All,

Further to yesterdays meeting regarding Raglan Bypass.

I have had confirmation that WSP can undertake the RSA1 for the Groseinon Road right turn ban in December.

The audit brief will be issued to me next week for WG approval.

Would you be in a position to issue the sketch drawing of the Monmouth Junction scheme so I can get it

incorporated into the brief so it can be undertaken at the same WG Official.

Many thanks

Hi [WG Official],

I just wanted to bring to your attention that the information we sent out at the end of June regarding

the A40 Raglan Bypass might be prone to misinterpretation. Specifically, the line about design taking

place on more medium and longer-term options isn't entirely accurate. At present, we are focusing

on the quick wins and reinforcing those measures, with no further design work on the longer-term options at this stage.

Additionally, I wanted to mention that GoSafe has recently confirmed that they cannot enforce the

Temporary Traffic Regulation Order (TTRO) as they previously indicated. However, they have assured

us that once the PO is in place, they will step in to enforce it. This process is currently in progress.

Thanks,

WG Official

Hi WG Official

We have received a query from Wales Online asking for the latest on the A40 Raglan Bypass (query below). I know we prepped a line that the Cab Sec could use if he was asked at the A465 visit but wondered if any progress had been made in this area. If not, does this line work okay. The journalist needs something by cop today.

Cabinet Secretary for Transport and North Wales, Ken Skates said:

"I recently met with local members recently to discuss the incidents on the A40 at Raglan.

"I have asked my officials to consider implementing further short-term measures while design

takes place on the more medium- and longer-term options."

Thanks

WG Official

Subject: WalesOnline - Raglan bypass issues

Hi all, hope you're well. Wales Online here from WalesOnline. Hope I'm in the right place. I've gone for transport but thought it could also be climate change, so cc'd that in just in case.

I'm coming to you again if you don't mind regarding the A40 and A449 roads in Raglan. The A40 is also known as the Raglan bypass.

I've been contacted again by residents living in and around Raglan regarding the junction at the A40 which has again recently been the site of multiple incidents.

We wrote this in 2022 on the stretch: <https://www.walesonline.co.uk/news/wales-news/the-mostdangerous-junction-wales-24954778>.

Locals have long said the junctions make it one of the most dangerous roads in Wales and cause continuous accidents. Motorists have to turn right across the carriageway towards the villages of Mitchel Troy and Dingestow, those from the opposite direction have to turn right across both sides of the A40 towards Raglan and Abergavenny, and less than 100 yards towards Raglan vehicles also turn right from Old Monmouth Road across the A40 to head towards Monmouth.

I'm aware the most recent fatality happened on the slip road from Raglan to Newport rather than at the junctions but locals say it's not a coincidence accidents are continuing to happen on the stretch. They say most of the incidents are caused by vehicles overhanging in the carriageway on the A40 because motorists are attempting to cross into the central reservation but are then realising there is not enough room to do so safely. People often using the road say motorists are not adhering to the current temporary 50mph speed limit in the area making the road unsafe as drivers are travelling too fast to navigate overhanging vehicles in the carriageway.

In 2023 the Welsh Government provided a statement to us which read: "We are nearing completion of a safety study at the A40/Monmouth Road junction which will result in improvements for this section of road." Where is the Welsh Government at with this?

Raglan community council clerk (redacted) says a survey of the junctions was carried out in 2024 and a series of potential "quick wins" were published on the A40 in June 2024, but he says they don't seem to have been carried out. They included preventing the right-hand turn towards Mitchel Troy and a permanent reduction in the speed limit. Resident Julian Dyer says he is under the impression Ken Skates has agreed to visit the stretch to see the issues.

Following the latest incidents in the area last month councillors (redacted) and (redacted) described the stretch of road on the bypass as "dangerous". They said: "We, along with colleagues from Raglan CC, Mitchel Troy CC, our local MSs and MP have campaigned tirelessly to the Welsh Government to ask for measures to be put in place along this stretch of road to make it safer. It shouldn't take for someone to lose their life."

