 £324,472

This project will build on a successful phase 1 project which supported 100 voluntary organisations and community groups in Pembrokeshire to establish a web presence and created an exemplar County Voluntary Council website. This follow-on project will develop and support the implementation of a portfolio of innovative on-line communication solutions including: 1 The development of a web based infrastructure to enable effective communications online within and across groups. The infrastructure will incorporate a county wide communications hub managed by PAVS which will provide information and image sharing, discussions groups, multiple event diaries, e-mail updates etc. Groups will be offered an invitation to join the hub via e-mail, along with support and advice on obtaining e-mail accounts and internet access. This will be the first stage in the 1-2-3 development process. 2 The provision of support groups in setting up their own on-line communities separate from, but connecting into, the county wide hub. The development and oversight of this radial network will allow flexibility and scaleability according to individual community needs. 3 The development and provision of short content creation workshops. The project will work with local providers with specific quidance on creating websites accessible to all, incorporating best practise approaches and relevant legislation. This will support those grouped in the more advanced stages from the previous projects. A research programme will run in parrallel to the development programme. This will evaluate emerging ICT solutions in the light of developments within the voluntary and community sector, supporting initiatives such as the promotion of a culture of social enterprise. Pembrokeshire Association of Voluntary Sector IT Project £184,672 52763 01/08/2002 £392.003 Voluntary Services The project will provide PAVS with the equipment to allow it to develop ICT and act as an exemplar to a netwotk of voluntary groups operating in a periphal and rural area. The project will enable PAVS to: establish its own presence on the web, develop and maintain a portal to other relevant sites locally and nationally, develop an online library of use of the voluntary sector, market the PAVS web server to the voluntary sector and establish web sites for 100 local voluntary organisations. Pembrokeshire Association of Pembrokeshire Keyfund 10/09/2002 £433,180 £238.249 54076 Voluntary Services The project aims to establish a Keyfund grant scheme in partnership with the spatially targeted wards to promote economic regeneration, support community led activities, encourage use of existing facilities by various initatives i.e. arts, cultural and recreational. Pembrokeshire Business BusiNet (Pembrokeshire) 14/11/2002 £797,745 Initiative The aim of BusiNet is to improve and grow the SME infrastructure in West Wales through supporting effective physical business networking, encouraging networked business developements, maximising the involvment of SME representation and developing intertrading. The project will ensure the widest involvement of services provided through the Business Connect Network. The project will inject resources and activities into existing networks and networking events to ensure they can operate more effectively, provided enhanced value for members and enable internetwork activities to take place thus eliminating duplication of activities. Resulting from such networking activities, business will also encourage intertrading by providing the Business Connect service "Contract Shop" which has proven extremely effective in North Wales. Pembrokeshire Business Developing the Oil & Gas Supply Industry in Pembrokeshire £385,956 20/07/2004 £785,422 Initiative The project meets the aims and objectives of the National Economic Development Strategy by developing the competitiveness of a number of businesses in a specialist area with the potential for growth and diversification. The project links with the OB 1 SPD & Programme Complement through supporting the growth of competitive SMEs. It will assist with raising GDP in the OB1 region closer to the level of the UK and Europe raising the performance of less well off regions of Wales The project will fit with Strategic Theme 1 of the Business Services Regional Strategy, provide high quality expertise to SMEs to improve their productivity, enabling them to become more competitive, exploit new jobs, safeguard those that exist and accelerate company growth The project has also taken into account a number of strategic reports produced by the DTI with regards to sustainability through diversity for the oil and gas supplies industry and also exploiting opportunities for environmental related industries. Identification & Development of New Tourism Products & Pembrokeshire Business £148,653 55324 26/05/2004 £302,509 Initiative Packages in Pembrokeshire The project aims to assist micro and small businesses working within the tourism industry in Pembrokeshire to become more competitive by developing a collective approach to build a more sustainable future. This project is driven by the private sector and their needs as identified through focus groups and working in liaison with the public sector. The project focuses on developing a solid tourism base The project adopts an innovative approach by working with the trade and other agencies to identify client need and aims to develop products and packages from this research in liaison with the Regional Tourism Partnership and Pembrokeshire County Council. Pembrokeshire Tourism aims to design & assemble these packages/products and deliver to the client, with the assistance of the other agencies involved. The emphasis is very much on 'what the client needs, the client gets' Pembrokeshire Business Market Oppourtunity Development £449,369 54332 16/07/2003 £914,466 The aim of this project is to assist the competitiveness, growth and increased turnover of SME's in Pembrokeshire. This will be achieved by ensuring SME's are able to access information, advice and assistance and skills to identify and act upon new opportunities through effective market research and the development and implementation of marketing strategies to icrease market share and access new markets Pembrokeshire Business Social Enterprise Business Support Services (SEBSS) £235,360 15/12/2005 £362,818 Initiative The project aims to develop new businesses within the Social Economy through working with potential clients up to and through the business planning process and beyond. Encourage sustainable growth in employment and income amongst businesses that operate within the social economy, provide specialist business advice for social economy organisations that increase employment or provide economic benefitsby assisiting social enterprises to grow and improve through the development of focused business plans and mentoring from personnel with the knowledge to ensure social enterprise clients can run viable businesses which are suitable in the long term. Pembrokeshire Business Pembrokeshire B2B - Fostering Business Growth Through £54,187 57308 10/11/2005 £130,008 Networking Initiative The project will directly assist in the strategic aims of Objective 1 i.e. supporting a proactive, customer led business support service, assisting in the development of employment growth and increased economic activity through developing a more competitive SME sector. A Winning Wales The project involves a partnership combination of public, private, academic and voluntary sectors as identified in the 'Team Wales' approach, and creates local business networking opportunities. The projects supports businesses by supporting new and existing growth sectors and clusters By ensuring that the support available meets the needs of businesses. The project fits with the local Strategic Objective C: delivering Economic Growth Based on Local Need , by supporting local businesses to exploit opportunities, improving competitiveness and broadening the county's economic base. Pembrokeshire B2B seeks to build on the relationships already established to ensure that local companies have the best opportunites to win business in the public & private sectors, working with both public and private sector companies to highlight future opportunities. Pembrokeshire Coast Pembrokeshire Landscape Gallery - St Davids £1,611,592 56909 10/07/2006 £3,270,506 National Park Authority The purpose of the project is to create, through an expansion and development of the existing National Park Visitor Centre - St Davids, a new visitor attraction and cultural facility for the permanent exhibition of a selection of Graham Sutherland's paintings together with temporary exhibitions of the work of contemporary artist, educational facilities and a cafe. The M Learning Project 4 4 Pembrokeshire College £206,809 56376 07/02/2005 £428,854 The aim of this project is to explore new approaches to open learning which maximises the use of new technology, for young people who are outside mainstream education and training and are exposed to social exclusion. Improving SME and Community Access to ICT and Wider Pembrokeshire College £44,824 52631 26/03/2002 £92,900 The aim of this project is to faciiltate access to ICT training for SMEs, particularly micro businesses, and those in Pembrokeshire who are unable to access the facilities at the College sites. This will be achieved through the purchase of a vehicle which will be furnished as a mobile classroom, the adaption of the College's trailer as a second mobile classroom and the purchase of the 9 laptop computers 4 4 Pembrokeshire College Enhancing Technology Based Training Courses £41,538 52589 20/05/2002 £88,530

