1.0 Summary	4
2.1 Employment rate	7
2.2 Gross value added per head	8
2.3 Gross disposable household income per head	9
2.4 Average gross weekly full-time earnings	10
2.5 Children living in workless households rate	11
2.6 General economic assessment	12
3.1 Male life expectancy	14
3.2 Female life expectancy	15
3.3 Adult obesity rate	16
3.4 Adult smoking rate	17
3.5 Under 18 conception rate	18
3.6 Mental component summary score	19
3.7 Older people supported in the community	20
3.8 Looked after children with three or more placements in year	21
3.9 Low birth weight babies	22
3.10 Uptake rate for primary MMR vaccine at age two	23
3.11 Average dmft score for five year old children	24
4.1 Working age adults with no qualifications	25
4.2 Working age adults with qualifications at NQF level four or above	26
4.3 Secondary school pupil attendance rate	27
4.4 Average wider points score for 15 year olds	28
4.5 Core subject indicator attainment at key stage two	29
5.1 Rate of households for whom homelessness was accepted	30
5.2 Additional affordable housing provision rate	31
6.1 Principal (A) roads in poor condition	32
6.2 Persons travelling to work by car, van or minibus	33
6.3 People killed and seriously injured on roads	34
7.1 Total recorded crime rate	35
7.2 Rate of individuals referred to treatment for alcohol misuse	36
8.1 Cleanliness rate of highways and relevant land	37
8.2 Ecological footprint	38
9.1 Welsh speakers	39
9.2 Key stage two pupils receiving teacher assessment in Welsh	40
9.3 Key stage three pupils receiving teacher assessment in Welsh	41
9.4 Visits to public libraries	42
9.5 Regular participation in sport and active recreation	43
10.0 Key quality information	45

#### 1.0 Summary

This document is a compendium of existing published statistics relating to the Vale of Glamorgan and is updated in-line with updates to the source statistics. Almost all of the statistics included are official statistics published by the Welsh Government, the National Health Service, or other central government departments. However, as the statistics are not all classified as National Statistics, this document is not itself a National Statistic.

The following is a high level summary of the data for the Vale of Glamorgan. The data behind each of the following points is shown in charts in the main body of the report.

# 1.1 Economy

- In 2013 the employment rate in the Vale of Glamorgan was 71.6 per cent. This was the sixth highest amongst the 22 Welsh local authorities. The rate rose over the year (up 3.2 percentage points) but overall has fallen since 2001 (down 0.7 percentage points). Between 2001 and 2013 the employment rate has been above the Welsh average.
- GVA per head in 2012 stood at £21,239 in the Vale of Glamorgan. This was above the Welsh average and the joint highest amongst the 22 Welsh local authorities. Between 1999 and 2012 GVA per head in the Vale of Glamorgan has been above that for Wales as a whole, with the gap widening slightly over this period.
- In 2012 GDHI per head in the Vale of Glamorgan stood at £15,500 and was the joint third highest amongst the 22 Welsh local authorities. Between 1999 and 2012 GDHI per head in the Vale of Glamorgan has been above the Welsh average.
- In 2013 average weekly earnings in the Vale of Glamorgan stood at £577. This was the second highest amongst the 22 Welsh local authorities. In 2003, 2008 and 2013 earnings in the Vale of Glamorgan were above the Welsh average.
- In 2013 the Vale of Glamorgan had the sixth lowest rate of children living in workless households amongst the Welsh local authorities. The rate rose since 2012 and fell since 2004. The gap between the Wales average has widened from being 1.7 percentage points below the Wales average in 2004 to being 3.9 percentage points below the Wales average in 2013.

#### 1.2 Health and well-being

- Male life expectancy for 2011-13 was higher than the Welsh average.
- Female life expectancy for 2011-13 was higher than the Welsh average.
- The percentage of obese adults for 2012 & 2013 was lower than the Welsh average.
- The percentage of adult smokers for 2012 & 2013 was lower than the Welsh average.
- The Vale of Glamorgan's under 18 conception rate has fallen since 2005 and in recent years has been at or below the Welsh average.
- The mean mental component summary score for 2012 & 2013 was not significantly different from the Welsh average.
- The Vale of Glamorgan's rate of older people supported in the community has generally decreased since 2005-06 and was the third lowest in Wales in 2013-14.
- The Vale of Glamorgan's percentage of looked after children with three or more placements in the year was higher than the Wales average in 2013-14.
- The proportion of low birth weight babies in the Vale of Glamorgan was below the Wales average for most years since 2000.

- The MMR coverage rate in The Vale of Glamorgan has increased 0.7 percentage points since 2012-13 to a rate of 96.8 per cent in 2013-14, which is slightly above the Welsh average.
- The average dmft score for the Vale of Glamorgan was 0.91 in 2011-12, which was the lowest score in Wales. The score has been lower than the Wales average in the last two surveys.

#### 1.3 Education and skills

- The percentage of working age adults with no qualifications has fallen since 2001. In 2013 the rate was 2.4 percentage points lower than the Welsh average and was the fifth lowest local authority rate in Wales.
- The percentage of working age adults with qualifications at NQF level 4+ has risen since 2001. In 2013 the rate was 8.9 percentage points higher than the Welsh average and was the second highest local authority rate in Wales.
- The attendance rate has risen since 1999. It was 0.5 percentage points above the Welsh average of 93.6 percent in 2014, making it the fifth highest attendance rate.
- The average wider points score has generally risen since 2004. It was above the Welsh average in 2013.
- The percentage of pupils achieving the core subject indicator at key stage two has risen overall since 1999. It was 4.3 percentage points above the Welsh average of 86.1 per cent in 2014 and had the second highest rate in Wales.

#### 1.4 Housing

- The rate of homelessness acceptances in the Vale of Glamorgan remained below the average rate for Wales from 2001-02 to 2007-08. However, following an increase the homelessness rate rose above the Wales average in 2008-09 before dropping again in 2009-10 to well below the Wales average. This trend has continued through to 2013-14 when the rate remained below the Wales average.
- The rate of additional affordable housing provision in the Vale of Glamorgan decreased in 2013-14 remaining below the Wales average.