I know this is an issue which has been mentioned in the Senedd recently too by (redacted) here: <https://www.facebook.com/watch/?v=1493744824940965>.

Could I get a response from the Welsh Government please on where they're at with this? If I could get something by Friday evening I'd be grateful. Any problems please feel free to call me on redacted.

All the best,

Wales Online

Hi WG Official,

This is just an interim email to keep you updated and confirm with you that we are looking into this for you.

Unfortunately we are currently having access issues to the main accident database that we use for full site assessments so are unable to complete this one as of yet.

The problem has been reported to our IT specialists as it is affecting all users of the database within Gwent Police too, so hopefully the access will be back for all of us to use again as soon as possible.

In view of this, I am unable to give you a WG Officialframe but will inform you when site assessment is completed.

Kind Regards,

Hey both,

I've had the below and attached through.

Does this warrant attention as a possible area for enforcement? If it does can we please look at it and inform WG Official – email below – directly we are looking at it given the data.

Or alternatively – if it doesn't meet the threshold inform WG Official that it doesn't and for what reasons. For all I know its already been raised discussed and discarded as an option by you two already...

Thanks both,

WG Official

**Cc:** [WG Official](mailto:WG Official)  
**Subject:** Potential Speed Enforcement Raglan Bypass

Hi WG official,

Hope you are well!

WG have implemented a speed limit measure at Raglan bypass (dual carriageway) from 70mph to 50mph - this was recommended as part of the attached safety study (apologies for the size of this file!).

The attached excel spreadsheet contains the speed monitoring data collected since the 50mph measure was implemented and we would be grateful if this can be passed to Go Safe for their consideration.

	Daily Avg Nos	Mean	85%ile
07.00-19.00	14699	50.5	59.1
06.00-22.00	16577	50.6	59.5
06.00-00.00	16814	50.6	59.5
00.00-00.00	17592	50.7	59.5

SS1498 SWTRA Batch 1 East								
SEPTEMBER 2024								
Site	Location	Lat / Long	Direction	Start Date	End Date	Posted Speed Limit (PSL)	Total Vehicles	
12	A40 Raglan	51.767880, -2.844830	Eastbound	11 September 2024	18 September 2024	50	63248	
			Westbound	11 September 2024	18 September 2024		59897	
			Two-Way	11 September 2024	18 September 2024		123145	

The Safety Study also contains collisions in Section 2, although these don't include a collision that occurred in May 24.

Looking at all options for enforcement here both in terms of the criteria being met, and also any issues associated with the practicalities of enforcement taking place at the site.

Please let me know if you require any further details and I will be more than happy to set up a meeting or discuss over coffee in CP2 – copied to WG Official (Brandon) as we are the officials who met with Raglan Community Council and other community representatives last month on this matter.

Many thanks

Dec

Hi WG Official,

I had a meeting with WSP this afternoon and the sketches provided by MCC are going to be appended to the

RSA. The lane reduction will need a slight tweak as it doesn't go back far enough so WSP are going to design this.

With regards to the speed limit order, I have answered Rhian regarding her query but I cannot give a WG Official line of when it will be implemented – WG Orders branch may be able to give you an indication of when it will be published but possibly not until the end of Q4.

I am chasing WSP for an updated costs on the stage 2 crossing assessment as I was not happy with some of the hours that they were proposing to undertake the report.

SWTRA Official has confirmed the supplier is now on NPTs finance system and the TM contractor has been given an account on Synology to book road space. They are looking to get all the surveys done with the next couple of months and they data should be with us by the end of February 2026.

Kind regards

Hi SWTRA Official,

Hope all is well.

I'm forwarding you the information below for your reference. Thank you for all your hard work and support with the works and investigations in this area.

To ensure we are fully prepped for the upcoming meeting, I would be grateful if you could provide an esWG Officialated WG Officialalline for the statutory speed limit introduction. Additionally, any information on the latest available collisions and updates to the data we previously had would be beneficial.

