Subject: IVMS and REM working group

Hi

Following MMO's announcement yesterday regarding the results of the IVMS testing Wales have published the following announcement

<https://www.gov.wales/wales-inshore-vessel-monitoring-systems-ivms-fishing-vessels-under-12m>

In light of the MMO testing it is our opinion that the Maritime Systems MS44 device does not meet the requirements of the Welsh iVMS regulations. It is therefore not suitable for use by Welsh Fishers or any vessel undertaking fishing operations in the Welsh zone.

Please share this with relevant colleagues and your fishing industry.

Regards
REDACTED
