Dear colleagues,

As part of the National Neurodivergence Improvement Programme's ongoing work to improve the timeliness, consistency and quality of adult ADHD assessment pathways in Wales, we are exploring a pilot of QbTest implementation within a Health Board setting.

Please find attached an Expression of Interest document outlining the proposed pilot model, operational requirements, evaluation approach and governance arrangements, along with the information we would ask interested Health Boards to provide.

We would welcome expressions of interest from Health Boards able to identify a clinical lead, a testing location and workforce capacity to support the pilot. Please see the attached document for full details of what to submit, and for further information regarding the QbTest.

If your service would like to be considered, please submit your expression of interest by **12th October 2026** to neurodiversity@gov.wales.

Following receipt of expressions of interest, we will be in contact to agree the pilot site, implementation arrangements and evaluation framework.

Please don't hesitate to get in touch if you have any questions in the meantime.

Kind regards,

Specialist Neurodivergence Improvement Programme Manager