A short summary of all aspects would be very welcome, including updates on speed limits, the right turn into Groesenon Road, the latest on Castle Hill, safety audit prospects, and any available rough WG Officialallines. We wouldn't want to be too rigid with these WG Officialallines, but it would be something we can draw on to show progress.

Lastly, if possible, could you provide the next date we intend to go in to monitor speeds at the new location between the junctions?

Noting that you return tomorrow, I would be grateful if we could have the above available for an internal meeting Wednesday AM please.

Thanks,

WG Official

Good morning RCC ,

I hope you are doing well. Apologies for the late comeback, we have been busy preparing for our update at the meeting on the 24th of November. I can confirm that we won't be requiring the use of PowerPoint for this session.

We are currently working closely with MCC on investigating short-term measures, which include the restriction of right turns into Groesenon Road and those out of Monmouth Road. Additionally, we will be providing updates on the Castle Hill crossing and the status of the permanent speed limit works.

However, as we are yet to complete Safety Audit, we won't be able to present finalised information on that front.

Looking forward to receiving the invite and providing an update as well as hearing out any concerns.

Kind regards,

Acknowledgement to To WG Official, Divisional Support Officer @ WG

Afternoon WG Official, thank you for your email. I can confirm, I have arranged a venue for the 24th of November, at MCC Raglan Depot, Station Road, Raglan, NP15 2ER.

Some thoughts!

Should we be targeting a 10am start (that will focus peoples minds before Lunch)

Will there be some form of an agenda to keep everyone on the "straight and narrow".

Will WG Official or WG Official be looking to do some form of Power Point or provide handouts?

Would you like me to extend invites to those that have attended earlier meetings?

In the meanWG Official, please accept this reply to acknowledge your email.

I hope you don't mind, as a matter of courtesy, I have copied WG Official, WG Official and

MCC Official from MCC into this reply.

Best wishes & kind regards

Good morning RCC ,

I hope you are doing well. Apologies for the late comeback, we have been busy preparing for our update at the meeting on the 24th of November. I can confirm that we won't be requiring the use of PowerPoint for this session.

We are currently working closely with MCC on investigating short-term measures, which include the restriction of right turns into Groesenon Road and those out of Monmouth Road. Additionally, we will be providing updates on the Castle Hill crossing and the status of the permanent speed limit works. However, as we are yet to complete Safety Audit, we won't be able to present finalised information on that front.

Looking forward to receiving the invite and providing an update as well as hearing out any concerns.

Kind regards,

WG Official

Afternoon WG Official, thank you for your email. I can confirm, I have arranged a venue for the 24th of November, at MCC Raglan Depot, Station Road, Raglan, NP15 2ER.

Some thoughts!

Should we be targeting a 10am start (that will focus peoples minds before Lunch)

Will there be some form of an agenda to keep everyone on the "straight and narrow".

Will WG Official or WG Official be looking to do some form of Power Point or provide handouts?

Would you like me to extend invites to those that have attended earlier meetings?

In the meanWG Official, please accept this reply to acknowledge your email.

I hope you don't mind, as a matter of courtesy, I have copied WG Official, WG Official and MCC Official from MCC into this reply.

Subject: Raglan Safety Study Update meeting late Nov early Dec

Good afternoon RCC ,

I hope you are well.

WG Official has asked me to reach out to arrange the next meeting to discuss the Raglan Safety Study for November/December.

WG Official and WG Official from WG have suggested the following list of dates:

November: 24th, 25th, 26th, 27th

December: 1st, 3rd, 4th, 9th, 10th, 11th, 15th

I was not involved in the initial meeting, are they usually hosted at your premises or at the Welsh Government building?

Kind regards,

WG Official

Divisional Support Officer

Reply to WG Official, @ WG Network Management Division,

Morning WG Official

Please accept my apologies. I thought I had Cc'd you into the emails I sent out.

The meeting date was as a result of correspondence by WG requesting a meeting back in July between WG and RCC. I can only apologise again for not confirming the date and WG Official with you.

The meeting start WG Official will be 10am at Monmouthshire County Council, Raglan Depot, Station Road, Raglan, Monmouthshire NP15 2ER.

