Food allergies/avoidance <sup>4</sup>	•	•	•
General health (all ages)		•	•
Oral health (age 16+ years)		•	•
Drinking (age 8+ years; those aged 8-17 years given a self-completion booklet)	•	•	•
Smoking (age 8+ years; those aged 8-17 years given a self-completion booklet)	•	•	•
Education (age 16+ years)	•	•	•
Use of dietary supplements (including whether a participant is a supplement taker for the previous 12 months) (all ages)	•	•	•
Sun exposure - (where (latitude) and when holidays were taken)		•	•
<b>Dietary data (1.5 years and over)</b>			
Daily intake of all individual foods and nutrients from each of the individual foods by day and eating occasion		•	•
Where and with whom data (including whether at table/tv on) for each eating occasion		•	•
Daily intake of food groups		•	•
Disaggregated daily intakes for meat, fish, fruit and vegetables		•	•

<b>Topic area and age group included in reported/archived data</b>	<b>Included in current report</b>	<b>Included in archived data</b>	<b>Intend to report/archive in future</b>
Per cent contribution of food groups to energy and nutrients	•	•	•
Daily intake of energy and nutrients		•	•
Mean intake of food groups	•	•	•
Disaggregated mean intakes for meat, fish, fruit and vegetables	•	•	•
Mean intake of energy and macronutrients	•	•	•
Mean intake of micronutrients from food sources only	•	•	•
Mean intake of micronutrients from all sources including supplements	•	•	•
Mean micronutrient intakes as per cent RNI from food sources only	•	•	•
Mean micronutrient intakes as per cent RNI from all sources including supplements	•	•	•
Per cent below LRNI for micronutrients from food sources only	•	•	•
Per cent below LRNI for micronutrients from all sources including supplements	•	•	•
Use of dietary supplements (including whether a participant is a supplement taker during the diary period)	•	•	•
<b>Energy expenditure data (doubly labelled water) (sub-sample of participants age 4+ years)</b>	•	•	•

<sup>1</sup> Ages 4-10 years only in Year 1.

<sup>2</sup> Included from Year 2.

<sup>3</sup> Questions included in Year 1 only.

<sup>4</sup> The published report only includes information about vegetarian/vegan diets.

<sup>5</sup> Year 1-4 report covers adults (aged 19 years and over) only.

<sup>6</sup> In the report, demispan data is combined with height

<sup>7</sup> Urinary analyte results have only been provided in the Year 1-4 report and archive dataset for samples that are deemed to be complete.

<sup>8</sup> Descriptive statistics for this analyte are presented in Appendix S of the Year 1-4 report.

<sup>9</sup> Whilst % PABA recovery results have not been included in the archive dataset, a variable indicating whether a sample is complete, over or incomplete by the standard criteria or the child claim only criteria has been provided in the archive dataset.

<sup>10</sup> Results of a salt intake survey based on 24-hour urinary sodium (carried out in 2011) has been published on DH's website. (Assessment of dietary sodium in adults aged 19-64 years in England): <http://transparency.dh.gov.uk/2012/06/21/sodium-levels-among-adults/> (accessed 10/03/14)

<sup>11</sup> Results have been delayed due to problems with the analysis and will be published as soon as they are available.

<sup>12</sup> In addition to total serum folate data, data for the individual forms of serum folate will be included in the archive dataset.

---

<sup>13</sup> 25-hydroxyvitamin D was measured in plasma for Years 1-3 and for Year 4 samples taken during the first six issued fieldwork months (404-409). For samples taken during the last six issued fieldwork months of Year 4 (410-412), 25-hydroxyvitamin D was measured in serum. Concentrations of 25-hydroxyvitamin D have been shown to be the same in both plasma and serum.

<sup>14</sup> This analyte was only measured for participants aged seven years and over.

<sup>15</sup> Descriptive statistics for this analyte are presented in Appendix Q of the Year 1-4 report.

<sup>16</sup> This analyte was only measured for participants aged four years and over who provided a fasted blood sample.

<sup>17</sup> This analyte was funded separately. Results are not included in this report but will be archived.
