Subject: RE: ADHD patients moving to Wales - <redacted s40(2)> your guidance please

Good Afternoon All,

Thank you for your responses and I have updated our Adult Mental Health team that this will be discussed at a national level in due course.

I would be more than happy to provide an update on our new ADHD Local Supplementary Service in CTM UHB. I have attached the specification and a brief overview below, but if you would like to schedule a meeting to discuss further, please just let me know.

Discussions took place in our Supplementary Service Review Group to consider a new service, following review of both HDUHB and ABUHB existing models. We were lucky enough to work with <redacted s40(2)> who originally wrote a robust specification for ABUHB, and therefore adapted this to our UHB, with similarities in standard shared care approach and linked shared care protocol. We commissioned the service from 1st December 2025 and currently have 11 practices signed up, with each practice receiving a thorough handover from CTM Adult Mental Health on existing patients.

Many Thanks

<redacted s40(2)>

Thanks, <redacted s40(2)> for responding.

Hello <redacted s40(2)>,

Following up on the emails below, we have had several pieces of correspondence about Shared Care, and it is something we need to look at through one the subgroups we are establishing for the ADHD roundtable. I was speaking the ADHD lead for NHS England yesterday regarding Right to Choose and Shared Care. We discussed the plethora of private providers operating in England and the issues they face because of that.

Happy to discuss further and including the intentions of the subgroups which we will be setting dates (after the Election).

Best wishes

<redacted s40(2)>

Hi <redacted s40(2)>

I am a senior medical officer and a GP working in the primary care division of Welsh government. Working with <redacted s40(2)>,

our remit includes mental health, ND, ADHD amongst other things, as well as a review of shared care and supplementary services. <redacted s40(2)> mentioned that there may be some correspondence making it's way to Welsh Gov and it would super handy if we could link into you and start with a look at the DSS ADHD commissioned in CTM.

Sincere thanks,

<redacted s40(2)>

Hi <redacted s40(2)>

I'm forwarding to colleagues in WG for awareness and consideration as we in NHSP&I wouldn't be able to advise on contracts.

However, there will be some broader work commencing that focuses on adult ADHD.

Hi <redacted s40(2)>,

I hope I have found the correct contact who may be able to help us with a query.

Our Adult Mental Health team have received the below query through our Concerns team, and I work within the GMS contracting team for GP practices, leading on the ADHD supplementary service recently commissioned across CTM UHB.

We feel this query may be a discussion required at a national level, based on the recipients of the email and the complexity of shared care and GP prescribing. There is a whole industry around ADHD assessment and medication in NHS England, with "right to choose" pathways meaning there are hundreds of providers in comparison to NHS Wales' supplementary services. Most Wales GPs will not engage in shared care with private providers, and not all GPs choose to engage in shared care at all.

Are you aware of any suitable forums which we can take this query to discuss nationally?

Many Thanks

Subject: ADHD patients moving to Wales

Good afternoon,

I'm hoping you can give me some guidance, or introduce me to the person who can help with regard to patients moving from England to Wales either partway through the ADHD titration pathway, or those who have completed titration and are on a shared care agreement with the English GP. I'm sure this is a scenario that must have arisen before, and we quite often don't find out about the move until after it has happened. Patients aren't always aware of the implications of moving out of England, and assume the NHS is the same nationwide.

Is there some way that we could be accredited so that we could honour the annual reviews, and the Welsh GP could take over routing prescribing? This would avoid the expense of a Welsh consultant having to review and issue a shared care agreement, and would provide greater continuity of care for the patient. Obviously annual

reviews would still have to have a tariff attached, but we would be willing to work with you on that point.

I'd be keen to work with you to put in place a proper solution to this issue which seems to be happening more often.

More than happy to schedule a quick meeting if it helps, and many thanks in advance for any information you can share.

Kind regards,