I have attached a draft agenda so hopefully that will keep the meeting on track.

Best wishes & kind regards

RCC

Hi WG Official,

No it wont as there is 200m from centre Monmouth Road junction to Centre Groesnon Rd.

The latest LSS sift dates is 1/7/21 to 30/6/24. This is to inform the 25/26 programme. All these collisions listed have occurred within this period and no cluster site was identified due to the distance between the junctions.

Kind Regards

Morning SWTRA Official,

I have run the collision stats at A40 Raglan to cover the Monmouth Road Junction and Grosenon Rd ONLY from 01/04/22 to 31/03/25 (2024 and 2025 data is still provisional).

There are 4 collisions listed:

1 slight at Monmouth Rd Junction (right turn) March '24

2 Serious at Gosenon Rd Junction (both right turns out of Gosenon Rd) August '22 and May '24

1 Serious at the eastbound merge at Gosenon Rd (driver was intoxicated) April '23

Hi WG Official,

I had a meeting with WSP this afternoon and the sketches provided by MCC are going to be appended to the RSA. The lane reduction will need a slight tweak as it doesn't go back far enough so WSP are going to design this.

With regards to the speed limit order, I have answered Rhian regarding her query but I cannot give a WG Official line of when it will be implemented – WG Orders branch may be able to give you an indication of when it will be published but possibly not until the end of Q4.

I am chasing WSP for an updated costs on the stage 2 crossing assessment as I was not happy with some of the hours that they were proposing to undertake the report.

SWTRA Official has confirmed the supplier is now on NPTs finance system and the TM contractor has been given an account on Synology to book road space. They are looking to get all the surveys done with the next couple of months and they data should be with us by the end of February 2026.

Kind regards

Hi SWTRA Official,

Hope all is well.

I'm forwarding you the information below for your reference. Thank you for all your hard work and support with the works and investigations in this area.

To ensure we are fully prepped for the upcoming meeting, I would be grateful if you could provide an estimate for the statutory speed limit introduction. Additionally, any information on the latest available collisions and updates to the data we previously had would be beneficial.

A short summary of all aspects would be very welcome, including updates on speed limits, the right turn into Groesenon Road, the latest on Castle Hill, safety audit prospects, and any available rough timelines. We wouldn't want to be too rigid with these, but it would be something we can draw on to show progress.

Lastly, if possible, could you provide the next date we intend to go in to monitor speeds at the new location between the junctions?

Noting that you return tomorrow, I would be grateful if we could have the above available for an internal meeting Wednesday AM please.

Thanks,

WG Official

Morning WG Official

Please accept my apologies, it would seem this email went into my draft box.

Would it be convenient if we could convene the meeting on the 24th Nov.

I will arrange a venue next week if the 24th is satisfactory with you and your colleagues.

Best wishes & kind regards

RCC

Good morning RCC ,

I hope you are doing well. Apologies for the late comeback, we have been busy preparing for our

update at the meeting on the 24th of November. I can confirm that we won't be requiring the use of

PowerPoint for this session.

We are currently working closely with MCC on investigating short-term measures, which include the

restriction of right turns into Groesonen Road and those out of Monmouth Road. Additionally, we will be providing updates on the Castle Hill crossing and the status of the permanent speed limit works. However, as we are yet to complete Safety Audit, we won't be able to present finalised information on that front. Looking forward to receiving the invite and providing an update as well as hearing out any concerns.

Kind regards,

WG Official

Afternoon SWTRA Official,

As discussed, and with regards to the annual speed survey programme – grateful if you can include the Raglan bypass this financial year.

I note our previous survey is west of the junction arrangement – this provides speeds for the link although after discussing with SWTRA Official, a suggested better location at this current WG Official while we are focusing on the junction arrangement, would be to survey speeds midway between the off-slip and junctions in each direction as per the indicative plan below.

Happy to discuss.