#### 1.5 Transport

- In 2010-11, in The Vale of Glamorgan, the proportion of A county roads in poor condition was significantly higher than the proportion for Wales as a whole and this had increased sharply from the position for the previous year. There were 74 miles of these roads in The Vale of Glamorgan.
- In 2009, the proportion of people living in the Vale of Glamorgan and travelling to work by car, van or minibus was similar to (between 2 percentage points above and 2 points below) the all-Wales average.
- In the Vale of Glamorgan, the average rate (per head of population) between 2011-13 at which people were killed or seriously injured on roads was below the Wales average.

#### 1.6 Crime and substance misuse

- The Vale of Glamorgan has a crime rate seven percentage points lower than the average for Wales. It has fallen 48 per cent since 2002-03.
- The estimated number of individuals referred for alcohol treatment in the Vale of Glamorgan was lower than the Wales average in 2013-14.

#### 1.7 Environment

- The cleanliness rate of highways and relevant land in The Vale of Glamorgan remained fairly close to the Welsh average until 2010-11, when it dropped markedly. The rate increased consistently in the years that followed, reaching a level just below the Welsh average in 2013-14.
- The ecological footprint in The Vale of Glamorgan was one of the highest amongst Welsh local authorities in 2006.

#### 1.8 Heritage

- According to the 2011 Census the percentage of people age three and over who spoke Welsh in the Vale of Glamorgan was 10.8 per cent, and was one of the lowest rates amongst Welsh local authorities.
- The percentage of pupils assessed in Welsh first language at key stage two has increased by 2.7 percentage points since 2013 and by 4.2 percentage points since 1999.
- The percentage of pupils assessed in Welsh first language at key stage three has decreased by 0.3 percentage points since 2013 but has increased by 8.9 percentage points since 1999.
- The number of visits to public libraries in the Vale of Glamorgan in 2012/13 was around 7,000 per thousand, which was higher than the Welsh average and was the third highest local authority rate.
- The percentage of adults who regularly participated in sport and active recreation in the Vale of Glamorgan in 2008/09 was 48 per cent, around the same as 2004/05. Since 1998/99 the figures have fluctuated close to the Wales average. The sampling method of the Active Adults Survey changed from a quota sample to a random probability sample in 2008/09, so care should be taken when making comparisons with previous years.

#### 2.1 Employment rate

The employment rate is defined as the percentage of the resident working age population that is in employment. Figure 2.1 shows the latest annual data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 2.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 2.1: Employment rate, 2013

Source: Annual Population Survey, Office for National Statistics

Figure 2.2: Employment rate, 2001-2013

Source: Annual Population Survey, Office for National Statistics

In 2013 the employment rate in the Vale of Glamorgan was 71.6 per cent. This was the sixth highest amongst the 22 Welsh local authorities. The rate rose over the year (up 3.2 percentage points) but overall has fallen since 2001 (down 0.7 percentage points). Between 2001 and 2013 the employment rate has been above the Welsh average.

# 2.2 Gross value added per head

Gross value added measures the size of the economy of an area at NUTS3 level, which is a European Union geography representing small groups of local authorities. Local authority figures have been estimated by assuming they are the same as the figures for the NUTS3 area. Figure 2.3 shows the latest data for the Vale of Glamorgan, relative to other Welsh local authorities and the Welsh average. Figure 2.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Vale of Glamorgan Cardiff Monmouthshire Newport Flintshire Wrexham Swansea Gwynedd Neath Port Talbot Bridgend Conwy Denbighshire Powys Rhondda Cynon Taf Merthyr Tydfil Caerphilly Blaenau Gwent Wales average Torfaen Cere digion Pembrokeshire Carmarthenshire Isle of Anglesey 10,000 0 5,000 15,000 20,000 25,000 GBP per head

Figure 2.3: Gross value added per head, 2012

Source: Regional Accounts, Office for National Statistics

Figure 2.4: Gross value added per head, 1999-2012

Source: Regional Accounts, Office for National Statistics

GVA per head in 2012 stood at £21,239 in the Vale of Glamorgan. This was above the Welsh average and the joint highest amongst the 22 Welsh local authorities. Between 1999 and 2012 GVA per head in the Vale of Glamorgan has been above that for Wales as a whole, with the gap widening slightly over this period.

# 2.3 Gross disposable household income per head

Gross disposable household income is measured at NUTS3 level, which is a European Union geography representing small groups of local authorities. Local authority figures have been estimated by assuming they are the same as figures for the NUTS3 area. Figure 2.5 shows the latest data for the Vale of Glamorgan, relative to other Welsh local authorities and the Welsh average. Figure 2.6 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Monmouthshire Newport Vale of Glamorgan Cardiff Conwy Denbighshire Powys Isle of Anglesey Flintshire Wrexham Cere digion Pembrokeshire Carmarthenshire Neath Port Talbot Bridgend Swansea Wales average Gwynedd Rhondda Cynon Taf Merthyr Tydfil Caerphilly Blaenau Gwent Torfaen 12,000 12,500 14,000 13,500 14,500 15,000 13,000 15,500 16,000 GBP per head

Figure 2.5: Gross disposable household income per head, 2012

Source: Regional Accounts, Office for National Statistics

Figure 2.6: Gross disposable household income per head, 1999-2012

Source: Regional Accounts, Office for National Statistics

In 2012 GDHI per head in the Vale of Glamorgan stood at £15,500 and was the joint third highest amongst the 22 Welsh local authorities. Between 1999 and 2012 GDHI per head in the Vale of Glamorgan has been above the Welsh average.

