Subject: Delivering a 'Data Promise' for health and care

All,

Thank you for attending the initial meeting on delivering the 'Data Promise' for health and care yesterday afternoon. Please find attached the slides for as well as another set of slides for a presentation that Deb gave recently which provides more detail on those 'enabling activities' we're looking at, which together look to set the direction for our data policy work this year.

13-05-2021 - 21-04-2021 Data
Presentation on ... Policy Overvie...

I hope the session gave you a flavour of work involved and the decisions that need to be made. The next step is to plan out the stages of the work and agree our stakeholder engagement plan. I will hopefully send this through to you next week and would very much appreciate your comments and advice on that.

If you do have any thoughts or comments about the work of the 'Data Promise', please do get in touch. Otherwise, I'm sure I will contact many of you again for advice of various aspects of this work.

Thanks again for your contribution - have a nice weekend!

Subject: Follow up to today's chat

Hi Official 1 (REDACTED – SECTION 40)

Fab to catch up with you this morning – I've copied in my colleague **Official 2 (REDACTED – SECTION 40)** who is spearheading our data policy and is the link into NDR from Welsh Gov.

We've just had a meeting with primary care colleagues on the 'indemnity' issue and data controllers which was interesting. **Official 3 (REDACTED – SECTION 40)** was the name I couldn't remember who is involved in the GMC contract work that is happening at the moment. Still trying to unpick the legal position vs the perceived position.

I've attached the two presentations I discussed; an overview of our data policy work I presented to IG working group and a presentation from a follow up workshop Lisa held.

I'm on leave next week but very happy to catch up again when I'm back to look at some of this a bit more.

Thanks

Subject: Data Promise

Hi all,

Following on from this morning's meeting I've attached an infographic **Official 6 (REDACTED – SECTION 40)** at NWIS shared with me recently which covers the essence of the data promise and aligns with the thoughts expressed today. It's probably not for external sharing at this stage.

Regards,

(REDACTED – SECTION 40)

Subject: RE: Introductions - Welsh health "data promise"

Thanks Glyn, and hi **Official 7 (REDACTED – SECTION 40)** and **Official 8 (REDACTED – SECTION 40)**, really lovely to meet you.

Very happy to set up a slot to discuss the data promise work, I've looped in my colleague **Official 6 (REDACTED – SECTION 40)** who is leading on this for us.

I've attached an overview presentation which I gave recently which gives a flavour of the different things we're looking at which together look to set the direction for our data policy work this year. We're still awaiting more info on the NHSX Data Strategy and some draft clauses of the UK Government's Health and Care Bill which will give us an idea of the direction being taken in England (as although health and care services are devolved much of the data legislation is not and with so much cross-border data activity it's not as easy as saying 'this is for England only'.

I think key to our success in this is exploiting the non-legislative levers as much as possible whilst planning for medium to longer term legislative changes (either by Welsh Government or UK Government) which may come down the track. We'd like to build on the breakthroughs that COPI Reg 3 (emergency data sharing powers) has given us in improving data sharing in the pandemic, but realising we can't keep extending those powers forever.

If you're able to share some dates for when you'd be available over the next few weeks we'd really welcome getting your views on our overall direction and look at areas we could perhaps work together on.

Best Wishes

(REDACTED – SECTION 40)

Subject: Introductions - Welsh health "data promise"

Official 1 (REDACTED – SECTION 40);

I mentioned recently we'd met with **official 7 (REDACTED – SECTION 40)**; and **official 8 (REDACTED – SECTION 40)** who lead on stakeholder engagement for the Centre for Data Ethics and Innovation. At our meeting we agreed it would be helpful to give CDEI some background on your health data promise work and discuss in which way they might get involved.

I'm happy to be involved but do you want to arrange a slot directly with **Official 7 (REDACTED – SECTION 40)**, **official 8 (REDACTED – SECTION 40)** or whoever they suggest should be involved from CDEI?

Thanks

Glyn

Glyn Jones

Hi Official 1(REDACTED – SECTION 40),

I hope you don't mind I have provided a few comments to the paper you kindly sent over earlier

Thanks