Kind regards

Subject: speed survey Raglan

Hi WG Official,

I hope this message finds you well. We have made an ongoing commitment to Raglan Community Council to survey the speed within the 50mph on an annual basis. SWTRA Official has reviewed his list of sites and, as it currently stands, this site isn't in for review this year. However, we are working on a stage 2 crossing investigation. With that in mind, I was wondering if it would be possible to survey speeds at this location this year?

Another point to consider is whether it might be better for us to conduct the survey once the temporary speed limit is in on permanent signs or whether we can go ahead in any case and review again next year. Copying in those involved for awareness and I'm sure we will get together for a meeting to ensure we are well prepped for the end of November meeting with the Community Council.

Grateful for your thoughts.

Thanks,

WG Official

Hi WG Official,

Just to keep you in the loop, should have cc'd you. These are the main two contacts I have for requesting TROs and have sent the request today.

Also, as an update from my previous email, bit more good news, we can still enforce foldaway signs providing the TRO is correct and corresponds with their positioning and they are weighted down (I received confirmation after sending earlier email). Our enforcement officers just need to note the signs were on site/in correct place at WG Official of enforcement when they are submitting offence data.

Subject: Request for Traffic Regulation Orders please - A40 50mph Raglan and A4042

Morning Both,

Please could you help me with sending over some Traffic Regulation Orders.

Following speed survey and historical accidents assessment on the 50mph A40 Raglan by pass section, this road has been assessed for Gosafe enforcement and warrants higher priority/attention from us in view of the assessment outcome.

Therefore, please could you provide me with the current Traffic Regulation Order for this section of road? On my last visit to the road there were still foldaway 50mph signs, we can enforce using those providing they are weighted down and in same position according to the Traffic Order however, do you have a date of when permanent signs are being installed?

Also, following the fatal accidents along the A4042 from Mamhilad to Abergavenny, I am aiming to adopt a few operational enforcement sites along this road for Operation Apex (old Op Darwin) that we run on Sundays during fair weather season.

I am aware that Kurt already made contact with you previously regarding the A4042 Orders for the section from Newport through Torfaen to Mamhilad too, has there been updates on those now that roadworks are more or less finished?

Your help is much appreciated.

Kind thanks.

Subject: Raglan Safety Study Update meeting late Nov early Dec

Attachments: 25-5-31 May To CSTNW WG A40 in Raglan V2.pdf

Importance: High

Hi WG Official,

Thank you for the support with reaching out to Raglan Community Council in agreeing a date and

venue with Raglan Community Council and other stakeholders.

The Cab Sec doesn't need to attend this next one.

Previous arrangements were through RCC of the Community Council (Clerk)  
RCC.

Emails are provided below, although rather than providing to all, maybe it will be best worked via the

Clerk, RCC to agree a venue and a date.

As a heads up it would likely be myself and WG Official fronting,

I am generally available on the following and my calendar is open. I have checked WG Official is generally

aligned;

24, 25, 26, 27 Nov

1st, 3rd, 4th

9th 10th 11th

15th Dec.

Happy to discuss,

Thanks

WG Official

Subject: RE: WalesOnline - Raglan bypass issues

WG Official

Thanks for the below and agree with your stance. Not much we can do re the press but hold the line

we set out in the meeting.

I did see the Go Safe issue and disappointing they can't enforce (they do for roadworks) but as you say when the PTRO is in and signs we can get them to the site to undertake the enforcement then.

Might be worth see if WG Official Wyn can coordinate a date in the diary for us to go back to Raglan as we promised in Nov/December to provide an update.

Kind regards,

WG Official

Subject: FW: WalesOnline - Raglan bypass issues

Hi WG Official,

I just wanted to bring to your attention that the information we sent out at the end of June regarding the A40 Raglan Bypass might be prone to misinterpretation. Specifically, the line about design taking place on more medium and longer-term options isn't entirely accurate. At present, we are focusing on the quick wins and reinforcing those measures, with no further design work on the longer-term options at this stage.

Additionally, I wanted to mention that GoSafe has recently confirmed that they cannot enforce the Temporary Traffic Regulation Order (TTRO) as they previously indicated. However, they have assured us that once the PO is in place, they will step in to enforce it. This process is currently in progress.