# 2.4 Average gross weekly full-time earnings

Mean average gross weekly full-time earnings data is based on workplaces in each local authority, for full-time employees only, and includes overtime. Figure 2.7 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 2.8 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Cardiff Vale of Glamorgan Flintshire Denbighshire Newport Pembrokeshire Neath Port Talbot Bridgend Rhondda Cynon Taf Caerphilly Torfaen Carmarthenshire Conwy Wrexham Swansea Isle of Anglesey Wales average Cere digion Gwynedd Merthyr Tydfil Powys Monmouthshire Blaenau Gwent 0 100 200 300 500 600 700 400 **GBP**

Source: Annual Survey of Hours and Earnings, Office for National Statistics

Figure 2.8: Average gross weekly full-time earnings, 2003-2013

Source: Annual Survey of Hours and Earnings, Office for National Statistics

In 2013 average weekly earnings in the Vale of Glamorgan stood at £577. This was the second highest amongst the 22 Welsh local authorities. In 2003, 2008 and 2013 earnings in the Vale of Glamorgan were above the Welsh average.

# 2.5 Children living in workless households rate

The children living in workless households rate is defined as the percentage of all children under 16 who are living in working age households with no-one in employment. Figure 2.9 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 2.10 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Blaenau Gwent Torfaen Rhondda Cynon Taf Carmarthe nshire Newport Bridgend Merthyr Tydfil Neath Port Talbot Caerphilly Conwy Denbighshire Swansea Wrexham Cardiff Gwynedd Isle of Anglesey Wales average Vale of Glamorgan Pembroke shire Monmouthshire Flintshire Powys Cere digion o 10 15 20 25 30 35 Percentage of children aged 0-15

Figure 2.9: Children living in workless households rate, 2013

Source: Annual Population Survey, Office for National Statistics

Figure 2.10: Children living in workless households rate, 2004-2013

Source: Annual Population Survey, Office for National Statistics

In 2013 the Vale of Glamorgan had the sixth lowest rate of children living in workless households amongst the Welsh local authorities. The rate rose since 2012 and fell since 2004. The gap between the Wales average has widened from being 1.7 percentage points below the Wales average in 2004 to being 3.9 percentage points below the Wales average in 2013.

#### 2.6 General economic assessment

This section presents an economic assessment for Wales and, where appropriate, focuses on the regional differences apparent in the datasets above.

Gross Value Added (GVA) measures the contribution to the economy of each individual producer, industry or sector. It is commonly used as an estimate of Gross Domestic Product, a key indicator on the state of the economy. GVA per head varies quite significantly across Wales, with all Welsh regions lagging behind the UK average, although estimates of sub-regional GVA should always be treated with caution as they can be distorted by commuting flows between local authorities and across the Welsh-English border.

Gross Disposable Household Income (GDHI) is a measure of the amount of money individuals have available for spending or saving. It generally provides a more reliable indicator of living standards across different areas as it is based on where people live rather than where they work. GDHI figures per head for Welsh local authorities portray a more equitable picture of living standards across the country than is otherwise suggested by the GVA per head figures. However, similarly to GVA data, GDHI per head figures for each sub-region in Wales all lie below the UK average.

In broad terms, GVA per head in the North<sup>1</sup>, Mid<sup>2</sup> and South West<sup>3</sup> regions of Wales lie below the average for Wales as a whole whereas the figure for South East<sup>4</sup> Wales lies above the Welsh average. Differences in GVA per head across Wales can be explained for the most part through varying rates of productivity, economic activity, out-commuting, and demographic differences across the regions.

The lower level of GVA per head in the North is largely explained by a higher proportion of elderly residents and out-commuting from the region but these effects are partially offset by the region's higher activity rates. GDHI per head in North Wales lies above the Welsh average, however average full-time earnings are below the Welsh average. Over the last year, both the employment and the economic inactivity rate increased in North Wales, whilst the unemployment rate fell. Looking over the longer term, the labour market in North Wales has seen improvement similar to that for Wales since 2001.

The level of GVA per head in Mid Wales also lies below the Welsh average – this is due to lower GVA per job, out-commuting from the region, and a higher proportion of elderly residents. However, these effects are partly offset by higher activity rates within the region. GDHI per head in the region is above the Welsh average, however average full-time earnings lie below the Welsh average. Over the latest year the employment rate increased in Mid Wales whilst the unemployment and inactivity rates fell. The average for Mid Wales generally hides differences between Ceredigion and Powys, partly because Ceredigion is affected by a large number of economically inactive students. Looking over the longer term, Mid Wales has seen improvement compared to Wales since 2001.

<sup>&</sup>lt;sup>1</sup> Isle of Anglesey; Gwynedd; Conwy; Denbighshire; Flintshire; and Wrexham

<sup>&</sup>lt;sup>2</sup> Powys; and Ceredigion, although the GVA and GDHI figures used in this context are for Powys only

<sup>&</sup>lt;sup>3</sup> Pembrokeshire; Carmarthenshire; Swansea; and Neath Port Talbot

<sup>&</sup>lt;sup>4</sup> Bridgend; Rhondda, Cynon, Taff; Merthyr Tydfil; Caerphilly; Blaenau Gwent; Torfaen; The Vale of Glamorgan; Monmouthshire; Newport; and Cardiff

GVA per head in South West Wales is also below the Welsh average. This difference is largely due to lower GVA per job in the region. GDHI per head in the South West is nearer the Welsh average, however average full-time earnings lie below the Welsh average. Over the latest year both the employment and the ILO unemployment rates increased in South West Wales whilst economic inactivity (excluding students) rate fell. Looking at the longer term, the labour market in South West Wales has generally seen a slight improvement compared to Wales since 2001.

As mentioned previously, South East Wales is the only Welsh region to report a GVA per head figure that is above the Welsh average. This largely reflects higher GVA per job in the region than elsewhere in Wales. The GVA per head figure however remains below that of the UK average. GDHI per head in South East Wales is similar to the Welsh average and average full-time earnings in the region lie above the average. Over the latest year the employment rate increased in South East Wales, whilst both the unemployment and economic inactivity rates fell. Looking at the longer term, the labour market in South East Wales has seen an improvement compared to Wales since 2001.

One further notable conclusion from the data is that the Heads of the Valleys<sup>5</sup> region lags well behind the rest of Wales on almost all economic measures.

