Centre for Subnational Analysis

- Team of ~20 staff across ONS sites
- Includes sub-teams on:
 - Regional economic analysis
 - Spatial analysis
 - International engagement
 - Cities analysis
- Work across departments to drive delivery of analysis for smaller geographies across the UK

Aims of our Centre

To **provide innovative and insightful analysis** to inform subnational policymaking

To **work with city and regional stakeholders** to understand their statistical and analytical requirements, and collaborate with ONS and GSS colleagues to deliver these requirements

To **provide leadership and direction** to the ONS and GSS in creating and disseminating subnational statistics and analysis

What have we been doing?

2019 items delivered

- Continuing (and developing) <u>subnational estimates of productivity</u>

1	Population in each city region by nationality
	Last week, the Ottes have produced laties showing the <u>epimated population in each of region by submatily</u> (SK, EU, or set of work). These laties are split by sex and give both the efekt population and the population aged 16 to 64. This was extended from the Annual Population Survey, further to equality struct an provides Labor Group.
1	Similar estimates are also produced by our Migration Analysis learn and <u>scheduled at the local archedule lows</u> . This uses different sources, for a signify different papera, and is not cannotly available at the oly region level. However, they are looking into producing this table at lower level geographies and none it is published by us can choose which cogic to use.

Population in each city region by nationality
Last weak, the Cities have produced tables showing the <u>estimated provident is each offyrequinty relationship</u> (IK, EU, or set if work). These tables are split by sex and give both the whole population and the population aged 16 to 64. This was extracted from the Annual Population Survey, farther to requests satisfied as provide a Laboration Cosp.
Break and/white are used on protocols of your Migradion Analysis laters and politicity of the local portunits byot. This uses different sprocess for a slightly different sprocess and is not anorely result and an only region head. However, they are looking this producing this lates at lower level geographies and once it is published you can choose which adjud to use.