Thanks,

WG Official

Subject: FW: WalesOnline - Raglan bypass issues

Hi WG Official

We have received a query from Wales Online asking for the latest on the A40 Raglan Bypass (query below). I know we prepped a line that the Cab Sec could use if he was asked at the A465 visit but wondered if any progress had been made in this area. If not, does this line work okay. The journalist needs something by cop today.

Cabinet Secretary for Transport and North Wales, Ken Skates said:

“I recently met with local members recently to discuss the incidents on the A40 at Raglan.

“I have asked my officials to consider implementing further short-term measures while design takes place on the more medium- and longer-term options.”

Thanks

WG Official

Cc: Climate Change - Press Office

Subject: WalesOnline - Raglan bypass issues

Hi all, hope you're well. Wales Online here from WalesOnline. Hope I'm in the right place. I've gone for transport but thought it could also be climate change, so cc'd that in just in case. I'm coming to you again if you don't mind regarding the A40 and A449 roads

in Raglan. The A40 is also known as the Raglan bypass. I've been contacted again by residents living in and around Raglan regarding the junction at the A40 which has again recently been the site of multiple incidents.

We wrote this in 2022 on the stretch: <https://www.walesonline.co.uk/news/wales-news/the-mostdangerous-junction-wales-24954778>. Locals have long said the junctions make it one of the most dangerous roads in Wales and cause continuous accidents. Motorists have to turn right across the carriageway towards the villages of Mitchel Troy and Dingestow, those from the opposite direction have to turn right across both sides of the A40 towards Raglan and Abergavenny, and less than 100 yards towards Raglan vehicles also turn right from Old Monmouth Road across the A40 to head towards Monmouth. I'm aware the most recent fatality happened on the slip road from Raglan to Newport rather than at the junctions but locals say it's not a coincidence accidents are continuing to happen on the stretch. They say most of the incidents are caused by vehicles overhanging in the carriageway on the A40 because motorists are attempting to cross into the central reservation but are then realising there is not enough room to do so safely. People often using the road say motorists are not adhering to the current temporary 50mph speed limit in the area making the road unsafe as drivers are travelling too fast to navigate overhanging vehicles in the carriageway.

In 2023 the Welsh Government provided a statement to us which read: "We are nearing completion of a safety study at the A40/Monmouth Road junction which will result in improvements for this section of road." Where is the Welsh Government at with this?

Raglan community council clerk RCC says a survey of the junctions was carried out in 2024 and a series of potential "quick wins" were published on the A40 in June 2024, but he says they don't seem to have been carried out. They included preventing the right-hand turn towards Mitchel Troy and a permanent reduction in the speed limit. Resident Julian Dyer says he is under the impression Ken Skates has agreed to visit the stretch to see the issues. Following the latest incidents in the area last month councillors WG Official John and Jayne McKenna described the stretch of road on the bypass as "dangerous". They said: "We, along with colleagues from Raglan CC, Mitchel Troy CC, our local MSs and MP have campaigned tirelessly to the Welsh Government to ask for measures to be put in place along this stretch of road to make it safer. It shouldn't take for someone to lose their life." I know this is an issue which has been mentioned in the Senedd recently too by MS Laura Anne here:

<https://www.facebook.com/watch/?v=1493744824940965>.

Could I get a response from the Welsh Government please on where they're at with this? If I could get something by Friday evening I'd be grateful. Any problems please feel free to call me on

redacted.

All the best,

Wales Online

Subject: Raglan Current Actions and required elements for Groesenon Rd Quick Win

Good morning WG Official,

I hope you are well. Following our discussions yesterday afternoon during our catch-up session for Raglan, I wanted to provide a quick update on the current actions regarding the quick wins identified in the safety study.

Firstly, SWTRA is making progress with the purchase order and associated signing. With due process, the earliest that the order will be in place will be January 26. Meanwhile, the design for the permanent signs is ongoing and currently undergoing RSA.

