August 2026

Ratio Weekend_Weekday direct visits

- Average number of visits that occur on a weekday compared to the average number of visits that occur on a weekend day.
- Ratio compares the average weekday visits to average weekend visits (Weekend / Weekday).
- Reporting on the average number of visits on a given weekday vs a weekend day.
- Bank holidays are considered week days.

N.B. Averages are calculated with the available data, some months may not include all HBs.

Additional Information

This measure represents activity i.e. Number of visits occurring

This measure is **activity** which is not the same as **capacity** available and only considers direct visits and not additional work undertaken by DN services.

The weekend Activity ratio is at 2026-08 was **67.90 % .**

This is **HIGHER** than the average activity ratio for the last 4 months (**67.0 %**) and **LOWER** than the same month of the previous year (**69.3 %**)