undertaken at ILS. The Institute of Life Science (ILS) has the following aims: 1. to co-locate a number of life-science related research centres of excellence in the one high-quality multi disciplinary research environment, 2. to establish a business support structure with the goal of ensuring that the project delivers maximum benefits to the knowledge in the region and Wales as a whole, 3. to construct an 'incubator' for microcompanies within the Institute and establish a seamless link between that incubator and the wider Technium network, 4. to ensure that the project becomes self-sustaining within a three year period and establish the appropriate special purpose vehicle to deliver that sustainability while protecting the mission. 2 3 Swansea University Institute of Advanced Telecommunications - IAT £5,233,000 56584 10/11/2005 £11,234,000 IAT will be a Swansea based world class hub for telecommunications, long and short term R&D, technology transfer, postgraduate training and spin-off activities unique in Wales and the UK to the benefit of the local and national economy Sylfaen Cymunedol Cyf. Sylfaen Wledig £225,288 54092 04/11/2002 £309,207 The aim of the project is to build capacity of the disadvantaged via the community based actions to reduce social deprivation. This will be achieved by increasing capacity and skill levels to enable (through community partnerships) to participate and influence activities which affect their lives. The objectives are to provide consistent and regular support for community groups to identify social, economic and environmental needs and develop the confidence to find local solutions Provide consistent and regular support for young people to identify social, economic and environmental needs and develop the confidence to find local solutions. Provide accredited training for community groups in community development skills which include community profiling, community needs analysis, implementing change ensuring that all work is underpinned by equal opportunities and an awareness of the environment in which they live. Also training in the development of support networks and information gathering across wards and geographical areas through the use if ICT: Provide accredited training for young people in capacity building and community development skills and develop their confidence and ensure that they have the opportunity to take part in local decisionmaking. Provide support and advice for agencies on including community groups and young people in their day to day work and provide opportunities to work together. Create local partnership structures between voluntary and statutory agencies, the private sector, community groups and young people which are based on equality, mutual respect and inclusion and whose role is to facilitate the development of the work of the community group and young people by providing specialist support, resources, worker time and the capacity to attract funding. Establish strong working relationships with disadvantaged groups (both of interest and geographical) to alleviate poverty and create equality of opportunity. 3 2 Symud Ymlaen £114,368 55501 03/03/2004 £171,053 Llangeler Community Initiative The aim of the project is to employ a full time development officer and part-time administration officer for the Llangeler area, who will facilitate voluntary and community groups within the Llangeler area to fully participate in commuity partnership and local community initiatives. This will be achieved through the development officer undertaking the following actions: will provide the local community with a dedicated community development officer and base within the community will create a single point of contact for information and help for community groups and to provide a focal point for a range of projects that will support both community and economic regeneration and a centre for the parish of Llangeler will assist community groups to co-ordinate, resource and action the community needs as identified in a number of local consultations, such as the APPLES and the Teifi Area Community Appraisal. will assist in building the capacity of local groups and will aid the process of both economic and community regeneration and support the process of capacity building within the parish . To put in place the essential building blocks to raise economic activity and job creation within the parish by supporting and encouraging the development of community enterprises To deliver 'hard' targets in terms community led services and 'soft' targets in terms of empowering and enabling of local people to sustain their own communities. · To assist the community to help tackle their own problems and find local solutions · Encourage partnership working between local groups and organisations and minimize any duplication of resource allocation and effort. To add value to existing structures, eg: the Teifi area facilitator, to provide a simplified way for communities to get involved in developing and delivering their projects \cdot . To create a sustainable partnership involving voluntary, public, private groups for the purpose of developing and implementing action for community regeneration -ReCTify - Community Employment, Safety and Taff Ely Crime Prevention £346,763 03/02/2003 £834,171 Regeneration Scheme The project is a mechanism whereby individuals and groups in the community can work with established partnership organisations (such as neighbourhood watch schemes) to identify community improvement measures which will specifically identify crime prevention measures both in terms of practical activities and wider community actions and strategies. The project includes an element of capacity building within the community and this project can be seen as a stepping stone to the possible development of the organisation in the future to providing a service as a community enterprise. In the short term, the project will engage local people in a variety of practical community safety measures. For example, the project includes capital monies for safety lighting (ie that which is outside the scope of statutory provision) and other physical crime prevention measures for individuals and their environment. It will enable to community as a whole to address the fear of crime as disincentive to employment and investment in the area. The project will employ 4 posts delivering advice, promoting the scheme, developing the organisation and undertaking the practical measures. 5 6 Taliesin Trust Ltd TY NEWYDD WALES £375,000 55417 14/10/2004 £2,305,754 This project aims to sustain and develop Ty Newydd as a quality resedential writers centre as a national resource which sustains local businesses within the supply chain throughout the year. Specifically this project will improve existing buildings as well as provide new build at Ty Newydd, including providing accommodation for the disabled as well as for course tutors. It will also open up the centre to a wider client base with a new heritage element. These improvements are vital to the long-term sustainability of the centre as well as to the sustainability of other local businesses. The project will also increase niche tourism and wider investment in the local economy generally. This application forms phase 1 of a two phase project (the 2nd phase will include a new build to provide further access and facilities for disabled people as well as an innovative new build extension to the centre of high environmental standards). However this phase of the project is able to stand alone and can deliver distinct outputs in terms of jobs and the economy. Telecentre and Business Community Action Development and Regneration for £110.928 54244 06/03/2003 £152,247 School Ltd Employment (CADRE) Develops an existing community enterprise & training organisation - Telecentre and Business School Ltd (TABS) into an ability to be involved with wider economic and social regeneration. The project will employ a Community Projects Officer and Administrator to develop links with Area Regeneration Partnerships. The project appears to intend to undertake a measure of training as part of its activtiies. 17/12/2003 £1,894,898 4 Telynau Teifi Telynau Teifi £871,527 55241 The formation of a non-profit community business to manufacture concert and celtic harps in the Llandysul area. Project will acquire suitable premises and employ and train local people in the necessary skills of high quality batch production harp making. Tenby Events Management Tenby Town Partnership & De Valance Trust £165,113 55050 27/07/2004 £518,342 The Partnership would act as a forum for the co-ordination and development of a programme of events, as an important part of the 'offer' to visitors and hence the economy of the town. The project also includes the support of the De Valence Trust who will be responsible for the development and management of the De Valance Pavilion - a theatre and community building. The Bridge Marine Science the Bridge Marine Science Buisness Group 57204 09/05/2006 £741,306 £348,140 Business Group The purpose of the project is to develop competitive SME's in North Wales, raise the profile of the area for marine science excellence and halt thw economic migration of talented marine scientists away from North West Wales. The Coalfields Regeneration Coalfields Social Enterprise Development Grant Scheme £921,023 56427 15/03/2005 £1,419,795 The purpose of the project is to provide a grants and support package for the emerging social economy in the coalfields areas of Wales. This will be a one-stop option that will offer new and developing social buisnesses a range of support mechanisms that can be tailored to meet the needs of individual applicants. THE ETHOS GROUP LIMITED ETHOS £2,589,137 56287 04/07/2006 £7,397,535 The ETHOS building will provide new, modern, well-equiped, high quality office space with access to the latest ICT. This project will provide 4,477 square meters of floorspace for 10-12 indigenous SMEs and conference facilities The National Botanic Garden 20/03/2002 £520,820 Cambrian Ventures - Revenue £278,431 52767 of Wales