Regarding the second quick win to restrict the right turns out of Monmouth Road, this is something on which MCC are leading and we shall continue to liaise as there will be associated works in the central reserve of the A40.

As for the quick win that stops the A40 eastbound right turn from the A40 to Groesenon Road, we committed to investigating this at the meeting on 12th June with local representatives and the C.S.. Comments made by WG Official (Day) at the meeting indicated that we would investigate and subject a drawing to RSA. I can confirm that the 2 additional elements are therefore required on the existing

brief, i.e. feasibility design and RSA.

Thanks,

WG Official

WG Official

Subject: Raglan update

Location: Microsoft Teams Meeting

Start: Tue 08/07/2025 14:00

End: Tue 08/07/2025 14:45

Show WG Official As: Tentative

Recurrence: (none)

Meeting Status: Not yet responded

Organiser: , WG Official (EET - Network Management Division)

Required Attendees: WG Official (EET - Network Management Division); SWTRA Official; WG Official (EET - Infrastructure Delivery)

Afternoon all,

Looking for a slot to discuss progress on at the above site. Feel free to suggest an alternative if this doesn't work.

This relates to the Castle crossing St 1 (subsequent 2) and also the wider schemes in Raglan where

we are looking to follow up on commitments from the Safety Study and 2 subsequent meetings this year. These are

② to make the speed limit permanent with an order and on permanent signs.

② Implement quick win out of Mon Rd

② Investigate quick win into Groesenon rd.

We can also discuss the Llanover stage 1 if there is WG Official.

Thanks

WG Official

Subject: Draft meeting note for C.S. Raglan 12 June

WG Official,

Bones for a note – I have attendees. My recollection is that we sat down at 11:30 and cab sec arrived 11:45. The draft below does not include the mention of further signing, also that some of the higher level options would be more deliverable in terms of land take/cost and that some were much better aligned for AT – but can include.

Regards

WG Official

The C.S met with elected members of Raglan Community Council, alongside representatives from Monmouthshire County Council and elected Senedd members, at 11:45 on 12th June at Raglan Village Hall. The meeting provided an opportunity to discuss concerns related to the junctions onto the A40 at Raglan.

Discussions focused on specific quick win improvements identified in the published Raglan Safety Study, concentrating on immediate measures to enhance road safety. The meeting also included reference to the higher-level options as outlined in the Safety Study.

Welsh Government (WG) officials provided clarification on the thresholds for intervention, stating that before further investigation, funding and prioritisation of a possible scheme would require a

Killed or Seriously Injured (KSI) level of four KSIs within 100 metres over a three-year period. Officials confirmed actions were being taken to improve compliance with the first quick win, collaborating with GoSafe to enforce the new 50mph speed limit. Additionally, officials explained ongoing work to provide permanent speed limit signs, supported by a permanent order, was targeted for completion by the end of this financial year.

Officials reaffirmed that they would continue working with officers at the local authority to progress the implementation of the quick win restricting right turns from one of the county road junctions. They also confirmed that they would further investigate the removal of trunk road westbound right turns into a connecting county road, while emphasizing that care should be taken to avoid unintended safety consequences due to evidence of u-turns through the junction. The C.S. thanked the elected members and departed for another engagement at 12:30. WG officials

continued the meeting until its close at 1:00 PM.

Hi SWTRA Official,

Hope you are recovering well!

WG are meeting with the Cab Sec and Raglan Community Council this coming Thursday 12t and one of the actions we have has fallen out of speed enforcement conversations we have had with GoSafe. Grateful if you can arrange to have checked the attached and how it relates on site with appropriate signing and bagging of the NS signs, to make sure everything tallies.

This is so we can confirm back to GoSafe that the signs are in order with the Order, who will then enforce the temp 50 on this link who will then be in a position to enforce on the link without the risk of legal challenge / loophole issues.

Thanks

Hi WG Official,

Just to keep you in the loop, should have cc'd you. These are the main two contacts I have for requesting TROs and have sent the request today.