<sup>&</sup>lt;sup>5</sup> The Head of the Valleys programme area is defined as the whole of the local authorities of Merthyr Tydfil; and Blaenau Gwent, together with the northern and central elements of Rhondda, Cynon, Taff; Caerphilly; and Torfaen.

# 3.1 Male life expectancy

Male life expectancy is the expected number of years a male would live from birth, assuming that he will experience the given area's age-specific mortality rates for that time period throughout his remaining life (period life expectancy). Figures are based on the population estimates and deaths by date of registration for a period of three consecutive years. Figure 3.1 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Powys Monmouthshire Cere digion Vale of Glamorgan Gwynedd Pembrokeshire Conwy Flintshire Isle of Anglesey Wrexham Carmarthenshire Denbighshire Cardiff Newport Caerphilly Swansea Torfaen Wales average Bridgend Merthyr Tydfil Neath Port Talbot Rhondda Cynon Taf Blaenau Gwent 73 74 75 76 77 78 79 80 81 Years

Figure 3.2: Male life expectancy, 2001-03 - 2011-13

Source: Life expectancy at birth and at age 65 by local areas in the United Kingdom, Office for National Statistics

Male life expectancy for 2011-13 was higher than the Welsh average.

# 3.2 Female life expectancy

Female life expectancy is the expected number of years a female would live from birth, assuming that she will experience the given area's age-specific mortality rates for that time period throughout her remaining life (period life expectancy). Figures are based on the population estimates and deaths by date of registration for a period of three consecutive years. Figure 3.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Monmouthshire Cere digion Gwynedd Powys Vale of Glamorgan Isle of Anglesey Conwy Cardiff Pembrokeshire Carmarthenshire Flintshire Newport Wrexham Swansea Torfaen Caerphilly Denbighshire Wales average Neath Port Talbot Bridgend Merthyr Tydfil Rhondda Cynon Taf Blaenau Gwent 78 79 80 81 82 83 84 85 Years

Figure 3.4: Female life expectancy, 2001-03 - 2011-13

Source: Life expectancy at birth and at age 65 by local areas in the United Kingdom, Office for National Statistics

Female life expectancy for 2011-13 was higher than the Welsh average.

# 3.3 Adult obesity rate

The adult obesity rate is the percentage of all adults (persons aged 16 and over) who have a body mass index of 30 or more. Body mass index is calculated as a person's weight in kilogrammes divided by the square of their height in metres. Figure 3.5 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.6 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Torfaen Caerphilly Blaenau Gwent Merthyr Tydfil Neath Port Talbot Carmarthe nshire Rhondda Cynon Taf Wrexham Newport Isle of Anglesey Swansea Bridgend Pembrokeshire Flintshire Cardiff Powys Denbighshire es average Vale of Glamorgan Monmouthshire Cere digion Conwy PΑ Gwynedd 0 5 10 15 20 25 30 35 Age-standardised percentage of adults

Source: Welsh Health Survey, Welsh Government

Figure 3.6: Adult obesity rate, 2003/05 - 2012 & 2013

Source: Welsh Health Survey, Welsh Government

The percentage of obese adults for 2012 & 2013 was lower than the Welsh average.

# 3.4 Adult smoking rate

The adult smoking rate is the percentage of all persons aged 16 and over who reported that they smoke daily or occasionally. Figure 3.7 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.8 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 3.7: Adult smoking rate, 2012 & 2013

Source: Welsh Health Survey, Welsh Government

Figure 3.8: Adult smoking rate, 2003/05 - 2012 & 2013

Source: Welsh Health Survey, Welsh Government

The percentage of adult smokers for 2012 & 2013 was lower than the Welsh average.

40

45

#### 3.5 Under 18 conception rate

The under 18 conception rate is the number of births plus the number of abortions to females aged under 18 per 1,000 females aged 15-17. Figure 3.9 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.10 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Blaenau Gwent Isle of Anglesey Bridgend Wrexham Rhondda Cynon Taf Cardiff Conwy Denbighshire Neath Port Talbot Gwynedd Merthyr Tydfil Newport Vale of Glamorgan Flintshire Pembrokeshire Torfaen Carmarthenshire Swansea Caerphilly Cere digion Monmouthshire Powys

15

Figure 3.10: Under 18 conception rate, 2005-2012

0

Source: Conception and Vital Statistics, Office for National Statistics

The Vale of Glamorgan's under 18 conception rate has fallen since 2005 and in recent years has been at or below the Welsh average.

# 3.6 Mental component summary score

The mental component summary score is a relative measure of mental well-being. Figure 3.11 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.12 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

52

51

# 3.7 Older people supported in the community

The rate of older people supported in the community is the count of social services clients receiving non-residential services per 1,000 population aged 65 and over. Figure 3.13 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.14 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Torfaen Blaenau Gwent Caerphilly Merthyr Tydfil Neath Port Talbot Rhondda Cynon Taf Bridgend Swansea Wrexham Pembrokeshire Powys Flintshire Newport Conwy Carmarthe nshire Monmouthshire Wales average Isle of Anglesey Ceredigion Denbighshire Vale of Glamorgan Cardiff Gwynedd 0 40 60 100 120 20 80 140 Rate per 1,000 aged 65+

Figure 3.14: Older people in the community, 2005-06 - 2013-14

Source: Local authority data returns to Welsh Government; Mid-Year Population Estimates, Office for National Statistics

The Vale of Glamorgan's rate of older people supported in the community has generally decreased since 2005-06 and was the third lowest in Wales in 2013-14.

# 3.8 Looked after children with three or more placements in year

The percentage of looked after children with three or more placements in the year is the percentage of all those children with a looked after status at the end of the year with three or more placements during that year. Figure 3.15 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.16 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 3.16: Looked after children with three or more placements in year, 2005-06 – 2013-14

Source: Local authority data returns to Welsh Government

The Vale of Glamorgan's percentage of looked after children with three or more placements in the year was higher than the Wales average in 2013-14.