increased supply of finance, which they would otherwise be unable to obtain from other commercial services or loan funds. This would be provided by way of grants available from WTB's Section 4 grant scheme that would enable tourism SMEs to address problems/grow their business. The grants are available on a discretionary basis. The level of grant is linked firmly to employment creation but the over-riding criteria will be 'minimum necessary grant'. This project relates to number of local and regional development strategies such as the National Economic Development Strategy "A Winning Wales", " Wales A Better Country" and other Local Partnership Action Plans throughout West Wales and the Valleys. The Wales Tourist Board is the statutory body for the development of tourism in Wales. As such, it is directly tasked with delivering the Welsh Assembly Government policies and priorities for tourism. Our targets are passed down from the Welsh Assembly Government through an annual remit letter. This letter reflects the overall targets and priorities outlined in the above strategies. This project will be a key deliverer for these targets. The project agrees with two of its priorities, namely; ? Supporting businesses - by improving support and business advice ? Establishing Wales in the World - by implementing 'Achieving Our Potential - A National Tourism Strategy for Wales" The project agrees with the Vision of the Regional Tourism Strategy, as it will contribute "to the economic, social, cultural and environmental well being of West Wales and the Valleys." (Regional Tourism Strategy; p3). It will help "to generate wealth and employment for the region by supporting the growth of the SME sector." (Regional Tourism Strategy, p3) Specifically it can be linked to 4.2 of the strategic objective 2 of the Regional Tourism strategy as it will "improve the quality of the product to meet the changing needs of the visitor" (p6). The project also agrees with Strategic objective 2 as "increased levels of investment in tourism facilities" is mentioned as a Performance Measure for this Objective (p16).