Also, as an update from my previous email, bit more good news, we can still enforce foldaway signs providing the TRO is correct and corresponds with their positioning and they are weighted down (I received confirmation after sending earlier email). Our enforcement officers just need to note the signs were on site/in correct place at WG Official of enforcement when they are submitting offence data.

Subject: Request for Traffic Regulation Orders please - A40 50mph Raglan and A4042

Morning Both,

Please could you help me with sending over some Traffic Regulation Orders.

Following speed survey and historical accidents assessment on the 50mph A40 Raglan by pass section, this road has been assessed for Gosafe enforcement and warrants higher priority/attention from us in view of the assessment outcome.

Therefore, please could you provide me with the current Traffic Regulation Order for this section of road? On my last visit to the road there were still foldaway 50mph signs, we can enforce using those providing they are weighted down and in same position according to the Traffic Order however, do you have a date of when permanent signs are being installed?

Also, following the fatal accidents along the A4042 from Mamhilad to Abergavenny, I am aiming to adopt a few operational enforcement sites along this road for Operation Apex (old Op Darwin) that we run on Sundays during fair weather season.

I am aware that Kurt already made contact with you previously regarding the A4042 Orders for the section from Newport through Torfaen to Mamhilad too, has there been updates on those now that roadworks are more or less finished?

Your help is much appreciated.

Kind thanks.

Hi WG Official,

Apologies for the delay in coming back to you I got distracted by the 2 dates on the DC.

Cluster sites are defined by a 100m diameter, 4 personal injury (not damage only) collisions in 3

years. We typically search for clusters once a year, but we can add studies if validated stats 19 data

supports this. The validated stats 19 data we hold in IRIS currently only covers to the end of

September 2024, so the more recent collisions noted in the DC aren't currently available for us to

consider in the identification of cluster sites. We will review if this site meets the cluster site criteria

when the latest Stats 19 police recorded injury collisions are published.

Subject: ADVICE: A40 Raglan

Importance: High

Afternoon Gents

I am dealing with the DC for the meeting at Raglan. Do you have any info on the recent accidents please so I can include. Anything else greatly appreciated

This is what I have so far

We are aware accidents have occurred over WG Official and there are a number of documented near misses. These are not at a level which represent a 'collision cluster' or significant pattern to warrant a major intervention at this current WG Official.

The options provided in the Safety Study are ready/available for further development should a major intervention become necessary.

Budgets are finite and must be allocated where there is evidence of the most need.

Interventions to improve safety already took place in March 2024 to temporarily reduce the

speed limit to 50mph (from 70mph) – this 50mph speed limit is the first of 3 no. potential quick wins in the study, and will now be made permanent by way of a traffic order and permanent signing.

Officials have commissioned a stage 1 pedestrian crossing investigation at the location between the town and the junction for Raglan Castle over the A40.

Officials are currently working on a stepped and sequential approach to improving highway safety and are working closely with officers at Monmouth County Council highways to

implement improvements at the junctions of Monmouth Road with the A40, to further improve safety conditions.

Officials are also consulting GoSafe safety camera partnership to review opportunities to enforce the speed limit in the interests of greater compliance.

Officials will continue to be evidence led and will monitor the site with regards to collisions and speeds

Thanks

H

I'm sorry to email everyone, but given the sensitivities, I want to make sure that everything is

being covered and we're not duplicating / responding to things we shouldn't be.

We've had several items come in regarding the A40 Raglan and I understand the Cab Sec has now agreed to a site visit on 12th June with redacted MS, reference DC/KSNWT/00265/25. I note that she will be inviting elected representatives. I'm assuming (can we ask her to confirm the attendees please?) that the majority of those who have written to us, will be at the meeting. So can we put a hold on all the correspondence please. We shouldn't be responding to anyone prior to the meeting.

Once we have a list of attendees and the meeting has taken place, can we have a note from the attending official as to whether responses are still required or whether it was resolved at the meeting.

Hopefully that makes sense. We'll get a list of who has written to us now, wanted to get this out asap just in case!

Diolch / Thanks