# 3.9 Low birth weight babies

The low birth weight babies measure is the number of live and still births which are below 2.5kg as a percentage of all live and still births with a stated birth weight. Figure 3.17 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.18 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 3.17: Low birth weight babies, 2012

Source: Vital Statistics, Office for National Statistics

Figure 3.18: Low birth weight babies, 2000-2012

Source: Vital Statistics, Office for National Statistics

The proportion of low birth weight babies in the Vale of Glamorgan was below the Wales average for most years since 2000.

# 3.10 Uptake rate for primary MMR vaccine at age two

The uptake rate for primary MMR vaccine at age two measure is the percentage of all children reaching the age of two in the time period who were immunised against MMR by their second birthday (i.e. had received the primary vaccination). Figure 3.19 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.20 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Flintshire Bridgend Torfaen Merthyr Tydfil Blaenau Gwent Wrexham Caerphilly Swansea Cere digion Carmarthenshire Rhondda Cynon Taf Vale of Glamorgan Isle of Anglesey Conwy Denbighshire Neath Port Talbot es average Gwynedd Newport Pembrokeshire Powys Monmouthshire PΑ Cardiff 95.0 95.5 96.0 93.0 94.0 94.5 96.5 97.0 97.5 98.0 93.5 Percentage of children reaching two

Source: COVER Statistics, Public Health Wales

Figure 3.20: Uptake rate for primary MMR vaccine at age two, 2005-06 – 2013-14

Source: COVER Statistics, Public Health Wales

The MMR coverage rate in The Vale of Glamorgan has increased 0.7 percentage points since 2012-13 to a rate of 96.8 per cent in 2013-14, which is slightly above the Welsh average.

#### 3.11 Average dmft score for five year old children

The average dmft score for five year old children is the average number of teeth decayed, missing or filled per child aged five, and therefore a lower score is preferable. The data is sourced from surveys of oral health of five year olds. Figure 3.21 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 3.22 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Blaenau Gwent Torfaen Newport Neath Port Talbot Merthyr Tydfil Rhondda Cynon Taf Caerphilly Wrexham Isle of Anglesey Cardiff Swansea Denbighshire Pembrokeshire Gwynedd Conwy Powys Cere digion es average Bridgend Monmouthshire Flintshire Carmarthenshire EΑ Vale of Glamorgan 0.0 0.5 1.0 1.5 2.0 3.5 2.5 3.0 Average dmft score

Figure 3.22: Average dmft score for five year old children, 2007-08 and 2011-12

Source: Welsh Oral Health Information Unit, School of Dentistry, University of Cardiff

The average dmft score for the Vale of Glamorgan was 0.91 in 2011-12, which was the lowest score in Wales. The score has been lower than the Wales average in the last two surveys.

# 4.1 Working age adults with no qualifications

The working age adults with no qualifications measure is the percentage of all persons aged 18 to 59 for women and 18 to 64 for men who have no qualifications. Figure 4.1 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 4.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Blaenau Gwent Rhondda Cynon Taf Merthyr Tydfil Torfaen Bridgend Neath Port Talbot Caerphilly Pembrokeshire Carmarthenshire Isle of Anglesey Swansea Wrexham Gwynedd Denbighshire Newport Powys Cere digion Walesaverage Vale of Glamorgan Conwy Cardiff Flintshire Monmouthshire o 2 10 16 4 8 12 14 18 Percentage of working age adults

Source: Annual Population Survey, Office for National Statistics

Figure 4.2: Working age adults with no qualifications, 2001-2013

Source: Annual Population Survey, Office for National Statistics

The percentage of working age adults with no qualifications has fallen since 2001. In 2013 the rate was 2.4 percentage points lower than the Welsh average and was the fifth lowest local authority rate in Wales.

# 4.2 Working age adults with qualifications at NQF level four or above

The working age adults with qualifications at National Qualification Framework (NQF) level four or above measure is the percentage of all persons aged 18 to 59 for women and 18 to 64 for men who have a qualification at level four or higher in the NQF. Level four in the NQF represents a graduate degree level qualification or equivalent. Figure 4.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 4.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 4.4: Working age adults with qualifications at NQF level four or above, 2001-2013

Source: Annual Population Survey, Office for National Statistics

The percentage of working age adults with qualifications at NQF level 4+ has risen since 2001. In 2013 the rate was 8.9 percentage points higher than the Welsh average and was the second highest local authority rate in Wales.

# 4.3 Secondary school pupil attendance rate

The secondary school pupil attendance rate is the percentage of all half-day sessions for all pupils of compulsory school age in maintained secondary and special schools that are missed due to both authorised and unauthorised absence. Figure 4.5 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 4.6 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Cere digion Monmouthshire Powys Gwynedd Vale of Glamorgan Conwy Carmarthenshire Flintshire Bridgend Cardiff Wrexham Torfaen Neath Port Talbot Isle of Anglesey Pembrokeshire Swansea Rhondda Cynon Taf es average Denbighshire Merthyr Tydfil Caerphilly Newport 70 3 Blaenau Gwent 92.5 93.0 93.5 94.0 91.0 91.5 92.0 94.5 95.0 Percentage of all sessions

Figure 4.5: Secondary school pupil attendance rate, 2014

Source: School attendance returns to Welsh Government

Figure 4.6: Secondary school pupil attendance rate, 1999-2014

Source: School attendance returns to Welsh Government

The attendance rate has risen since 1999. It was 0.5 percentage points above the Welsh average of 93.6 percent in 2014, making it the fifth highest attendance rate.

# 4.4 Average wider points score for 15 year olds

The average wider points score for 15 year olds is an aggregate of all the examination scores achieved in maintained schools (using scores allocated to every qualification approved for use in Wales for pupils aged under 16) divided by the total number of pupils aged 15. Figure 4.7 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 4.8 shows the change over time in the Vale of Glamorgan compared to the change in Wales. The Welsh average includes pupils in independent schools and pupils from a non-English or Welsh-based education system. These pupils are excluded from local authority figures.

Figure 4.8: Average wider points score for 15 year olds, 2004-2013

Source: Pupil level annual school census and school examination performance, Welsh Government

The average wider points score has generally risen since 2004. It was above the Welsh average in 2013.