3 WAG - DEIN (WTB) Promoting Wales to the World £14,500,000 55910 30/07/2004 £25.885.100 Promoting Wales to the World seeks to build on the work undertaken by the Tourism promotion and marketing project, which is anticipated to end in June 2004. The current project has assisted some 600 SMEs directly and over 3000 indirectly whilst generating just under 2000 gross new jobs to date. The project will aim to ensure and continue the success and competitiveness of the tourism sector in Objective 1 area. This will involve demand generation of Welsh tourism products as well as the creation of appropriate platforms and leads for businesses to convert this demand into revenue. "Promoting Wales to the World" will focus on the strengths of the previous project and thus will be better placed to take advantage of recent research into key tourism growth products. This will improve the focus on tourism SMEs growth potential in order to maximise outputs. Work on cross cutting themes will be improved by improving the linkages and direction of tourism SMEs to other initiatives/ organisations (some Objective 1-funded) such as Arena Network (Green Dragon); Opportunity Wales; "Sense of Place", the WDA/ Chwarae Teg SME Equality Project and the VisitWales e-commerce initiative. This project relates to number of local and regional development strategies such as the National Economic Development Strategy "A Winning Wales", "Better Wales and the Objective 1 Programme for West Wales and the Valleys. The Wales Tourist Board is the statutory body for the development of tourism in Wales. As such, it is directly tasked with delivering the Welsh Assembly Government policies and priorities for tourism. Our targets are passed down from the Welsh Assembly Government through an annual remit letter. This letter reflects the overall targets and priorities outlined in the above strategies. This project will be a key deliverer for these targets. The project agrees with two of its priorities, namely; - Supporting businesses - by improving support and business advice -"Establishing Wales in the World" priority by "developing Wales as a location attractive to both business and to tourism, and a more concerted effort to enhance Wales's image overseas". The project meets the overall aims of the Objective 1 Programme, specifically Priority 1 of the SPD as it will "generate wealth an employment for the region by supporting the growth of the SME sector" (SPD, p175) and "improve the competitiveness of business and the creation of new businesses through the provision of co-ordinated and focussed business support, advice and training". (SPD, p10). The project specifically addresses the strategic aims of Priority 1 Measure 3 of the Objective 1 Programme by " supporting a proactive, customer-led high quality businesses, assisting businesses individually or collectively to improve their turnover and profitability and enabling them to employ more people" and "by generating wealth and employment for the region by supporting the growth of SME sector". The tourism context for the project is in Action 31 of "Achieving Our Potential", the Assembly approved strategy for the industry, which has been incorporated within the Regional Tourism Strategy for the Objective 1 area. The project also agrees with the Vision of the Regional Tourism Strategy, as it will contribute "to the economic, social, cultural and environmental well being of West Wales and the Valleys." (Regional Tourism

