Making a Difference Housing and Health: A Case for Investment

2019

- Aims to inform, support and advocate for wider health policy and cross-sector approaches and interventions
- Summarises **impact of housing** (across tenure) **on health** and well-being across the life course
- Identifies **which interventions work** and offer **value for money**
- Identifies priority areas for preventative action within Wales:
 - housing quality
 - unsuitable homes
 - homelessness
 - housing inequality
 - partnerships
- Builds on *Making a Difference: Investing in Sustainable Health and Wellbeing for the People of Wales*

Investing in Health and Housing in Wales

Those at greatest risk from poor housing are:

Older
people

Children

Those with
existing
health
problems

The
unemployed

Health and Well-being Impacts

10% of excess winter deaths can be attributed to **fuel poverty**

People who live in homes which are cold, damp and unsafe are more at risk of:

> poor physical and mental health and well-being

> cancers, circulatory, cardiovascular and respiratory ill-health

> more falls and serious injury

> arthritic and rheumatic conditions

Unhealthy homes

18% of homes pose an unacceptable risk to health

Cold homes impact on physical health, social isolation, stress, and financial capability

Damp or mouldy homes increase respiratory problems by 30-50%, mainly in children

12% of households are in fuel poverty

Unsuitable homes

3 in 4 over 65s live in their own home

30% of over 65s and 50% of over 80s have a fall each year

Accidental injuries are a leading cause of death for children and young people

Overcrowding is linked to stress, alcohol abuse and depression

Homelessness

Those with **4+ Adverse Childhood Experiences** are **16 times more likely** to become homeless

A third of homelessness is caused by a health problem

Return on Investment

Housing Quality

£1 spent on central heating generates 42p in health benefits

3.9% reduction in GP visits for respiratory conditions in **Nest scheme** beneficiaries (compared to 9.8% increase in the control group)

£1 spent on insulation interventions provides a return of **£1.87¹**

Improving **heating and ventilation** improves asthma in children and is cost effective

£1 spent on improving warmth in vulnerable households results in **£4** of health benefits

39% fewer hospital admissions for cardiorespiratory conditions and injuries in those with **upgraded houses**

Unsuitable homes

Falls prevention results in pay back in less than 3 years

Adaptations to reduce falls pay back in 5-6 years in NHS costs.

Home modifications result in 26% fewer injuries requiring medical treatment (caused by falls) per year

Extra Care schemes reduce NHS health costs by **£1,786** per person per year

£1 spent on adaptations prior to hospital discharge generates **£7.50** of cost savings for Health and Social Care

Homelessness

Housing First models for homeless individuals with complex needs returns **£3.60** for every **£1** spent

Every **£1 invested** in moving people out of homelessness generates **£2.80** in benefits

Preventing homelessness results in savings of **~£9,266** per person compared to allowing homelessness to persist for 12 months

Priority Areas for Preventative Action

Housing quality

- Healthy, safe & well managed homes regardless of tenure
- Eliminate cold, damp and mouldy homes, and improve ventilation
- Energy efficiency measures & fuel poverty schemes
- Support vulnerable households instead of area based interventions
- Good home quality standards, particularly in the privately rented sector
- Improve planning through housing strategies and health impact assessments

Suitable housing

- Integrating adaptations with personal health care plans
- Home modifications and adaptations based on need, not location or tenure
- Falls prevention programmes
- Support independence for older people through Extra Care schemes
- Homes that promote social inclusion
- Tackle overcrowding

Homelessness

- Early intervention and prevention e.g. tackling Adverse Childhood Experiences
- Co-ordinated approaches to improve access to health and care services
- Person centred approaches taking services to people and supporting people into homes e.g. avoiding complex systems, more assertive outreach, Housing First
- Raise awareness at a local level of what benefits and support people are entitled to receive

Housing Inequality

- Develop evidence on the cost and impact of poor housing on health and society
- Identify those with the greatest need through partnership working and shared intelligence

Partnerships

- Alignment of housing, health and social care, maximising collaboration and integration
- Increased involvement of housing sector in partnerships e.g. Regional Partnership Boards

**Adverse Childhood Experiences (ACEs)
and Housing Vulnerability –
Report and Evaluation of
ACE-informed Training for Housing**

5

Case Study. ACE based approach to Housing: Working with police, housing sector, local authority and ACE Hub to develop training

- **Improve knowledge**, skills & confidence of ACEs and their impact across the life course, to improve practice.
- **Increase understanding** of ACEs for those at risk of homelessness and how using a trauma informed approach can help.
- Explore ideas to **improve engagement with tenants** & their families to sustain tenancies, recognise vulnerability and reduce homelessness.
- Explore current support systems in place for housing staff and **identify gaps** in current provisions.
- Provide a **training resource** for ACE based approaches within the housing sector.

Adverse Childhood Experiences and Homelessness

- Examines the relationship between ACEs and homelessness in Wales
- **7%** (1 in 14) have lived experience of homelessness in Wales
- Individuals who reported **4+ ACEs** were **16 times** more likely to go on to experience homelessness
- **Childhood Resilience Assets** were seen to be protective, reducing this likelihood by half
- Prevention & early intervention, innovation

A collaborative approach

- Working with partners such as Welsh Government, Community Housing Cymru and Chartered Institute of Housing Cymru to progress the housing and health agenda in Wales, learning from others.
- Supporting partners e.g. Tyfu Tai Cymru, Welsh Housing Conditions Programme, working with Regional Partnership Boards
- Working with Cardiff University, Crisis, and Welsh Government to build on the homelessness and ACEs research
- Supporting Building a Healthier Wales partnership for collective action on evidenced based priorities and prevention activity

A photograph of three young children sitting on concrete steps. The child on the left is a girl with dark skin, wearing a grey hooded jacket and a grey beanie with a red and white patterned band. She is smiling. The child in the middle is a girl with light skin, wearing a brown jacket and a light blue beanie with a pom-pom. She is looking directly at the camera. The child on the right is a boy with light skin, wearing a grey hooded jacket and a dark beanie. He is looking slightly to the side. The background is a plain, light-colored wall.

*He who has health has hope
and he who has hope has
everything.*

Thomas Carlyle