# 4.5 Core subject indicator attainment at key stage two

Core subject indicator attainment at key stage two is the percentage of year group six pupils who achieve the expected level in English or Welsh first language, mathematics and science. Figure 4.9 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 4.10 shows the change over time in the Vale of Glamorgan compared to the change in Wales. The Welsh average includes pupils in independent schools and pupils from a non-English or Welsh-based education system. These pupils are excluded from local authority figures.

Torfaen Vale of Glamorgan Monmouthshire Cere digion Pembrokeshire Powys Isle of Anglesey Carmarthenshire Swansea Denbighshire Newport Bridgend Flintshire Gwynedd Caerphilly Cardiff Wales average Conwy Rhondda Cynon Taf Wrexham Merthyr Tydfil Neath Port Talbot Blaenau Gwent 80 82 84 86 88 90 92 Percentage of pupils

Source: National teacher assessment data collection, Welsh Government

Figure 4.10: Core subject indicator attainment at key stage two, 1999-2014

Source: National teacher assessment data collection, Welsh Government

The percentage of pupils achieving the core subject indicator at key stage two has risen overall since 1999. It was 4.3 percentage points above the Welsh average of 86.1 per cent in 2014 and had the second highest rate in Wales.

# 5.1 Rate of households for whom homelessness was accepted

The rate of households for whom homelessness was accepted is the number of households accepted as eligible, unintentionally homeless and in priority need per 10,000 households. Figure 5.1 shows the latest data for the Vale of Glamorgan, relative to other Welsh local authorities and the Welsh average. Figure 5.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Figure 5.1: Rate of households for whom homelessness was accepted, 2013-14

Source: Local authority data returns to Welsh Government

Figure 5.2: Rate of households for whom homelessness was accepted, 2001-02 - 2013-14

Source: Local authority data returns to Welsh Government

The rate of homelessness acceptances in the Vale of Glamorgan remained below the average rate for Wales from 2001-02 to 2007-08. However, following an increase the homelessness rate rose above the Wales average in 2008-09 before dropping again in 2009-10 to well below the Wales average. This trend has continued through to 2013-14 when the rate remained below the Wales average.

# 5.2 Additional affordable housing provision rate

The additional affordable housing provision rate is the number of additional housing units delivered during the year that were classed as affordable per 10,000 households. Affordable housing is housing provided to those whose needs are not met by the open market. Figure 5.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 5.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Monmouthshire Torfaen Cardiff Conwy Wrexham Caerphilly Flintshire Bridgend Swansea Newport Neath Port Talbot Powys Pembrokeshire Gwynedd Vale of Glamorgan Rhondda Cynon Taf Wales average Isle of Anglesey Blaenau Gwent Merthyr Tydfil Cere digion Carmarthe nshire Denbighshire 0 5 10 15 25 30 20 35 40 45 Units delivered per 10,000 households

Source: Local authority data returns to Welsh Government

Figure 5.4: Additional affordable housing provision rate, 2007-08 – 2013-14

Source: Local authority data returns to Welsh Government

The rate of additional affordable housing provision in the Vale of Glamorgan decreased in 2013-14 remaining below the Wales average.

# 6.1 Principal (A) roads in poor condition

The principal A roads in poor condition measure is the percentage of the surveyed length of local authority owned A roads that are classed as in poor condition (above the RED threshold and in need of planned maintenance within a year). It is derived from road condition surveys which use road surface scanning equipment. Figure 6.1 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 6.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales. This indicator is no longer updated.

In 2009, the proportion of people living in the Vale of Glamorgan and travelling to work by car, van or minibus was similar to (between 2 percentage points above and 2 points below) the all-Wales average.

# 6.3 People killed and seriously injured on roads

The number of people killed and seriously injured on roads is sourced from road accident and casualty statistics recorded by police authorities. The rate is given per 10,000 population. Figure 6.5 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 6.6 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

#### 7.2 Rate of individuals referred to treatment for alcohol misuse

The rate of individuals referred for alcohol misuse is the number of individuals referred to treatment services for main substance alcohol misuse per 100,000 population in the previous year. Individuals receiving multiple referrals are counted only once. Figure 7.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 7.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

The estimated number of individuals referred for alcohol treatment in the Vale of Glamorgan was lower than the Wales average in 2013-14.

# 8.1 Cleanliness rate of highways and relevant land

The cleanliness rate measure is the percentage of highways and relevant land inspected that exhibited a high or acceptable level of cleanliness. Figure 8.1 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 8.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales. The Welsh average is calculated by considering all the inspections across Wales, although these are disproportionate across local authorities.

Denbighshire Rhondda Cynon Taf Powys Monmouthshire Carmarthenshire Conwv Bridgend Pembrokeshire Neath Port Talbot Newport Caerphilly Swansea Vale of Glamorgan Torfaen Merthyr Tydfil Cardiff Wales average Gwynedd Flintshire Wrexham Cere digion Blaenau Gwent Isle of Anglesey 75 80 85 90 95 100 Percentage of highways and relevant land

Figure 8.2: Cleanliness rate of highways and relevant land, 2005-06 – 2013-14

Source: Data Unit Wales

The cleanliness rate of highways and relevant land in The Vale of Glamorgan remained fairly close to the Welsh average until 2010-11, when it dropped markedly. The rate increased consistently in the years that followed, reaching a level just below the Welsh average in 2013-14.

#### 8.2 Ecological footprint

The ecological footprint measures our impact on the Earth. It shows us how much productive land and water that we require to support our current levels of consumption and waste production, measured in global hectares per person. Data show that the ecological footprint for Wales is more than double the resources which are currently available across the world (which is just over two global hectares per person). Figure 8.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 8.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales. This indicator is no longer updated.

The ecological footprint in The Vale of Glamorgan was one of the highest amongst Welsh local authorities in 2006.

# 9.1 Welsh speakers

The Welsh speakers measure is the percentage of the population aged three and over who can speak Welsh. Figure 9.1 shows the 2011 Census data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 9.2 shows the change over time in the Vale of Glamorgan compared to the change in Wales using Annual Population Survey data. Information on the different sources is available in the key quality information section.