1 | 1 | WAG - DEIN (WTB) Phase 2 Integrated Support for Tourism SMEs £1,134,000 55357 26/11/2003 £3,150,000 The aim of the project is to develop a more co-ordinated delivery of tourism business support to tourism SMEs that is flexible and focussed on improving competitiveness through the adoption of more effective business practices. The project will provide integrated financial assistance plus specialist tourism advice to tourism SMEs. A key gateway to the project is via WTB quality advisors who undertake annual quality inspections of c.4000 tourism SMEs in West Wales & Valleys. Their role in addition to advice on "star" grading has been expanded to give initial business advice and to signpost tourism SMEs to more specialist tourism advice or financial assistance where appropriate and this is a key component of the project. This is Phase 2 of an earlier Objective 1 funded project. Phase 1 has been very successful in delivering assistance to SMEs. Ongoing monitoring of this phase indicates that the financial assistance scheme has been particularly successful in terms of commitment and spend and in achieving anticipated outputs of gross new/safeguarded jobs and increasing turnover in assisted SMEs. Phase 2 will build on the strengths of Phase 1 but will be better placed to take advantage of recent research into key tourism growth products (e.g. golf, business tourism, cycling, activities). This will improve the focus on tourism SMEs growth potential in order to maximise outputs. There will also be an emphasis on improving the outputs achieved within Valleys local partnerships through SME seminars and improved linkages with South Wales Valleys Heritage Initiative ("Herian"). Work on cross cutting themes will be improved via improving the linkages and direction of tourism SMEs to other initiatives/ organisations (some Obj 1-funded) such as Arena Network (Green Dragon); Opportunity Wales; "Sense of Place", the WDA/ Chwarae

1 3 WAG - DEIN (WTB) Tourism Promotion and Marketing £10,702,692 52578 28/03/2002 £21,780,000 This project will deliver key marketing and promotional aspects of "Achieving our Potential" (Tourism Strategy for Wales) the Assembly approved strategy for tourism.

