

***This discussion paper has been written by officials of the Welsh Government. Ministers have not had an opportunity to comment on the contents. Exemplifications of changes are provided simply to inform discussion by DSG members. They are not Welsh Government proposals or statements of Government policy for or against changes.***

## **Eligible for Free School Meals (eFSM) data within the settlement**

### **Summary**

1. This paper provides analysis of the eligible for Free School Meals (eFSM) pupil numbers taken from the [January 2025 Pupil Level Annual School Census \(PLASC\)](#).
2. This paper summarises options for eFSM data for the 2026-27 settlement following the decision to use a 3-year average (2022, 2023 and 2024) of those pupils recorded as eFSM or Transitionally Protected (TP) for the 2025-26 settlement.

### **Views sought**

3. DSG members are asked to consider the analysis and options discussed throughout the paper and agree on an option for use in the 2026-27 settlement.

### **Related Papers**

4. Distribution Sub-Group (2024) Paper 14 – eFSM data decision for the 2025-26 settlement
5. Distribution Sub-Group (2023) Paper 19 – eFSM data decision for the 2024-25 settlement
6. Distribution Sub-Group (2023) Paper 10 – Eligible for Free School Meals (eFSM) within the settlement.
7. Distribution Sub-Group (2022) Paper 09 – Eligible for Free School Meals (eFSM) within the settlement.

### **Background**

8. Eligibility for Free School Meals (eFSM) is used as a proxy of deprivation in the assessment of relative need to spend on teaching and other services in the local government settlement (it is not used as a proxy for the need to spend on school meals). More information on the background can be found in papers from previous years.
9. The data also includes transitionally protected (TP) pupils who were eligible for FSM under previous eligibility rules, even if they no longer meet the current criteria.

### **Options**

10. The analysis summarises **5 options**:
  - a) **Option 1:** Use the latest data 2025 PLASC data only (pupils recorded as eFSM or TP).
  - b) **Option 2:** Use the latest 3-year average (2023, 2024 and 2025) of PLASC data (pupils recorded as eFSM or TP).
  - c) **Option 3:** Use the latest 4-year average (2022, 2023, 2024 and 2025) of PLASC data (pupils recorded as eFSM or TP).

- d) **Option 4:** Use the latest 3-year average (2023, 2024 and 2025) of PLASC data (pupils recorded as eFSM only).
- e) **Option 5:** Use the latest 4-year average (2022, 2023, 2024 and 2025) of PLASC data (pupils recorded as eFSM only).
- f) The advantage of using an average of the datasets is that it smooths out volatility. Option 2 is in line with the approach used for the 2025-26 Settlement.

## **Analysis**

### **Data**

- 11. **Table 1** in Annex A shows the number and share of pupils in **primary school** meeting the eligibility criteria for Free School Meals (eFSM) or those recorded as transitionally protected (TP) by local authority.
- 12. **Table 2** in Annex A shows the number and share of pupils in **secondary school** eligible for Free School Meals (eFSM) or those recorded as transitionally protected (TP) by local authority.
- 13. **Table 3** in Annex A illustrates Options 1-3. Option 1, which uses the latest year of data, results in the largest percentage change in AEF values (ranging from -0.15% to 0.14%). In contrast, Option 3 (a four-year average) produces the smallest changes (ranging from -0.04% to 0.03%), with Option 2 (a three-year average) falling in between (with changes ranging from -0.05% to 0.06%).
- 14. Since 2024-25, the data used in the settlement has been a combination of eFSM and TP. For comparison purposes, **Table 4** in Annex B illustrates two additional options based on eFSM data only. Both of these options result in a larger range of percentage changes to AEF when compared to Options 1-3. Option 4 results in a range of percentage changes from -0.53% to 0.51%, whilst Option 4 ranges from -0.54% to 0.55%.
- 15. **Table 5** in Annex C summarises the range in percentage changes in AEF values for all five options presented, with the different averaging time periods and the inclusion and exclusion of TP.

### **Conclusion:**

- 16. The exemplifications reflect only the isolated impact of free school meals data on the 2025-26 Settlement. Note that the data has not been updated to reflect the latest EOTAS data as this is currently unavailable. The exemplifications do not consider any other data changes planned for the 2026-27 Settlement, nor the impact of transfers in and out.
- 17. For the purposes of this analysis, it is assumed that the 2025-26 top-up figures allocated to certain local authorities under the floor funding calculations remain unchanged.
- 18. DSG members are asked to consider and discuss the analysis included in this paper and agree on an option for the free school meals data to be used in the 2026-27 settlement.