Figure 9.1: Welsh speakers, 2011

Source: 2011 Census

Figure 9.2: Welsh speakers, 2001-2013

Source: Annual Population Survey

According to the 2011 Census the percentage of people age three and over who spoke Welsh in the Vale of Glamorgan was 10.8 per cent, and was one of the lowest rates amongst Welsh local authorities.

# 9.2 Key stage two pupils receiving teacher assessment in Welsh

The percentage of key stage two pupils receiving teacher assessment in Welsh is the percentage of all pupils assessed at the end of year group six who studied Welsh as a first language. Figure 9.3 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 9.4 shows the change over time in the Vale of Glamorgan compared to the change in Wales. The Welsh average includes data for pupils in independent schools and pupils from a non-English or Welsh-based education system. These pupils are excluded from local authority figures.

Figure 9.4: Key stage two pupils receiving teacher assessment in Welsh, 1999-2014

Source: National teacher assessment data collection, Welsh Government

The percentage of pupils assessed in Welsh first language at key stage two has increased by 2.7 percentage points since 2013 and by 4.2 percentage points since 1999.

# 9.3 Key stage three pupils receiving teacher assessment in Welsh

The percentage of key stage three pupils receiving teacher assessment in Welsh is the percentage of all pupils assessed at the end of year group nine who studied Welsh as a first language. Figure 9.5 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 9.6 shows the change over time in the Vale of Glamorgan compared to the change in Wales. The Welsh average includes data for pupils in independent schools and pupils from a non-English or Welsh-based education system. These pupils are excluded from local authority figures.

Source: National teacher assessment data collection, Welsh Government

The percentage of pupils assessed in Welsh first language at key stage three has decreased by 0.3 percentage points since 2013 but has increased by 8.9 percentage points since 1999.

#### 9.4 Visits to public libraries

The visits to public libraries measure is the total number of physical and virtual (i.e. on-line) visits to public libraries including mobile libraries per 1,000 population. Figure 9.7 shows the latest data for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 9.8 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Cardiff Monmouthshire Vale of Glamorgan Neath Port Talbot Denbighshire Powvs Carmarthe nshire Rhondda Cynon Taf Pembrokeshire Newport Blaenau Gwent Flintshire Swansea Gwynedd Conwy Wrexham Wales average Caerphilly Ceredigion Isle of Anglesey Merthyr Tydfil Torfaen Bridgend 5,000 0 2,000 3,000 4,000 6,000 7,000 1,000 8,000 9,000 10,000 Visits per 1,000 population

Figure 9.8: Visits to public libraries, 2007/08 – 2012/13

Source: Local authority data returns to Local Government Data Unit; Mid-Year Population Estimates, Office for National Statistics

The number of visits to public libraries in the Vale of Glamorgan in 2012/13 was around 7,000 per thousand, which was higher than the Welsh average and was the third highest local authority rate.

#### 9.5 Regular participation in sport and active recreation

The regular participation in sport and active recreation measure is the percentage of the adult population (aged 15 and over) that reported participation at least once a week on average in the previous four week period. This measure has been superseded by a *hooked on sport* measure, which provides the average number of occasions of participation in sport per week by local authority area. This data can be accessed from the link in Section 10.0. Figure 9.9 shows regular participation data for the period March 2008 to February 2009 for the Vale of Glamorgan, relative to the other Welsh local authorities and the Welsh average. Figure 9.10 shows the change over time in the Vale of Glamorgan compared to the change in Wales.

Cardiff Powys Denbighshire Flintshire Bridgend Neath Port Talbot Conwy Wrexham Cere digion Caerphilly Newport Gwynedd Swansea Vale of Glamorgan Monmouthshire Carmarthenshire Isle of Anglesey Wales average Pembrokeshire Blaenau Gwent Merthyr Tydfil Torfaen Rhondda Cynon Taf 20 Ö 10 30 40 50 60 70 Percentage of adults participating

Figure 9.9: Regular participation in sport and active recreation, period March 2008 - February 2009

Source: Active Adults Survey, Sports Council for Wales

Figure 9.10: Regular participation in sport and active recreation, 1998/99 – 2008/09

Source: Adult's Sport and Physical Activity Participation Survey (1998/99-2004/05)
Active Adults Survey (2008/09), Sports Council for Wales

The percentage of adults who regularly participated in sport and active recreation in the Vale of Glamorgan in 2008/09 was 48 per cent, around the same as 2004/05. Since 1998/99 the figures have fluctuated close to the Wales average. The sampling method of the Active Adults Survey changed from a quota sample to a random probability sample in 2008/09, so care should be taken when making comparisons with previous years.

# 10.0 Key quality information

This document is a compendium of existing published statistics and is updated in-line with updates to the source statistics. Almost all of the statistics included are official statistics published by the Welsh Government, the National Health Service, or other central government departments. However, as the statistics are not all classified as National Statistics, this document is not itself a National Statistic.

Key quality information and more detail behind each of the datasets provided in this publication can be obtained via the following links.

Indicator		Link to Source and Quality Information
2.1	Employment rate	http://wales.gov.uk/statistics-and-research/?topic=Business+and+economy⟨=en
2.2	Gross value added per head	http://wales.gov.uk/statistics-and-research/?topic=Business+and+economy⟨=en
2.3	Gross disposable household income per head	http://wales.gov.uk/statistics-and-research/ regional-gross-disposable-household-income/ ?lang=en
2.4	Average gross weekly full- time earnings	http://wales.gov.uk/statistics-and-research/?topic=Business+and+economy⟨=en
2.5	Children living in workless households rate	http://wales.gov.uk/statistics-and-research/labour- market-statistics-households/?lang=en
2.6	General economic assessment	http://wales.gov.uk/statistics-and-research/ regional-economic-labour-market-profiles/?lang=en
3.1	Male life expectancy	http://www.ons.gov.uk/ons/rel/lifetables/national -life-tables/2011-2013/stb-uk-2011-2013.html
3.2	Female life expectancy	http://www.ons.gov.uk/ons/rel/lifetables/national -life-tables/2011-2013/stb-uk-2011-2013.html
3.3	Adult obesity rate	http://wales.gov.uk/statistics-and-research/welsh-health-survey/?lang=en
3.4	Adult smoking rate	http://wales.gov.uk/statistics-and-research/welsh-health-survey/?lang=en
3.5	Under 18 conception rate	http://wales.gov.uk/statistics-and-research/ teenage-conceptions/?lang=en