1 WAG - DEIN (WTB) Integrated Business Support for Tourism SMEs

£6,300,000 52554 11/09/2002 £13,029,873

The aim is to develop a more co-ordinated delivery of tourism business support to the industry, particularly SMEs which is flexible and focussed on improving on competitiveness through the adoption of more effective business practices. The project will provide integrated financial assistance plus specialist tourism advice to tourism SMEs.

2 2 WAG - DEIN (WTB)

E-Tourism Destination

£311,291 54212 14/11/2002 £635,030

This project has been developed to stimulate awareness and demand of the potential offered by ICT and to support tourism SMEs, in particular, in exploiting the benefits of e-trading and e-marketing. This demand will be stimulated through encouraging the use of the Wales Destination Management System as an effective distribution system to enable tourism SME's to get their project to market and to facilitate booking of Welsh holiday products via the internet. The Destination Management System has been developed as a sepatate programme (funded by the National Assembly for Wales) and will be used to increase the awareness of ICT of tourism SME's. Support will also be available to the tourism SME's.

4 4 WAG - DELLS (ELWA) The Welsh Learning Network

Teg SME Equality Project and the VisitWales e-commerce initiative.

£2,636,380 52563 27/03/2002 £5,487,843

The Welsh Learning Network will provide an information communications technology (ICT) infrastructure linking further education institutions (FEIs) and higher education institutions (HEIs) throughout West Wales and the Valleys to increase the use of information learning technology (ILT) in the curriculum and in management.

WAG - DELLS (ELWA)

Strategy; p3)

KNOWLEDGE EXPLOITATION FUND(KEF) - Commercial Exploitation

£4,503,600 52712

01/08/2002 £8,340,000

The aim of the Knowledge Exploitation Fund (KEF) commercialisation project is the effective exploitation of knowledge, research and development within Further and Higher Education (FE and HE) for the benefit of the Objective 1 economy.

Wales Co-operative Centre Developing Social Economy Entrepreneurs

52552 £86,199 26/03/2002 £172,397

The project aims to develop entepreneurs within the social economy through co-operatively structured businesses. The project has two key aims. First to work with the many exisitng businesses assisting them to realise and develop enterpreneurial activity through businesses in the social economy. This will include a specific emphasis on risk management. Second, entrepreneurial activity will be supported in the development of new businesses in the social economy.

1 | 2 | Wales Co-operative Centre | Community Regeneration through Co-operatives

£69,619 52566 26/03/2002 £139,238

This project will deliver a pcakage of business support for existing and potential co-operative enterprises to encourage joint marketing, business growth and increased participation. To develop "Team Gwynedd" establishing joint partnerships within Gwynedd Regeneration Team to ensure seamless support is delivered to the client at all levels.

Wales Co-operative Centre Succession Fund Facilitator

£156,057 52567 27/03/2002 £316,225

The aim of the project is to set up a key fund that will enable ambitious and innovative projects to thrive. To finance projects that aim high and deal with the difficult material flows - to go where other funding would not. It will encourage and reward community organisations, local authorities and private industry that seek to work in partnership for community benefit. It will finance a Country-wide "Action Research" project to achieve increased waste diversion rates on a scale significant enough to exceed or make a major impact on the targets for waste reduction, re-use and recycling that are set out in the Wales Waste Strategy and the EU Landfill Directive. SRS will be a pre-matched fund enabling ease of access to all groups - particularly community-based organisations that have been toiling in the recycling field for over a decade. Whilst the spending is essentially in the public arena, because it is local authorities that have responsibility for finding out what the new contracts should look like beyond 2006, there is no reason why the other stakeholders, private and community sector, should not play a full part in the "Action Research" process. Once the experiment is complete, has been evaluated and discussed, the nature of best practice to deliver the new service will be better understood and the whole service issue can be open to best value competition using better drawn contract specifications.