Indicator		Link to Source and Quality Information	
3.8	Looked after children with three or more placements in year	http://www.dataunitwales.gov.uk/ local-authority-performance See Public Accountability Measures Guidance at link	
3.9	Low birth weight babies	http://wales.gov.uk/statistics-and-research/ births-infant-mortality/?lang=en	
		http://www.ons.gov.uk/ons/rel/vsob1/characterist ics-of-birth-1england-and-wales/2012/index.html	
3.10	Uptake rate for primary MMR vaccine at age two	http://www.wales.nhs.uk/sites3/page.cfm? orgid=457&pid=27778	
3.11	Average dmft score for five year old children	http://www.cardiff.ac.uk/dentl/research/themes/appliedclinicalresearch/epidemiology/oralhealth/index.html	
4.1	Working age adults with no qualifications	http://wales.gov.uk/statistics-and-research/levels-highest-qualification-held-working-ageadults/?lang=en	
4.2	Working age adults with qualifications at NQF level four or above	http://wales.gov.uk/statistics-and-research/ levels-highest-qualification-held-working-age- adults/?lang=en	
4.3	Secondary school pupil attendance rate	http://wales.gov.uk/statistics-and-research/ absenteeism-secondary-schools/?lang=en	
4.4	Average wider points score for 15 year olds	http://wales.gov.uk/statistics-and-research/ examination-results/?lang=en	
4.5	Core subject indicator attainment at key stage two	http://wales.gov.uk/statistics-and-research/ end-foundation-phase-outcomes-national-curriculum- teacher-assessment-core-subjects-key-stages-2-3/ ?lang=en	
5.1	Rate of households for whom homelessness was accepted	http://wales.gov.uk/statistics-and-research/ homelessness/?lang=en	
		http://wales.gov.uk/statistics-and-research/ household-estimates/?lang=en	
5.2	Additional affordable housing provision rate	http://wales.gov.uk/statistics-and-research/affordable-housing-provision/?lang=en	
		http://wales.gov.uk/statistics-and- research/household-estimates/?lang=en	
6.1	Principal (A) roads in poor condition	http://wales.gov.uk/statistics-and-research/road-lengths-conditions/?lang=en	
6.2	Persons travelling to work by car, van or minibus	http://www.ons.gov.uk/ons/rel/lmac/commuting-to-work/2011/index.html	
6.3	People killed and seriously injured on roads	http://wales.gov.uk/statistics-and-research/road-safety/?lang=en	
		http://wales.gov.uk/statistics-and-research/welsh-transport-statistics/?lang=en	

Indicator		Link to Source and Quality Information	
7.1	Total recorded crime rate	http://www.ons.gov.uk/ons/rel/crime-stats/ crime-statistics/period-ending-march-2014/ stb-crime-stats.html	
7.2	Rate of individuals referred to treatment for alcohol misuse <i>See table note a</i>	http://wales.gov.uk/statistics-and-research/substance-misuse/?lang=en	
8.1	Cleanliness rate of highways and relevant land	http://www.dataunitwales.gov.uk/ local-authority-performance See Public Accountability Measures Guidance at link	
8.2	Ecological footprint	https://statswales.wales.gov.uk/Catalogue/ Environment-and-Countryside/State-of-the- Environment/Addressing-Climate-Change	
9.1	Welsh speakers See table note b	https://statswales.wales.gov.uk/Catalogue/ Welsh-Language	
9.2	Key stage two pupils receiving teacher assessment in Welsh	http://wales.gov.uk/statistics-and-research/ national-curriculum-teacher-assessments-non-core- subjects/?lang=en	
9.3	Key stage three pupils receiving teacher assessment in Welsh	http://wales.gov.uk/statistics-and-research/ national-curriculum-teacher-assessments-non-core- subjects/?lang=en	
9.4	Visits to public libraries See table note c	http://wales.gov.uk/statistics-and-research/national-strategic-indicators-data-collection/?lang=en	
9.5	Regular participation in sport and active recreation	http://www.sportwales.org.uk/researchpolicy/surveys-and-statistics/active-adults-survey.aspx	
n/a	Population data used as a denominator for many of the indicators	http://wales.gov.uk/statistics-and-research/mid-year-estimates-population/?lang=en	

- (a) In Abertawe Bro-Morgannwg University area (Swansea, Neath Port Talbot and Bridgend), the number of individuals referred to treatment services is lower as they report on a client not referral based system; work is ongoing to ensure that it is consistently recorded across Wales.
- (b) There are currently two main sources for Welsh language data the decennial Census and the Annual Population Survey providing less detail but more frequent annual updates. The APS estimates of Welsh language ability are historically considerably higher than those produced by the Census. Potential reasons for this are explored in a research paper by ONS at <a href="http://www.ons.gov.uk/ons/guide-method/census/census-2001/data-and-products/data-and-product-catalogue/reports/report-on-the-welsh-language/differences-in-estimates-of-welsh-language-skills.pdf">http://www.ons.gov.uk/ons/guide-method/census/census-2001/data-and-products/data-and-product-catalogue/reports/report-on-the-welsh-language/differences-in-estimates-of-welsh-language-skills.pdf</a>.
- (c) There is more than one source of data for visits to public libraries. This report uses the National Strategic Indicator data as its source. Previous versions of this report included 2009-10 figures from the CIPFA source. This data has now been amended so that all data is sourced from the National Strategic Indicators. The 2009-10 and 2010-11 data is based on a sample week aggregated to 52 weeks. The 2011-12 data is based on a sample week aggregated to 50 weeks.
